

INTERTEK TESTING SERVICES

Purpose of Application

The purpose of this application is to report changes in the original certified product for reason of cost reduction. The main modifications is PCB layout change due to use photo coupler instead of relay. Also, the handset keypad PCB is re-constructed and re-laid out from double-sided to single-sided. The RF module of base unit and handset are remained the same, and other electronic, electrical, mechanical design including housing, and cosmetic are identical.
