

Tailored air purification

The new connected air purifier adapts to changes in your environment.

Product Benefits & Features

Responds to your environment

The unique PureSense system continuously measures indoor and outdoor air quality levels and automatically adjusts the air purification rate so that you come home to a healthy indoor environment.

Tailored filtration to meet your needs

Tailor your Pure A9 to your personal needs with our 360 filters and 5 stages purification. Features HEPA filtration, capable of filtering up to 99.5% of airborne pollutants as small as 0.3 microns.

Continuous monitoring

Whether you are home or on the go, monitor and optimize your home air quality from the app or sit back and let PURE A9 do it for you. Check the job done on a given timeframe, get smart summaries or simply adjust your preferences. The PURE A9 app is the perfect air quality assistant.

The AirSurround system is designed to reach all corners of the room.

AirSurround system creates a powerful yet smooth spiral movement of the indoor air that efficiently circulates and cleans the air up to 4 times faster than previous generations. Pure A9 is recommended for room sizes up to 129m² (based on Swedish regulations of air changes per hour) and 52m² (US AHAM)

Quietly smart

With a minimum noise level of just 17 dB(A)* your Pure A9 runs so silent you will hardly notice it. Even at maximum speed the noise level is just 49 dB(A)*, more silent than your dinner conversation at home.

*measured 1m away in front of the product

Product Specification

FanSpeed	9
CADRSmoke	620
Nordic_AirCleaner_MaxAreaToServe_Boverket	129 kvm
MaxAreaServed	52
