

Bosch Floorcare.

Edition 2015/2016

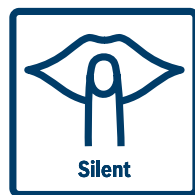

www.bosch-home.co.nz

BOSCH

Invented for life

Why choose Bosch?

We've been working for over 75 years, so that you can work less.

Bosch is Europe's largest manufacturer of Household Appliances. Producing high-quality, technologically advanced products, Bosch continues to play an active part in the New Zealand floorcare market. Bosch's factory in Germany is the largest in Europe and produces in excess of 1.8 million vacuum cleaners each year.

Bosch: German Engineered Quality

The term 'German Engineered' stands for high-class workmanship – and for the legendary quality of Bosch domestic appliances. At Bosch we never compromise, so we wouldn't expect you to either. That's why all of our cleaners have top of the range features as standard.

Silence

Noise is measured in numeric decibels or dB(A). It is important to note that a few decibels can make a huge difference. Our entire floorcare range is exceptionally quiet, and also features New Zealand's quietest bagged and bagless ProSilence vacuum cleaners. This is due to our latest Compressor Motor Technology, internal insulation and housing and unique floorhead design.

AFNZ Approved

Bosch Bagged and Bagless vacuums are approved by the Asthma Foundation of New Zealand's Sensitive Choice® Program.

Suction/Performance

A combination of quality design elements contribute to exceptional suction power and dust pick up. These include our powerful Bosch engineered motors; extra wide hose diameters, high grade filtration systems and specially designed floorheads which facilitate maximum cleaning performance.

SensorBagless™ Technology

Our bagless vacuum cleaners take out the guess work when it comes to cleaning and maintenance. The internal sensor continuously measures airflow rates to ensure that the vacuum cleaner operates at optimal performance throughout its lifetime. When the filters become dirty and block airflow, the system will automatically power down and activate its own self cleaning process (On models BGS5225AU, BGS5Z00AU and BGS5SL66AU). On all other bagless and Athlet models, the SensorBagless™ Technology system will prompt the user to clean the filters by powering down and flashing the red LED.

Bosch Technology.

SensorBagless™ Technology self-activated filter cleaning system.

SensorBagless™ Technology: Intelligent solutions for low maintenance effort.

No disappointing loss of performance thanks to SensorControl.

Bosch SensorBagless™ Technology alerts you when the filter needs cleaning.

Fully automatic self cleaning.

Imagine a vacuum cleaner that is so intelligent it knows when and how to clean itself! All the Relaxx'x vacuum cleaners have just that. Equipped with an integrated sensor that constantly monitors the airflow rate, the Intelligent SelfClean system activates its lifetime self-cleaning filter feature to ensure it always operates at peak performance.

Bagless and Athlet SensorBagless™ Technology

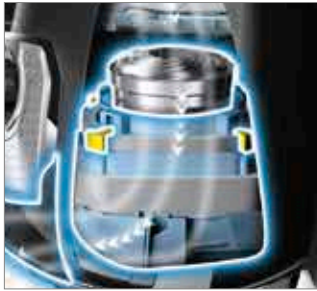

SensorBagless™ Technology

The SensorControl system sends an LED alert when the filter needs cleaning.

Silence Technology for a quieter operation.

Bagless Range.

SilenceSound System™: a diverse and comprehensive package of sound reducing measures

1 Sound controlled motor with CompressorTechnology

Reduces transference of motor noise and vibration.

2 Sound controlled insulation

Sophisticated materials with micro structure technology absorb noise.

3 Silent airflow with sound reducer

Aerodynamic airflow is supported by air guiding channels. The air flows smoothly with little twists and is therefore much quieter.

4 Silent accessories

Silent nozzle, sealed tubes and joints ensure smoother air flow and less noise.

— The quietest bagless vacuum cleaner

Easy cleaning...

In bagless vacuum cleaners, centrifugal forces separate the dust from the air flow and push it into a separator before it is fed into a dust container that can be emptied. The advantage: No follow up costs for bags and filters.

Ingenious high tech solution.

The large surface area of the CLEANSTREAM® filter with its unique GORE™ membrane technology ensures that dust cannot penetrate the filter and block it permanently. The result is a high level of performance, all year round.

Lifetime HEPA filter.

The lasting benefits offered by the robust special material used for the integrated HEPA filter include an impressive dust retention capability, clean exhaust air and the fact that the filter can be washed as required.

Super simple cleaning.

The dust container can easily be rinsed under running water once it has been emptied.

Bagless Range.

Some of the quietest bagged vacuum cleaners.

Bagged Range.

**Quattro
Power
System**

In developing the In'Genius, our engineers appear to have turned the laws of physics on their head. The In'Genius delivers impressive cleaning results despite low energy consumption.

The Bosch formula.

Less is more, certainly as far as the new In'Genius is concerned.

- New silent motor
- New high performance nozzle
- Airtight seals
- PowerProtect dust bags - preventing suction loss.

Washable HEPA filter

The integrated HEPA filter is washable and doesn't have to be replaced. This saves unnecessary additional costs. The HEPA filter also allows allergy sufferers to breath easier with the In'Genius.

In'Genius ProSilence 59

The new In'Genius ProSilence 59 is ultra-quiet at 59 dB(A) and delivers powerful cleaning performance.

15-metre operating radius

Thanks to the extra-long cable, you'll be able to reach even the remotest corners without having to plug the machine into a different socket.

5-litre capacity

The dust bag of the In'Genius has an extra large capacity, which means it doesn't have to be changed very often.

Four soft wheels

Wherever you go, the In'Genius follows on its four soft wheels, which are kind to your flooring.

Exhaust system with optimised airways

The extra-large exhaust system with its special exhaust filter expels the air more slowly – and much more quietly.

New, high-performance nozzle

Larger, better-sealed airways and the extra-wide and deep suction channel ensure outstanding cleaning performance while keeping noise to a minimum.

Innovative damping materials

Multi-layered damping materials filter a wide range of noise frequencies out of the air.

Triple encapsulation

The triple encapsulation of the motor makes these vacuum cleaners much quieter than many others.

Silence motor

The new motor with its specially shaped blades reduces noise at the point where it originates.

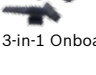

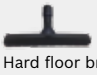

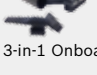

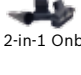

Bagged Vacuum Cleaners.

In'Genius and Free'e.

Approved by the Asthma Foundation of New Zealand's Sensitive Choice® programme.

Athlet Zoo'o ProAnimal removes animal hair up to 30% faster.*

Cordless Range.

Cleaning animal hair is a chore, it spreads all round the home and is hard to get rid of. Conventional vacuum cleaners can perhaps keep up on parquet and tiles – but when it comes to textiles, carpets or crevices, they reach their limits.

Thanks to its SensorBagless™ Technology and the motorised HighPower Brush, the Athlet Zoo'o ProAnimal doesn't just deliver the cleaning results of a conventional vacuum cleaner, but also effortlessly picks up animal hair on all types of flooring.

Extremely manoeuvrable.

The flexible nozzle joint makes the Athlet Zoo'o ProAnimal nimble and easy to manoeuvre. It therefore vacuums safely and reliably around furniture and even reaches remote corners under sofas, cupboards and chests of drawers. And as its freedom of movement is not restricted by a power cord, you can use the appliance in places where there is no power socket anywhere to be seen.

Versatile accessories.

The Athlet Zoo'o ProAnimal kit includes an attachable adapter with a hose, shoulder strap, an upholstery nozzle, crevice nozzle and car seat nozzle. This means it is perfect for cleaning textiles, crevices and corners.

Extra long run time: up to 60min.**

High-performance Lithium-Ion rechargeable battery with an extra-long life.

Long-lasting high performance.

The tried and tested Bosch Lithium-Ion Technology used in Bosch Power Tools and E-Bikes is synonymous with high performance, short charging times and long battery life. When combined with the highly efficient and aerodynamic LongLife Motor, the cordless Athlet range is equipped for intensive use.

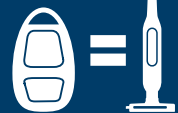

Long running time – short charging time.

The highly efficient system and Bosch's Lithium-Ion battery with its outstanding capacity means that the Athlet range can operate for up to 60 minutes without interruption.** In addition, the battery is already 80% charged after just 3 hours. A three-stage electronic protection system reliably prevents overcharging, overheating and deep discharge of the batteries.

SensorBagless™ Technology: SensorControl

The SensorControl system sends an LED alert when the filter needs cleaning.

Results comparable to a 2400 watt vacuum cleaner*

Up to 60 minutes of autonomous operation.

The combination of a motor with long-lasting Lithium-Ion battery (25.5V) allows the Bosch Athlet vacuum to function for up to 60 minutes**

Lithium-Ion Technology: Lighter and highly durable battery.

* Dust pick up in comparison to a 2400 watt vacuum cleaner from Bosch (BGL32400AU) on carpet and hard floor with crevices.

** Operation time varies depending on the model and speed setting selected.

Asthma and Allergens.

Allergens, such as house dust mites, pollens, pet hairs and moulds, are one of the most common triggers for asthma. The best prevention of allergen triggers is reducing your exposure to them.

Where can allergens be found?

Dust Mites

Dust mites like moderate temperatures and high humidity. They are found in bedding, flooring and furniture. Powerful and effective vacuum cleaner suction is extremely important to ensure dust mites are controlled.

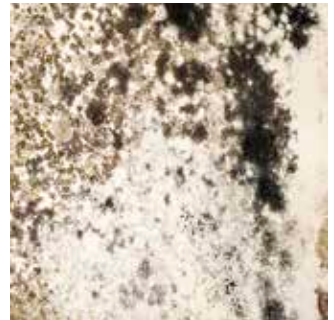

Pets

Our furry friends especially cats and dogs are the most common cause of pet allergies. They shed hair daily, a powerful vacuum and proper floor head are important to gather up pet hair around the house and avoid build up.

Pollen

Trees, grasses and other wind-pollinated plants are the source of the most troublesome pollens, these are especially prominent during spring. They are brought into the house on clothing and shoes, so regular cleaning is the best way to reduce your exposure to pollen in your house.

Mould

Mould can be mostly found in houses with rising damp and poorly ventilated areas, such as bathrooms or built-in wardrobes. Good ventilation and decreasing humidity are key to tackling mould issues.

Bosch Bagged and Bagless vacuums are approved by the Asthma Foundation of New Zealand's Sensitive Choice® Program.

Optional Accessories

BBZ102TBB

280mm Turbo-Duo

- Brushes and vacuums simultaneously
- Lifts fluff, threads and hair with ease
- Flattened piles are restored
- Side air control for adapting roller speed to floor type
- Also suitable for thick pile carpets due to brush roller mounted onto the floating bearings

BBZ42TB

165mm Mini Turbo-Duo

- Brushes and vacuums simultaneously
- Lifts fluff, threads and hair with ease
- Ideal for upholstery and mattresses

BBZ123HD

300mm Hard floor tool

- Specially designed for hard floors
- Extra soft bristles
- Glides over floors effortlessly, picking up dust and dirt from cracks and crevices

BBZ124HD

305mm DuoSoft parquet floor nozzle

- 100% natural hair designed for parquetry and sensitive hard floors
- Also draws on carpets

BBZ41FGXXL

Fabric dust bag

- Type GXXL
- Suitable for BSG5 models

BBZ118F

Bionic filter

- Removes bad smells from vacuum cleaner's exhaust air by breaking down odour molecules in a natural biological process.

BBZ41FGALL

Fabric dust bag PowerProtect

- Type G ALL
- Suitable for GL30, GL50, GL80 models

BHZKIT1

Athlet accessory kit

- Adjustable strap
- Flexible hose
- XXL Upholstery brush (19cm)
- Extra long crevice nozzle (36cm)

Important notes

Model numbers and specifications are for reference only and subject to change without prior notice.

For additional information on products, please refer to your local Bosch retailer. Bosch is continuously seeking to improve specification, design and production of its appliances and alterations may take place regularly.

All descriptions and technical diagrams are intended as a guide only. For additional technical information, full dimensional and installation details, please refer to the instruction and installation manuals supplied with the appliance.

For model and accessory availability, please contact BSH Home Appliances Limited.

(See back cover for details)

Quality service for quality appliances

Quality of our after-sales service is just as important as the quality of our products. In the unlikely event that service is required on your appliance, our extensive network of authorised service agents throughout New Zealand will ensure you are provided with the full support to ensure your appliance is operating at optimal condition.

Warranty

All Bosch products are covered under a 2-year comprehensive parts and labour warranty.
