How Digitization Impacts the Network Discussion?

Network

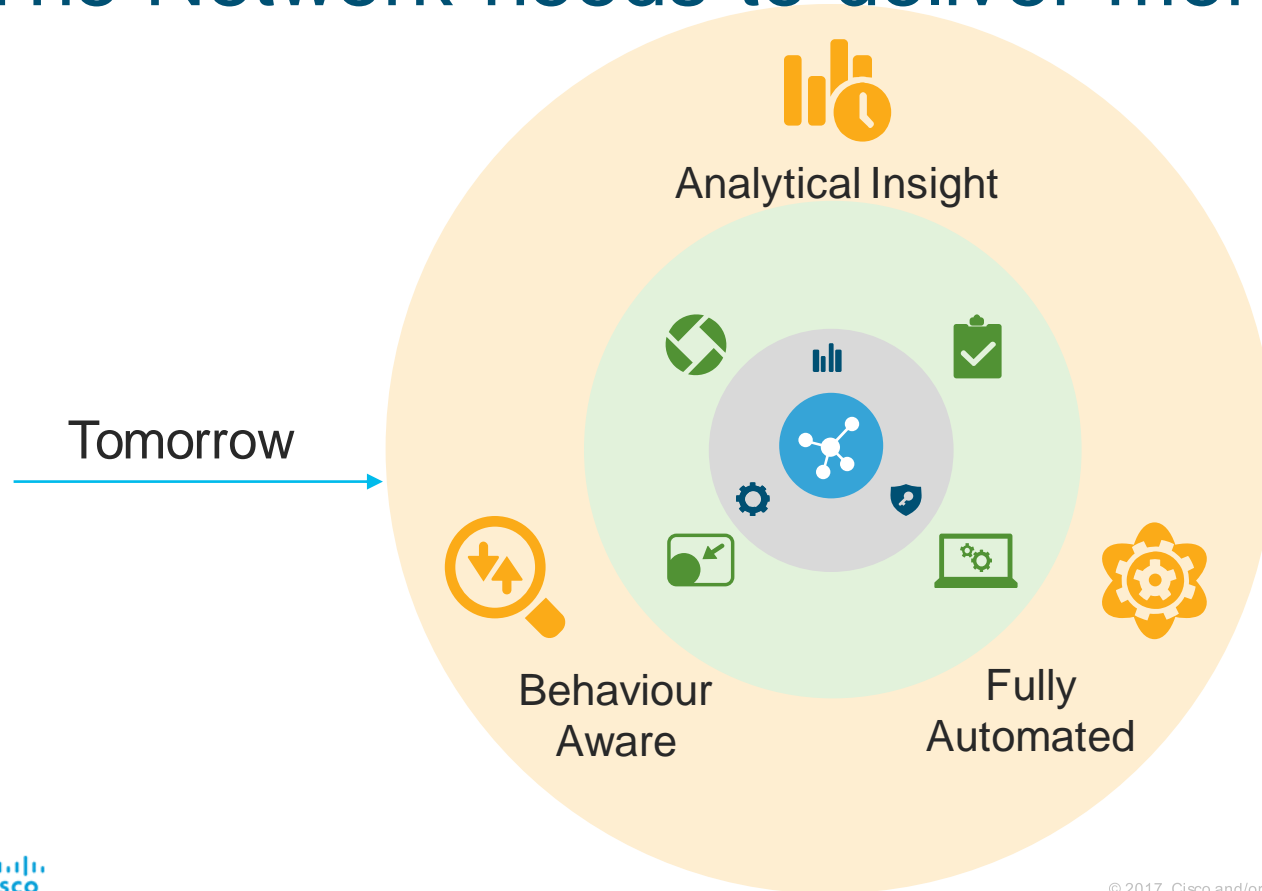

Is the Network Ready to Provide a Digital Foundation?

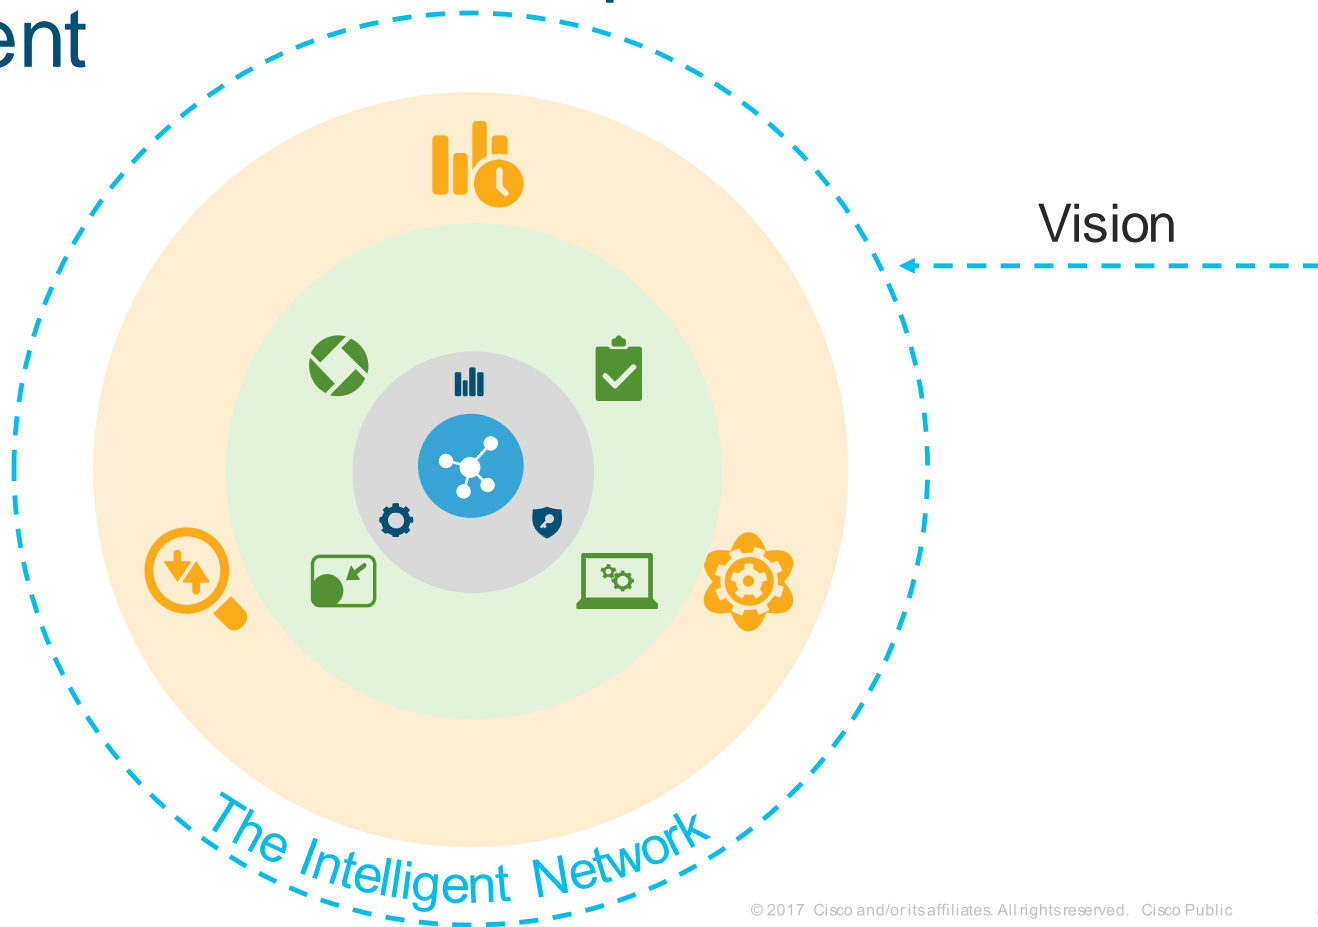

Is the Network Ready to Provide a Digital Foundation?

The Network needs to deliver more Value

The Potential is for a Complete Autonomic Environment

What is stopping this Network Evolution?

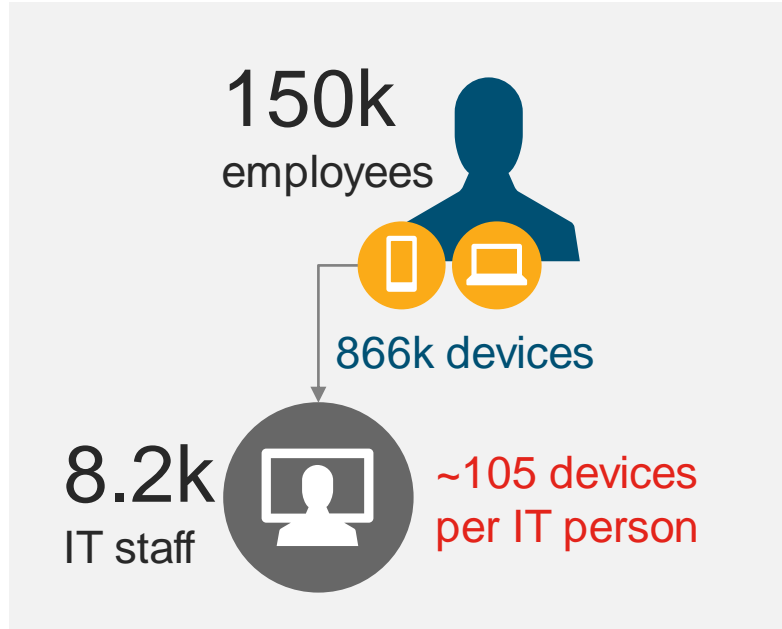

Overwhelming complexity

Humans can't scale to
manage networks of
this size

Intent Based Networking

Introducing Cisco SDA

The Enterprise Network Needs New Approach

Today's Networks

Tomorrow's Networks

Rewriting the Networking Playbook with Intent-based Networking

“Intent-based networking systems monitor, identify and react in real time to changing network conditions.”

– Gartner

What is Intent?

Intent

Execution

I have scheduled a telemedicine session at 10:00AM

Create a HD video connection; prioritize with E2E QoS; validate performance; keep the communication safe; tear down connection after call.

I am rolling out a new IoT app for factory equipment monitoring

Create a new segment for all factory devices to connect to the IoT App; isolate from other traffic; apply SLA; validate SLA; optimize.

I am opening a new branch to serve customers better

Provision and configure the branch network; set up secure access for staff and customers; apply network services; validate application performance.

I need the lawn cut

Take mower out of shed; fill gas and oil; pull starter cord; push onto lawn; clean mower; return to shed.

With an IBN, the administrator determines the "what," & the system then figures out the "how." -Zeus Kerravala

A New Network

Constantly Learning

Support 100X new devices, apps, users

Constantly Adapting

Respond instantly to business demands with limited staff and budget

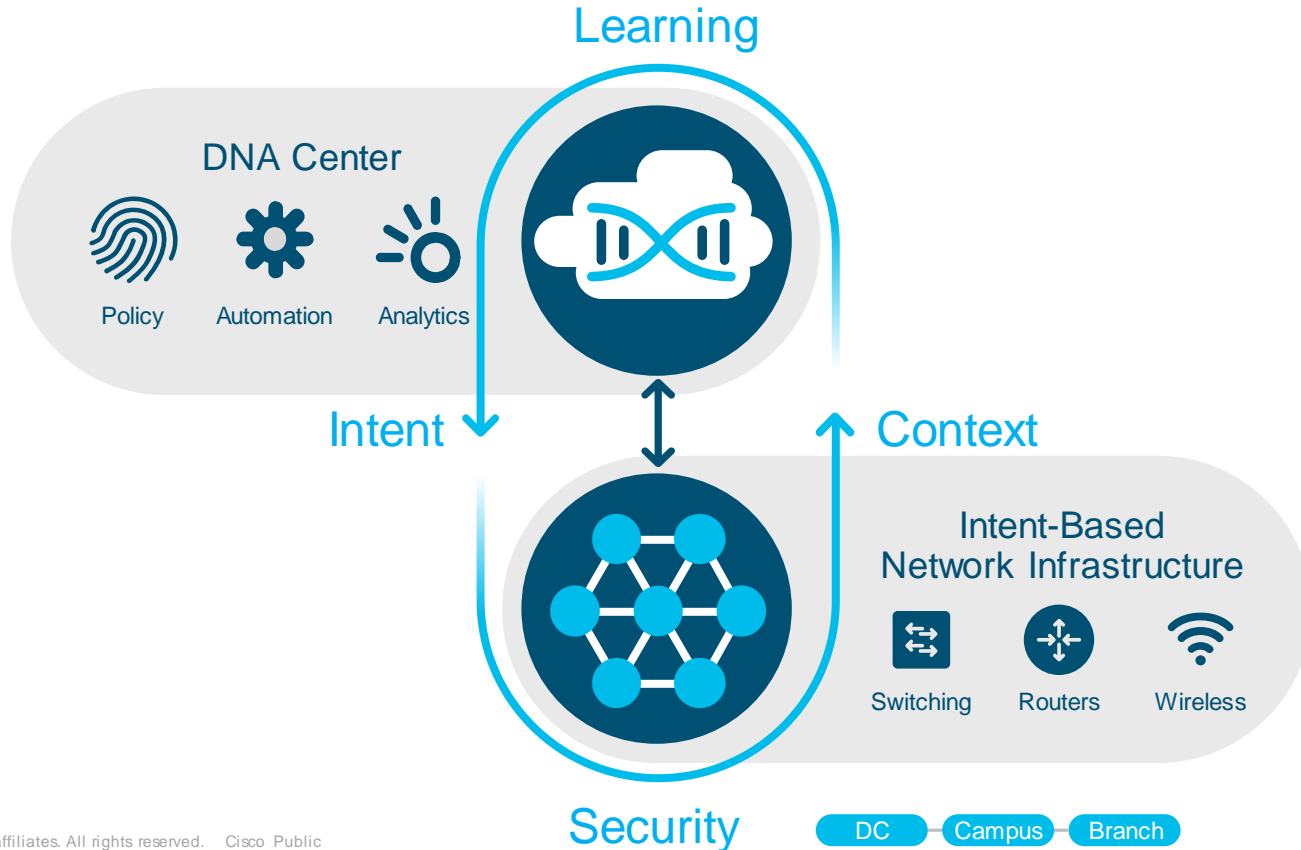

Constantly Protecting

See and predict issues and threats and respond fast

Cisco DNA 

The Network. Intuitive.

What Has Been Announced ?

■

One Network Fabric that
Automatically Adapts
Software Defined Access

Manage the network as one
entity
DNA Center

Agile Infrastructure
Catalyst 9000 Switching Portfolio
with Software Subscription

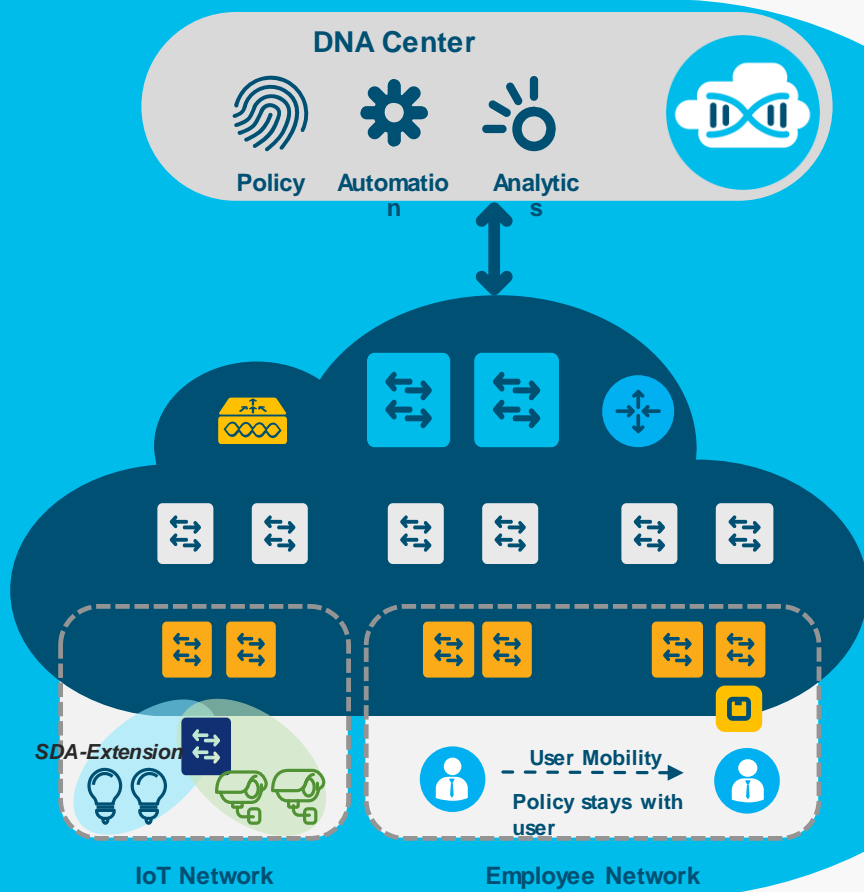

Predict Issues Before they
Become Issues
Network Data Platform

9xCv#1Apkf
Ahr5K&%0
qw4h96Ynm177js

Software-Defined Access

Networking at the speed of Software!

Identity-based Policy & Segmentation

Decoupled security policy definition from VLAN and IP Address

Automated Network Fabric

Single Fabric for Wired & Wireless with Workflow-based Automation

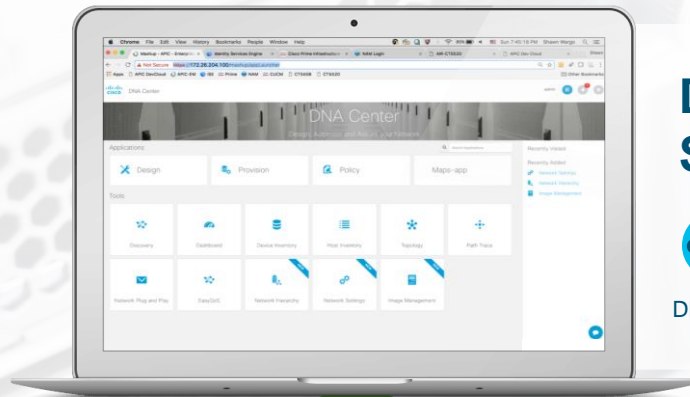

Insights & Telemetry

Analytics and insights into user and application behavior

Cisco DNA

Enterprise Portfolio

DNA Center

DNA Center: Simple Workflows

Software-Defined Access

Network Data Platform

APIC-EM

Identity Services Engine

Routers

Switches

Wireless AP

WLC

Simplifying How You Manage the Network

Logical workflow to design,
provision, set policy
Respond to changes faster

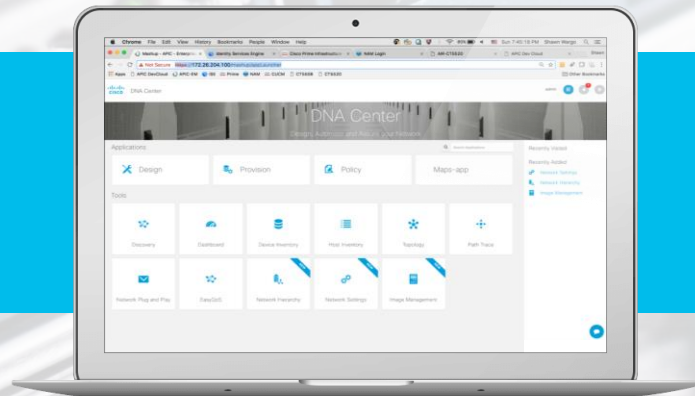

Monitor end-to-end
network performance
Predict and act on problems
before they happen

Pinpoint problems faster
Reduce downtime with an
end-to-end view instead of
hop by hop

Manage hardware and
software lifecycles
Keep up to date, meet
compliance and plan for refresh

DNA Center: Design, provision,
automate policy and assure services
from one place

SD-Access Support

A single fabric for your digital ready network

Switching

Routing

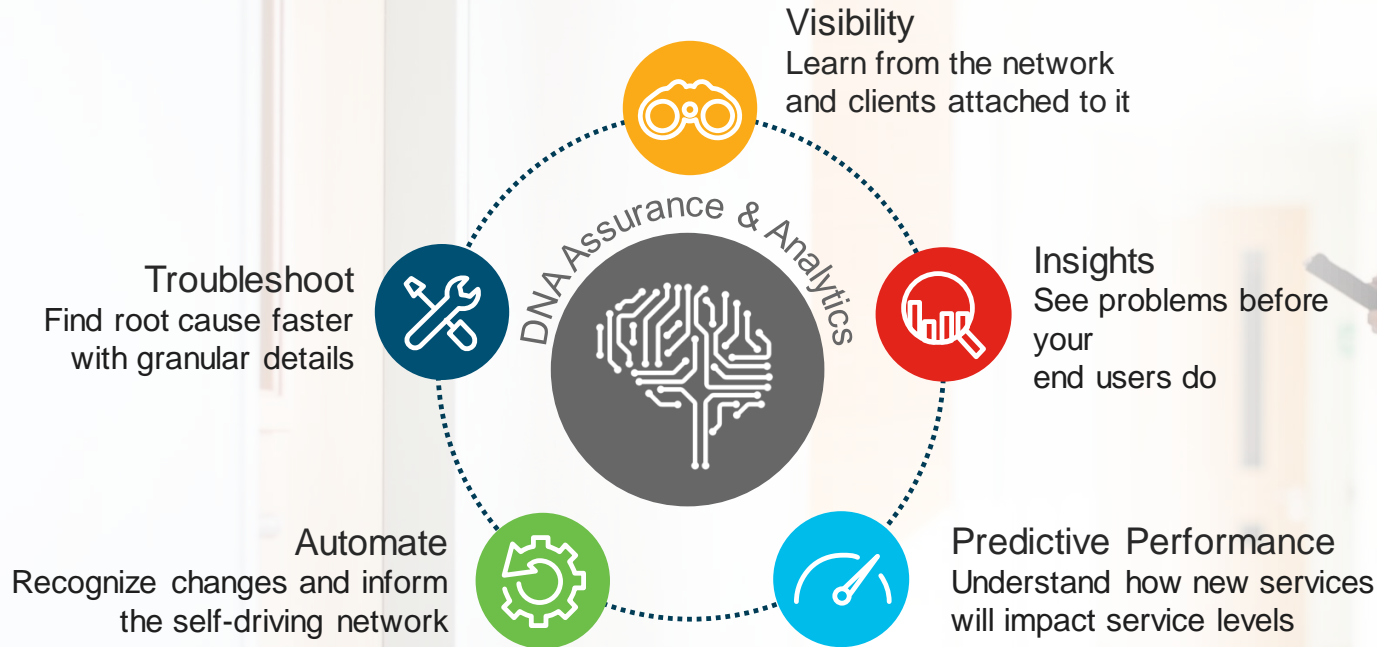

Wireless

Applied Intelligence with DNA Assurance

Converting Data to Business and IT Insights

Industry's First Self-Predicting Network Analytics Platform
