Notes & Conditions:

1. Ensure that you have dedicated power wherever you are planning to use your induction range. Refer to the Installation & Operation Manual for detailed instructions regarding power requirements, mounting & operating instructions.
2. For optimum performance, your MAX Induction™ Range must have good air circulation. ***Your induction range must have proper ventilation at all times.*** Do not place your induction range next to any appliance that throws heat; such as a stove, oven or fryer. Actual range temperature may vary due to a number of variables, such as ambient temperature in the immediate surrounding area, content and volume of food being heated or cooked, and whether or not you are using a lid on the serving vessel. Refer to your Operations Manual for steps on how to properly clean and maintain your induction range.
3. This induction range requires the use of ferrous metal, induction-ready cookware.
