General safety guidelines

Always observe the following precautions to reduce the risk of injury and property damage.

Service

Do not attempt to service a product yourself unless instructed to do so by the IBM® Support Center. Use only an IBM authorized service provider who is approved to repair your particular product.

Note: Some parts can be upgraded or replaced by the customer. These parts are referred to as Customer Replaceable Units, or CRUs. IBM expressly identifies CRUs as such, and provides documentation with instructions when it is appropriate for customers to replace those parts. You must closely follow all instructions when performing such replacements. Always make sure that the power is turned off and that the product is unplugged from any power source before you attempt the replacement. If you have any questions or concerns, contact the IBM Support Center.

Power cords and power adapters

Use only the power cords and power adapters supplied by the product manufacturer.

Never wrap a power cord around the power adapter or other object. Doing so can stress the cord in ways that can cause the cord to fray, crack or crimp. This can present a safety hazard.

Always route power cords so that they will not be walked on, tripped over, or pinched by objects.

Protect the cord and power adapters from liquids. For instance, do not leave your cord or power adapter near sinks, tubs, toilets, or on floors that are cleaned with liquid cleansers. Liquids can cause a short circuit, particularly if the cord or power adapter has been stressed by misuse. Liquids can also cause gradual corrosion of the power cord terminals and/or the connector terminals on the adapter which can eventually result in overheating.

Always connect power cords and signal cables in the correct order and ensure that all power cord connectors are securely and completely plugged into receptacles.

Do not use any power adapter that shows corrosion at the ac input pins and/or shows signs of overheating (such as deformed plastic) at the ac input or anywhere on the power adapter.

Do not use any power cords where the electrical contacts on either end show signs of corrosion or overheating or where the power cord appears to have been damaged in any way.

Extension cords and related devices

Ensure that extension cords, surge protectors, uninterruptible power supplies, and power strips that you use are rated to handle the electrical requirements of the product. Never overload these devices. If power strips are used, the load should not exceed the power strip input rating. Consult an electrician for more information if you have questions about power loads, power requirements, and input ratings.

Plugs and outlets

If a receptacle (power outlet) that you intend to use with your computer equipment appears to be damaged or corroded, do not use the outlet until it is replaced by a qualified electrician.

Do not bend or modify the plug. If the plug is damaged, contact the manufacturer to obtain a replacement.

Some products are equipped with a three-pronged plug. This plug fits only into a grounded electrical outlet. This is a safety feature. Do not defeat this safety feature by trying to insert it into a non-grounded outlet. If you cannot insert the plug into the outlet, contact an electrician for an approved outlet adapter or to replace the outlet with one that enables this safety feature. Never overload an electrical outlet. The overall system load should not exceed 80 percent of the branch circuit rating. Consult an electrician for more information if you have questions about power loads and branch circuit ratings.

Be sure that the power outlet you are using is properly wired, easily accessible, and located close to the equipment. Do not fully extend power cords in a way that will stress the cords.

Connect and disconnect the equipment from the electrical outlet carefully

Batteries

All IBM personal computers contain a non-rechargeable coin cell battery to provide power to the system clock. In addition many mobile products such as Thinkpad notebook PCs utilize a rechargeable battery pack to provide system power when in portable mode. Batteries supplied by IBM for use with your product have been tested for compatibility and should only be replaced with IBM approved parts.

Never attempt to open or service any battery. Do not crush, puncture, or incinerate batteries or short circuit the metal contacts. Do not expose the battery to water or other liquids. Only recharge the battery pack strictly according to instructions included in the product documentation.

Battery abuse or mishandling can cause the battery to overheat, which can cause gasses or flame to “vent” from the battery pack or coin cell. If your battery is damaged, or if you notice any discharge from your battery or the buildup of foreign materials on the battery leads, stop using the battery and obtain a replacement from the battery manufacturer.

Batteries can degrade when they are left unused for long periods of time. For some rechargeable batteries (particularly Lithium Ion batteries), leaving a battery unused in a discharged state could increase the risk of a battery short circuit, which could shorten the life of the battery and can also pose a safety hazard. Do not let rechargeable Lithium-Ion batteries completely discharge or store these batteries in a discharged state.

Heat and product ventilation

Computers generate heat when turned on and when batteries are charging. Notebook PCs can generate a significant amount of heat due to their compact size. Always follow these basic precautions:

- Do not leave the base of your computer in contact with your lap or any part of your body for an extended period when the computer is functioning or when the battery is charging. Your computer produces some heat during normal operation. Extended contact with the body could cause discomfort or, potentially, a skin burn.
- Do not operate your computer or charge the battery near flammable materials or in explosive environments.
- Ventilation slots, fans and/or heat sinks are provided with the product for safety, comfort, and reliable operation. These features might inadvertently become blocked by placing the product on a bed, sofa, carpet, or other flexible surface. Never block, cover or disable these features.

CD and DVD drive safety

CD and DVD drives spin discs at a high speed. If a CD or DVD is cracked or otherwise physically damaged, it is possible for the disc to break apart or even shatter when the CD drive is in use. To protect against possible injury due to this situation, and to reduce the risk of damage to your machine, do the following:

- Always store CD/DVD discs in their original packaging
- Always store CD/DVD discs out of direct sunlight and away from direct heat sources
- Remove CD/DVD discs from the computer when not in use
- Do not bend or flex CD/DVD discs, or force them into the computer or their packaging
- Check CD/DVD discs for cracks before each use. Do not use cracked or damaged discs

Laser compliance statement

An optical storage drive (device), such as a CD-ROM, CD-RW, DVD-ROM drive and SuperDisk, which can be installed in the IBM ThinkPad computer is a laser product. The drive's classification label (shown below) is on the surface of the drive.

CLASS 1 LASER PRODUCT
LASER KLASSE 1
LUOKAN 1 LASERLAITE
APPAREIL A LASER DE CLASSE 1
KLASS 1 LASER APPARAT

The drive is certified by the manufacturer to comply with the requirements of the Department of Health and Human Services 21 Code of Federal Regulations (DHHS 21 CFR) Subchapter J for Class I laser products at the date of manufacture.

In other countries, the drive is certified to conform to the requirements of IEC825 and EN60825 for Class 1 laser products.

DANGER

Do not open the optical storage drive unit; no user adjustments or serviceable parts are inside.

Use of controls, adjustments, or the performance of procedures other than those specified might result in hazardous radiation exposure.

Class 1 laser products are not considered hazardous. The design of the laser system and the optical storage drive ensures that there is no exposure to laser radiation above a Class 1 level during normal operation, user maintenance, or servicing.

Some drives contain an embedded Class 3A laser diode. Note this warning:

DANGER

Emits visible and invisible laser radiation when open. Avoid direct eye exposure. Do not stare into the beam or view it directly with optical instruments.

Product description

The ThinkPad X4 Dock works only with computers in the ThinkPad X40 Series including Tablet PC models. It can extend the capabilities of your computer by enabling it to use the Ultrabay™ Slim and various optional devices.

After you attach your computer to the ThinkPad X4 Dock, you can use its connectors in place of the computer's.

When the computer is attached to the ThinkPad X4 Dock, never pick up the assembly by taking hold of the computer alone. Always hold the whole assembly.

Attention: To reduce the risk of fire, use only No.26 AWG or larger (thicker) telephone cable.

Attention: AC Adapter: Use the UL Listed Power Supply, rated 16 Vdc 3.5 A or equivalent.

Front view

1 The **power switch** turns the computer on and off.

2 By pressing the **eject request button**, you can request the operating system to undock the computer from the X4 Dock. The **Docked indicator** is green when the computer is attached to the X4 Dock. This indicator turns off when the eject request is issued and the computer can be detached safely from the X4 Dock.

3 The **eject button** releases the computer from the X4 Dock. The **Eject Ready indicator** is green when the computer is ready to be detached safely from the X4 Dock. This indicator turns off when the computer is detached from the X4 Dock.

Note: To lock the eject button of the X4 Dock, use the security lock key.

4 The **docking connector** is where you attach your ThinkPad computer.

5 The **bay latch** releases the handle so you can replace the Ultrabay Slim device.

6 The **Ultrabay Slim device** is used for installing various devices such as a DVD drive, a CD-RW/DVD combo drive, or a second hard disk drive.

7 Make sure that the **adjuster** is secured in the proper position when attaching your ThinkPad computer to the X4 Dock. The position of the adjuster depends on the computer model and the type of battery installed. Refer to the label attached to the X4 Dock for details.

8 The built-in **stereo speakers** generate stereo sound.

Rear view

1 The **security lock key** is for locking the eject button.

2 The **power jack** is for connecting the ac adapter.

Note: When you attach a USB cable to the connector, make sure that the mark shown in the drawing is to the upper side. Otherwise, the connector might be damaged.

6 The **modem connector** is for connecting the X4 Dock to a telephone line.

Notes:

1. If your ThinkPad computer does not support the modem connector, you cannot use the connector.
2. If you attach your computer to the X4 Dock, use the modem connector on the X4 Dock, not the one on the computer.

7 The **Ethernet connector** is for connecting the X4 Dock to a 10BASE-T/100BASE-TX/1000BASE-T Ethernet LAN. The indicator on the connector is the same as that on the ThinkPad computer.

Notes:

1. If your ThinkPad computer does not have the Ethernet connector, you cannot use the Ethernet connector on the X4 Dock. You cannot use the Token Ring cable for this connector. This connector can be used for the 10BASE-T/100BASE-TX/1000BASE-T Ethernet connection. However, if your ThinkPad computer can only be used with the 10BASE-T/100BASE-TX Ethernet, the connector can only be used for the 10BASE-T/100BASE-TX Ethernet connection and not for the 1000BASE-T Ethernet connection.
2. If you attach your computer to the X4 Dock, use the Ethernet connector on the X4 Dock, not the one on the computer.

8 The **parallel connector** is for connecting a parallel device.

9 The **serial connector** is for connecting a serial device.

10 The **external monitor connector** is for connecting an external monitor.

Using the ThinkPad X4 Dock

Note

Before you attach or detach your computer when it is operating, always make sure that it has finished operations involving devices that are connected to the USB connector, the serial connector, or the parallel connector. Also make sure that any connection to a modem or an Ethernet is stopped.

Note: If you are using the ThinkPad X40 Series computer, before you attach it to the ThinkPad X4 Dock, you need to update the BIOS and the Easy Eject Utility. To download the latest version of the BIOS code and Utility, go to www.pc.ibm.com/support on the World Wide Web.

Attaching the ThinkPad X4 Dock

To attach your computer to the ThinkPad X4 Dock, do the following:

For details about setting up and using the X4 Dock, refer to Access IBM or the Setup Poster that came with this option.

Security feature

The ThinkPad X4 Dock has a security keyhole for a mechanical lock. To secure the X4 Dock to a heavy object, such as a desk, attach a mechanical lock with a cable to the security keyhole.

IBM does not offer a mechanical lock. You will need to purchase one elsewhere. You are responsible for evaluating, selecting, and implementing any locking device and security feature. IBM makes no comments, judgments, or warranties about the function, quality, or performance of any locking device or security features.

Utilizando o ThinkPad X4 Dock

Nota

Antes de conectar ou desconectar o computador quando ele estiver operando, sempre certifique-se de que ele concluiu as operações que envolvam dispositivos que estão conectados ao conector USB, ao conector serial ou ao conector paralelo. Certifique-se também de que qualquer conexão a um modem ou a uma Ethernet esteja parada.

Nota: Se estiver utilizando o computador ThinkPad X40 Series, antes de conectá-lo ao ThinkPad X4 Dock é necessário atualizar o BIOS e o Easy Eject Utility. Para transferir por download a versão mais recente do código do BIOS e do Utilitário, vá para www.pc.ibm.com/support na World Wide Web.

Conectando o ThinkPad X4 Dock

Para conectar seu computador no ThinkPad X4 Dock, faça o seguinte:

1. Desconecte o adaptador de corrente alternada do computador, ou o adaptador pode ser danificado. Conecte um adaptador de corrente alternada ao ThinkPad X4 Dock, utilizando o adaptador de corrente alternada fornecido no pacote com o X4 Dock.
2. Certifique-se de que a chave da trava de segurança do X4 Dock esteja no lugar e na posição destravada (vertical).

3. Prenda o ajustador na posição apropriada. A posição do ajustador depende do modelo do computador e do tipo de bateria instalada. Consulte a etiqueta afixada no ThinkPad X4 Dock.

4. Se estiver utilizando o computador ThinkPad X41 Tablet Series, alinhe a lateral esquerda do computador com a guia na lateral esquerda do X4 Dock; certifique-se de que o conector de acoplamento na parte inferior do computador e o do X4 Dock estejam alinhados um com o outro.

Se estiver utilizando o computador ThinkPad X40 Series, conecte o computador, alinhando a parte traseira do computador com o ajustador.

5. Pressione firmemente em ambas as laterais do computador até ouvir um clique. O computador está agora conectado ao X4 Dock.

Nota: Gire a chave da trava de segurança no sentido horário para travá-la. Sempre mantenha a chave da trava de segurança em local seguro. Não a perca; sem ela, você não conseguirá desconectar o computador do X4 Dock.

Desconectando o ThinkPad X4 Dock

Para desconectar seu computador do ThinkPad X4 Dock, faça o seguinte:

1. Certifique-se de que a bateria esteja com carga suficiente para operação normal.

2. Certifique-se de que a chave da trava de segurança do X4 Dock esteja no lugar e na posição destravada (vertical).

3. Feche a tela do computador.
4. Pressione o botão de pedido de ejeção. O indicador Acoplado começará a piscar e, em seguida, apagará.

5. O indicador Pronto para Ejeção acenderá; pressione o botão de ejeção até que o computador se mova para cima.

Descripción del producto

ThinkPad X4 Dock sólo funciona en sistemas ThinkPad Serie X40 que incluyen modelos Tablet PC. Puede ampliar las posibilidades de su equipo habilitándolo para utilizar el dispositivo plano Ultrabay™ así como otros dispositivos opcionales.

Después de conectar el equipo a ThinkPad X4 Dock, puede utilizar los conectores de éste en lugar de los conectores del equipo.

Cuando el equipo se conecta a ThinkPad X4 Dock, nunca levante el conjunto sosteniendo únicamente el equipo. Sostenga siempre todo el conjunto.

Atención: para reducir el peligro de incendio, utilice sólo el cable telefónico número 26 AWG o superior (más grueso).

Atención: Adaptador CA: utilice una fuente de alimentación listada en UL, de 16 CCV 3,5 A o equivalente.

Vista anterior

1 El **interruptor de alimentación** enciende y apaga el equipo.

2 Si pulsa el botón **Petición de expulsión**, puede solicitar que el sistema operativo expulse el equipo de X4 Dock. El **indicador de acoplamiento** se enciende de color verde cuando el equipo se conecta a X4 Dock. Este indicador se apaga cuando se emite la petición de expulsión y el equipo se puede extraer de forma segura de X4 Dock.

3 El botón de **expulsión** libera el equipo de X4 Dock. El **indicador de expulsión preparada** se enciende de color verde cuando el equipo está listo para ser desconectado de forma segura de X4 Dock. Este indicador se apaga cuando el equipo se separa de X4 Dock.

Nota: para bloquear el botón de expulsión de X4 Dock, utilice la clave de bloqueo de seguridad.

4 El **conector de acoplamiento** se encuentra donde el equipo se conecta a ThinkPad.

5 El **pestillo de la bahía** libera la agarradera para que pueda sustituir el dispositivo plano Ultrabay.

6 El **dispositivo plano Ultrabay** se utiliza para instalar varios dispositivos como unidades de DVD, una unidad combo CD-RW/DVD, o una segunda unidad de disco duro.

7 Asegúrese de que el **ajustador** se haya fijado en la posición correcta al conectar el equipo ThinkPad a X4 Dock. La posición del ajustador depende del modelo de equipo y del tipo de batería que esté instalada. Consulte la etiqueta adjunta al X4 Dock para obtener más detalles.

Descrizione del prodotto

ThinkPad X4 Dock è supportato solo su computer ThinkPad X40 Series inclusi i modelli PC tavoletta. È possibile estendere le funzioni del computer abilitandolo all'utilizzo di Ultrabay™ Slim e di altre periferiche facoltative.

Una volta collegato il computer al ThinkPad X4 Dock, è possibile utilizzare i relativi connettori al posto di quelli del computer.

Quando il computer viene collegato al ThinkPad X4 Dock, non afferrare mai l'insieme mantenendo solo il computer. Mantenere sempre l'intero assieme.

Attenzione: Per ridurre il rischio di incendio, utilizzare solo No.26 AWG o un cavo telefonico superiore (più doppio).

Attenzione: Adattatore CA: utilizzare un alimentatore, UL Listed Power Supply, classificato 16 V CC 3.5 A o equivalente.

Vista anteriore

1 L'**interruttore di alimentazione** accende e spegne il computer.

2 Premendo il **pulsante di espulsione**, è possibile richiedere al sistema operativo di sbloccare il computer da X4 Dock. L'**indicatore collegato** è verde quando il computer è collegato a X4 Dock. Questo indicatore si spegne quando la richiesta di espulsione viene emessa ed il computer può essere scollegato correttamente da X4 Dock.

3 Il **pulsante di espulsione** rilascia il computer da X4 Dock. L'**indicatore Espelli** è verde quando il computer è pronto per essere scollegato correttamente da X4 Dock. Questo indicatore si spegne quando il computer viene scollegato da X4 Dock.

Nota: Per bloccare il pulsante di espulsione di X4 Dock, utilizzare la chiave del blocco di sicurezza.

4 Il **connettore docking** è il punto in cui si collega il computer ThinkPad.

5 Il **gancio del vano** rilascia la maniglia in modo tale da poter sostituire la periferica Ultrabay Slim.

6 La **periferica Ultrabay Slim** consente di installare varie periferiche, quali unità DVD, CD-RW/DVD combo o una seconda unità disco fisso.

7 Verificare che il **regolatore** viene fissato correttamente quando si collega il computer ThinkPad a X4 Dock. La posizione del regolatore dipende dal modello del computer e dal tipo di batteria installata. Consultare l'etichetta allegata a X4 Dock per dettagli.

Používanie základne ThinkPad X4 Dock

Poznámka

Predtým ako zasuniete alebo vysuniete svoj zapnutý počítač sa presvedčte, či ukončil operácie týkajúce sa zariadení, ktoré sú pripojené k USB konektoru, sériovému konektoru alebo paralelnému konektoru. Taktiež sa uistite, či sú zastavené všetky pripojenia k modemu alebo ethernetu.

Poznámka: Ak používate počítač ThinkPad X40 Series, skôr ako ho zasuniete do základne ThinkPad X4 Dock, musíte aktualizovať BIOS a Easy Eject Utility. Najnovšiu verziu kódu BIOS a Easy Eject Utility nájdete na internete, na webovej stránke www.pc.ibm.com/support.

Pripojenie k základni ThinkPad X4 Dock

Ak chcete svoj počítač zasunúť do základne ThinkPad X4 Dock, postupujte takto:

1. Odpojte od počítača adaptér napájania, pretože by ste ho mohli poškodiť. Pripojte adaptér napájania k základni ThinkPad X4 Dock pomocou adaptéra napájania, ktorý sa dodáva spolu so základňou X4 Dock.
2. Uistite sa, že kľúč bezpečnostného zámku základne X4 Dock je na svojom mieste a v odomknutej (vertikálnej) pozícii.

3. Zaisťte nastavovací ovládač v správnej pozícii. Táto poloha nastavovacieho ovládača závisí od modelu počítača a typu nainštalovanej batérie. Pozrite si štítok na základni ThinkPad X4 Dock.

4. Ak používate počítač ThinkPad X41 Tablet Series, zarovnajte ľavú stranu počítača s vodidlom na ľavej strane základne X4 Dock; uistite sa, že pripájací konektor naspodku vášho počítača a konektor na základni X4 Dock sú vzájomne zarovnané.

Ak používate počítač ThinkPad X40 Series, pripojte ho tak, že zarovnáte jeho zadnú časť s nastavovacím ovládačom.

5. Pevne zatlačte na obidve strany vášho počítača, kým nezačujete kliknutie. Počítač je teraz pripojený k základni X4 Dock.

Poznámka: Otočte kľúč bezpečnostného zámku proti smeru hodinových ručičiek, aby ste ho zamkli. Kľúč bezpečnostného zámku majte vždy uložený na bezpečnom mieste. Nestráňte ho; bez neho nebudete schopný počítač vysunúť zo základne X4 Dock.

Odpojenie základne ThinkPad X4 Dock

Ak chcete svoj počítač vysunúť zo základne ThinkPad X4 Dock, postupujte takto:

1. Uistite sa, že batéria je dostatočne nabitá pre normálne fungovanie.

2. Uistite sa, že kľúč bezpečnostného zámku základne X4 Dock je na svojom mieste a v odomknutej (vertikálnej) pozícii.

3. Zatvorte displej počítača.
4. Stlačte tlačidlo požiadavky na vysunutie. Indikátor základne začne blikať, a potom zhasne.

5. Indikátor pripravenosti vysunutia sa zapoj; zatlačte na tlačidlo vysunutia, čím sa počítač posunie smerom nahor.

6. Potiahnutím za obidve strany počítača ho vysuňte zo základne X4 Dock.

Podrobnosti o nastavení a používaní základne X4 Dock nájdete v systéme pomoci Access IBM alebo Setup Poster, ktorý je súčasťou tejto voľby.

Bezpečnosť

Na základni ThinkPad X4 Dock sa nachádza bezpečnostný uzamykací otvor pre mechanický zámok. Ak chcete základňu X4 Dock zabezpečiť, pripevnite ju k pevnému objektu, ako je napríklad stôl, pomocou mechanického zámku s káblom.

IBM nemá vo svojej ponuke mechanické zámky. Aj tak si ale budete musieť nejaký kúpiť. V tomto prípade ste vy sám zodpovedný za zhodnotenie vlastností, výber a implementáciu uzamykacieho zariadenia a bezpečnostných komponentov. Spoločnosť IBM neprináša žiadne posudky ani záruky týkajúce sa funkčnosti, kvality alebo výkonu uzamykacích zariadení alebo bezpečnostných komponentov.

Pri pripájaní mechanického zámku postupujte takto:

Appendix A. Service and Support

The following information describes the technical support that is available for your product, during the warranty period or throughout the life of the product. Refer to your IBM Statement of Limited Warranty for a full explanation of IBM warranty terms.

Online technical support

Online technical support is available during the life of your product through the Personal Computing Support Web site at <http://www.ibm.com/pc/support>.

During the warranty period, assistance for replacement or exchange of defective components is available. In addition, if your IBM option is installed in an IBM computer, you might be entitled to service at your location. Your technical support representative can help you determine the best alternative.

Telephone technical support

Installation and configuration support through the IBM Support Center will be withdrawn or made available for a fee, at IBM's discretion, 90 days after the option has been withdrawn from marketing. Additional support offerings, including step-by-step installation assistance, are available for a nominal fee.

To assist the technical support representative, have available as much of the following information as possible:

- Option name
- Option number
- Proof of purchase
- Computer manufacturer, model, serial number (if IBM), and manual
- Exact wording of the error message (if any)
- Description of the problem
- Hardware and software configuration information for your system

If possible, be at your computer. Your technical support representative might want to walk you through the problem during the call.

For a list of Service and Support phone numbers, see "Worldwide telephone list" on page B-20. Phone numbers are subject to change without notice. For the most current phone numbers, go to www.ibm.com/pc/support and click **Support phone list**. If the number for your country or region is not listed, contact your IBM reseller or IBM marketing representative.

Appendix B. IBM Statement of Limited Warranty Z125-4753-08 04/2004

Part 1 - General Terms

*This Statement of Limited Warranty includes Part 1 - General Terms, Part 2 - Country-unique Terms, and Part 3 - Warranty Information. The terms of Part 2 replace or modify those of Part 1. The warranties provided by IBM in this Statement of Limited Warranty apply only to Machines you purchase for your use, and not for resale. The term "Machine" means an IBM machine, its features, conversions, upgrades, elements, or accessories, or any combination of them. The term "Machine" does not include any software programs, whether pre-loaded with the Machine, installed subsequently or otherwise. **Nothing in this Statement of Limited Warranty affects any statutory rights of consumers that cannot be waived or limited by contract.***

What this Warranty Covers

IBM warrants that each Machine 1) is free from defects in materials and workmanship and 2) conforms to IBM's Official Published Specifications ("Specifications") which are available on request. The warranty period for the Machine starts on the original Date of Installation and is specified in Part 3 - Warranty Information. The date on your invoice or sales receipt is the Date of Installation unless IBM or your reseller informs you otherwise. Many features, conversions, or upgrades involve the removal of parts and their return to IBM. A part that replaces a removed part will assume the warranty service status of the removed part. Unless IBM specifies otherwise, these warranties apply only in the country or region in which you purchased the Machine.

THESE WARRANTIES ARE YOUR EXCLUSIVE WARRANTIES AND REPLACE ALL OTHER WARRANTIES OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OR CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. SOME STATES OR JURISDICTIONS DO NOT ALLOW THE EXCLUSION OF EXPRESS OR IMPLIED WARRANTIES, SO THE ABOVE EXCLUSION MAY NOT APPLY TO YOU. IN THAT EVENT, SUCH WARRANTIES ARE LIMITED IN DURATION TO THE WARRANTY PERIOD. NO WARRANTIES APPLY AFTER THAT PERIOD. SOME STATES OR JURISDICTIONS DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

What this Warranty Does not Cover

This warranty does not cover the following:

- any software programs, whether pre-loaded or shipped with the Machine, or installed subsequently;

- failure resulting from misuse (including but not limited to use of any Machine capacity or capability, other than that authorized by IBM in writing), accident, modification, unsuitable physical or operating environment, or improper maintenance by you;
- failure caused by a product for which IBM is not responsible; and
- any non-IBM products, including those that IBM may procure and provide with or integrate into an IBM Machine at your request.

The warranty is voided by removal or alteration of identification labels on the Machine or its parts.

IBM does not warrant uninterrupted or error-free operation of a Machine.

Any technical or other support provided for a Machine under warranty, such as assistance with "how-to" questions and those regarding Machine set-up and installation, is provided **WITHOUT WARRANTIES OF ANY KIND**.

How to Obtain Warranty Service

If the Machine does not function as warranted during the warranty period, contact IBM or your reseller to obtain warranty service. If you do not register the Machine with IBM, you may be required to present proof of purchase as evidence of your entitlement to warranty service.

What IBM Will Do to Correct Problems

When you contact IBM for service, you must follow the problem determination and resolution procedures that IBM specifies. An initial diagnosis of your problem can be made either by a technician over the telephone or electronically by access to an IBM website.

The type of warranty service applicable to your Machine is specified in Part 3 - Warranty Information.

You are responsible for downloading and installing designated Machine Code (microcode, basic input/output system code (called "BIOS"), utility programs, device drivers, and diagnostics delivered with an IBM Machine) and other software updates from an IBM Internet Web site or from other electronic media, and following the instructions that IBM provides.

If your problem can be resolved with a Customer Replaceable Unit ("CRU") (e.g., keyboard, mouse, speaker, memory, hard disk drive), IBM will ship the CRU to you for you to install.

If the Machine does not function as warranted during the warranty period and your problem cannot be resolved over the telephone or electronically, through your application of Machine Code or software updates, or with a CRU, IBM or your reseller, if approved by IBM to provide warranty service, will either, at its

discretion, 1) repair it to make it function as warranted, or 2) replace it with one that is at least functionally equivalent. If IBM is unable to do either, you may return the Machine to your place of purchase and your money will be refunded.

IBM or your reseller will also manage and install selected engineering changes that apply to the Machine.

Exchange of a Machine or Part

When the warranty service involves the exchange of a Machine or part, the item IBM or your reseller replaces becomes its property and the replacement becomes yours. You represent that all removed items are genuine and unaltered. The replacement may not be new, but will be in good working order and at least functionally equivalent to the item replaced. The replacement assumes the warranty service status of the replaced item.

Your Additional Responsibilities

Before IBM or your reseller exchanges a Machine or part, you agree to remove all features, parts, options, alterations, and attachments not under warranty service.

You also agree to:

1. ensure that the Machine is free of any legal obligations or restrictions that prevent its exchange;
2. obtain authorization from the owner to have IBM or your reseller service a Machine that you do not own; and
3. where applicable, before service is provided:
 - a. follow the service request procedures that IBM or your reseller provides;
 - b. backup or secure all programs, data, and funds contained in the Machine;
 - c. provide IBM or your reseller with sufficient, free, and safe access to your facilities to permit IBM to fulfill its obligations; and
 - d. inform IBM or your reseller of changes in the Machine's location.
4. (a) ensure all information about identified or identifiable individuals (Personal Data) is deleted from the Machine (to the extent technically possible), (b) allow IBM, your reseller or an IBM supplier to process on your behalf any remaining Personal Data as IBM or your reseller considers necessary to fulfill its obligations under this Statement of Limited Warranty (which may include shipping the Machine for such processing to other IBM service locations around the world), and (c) ensure that such processing complies with any laws applicable to such Personal Data.

Limitation of Liability

IBM is responsible for loss of, or damage to, your Machine only while it is 1) in IBM's possession or 2) in transit in those cases where IBM is responsible for the transportation charges.

Neither IBM nor your reseller are responsible for any of your confidential, proprietary or personal information contained in a Machine which you return to IBM for any reason. You should remove all such information from the Machine prior to its return.

Circumstances may arise where, because of a default on IBM's part or other liability, you are entitled to recover damages from IBM. In each such instance, regardless of the basis on which you are entitled to claim damages from IBM (including fundamental breach, negligence, misrepresentation, or other contract or tort claim), except for any liability that cannot be waived or limited by applicable laws, IBM is liable for no more than

1. damages for bodily injury (including death) and damage to real property and tangible personal property; and
2. the amount of any other actual direct damages, up to the charges (if recurring, 12 months' charges apply) for the Machine that is subject of the claim. For purposes of this item, the term "Machine" includes Machine Code and Licensed Internal Code ("LIC").

This limit also applies to IBM's suppliers and your reseller. It is the maximum for which IBM, its suppliers, and your reseller are collectively responsible.

UNDER NO CIRCUMSTANCES IS IBM, ITS SUPPLIERS OR RESELLERS LIABLE FOR ANY OF THE FOLLOWING EVEN IF INFORMED OF THEIR POSSIBILITY: 1) THIRD PARTY CLAIMS AGAINST YOU FOR DAMAGES (OTHER THAN THOSE UNDER THE FIRST ITEM LISTED ABOVE); 2) LOSS OF, OR DAMAGE TO, DATA; 3) SPECIAL, INCIDENTAL, OR INDIRECT DAMAGES OR FOR ANY ECONOMIC CONSEQUENTIAL DAMAGES; OR 4) LOST PROFITS, BUSINESS REVENUE, GOODWILL OR ANTICIPATED SAVINGS. SOME STATES OR JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU. SOME STATES OR JURISDICTIONS DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

Governing Law

Both you and IBM consent to the application of the laws of the country in which you acquired the Machine to govern, interpret, and enforce all of your

and IBM's rights, duties, and obligations arising from, or relating in any manner to, the subject matter of this Statement of Limited Warranty, without regard to conflict of law principles.

THESE WARRANTIES GIVE YOU SPECIFIC LEGAL RIGHTS AND YOU MAY ALSO HAVE OTHER RIGHTS WHICH VARY FROM STATE TO STATE OR JURISDICTION TO JURISDICTION.

Jurisdiction

All of our rights, duties, and obligations are subject to the courts of the country in which you acquired the Machine.
