100% sRGB

[1] Not all features are available in all editions or versions of Windows. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS update to take full advantage of Windows functionality. Windows is automatically updated and enabled. High speed internet and Microsoft account required. ISP fees may apply and additional requirements may apply over time for updates. See http://www.windows.com.

[2] Multi-core is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering is not a measurement of higher performance.

[3] Intel and Core are trademarks of Intel Corporation in the U.S. and other countries.

[4] Full high-definition (FHD) content is required to view FHD images.

[5] The flicker-free capability eliminates screen flickering through integrating DC-dimming LED backlights.
