Legrand Australia Price Adjustment 1st May 2022

Dear Valued Customer,

Legrand Australia remains focused on initiatives to offset the ongoing escalation of cost increases impacting our industry whilst ensuring we deliver the support, service and quality you've become accustomed to.

Large ongoing raw material and freight cost increases has unfortunately led to the necessity to pass on some of these costs while we'll continue to bear the majority of the overall impact.

Effective 1st May 2022 Legrand Australia will be implementing an average weighted price adjustment of 4.5%.

We appreciate your ongoing support, our local R&D, Manufacturing, Sales and Service teams will continue to focus on bringing you and the market new and exciting products and opportunities with the highest standards and support possible.

Please don't hesitate to contact your local Legrand representative should you require further information.

Yours Sincerely,

Tosh Bourke
