## Hangzhou Great Star Industrial Co., Ltd.

2023/02/10

To: Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD

FCC ID: 2AMI2-33658
To Whom It May Concern:
This letter is to ascertain that, Product: Swiss Tech 40000mAh Ultimate Plus Power Bank M/N: 33658 has been the units used for conducting FCC compliance testing, and it meets 680106 D01 RF Exposure Wireless Charging App v03 Clause 5(b) all 6 conditions.

| 1 | Power transfer frequency is less that 1 MHz |
| :--- | :--- |
| Reply: | Yes, Power transfer frequency is less that 1 MHz ; Ans : The maximum <br> operating frequency of EUT is 0.11~0.205MHz. |
| 2 | Output power from each primary coil is less than or equal to 15 watts. <br> Reply: <br> Yes, Output power from each primary coil is less than or equal to 15 watts. <br> The max output power is 10W. <br> Reply: <br> The transfer system includes only single primary and secondary coils. This <br> includes charging systems that may have multiple primary coils and clients <br> that are able to detect and allow coupling only between individual pairs of <br> coils. <br> 4 <br> Yes, EUT has three primary coils, but each coil can only correspond to one <br> client |
| Client device is placed directly in contact with the transmitter. <br> Yes, The client device needs to be in contact with the transmitter base, and <br> the contact distance is less than 10mm. |  |
| 5 | Mobile exposure conditions only (portable exposure conditions are not <br> covered by this exclusion). |
| Reply: | Yes, EUT is mobile device |
| 6 | The aggregate H-field strengths at 15 cm surrounding the device and 20 cm <br> above the top surface from all simultaneous transmitting coils are <br> demonstrated to be less than 50\% of the MPE limit. |
| Reply: | Yes, RF Exposure Evaluation report test result meets this Limt.Please refer <br> to the RF exposure Evaluation report. |

If you have any question or concerns, pls. contact us.
Sincerely,
Hon jiamei
