**NOTE 1:** For details on the supported memory configurations on the HP Z6 G4 Workstation, please refer to the System Technical Specifications - System Board section of this document.

Each processor supports up to 6 channels of DDR4 memory. To realize full performance at least 1 DIMM must be inserted into each channel.

With single-processor configurations, 6 DIMM slots are available. 6 additional DIMM slots are available with the 2nd CPU & Memory Module.

The CPUs determine the speed at which the memory is clocked. If a 2400MT/s capable CPU is used in the system, the maximum speed the memory will run at is 2400MT/s, regardless of the specified speed of the memory.

#### Supported Components

**NVDIMM Mem** 

The Z6 G4 is designed to work ONLY with DDR4 memory. The system will not work with DDR3 memory.

**NOTE 2:** Z6 G4 configurations that include a 2<sup>nd</sup> CPU require the HP Z6 Memory Cooling Solution, which is available both CTO (2JA81AV) and AMO (2HW44AA). Z6 G4 configurations that include greater than 32GB total system memory require the HP Z6 Memory Cooling Solution, which is available both CTO (2JA81AV) and AMO (2HW44AA).

**NOTE:** Factory-configured CTO (xxxxxAV) and aftermarket AMO (xxxxxAA, xxxxAT) HP memory part numbers designated as "2666" will be transitioned to use "2933" speed memory components. This does not affect HP part number availability nor does it affect system performance or operation. All hardware configurations currently supporting HP memory part numbers designated as "2666" have been tested to work with "2933" memory and are fully-supported by HP under standard support terms.

- a. Available as factory configured in Memory Mode or Storage Mode.
- b. Systems configured with DCPMM memory will operate the memory subsystem at 2666 MT/s.
- c. Operating System Support:
  - i. Windows 10 Pro 64 for Workstations v1903 or later with all updates applied.
  - ii. Linux OS support may be found in the Linux Hardware Support Matrix.
- d. Detailed setup, security and support information may be found in the Intel® Optane™ DC Persistent Memory: Configuration and Setup on HP Z6 G4 and Z8 G4 Workstation\_white paper.
- e. DCPMM solutions require additional DRAM memory to be included in the solution:
  - i. Systems configured with DCPMM in Memory Mode will include DRAM memory to be used as cache. The amount of included DRAM memory is based on an 8:1 DCPMM to DRAM capacity ratio.
  - ii. Systems configured with DCPMM in Storage Mode will require DRAM System Memory to be ordered separately.
  - iii. DCPMM Memory will report approximately 2% less than advertised capacity .
- f. Total Memory (DCPMM + DRAM) per processor must be <= 1TB or 2TB per dual processor system.
  - i. When configured in memory mode, additional DRAM does not count against maximum processor memory.
- g. Maximum number of DCPMM modules in a Z6G4 is 4 per processor.
- h. Customer is responsible for additional required DRAM when adding DCPMM modules in Memory Mode.
- i. HP Z6G4 configured with some AMD Graphics are limited to 1TB of total DCPMM and DRAM memory. See AMD Graphics specifications for details.

SMBIOS	System Management BIOS 2.8, for system management information.
Boot Control	Disables the ability to boot from removable media on supported devices.
Memory Change Alert	Alerts management console if memory is removed or changed.

Thermal Alert	Monitors the temperature state within the chassis. Three modes:
	• NORMAL – normal temperature ranges.
	• ALERTED - excessive temperatures are detected. Raises a flag so action can be taken to avoid
	shutdown or provide for a smoother system shutdown.
	• SHUTDOWN - excessive temperatures are encountered. Automatically shuts down the computer without warning before hardware component damage occurs.
Remote ROM Flash	Provides secure, fail-safe ROM image management from a central network console.
ACPI (Advanced	Allows the system to enter and resume from low power modes (sleep states).
Configuration and Power	Enables an operating system to control system power consumption based on the dynamic workload.
