As shown in the picture below right.

Switch back to Audio_ST9 on the bracelet

speaker
iPhone
Audio~ST9

Why the watch can't receive the message notification?

Please make sure that the mobile phone Bluetooth is turned on, the DAFIT APP is turned on, and the bracelet is always connecting to the mobile phone Bluetooth !

NOTE:
If the phone is not locking or the software (whatapp, SMS, facebook...) is logging in the computer, the smart watch will not push messages for reduce power consumption and disturbing. Please allow all the notification permission(WhatsApp, Facebook, Twitter, Phone, SMS.) at the DAFIT APP

Since Android mobile phone background will automatically clean up the App which not commonly used, it will cause the watch connection to drop and no longer push the message.
1.Make sure turn on message push in Dafit setting.
2.Make sure the message can be displayed in mobile phone's notification bar,message notification is pushed by reading the phone notification bar,the watch can't get notification if the message push closed in mobile phone setting .

XIAOMI

Setting-apps-permissions-Autostart-open the Da Fit

HUAWEI

Setting-apps&services-app launch-open the Da Fit

SAMSUNG

"Smart Manager "- find the "Auto-Run Application" option, --enter the "Auto-Start Application" setting interface - open the auto-start setting program.

⚠ ****If the notification still cannot be displayed, please try to reset the watch, or reinstall the APP.**
