# Prior to installation

The following 4 steps must be conducted to ensure connectivity to Heimdall Cloud

## Step 1

Open the Neuron

## Step 2

Install the Activation Plug

## Step 3

Call Heimdall Power

## Step 4

Ready to be installed

# Installation on the power line

The activation plug must be activated prior to the installation!

## Step 5

How to position the Neuron

The neuron must be mounted on bare conductor (no coating, spirals etc.)

## Step 6

Ensure horizontal orientation

## Step 7

Apply a torque of ~15 Nm

# Measure distance from ground to suspension point

## Step 8

# Data registration

The following information for each Neuron must be provided to Heimdall Power:

NEURON ID

PHASE

DISTANCE FROM NEURON TO TOWER

TOWER ID (A)

NEIGHBOURING TOWER ID (B)

HEIGHT OF SUSPENSION POINT (A)

HEIGHT OF SUSPENSION POINT (B)

PICTURE OF THE INSTALLED NEURON (OPTIONAL)
