Get the Most Out of Your Bathtub

DoubleFlex™

Bath waste installations just became faster and easier. Introducing the new Mountain DoubleFlex™, the new bath waste system that is designed to handle misalignment problems. The secret is in the patented swivel joints at the overflow head and at the sanitary tee. We first incorporated this technology over 11 years ago with a swivel joint located at the overflow head; now we have also placed a swivel joint at the sanitary tee. What this means is that there is much more flexibility to compensate for misalignment when installing the bath tub. The DoubleFlex™ is available in both PVC and ABS as well as 3 different cable lengths to be utilized on any size tub.

Just look for the DoubleFlex™ Icon!

Immerse Yourself

The Mountain Plumbing "Immerse" feature allows you to have the most luxurious bathing experience you've ever had! It now comes standard on all Mountain Plumbing Products cable drains, allowing you to indulge in a more lavish bathing experience. The expertly engineered overflow has been developed for your tub to accommodate a near additional 2 inches of water. To fully take advantage of the immerse feature, simply fill your tub to the height you have been familiar with. Once seated and relaxed in your tub, the amount of displaced water will rise by approximately 2 inches and remain at this level. This additional water depth added to your tub will allow for you to be fully submerged, covering up your bare shoulders, and resulting in a more luxurious bath. It is the ultimate in getting the most out of your bathtub.

Francis Anthony Collection

Lifetime New York designer, Mr. Frank Antoniello, is the man behind the Francis Anthony Collection. This United States Army Vietnam Veteran got his start in the industry in the late 1970's working for T&S Brass developing and designing commercial faucets. Mr. Antoniello's focus became more directed at the residential side when he helped form the Concinnity Division, part of IW Industries, in the late 1980's. At Concinnity, he teamed with an architect to bring unique designs and ideas from concepts to full production.

As the years lead on, his craft has become more refined. Since joining Mountain Plumbing Products in 2008, Mr. Antoniello has served as Mountain's Director of Engineering and Design. To date, he has 30+ patents on design and utility with his first patent being issued in the mid 90's.

Mr. Antoniello says that, "Today's design focuses on a minimalistic level. The homeowner does not want to be overpowered when completing their kitchen design. This is where the Francis Anthony Collection comes into play. The Francis Anthony Collection exemplifies tailored proportion gourmet faucets which make an exclusive statement of chic design and perfect proportion".
