Step 1 — iPhone 5s Dock Teardown

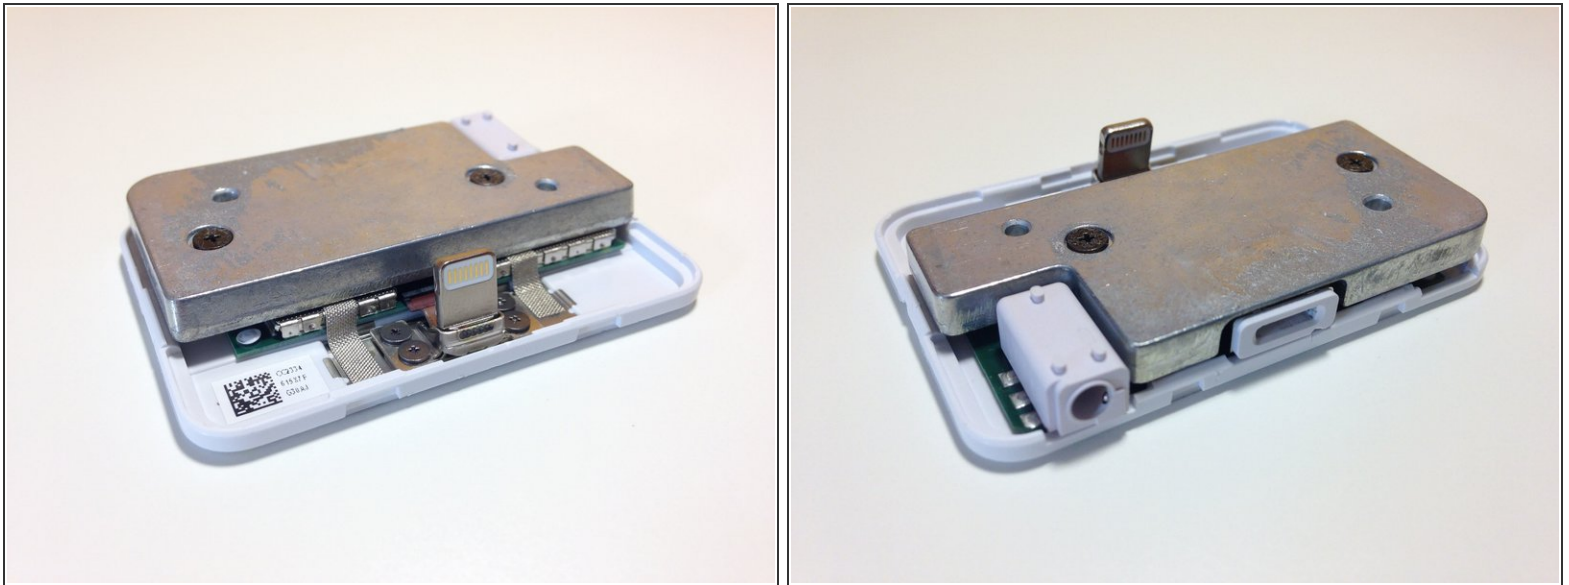

- Today this teardown provides you with the iPhone 5s dock - Kind of looks like the other iPhone docks, but with a Lightning connector instead.
- ⓘ This teardown is edited in 2016 (that means lots of 2016 stuff references).
 - This looks like an indented iPhone 6 dock.

Step 2

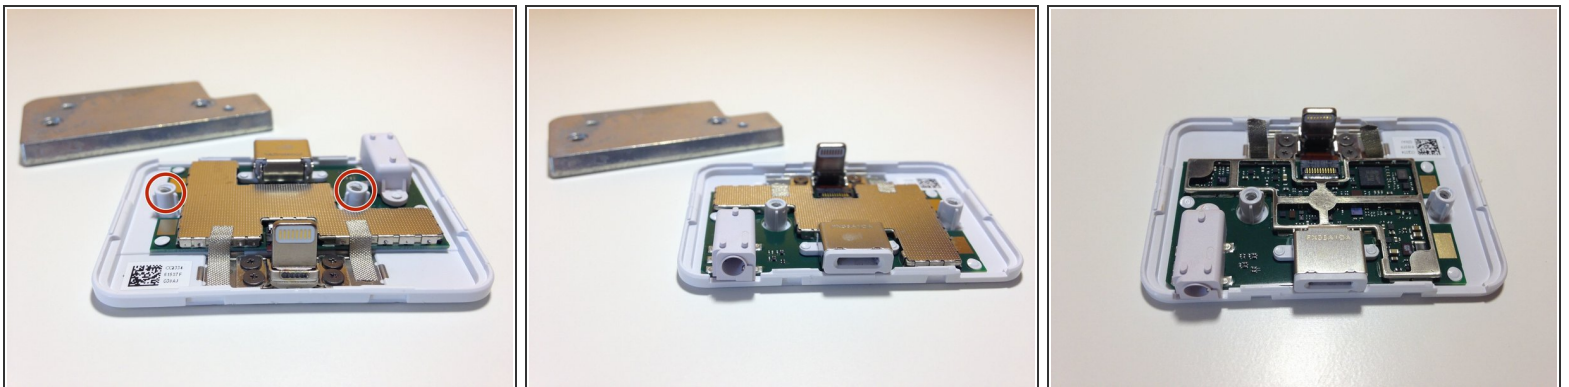

- This iPhone dock is perfectly indented for an iPhone 5s.
- Some (weaker) adhesive covers the bottom and it's a simple task to take it off.

Step 3

- Use a spudger to detach the cover from the base.

Step 4

- Remove the two screws that secure the weight to the plastic housing.
