HOME IS WHERE THE ART IS

With its 2018 home entertainment range, Panasonic brings the artist's vision into your home like never before.

When a filmmaker or musician creates a film or song, they know exactly how they want it to look or sound. Unfortunately, though, this artistic vision all too often gets lost in the long journey from the mastering suite or recording studio to your home. Panasonic is on a mission to change this. They are working harder than ever to develop advanced technologies that will help its audio and video products realise the dream of letting you enjoy from the comfort of your favourite armchair exactly the same quality of picture or sound that an artist had in mind when they created their masterpiece. Nowhere is this more apparent than the 2018 Panasonic TV range. The latest OLED and LED Panasonic TVs feature a brand new HCX (Holly-

wood Cinema Experience) processor that's got 'Hollywood' running through its DNA. At the new HCX system's heart, for instance, are colour, contrast and brightness enhancements built on years of experience working with film and TV industry creatives through the Panasonic Hollywood Laboratory in Los Angeles. The system has even been tuned by leading Hollywood colourists, making it no surprise that Panasonic OLED TVs are now being used as large-format client reference monitors by some of the largest post-production companies in Hollywood. The new Panasonic FZ950 OLED series combines OLED's peerless handling of dark scenes with new HDR-friendly levels of brightness, an Absolute

Black Filter to minimise screen reflections and enhance dark shades, and unprecedented levels of colour refinement and accuracy. Furthermore, the 2018 Panasonic 4K PRO TV range also support the new HDR10+ high dynamic range standard, which provides scene-by-scene information to help TVs exploit every last drop of picture quality from an HDR source. Staying true to a director's vision is also key to the new Panasonic Ultra HD/4K Blu-ray™ player range. By introducing HDR10+ support for the first time, for instance, models such as the UB420 can deliver extra instructions provided by film-makers to help TVs play each scene more accurately. The new decks also carry Panasonic's high

precision chroma processing for enhanced textures and image depth, and a new HDR optimiser feature designed to improve HDR bright detailing and light balance even with TVs and projectors that aren't bright enough to normally handle HDR well. Panasonic wants films to sound as good as they look, too. Its HTB250 soundbar, for instance, combines a practical, space-saving design with a powerful, bass-rich sound rounded out by a wireless subwoofer you can hide pretty much anywhere without compromising its sound. The 2018 Panasonic audio range strongly focusing on combining all the convenience features of today's audio world, such as wireless multi-room and online streaming support, with real sound quality.

The SC-GA10, for instance, is the first true hi-fi smart speaker. Google Assistant provides all the convenience of simply talking to the GA10 when you want it to play something, look up something online or even turn your smart lights or heating on. But it also contains a hi-fi grade tweeter and driver combination capable of delivering a truly room-filling sound. Similarly, the Panasonic RP-HTX80B headphones provide support for convenience features such as Bluetooth sound and 20-hour battery life, but also feature unusually powerful drivers able to maintain a rich, dynamic sound. Panasonic has even created a great modern twist on the conventional hi-fi - again without com-

promising sound. Its wall-mountable SC-HC2020 and SC-HC300 both support CD playback as well as Bluetooth® and Wi-Fi, with the HC2020 even carrying built-in Chromecasting, for easy playback from any Chromecast source. With the new improved Panasonic Music Streaming app makes it easier than ever to get the most from all these great new Panasonic audio options, we are proud to say the 2018 Panasonic AV product range really does have something for everyone.

OLED

HOLLYWOOD TO YOUR HOME

By combining the stunning contrast and colour of OLED technology with professional-grade processing, Panasonic has delivered its most accurate and detailed picture ever.

MASTER HDR OLED TECHNOLOGY – MAKING THE BEST BETTER

At the heart of the Panasonic drive to recreate at home exactly what film or TV show creators were seeing in the mastering room lies OLED screen technology. With OLED screens, every single pixel can create its own light and colour, independently of its neighbours. As a result, OLED TVs can deliver peerless light control and contrast, as well as incredible colour and detail precision. Great though OLED's innate qualities are, though, it still takes powerful processing and decades of picture know-how to unlock the technology's full potential. Which is where Panasonic comes in. For instance, the latest 'HCX' Panasonic video processing engine uses even more direct input from Hollywood creatives to get closer than ever to reproducing the filmmaker's vision by covering almost the full DCI (Digital Cinema Initiative) colour space.

The 2018 models even introduce new Dynamic Scene Optimizer and automatic brightness enhancement features, to ensure today's gorgeous high dynamic range pictures look as punchy and natural as possible at all times. Panasonic OLED TVs also use an 'Absolute Black Filter' to reflect light away so that you can see deeper, richer, more detailed black areas and dark colours. Finally, the brand's long experience with plasma TVs results in uniquely delicate control of the 'near black' picture areas some other OLED TVs can struggle with.

MASTER HDR OLED
OLED is a self-illuminating panel technology which individually illuminates each pixel. As it needs no backlight like LCD TVs, when the signal level is reduced to zero, black parts of the screen are real pitch black.

ULTIMATE PICTURE QUALITY:

Collaboration with Hollywood

Unique image processing technologies

Next generation OLED technology

THE CHOICE OF HOLLYWOOD PROFESSIONALS

It's not just Panasonic which believes its latest televisions are uniquely talented at showing pictures in the way they were created to be seen. Some of the film and TV industry's biggest names now use Panasonic OLED televisions as an essential part of their work processes. At the heart of the close relationship Panasonic has with the heart of the global film-making industry is the Panasonic Hollywood Laboratory. Set up more than 20 years ago to forge closer ties with Hollywood creatives, the PHL has worked with professionals from every part of the movie world to gain a better understanding of what goes into creating a film or TV show, and what the people making those shows want from a video display. This knowledge has filtered directly into Panasonic professional displays and televisions. In fact, the brand's latest televisions use so many of the premium technologies once reserved for professional monitors that they're truly erasing the space between the creation and playback ends of the film-making journey. Since 2017 Panasonic has been working closely with Hollywood giant Deluxe, to ensure that the technical accuracy of their award winning OLED TVs matches

the filmmakers' creative intent. Top colourists, image scientists and engineers at Deluxe's Company 3, EFILM, and Encore post-production companies worked with Panasonic to tune and test the 4K Pro EZ1000 and EZ950 OLED TVs, and will be involved in tuning 2018 OLED models too. Deluxe is a global partner to content creators and distributors enabling creative visions to come to life. World-renowned film industry veteran Technicolor has been working closely with Panasonic since 2015, when one of its senior colourists, Mike Sowa, 'tuned and approved' the Panasonic CZ950 and DX900 TVs to 'Hollywood' standards. Furthermore many semi-professional features suggested by Technicolor have found their way onto Panasonic TVs – most recently, two additional white balance and gamma calibration points have been added to premium models in response to a Technicolor suggestion.

One further seal of film and TV industry approval for Panasonic televisions comes from THX. This independent quality assurance group has tested the accuracy and performance of Panasonic OLED and high-end LCD TVs using more than 400 measurements, and every model has passed these stringent tests with flying colours.

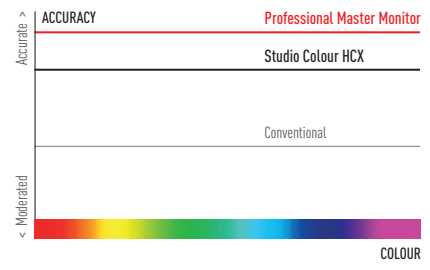

STUDIO COLOUR HCX

Decades of TV picture quality experience combined with unprecedented amounts of Hollywood collaboration resulted in the Panasonic HCX (Hollywood Cinema Experience) video processor. This incredibly powerful system works on colour, black level and brightness to deliver pictures that get as close as possible to the way they looked in the mastering suite. An 8000 registry point 3D look-up table system, for instance, with enhanced reproduction of white improves tonal accuracy in both light and dark areas. The HCX system also lets Panasonic's OLED TVs achieve better detailing and smoother blends in the darkest picture areas without compromising the quality of black colours, as well as bringing out more subtle details and blends in even the brightest high dynamic range picture areas.

MORE DETAILED PICTURE ADJUSTMENT

Finally, in response to requests from Hollywood's professional users, Panasonic has extended the range and reduced the interval between calibration steps at the darkest end of the RGB and gamma scales. This can be adjusted by the user via Panasonic's Colour Management System. The FZ950 and FZ800 support Imaging Science Foundation (ISF) calibration settings and new calibration points at 5 per cent and – in an industry first – just 2.5 per cent luminance, providing the greatest control to users where it is most needed, just above complete blackness in low-lit scenes. These new industry-first calibration points will also be supported by Portrait Displays' CalMAN software with AutoCal functionality. Panasonic FZ950 and FZ800 are now CalMAN Ready.

DELTA ZERO (Δ0) COLOUR ACCURACY
This feature identifies and compensates for variations in specific colours caused by the individual characteristics of an OLED TV's panel. It combines with the extra brightness and gradation steps of 2018's OLED TVs to help them to get even closer to master monitor levels of colour accuracy.

3D LOOK-UP TABLES (3D LUT)
Top-tier Panasonic TVs use advanced 3D look-up tables to reproduce colours in extremely fine brightness steps, ensuring that tones look accurate at virtually any brightness level.

PICTURE

DRAMATIC HIGHLIGHTS
AND SHADOWS

A BILLION BREATH-
TAKING COLOURS

STUNNING LEVEL
OF DETAIL

AS NATURE INTENDED

High dynamic range 4K UHD screens join forces with decades of Hollywood know-how to make the latest Panasonic televisions feel like windows on a bold and beautiful new world.

HIGH DYNAMIC RANGE

HDR TELEVISION: REAL LIFE BRIGHTNESS AND COLOUR

High dynamic range televisions can display a much wider range of brightness and colour than the TV's we're used to. The result is punchy, vivid pictures that look much more like the way our eyes see the real world. The 2018 Panasonic TV range leaves no stone unturned in its quest to deliver a thrilling HDR experience. For instance, its OLED TVs now go brighter without losing their beautifully rich black colours, while its LCD TVs use sophisticated backlight controls to deliver HDR's huge contrast range with spectacular impact.

Panasonic HDR TVs also provide peace of mind by supporting three different HDR formats: The so-called HDR10 industry standard found on almost all video streaming services and 4K Blu-rays; the Hybrid Log Gamma (HLG) platform used for HDR broadcasting; and the HDR10+ standard, which optimises the picture on a scene-by-scene basis to help TVs make HDR look even better. In addition, Panasonic is introducing a new Dynamic Scene Optimizer on 4K PRO TVs that applies advanced picture analysis to basic HDR10 signals to emulate the sort of scene-by-scene impact normally only possible with HDR10+.

4K HDR GAME AND SPORT MODE

To deliver the best picture quality at all times, televisions need to adapt to different types of content. This is why 2018 Panasonic TVs include special Game and Sport picture modes. The game mode makes the TV produce pictures faster to reduce input lag for better gaming experience. The sport mode boosts colours to make pitches look more life-like, and raises contrast levels to make players' uniforms look more vivid. It even partners its dramatic pictures with a stadium-like sound setting.

LED TV – CINEMA DISPLAY

PANASONIC CONVENTIONAL

PEAK BRIGHTNESS

New ultra-transmissive LCD cells let the latest Panasonic TVs deliver much greater brightness without using significantly more power. The high brightness required for HDR is achieved by high quality LED backlight technology that provides stable average brightness all over the screen. As a result, Cinema Displays are perfectly suited to playback of high dynamic range content.

PANASONIC CONVENTIONAL

WIDE COLOUR SPECTRUM

Wide Colour Phosphor technology lets you experience more vibrant, nuanced and natural colour tones – especially during dark scenes – than you get with normal LCD screens. This technology combines advanced LED backlighting with a new colour filter system to deliver a wider colour range that covers more than 90% of the Digital Cinema Initiative (DCI) colour spectrum.

PANASONIC CONVENTIONAL

LOCAL DIMMING PRO

High dynamic range pictures aren't just about brightness; they also deliver deeper, richer dark scenes. Some 2018 Panasonic LCD TVs use new Local Dimming Pro backlight technology to ensure both the brightest and darkest parts of HDR images look equally good. It works by combining independent control of different sections of each TV's LED lights with an array of shutters behind the screen that can constantly adjust the amount of light let through their part of the image.

THE BRAINS BEHIND THE BEAUTY

Look beyond the pretty exterior of Panasonic TVs and you'll find an ultra smart heart ready, willing and able to help you find and share content across all the myriad sources available in today's multimedia world.

VOD STREAMING:
Stream your favourite movies and videos whenever you want.

FINDING SOMETHING TO WATCH HAS NEVER BEEN SO EASY

MY HOME SCREEN 3.0

The new streamlined My Home Screen smart TV system helps you find your favourite content in just seconds – be it on live TV, a streaming app, or another device on your home network. You can create your own customised, graphically rich landing page, and even map your most used app to a dedicated remote control button. Thanks to **Panasonic Bluetooth® Audio Link** feature you can connect compatible headphones or playback your favourite music on your TV* from your mobile device via Bluetooth®.

*FX700 series and above

HOME NETWORK INTEGRATION

IP Home Networking means you can now add your Panasonic TV to home automation systems (such as Control4). You can then control your TV from your central 'whole home' device, and include your TV in macro command systems that let you, for instance, turn the TV on, adjust your lighting, boost the heating and activate your audio system at the press of a single button.

VOD STREAMING

With more and more of us binging on streamed TV these days, the latest Panasonic My Home Screen 3.0 platform not only makes it simple to stream shows and clips from Amazon, Netflix and YouTube, but also lets you watch video from those key sources in both 4K and high dynamic range quality*. The latest Panasonic Media Player 2.0 platform, meanwhile, lets you view your photo, video and music collections by date, and on 4K TVs can automatically recognise and play HDR files.

*Depending on availability and broadband speed.

WATCH TV WHENEVER AND WHEREVER YOU WANT TO

TWIN HD TUNER

If your Panasonic TV has more than one tuner, you could watch one programme while recording another; watch two programmes simultaneously on the TV; or keep watching TV while browsing other channels via a small window in the electronic programme guide.

TV ANYWHERE

Ever wished you could watch TV broadcasts and recordings on your phone or tablet when you're away from home? With TV Anywhere*, you can. This ground-breaking feature also lets you set recordings while you're out; add TV shows to your smart device playlists; and even enjoy high-quality video if your smart device is on a fast enough network.

*not available in the UK

MULTI-ROOM TV WITHOUT CABLES

Once upon a time you had to find a way of getting an aerial, satellite or cable feed into every TV in your home. **In-house TV Streaming** makes multiroom TV* life much easier by letting you stream broadcasts via your home router from one main server TV to other compatible Panasonic TVs. Client TVs are able to receive and handle those IP signals so you can enjoy TV broadcasts everywhere in your home.

*not available in the UK

CLASS IN GLASS

Turning your TV into a window on the world.

The glass frames around the new FX780/FX740 create a dazzling impression of beautiful pictures emerging as if from nowhere. Their seamless 360 degrees design and the elegantly minimalist appearance looks stunning in any room, and by removing the traditional sense of the 'technology' behind the pictures, they make it easier to become totally immersed in what you're watching.

BLU-RAY™ RECORDER & PLAYERS

BLU-RAY™ GOES ULTRA HD

Enter a whole new world of picture and sound quality with Panasonic Ultra HD Blu-ray™ Players.

UNLOCK THE FULL BEAUTY OF 4K

Normal Blu-ray™ players only output video with a resolution of 1,920 x 1,080px. Today's 4K UHD TVs, however, show pictures with resolutions of 3,840 x 2,160px. So when they're fed a standard HD Blu-ray™ picture, they 'upconvert' it to their higher resolutions. They deliver even more purity when you use a true 4K source. The new generation of Ultra HD Blu-ray™ Players from Panasonic deliver pictures to your UHD TV with a native 3,840 x 2,160px resolution, giving you pixel-for-pixel clarity.

COMPREHENSIVE HDR SUPPORT

Panasonic 2018 4K Blu-ray™ players play every key HDR format. These comprise the AV world's core HDR10 format; the broadcast-friendly HLG system, which automatically optimises its pictures to any type of television; plus, finally, the HDR10+ and (on the UB820 flagship model) Dolby Vision 'dynamic' HDR systems, which provide extra scene by scene information to help TVs optimise their HDR performance.

ALWAYS GET THE BEST FROM HDR

The quality of a high dynamic range picture experience can be greatly affected by the characteristics of your TV. The HDR Optimiser counters this inconsistency by adapting the brightest parts of HDR images to the brightness capabilities of the TV the Panasonic UHD Blu-Ray™ player is connected to. The result is a substantial increase in the amount of visible detail in peak HDR picture areas.

EXCLUSIVE PICTURE QUALITY

The 2018 Panasonic 4K Blu-ray™ players are uniquely qualified to unlock the full potential of the AV world's premium video source. The new HCX processor introduces the spectacular HDR10+ format to 4K Blu-ray™ for the first time, and uses advanced processing to better adapt both high and standard dynamic range pictures to different TVs and room environments. Working with filmmakers through the Panasonic Hollywood Labs, meanwhile, has helped create exclusive chroma processing and upscaling systems capable of delivering gorgeously nuanced, natural and colour-rich pictures from both 4K and HD Blu-ray™ discs.

IT'S GOOD TO TALK

Wouldn't it be great if you could just tell your home electronics what you wanted them to do, rather than always having to find the remote control? Well, with the latest Panasonic 4K Blu-ray™ players, you can. They support both the Amazon Alexa and the Google Assistant systems, so that when they're connected to a compatible speaker you can get them to perform a range of operations simply by saying what you want them to do.

HIGH-QUALITY SOUND

Panasonic Ultra HD Blu-ray players are packed with high-end audio technology. All 2018 models feature proprietary stabilizing technology to enhance sound clarity, and play high-resolution DSD and ALAC files as well as conventional WAV, FLAC, AAC, and WMA formats. The UB820 and UB420 additionally use a 192kHz/32-bit DAC to enhance playback of subtle sound details, and carry two HDMI outputs that keep the video and audio signals separate for extra clarity and quality.

4K STREAMING SUPPORT

Panasonic 4K Blu-ray players won't just play 4K video from Ultra HD Blu-ray discs. Our models will also support playback of native 4K content from the likes of Netflix and YouTube. What's more, each online source will have its picture quality taken to a whole new level by being run through Panasonic's 4K High-Precision Chroma Processor before it's passed to your TV.

PERFECT PICTURES EVERY TIME

UB820

DMP-UB820 ●

Premium Quality Ultra HD Blu-ray™ Player for Perfect Playback Every Time

Ultimate Ultra HD home cinema – Panasonic's high-end picture and audio technologies unlock the full potential of the peerless 4K Blu-ray™ format

SOUNDS GREAT, THINKS SMART

Proof at last that you really can combine smart speaker functionality with truly great sound.

SOUND QUALITY

Tucked inside the GA10's space-saving form is a seriously uncompromising speaker system. Two angled 20mm soft dome tweeters with proprietary diffuser technology fill your room 180 degrees of spectacular, ultra-clear, stereo sound. Also, an 8cm dual voice coil woofer and long port bass reflex system deliver the rich, robust bass so often missing from other smart speaker designs.

HIGH FASHION

The GA10's distinctive tower-style design combines elegant, modern simplicity with enough physical space to house a collection of truly high-performance speakers. Its sleek aluminium case can be partnered with black or white speaker fabric colour options, too, making it flexible enough to fit in with any living room style.

WELL CONNECTED

Thanks to its support of both Google Chromecast and Bluetooth®, the GA10 can play back music from almost any source. Various streaming services, internet radio stations, smartphones and tablets, basically if a device has got music on it and can be attached to a Bluetooth® or Wi-Fi network, the GA10 will be able to play songs from it.

You speak,
the GA10 listens

Say goodbye to remote controls. You can simply use your voice to ask the Assistant on your GA10 Speaker to play your music. Or you can ask it about the weather, your schedule, general knowledge - anything, really. You can even use it to voice control other compatible smart home devices, such as smart lights and thermostats.

OK Google, play some jazz.

Alright. Check out this jazz radio mix on Spotify.

GA10

SC-GA10 ● ○

Panasonic Sound Prowess Meets Smart Speaker Flexibility

- Google Assistant Voice Control** – simply tell your GA10 what you want it to do
- Hi-Fi Sound** – fantastic audio via two 20mm Soft Dome Tweeters, an 8cm Dual Voice Coil Woofer, and a Long Port Back Bass Reflex System
- Elegant Design** – its minimalist, compact shape, subtle colour schemes and refined materials complement any decor
- Wide content support** – playback from all major streaming apps, including Spotify, Google Play Music, Tune-In Radio, Deezer and the BBC
- Room-filling audio** – 180-degree coverage ensures that everyone enjoys the GA10's outstanding sound quality

MUSICAL MASTERPIECE

The latest Panasonic range of audio products look great, sound great, and make perfect partners for today's connected generation.

GOOGLE CHROMECAST AND STREAMING

The HC2020 carries built-in support for Google Chromecast. This makes it as easy as pressing a single button to stream songs from streaming music services eg. Spotify, Deezer and SoundCloud and smartphones. In combination with a speaker with Google Assistant function it can be voice controlled. Because Chromecast works over Wi-Fi you can simultaneously connect multiple devices to the HC2020, while multi-room sync functionality lets you play the same song through multiple speakers.

THE ART OF GREAT SOUND

The HC2020 manages to deliver its distinctively stylish design without compromising sound quality. First, it uses 8cm full-range drivers. Second, it can adapt its sound according to whether it's mounted on a wall or a shelf. Finally, it applies a unique Twisted Acoustic Port speaker design to enhance bass. Finally, it carries the latest LincsD-Amp system, which prevents sound from being affected by any sorts of mechanical interference.

WALL FLOWER

The HC2020 squeezes a triumph of design. It's minimalistic enough to harmonise with any room design, yet subtly blends different textures to create a sophisticated, three-dimensional appearance that clearly defines the system's speaker and front panel elements. Its remarkably thin body has also been optimised for hanging on a wall for the ultimate in space-saving hi-fi chic.

HC2020

SC-HC2020 ●

Style Meets Function with this Stunning Slimline Hi-Fi

- Google Chromecast built in** – easily stream, music services and radio stations from mobile devices. Supports high resolution audio
- Wide source support** – play music via CD, USB, DAB radio, Bluetooth® or Wi-Fi (including Spotify, Deezer and SoundCloud)
- A fantastic listening experience** – unique Panasonic technologies fill your room with beautifully natural Hi-Fi sound
- Works with Google Assistant** – control by voice when connected with your speaker with Goggle Assistant
- Space-saving design** – slim profile means you can place it on a narrow shelf or even hang it on the wall

CINEMA SOUND FOR YOUR HOME

Advanced technologies for excellent sound quality

Featuring two 10x4 cm full-range speakers designed to match the shape of the body, this speaker system includes a high-output amp that achieves a maximum 80W of power. The H.BASS function also reinforces the low-frequency range to deliver incredible bass sound that's almost unimaginable for such a compact size. Virtual Surround fills the entire listening space and Sound modes let you choose the sound that best suits the picture.

LOGO & ICON GLOSSARY: TV

TECHNOLOGY

4K PRO HDR / 4K HDR: High-end Panasonic 4K PRO TVs are designed from the bottom up and tuned in Hollywood to deliver picture quality accurate to the filmmaker's original intentions. Equipped with both cutting-edge Panasonic 4K Studio Colour HCX^{*} Processor with professional-quality colour management technology and the OLED next-generation panel, 4K PRO TVs capture every nuance and detail of the original film.

Ultra HD: The Ultra HD (UHD) logo is the official industry logo developed by DIGITAL EUROPE. TVs featuring this official logo must meet UHD requirements, like all 4K UHD Panasonic TVs. They are proven to provide true Ultra HD picture quality and connectivity in line with the high standards.

Full HD: Full High Definition (HD) offers an amazing resolution of 1,920 x 1,080 – in contrast, PAL offers 720 x 576 and NTSC 720 x 480. This means you can enjoy Full HD programmes and films with sharp, dynamic images and brilliant colour.

Master HDR OLED: Panasonic's OLED panels are dubbed 'Master' panels as they are able to produce deeper silky blacks and we are able to control them with more granularity than ever before. This means that thanks to Panasonic's renowned picture quality craftsmanship, together with input from a Hollywood Colourist, we are able to tune them to the utmost of their potential.

HDR10+: New HDR format with dynamic metadata adds extra scene by scene information to help TVs deliver the best true to life pictures.

LED TV: Panasonic panel featuring LED backlight technology and a slim chassis with narrow bezel. The panel provides excellent motion picture quality while consuming less energy, complemented by a design that delivers style to any interior.

The UHDA's **ULTRA HD PREMIUM™** logo identifies products and services that meet or exceed specified performance levels for resolution (4K – 4 times sharper than HD), High Dynamic Range (HDR – brilliant brights, deepest darks), Wide Colour Spectrum (more lifelike colours), and recommendations for immersive audio (multi-dimensional sound) among other performance advances, which enable certified televisions, content and other devices to fully replicate the richness of life's sights and sounds and allow viewers to more accurately experience the content creator's vision. The logo enables consumers to identify TVs, content and other devices that can deliver the high standard for performance and immersive experience set by the UHDA.

PICTURE QUALITY

Cinema Display: Our new Cinema Display is designed to ensure that you see exactly what the filmmakers intended. They combine wide cinematic colours, local dimming to deliver inky blacks alongside subtle gradations, and outstanding levels of brightness.

Picture Tuned in Hollywood: Panasonic's high-end 4K PRO HDR TVs are designed from the bottom up and tuned in Hollywood to deliver picture quality true to the filmmakers' vision. Equipped with Panasonic's cutting-edge Studio Colour HCX^{*} processor with professional 3D look-up table colour management technology and the OLED next-generation panel, 4K PRO HDR TVs capture every nuance and detail of the original film.

THX 4K Display: With Panasonic panels featuring THX 4K Display, you can be sure of experiencing the original image quality of a movie just as the filmmakers intended – in spectacular 4K. These Panasonic TVs have cleared the high standards for 4K set by the THX[®] Certified Display Programme.

Sport Mode/Game Mode: Picture presets optimised for a premium sport and gaming picture performance. Sport mode provides realistic stadium sound and colours while Game mode reduces the input lag for ultimate gaming experience.

Local Dimming: To ensure robust blacks and delicate gradation with any film genre, a range of Panasonic TVs feature Local Dimming. Rich gradation is achieved by matching the backlight control and optimising the brightness level to each area. This enables deeper black expression and displays even tiny details in dark scenes with crisp clarity.

Adaptive Backlight Dimming: Thanks to Adaptive Backlight Dimming you can enjoy crisp dark scenes and high-contrast pictures with a constantly optimised backlight.

Bright Panel: Everything from colour vibrancy and naturalism to sharpness and clarity benefits from extra brightness. So Bright Panel technology injects more brightness into pictures by putting high-efficiency LED lights behind an exceptionally transmissive LCD panel.

Super Bright Panel: Even when the sunlight is fully shining through your living room window, you will enjoy a clear picture on your Panasonic TV screen, featuring Super Bright Panel technology. This high-transmittance panel combines with a high-efficiency LED backlight to produce sharp, crisp images and HDR.

Studio Colour HCX^{*} Processor: Provides Hollywood-tuned picture processing for unprecedented 'as the director intended' accuracy. Built on colour, black level and brightness know-how learned from our reference-quality plasma TVs and professional broadcast equipment, the system has also been tuned by a Hollywood colourist to deliver picture quality true to the filmmakers' vision picture quality true to the film-makers' vision.

Multi HDR Support: Panasonic TVs support now multiple HDR formats, such as HDR10 the standard HDR format for films and UHD Blu-ray discs, and now also Hybrid Log Gamma, the HDR format for broadcast TV developed by the BBC and Japan's NHK.

Up to 2200Hz BMR^{2} 4K IFC:** Enjoy extremely smooth fast-motion 4K images thanks to the high-speed panel and Intelligent Frame Creation paired with advanced backlight scanning technology.

Up to 600Hz BMR: With a Panasonic TV featuring up to 600Hz (BMR), you are assured of smooth, jitter-free reproduction of fast motion images. This drive technology combines advanced backlight technology with enhanced, high-speed drive performance to provide outstanding sports or action movies.

3D: If you want to enjoy hassle-free 3D films at home, then Panasonic has the ideal solution for you. Opt for a high-grade LED TV featuring 3D rendering, and you'll get brilliant 3D entertainment with HD image quality.

ISF CalMAN: The FZ950 and FZ800 support Imaging Science Foundation (isf) calibration settings and new calibration points at 5 per cent and – in an industry first – just 2.5 per cent luminance, providing the greatest control to users where it is most needed, just above complete blackness in low-lit scenes. These new industry-first calibration points will also be supported by Portrait Display's[®] CalMAN[®] software with AutoCal functionality. Panasonic FZ950 and FZ800 are now CalMAN Ready.[™]

Wide Colour Spectrum: By using special Wide Colour Phosphor Technology or OLED panel capable of producing a wider colour range, the spectrum of colour covers more than 90% of DCI standards. Wide Colour Spectrum TVs / Studio Master Colour TVs give you a more subtle, naturally toned colour palette which, unlike most LCD TVs, still looks authentic in any scene.

Absolute Black: To deliver true depth and gradation, this self-illuminating method illuminates each pixel individually, enabling the pixels to control their own luminance to reproduce absolute black.

^{*} HCX stands for Hollywood Cinema Experience / ^{**} BMR: Backlight Motion Rate

Ultimate Contrast: TVs featuring Ultimate Contrast deliver bright images and impressive black levels. To achieve this, it combines innovative direct LED backlight technology with Local Dimming or a cutting-edge OLED panel and intelligent rendering drivers.

Supreme Contrast: High-end Panasonic TVs feature Supreme Contrast, which delivers spectacular levels of deep black with bright, crisp images. It does this by combining cutting-edge Panasonic panel technology with innovative LED backlight featuring Local Dimming.

Brilliant Contrast: To give you great contrast with bright images, deep black levels and low power consumption, many Panasonic TVs feature Brilliant Contrast. It combines innovative panel and LED backlight technologies for an immersive home cinema viewing experience.

High Contrast: Panasonic TVs with High Contrast deliver a genuine home cinema atmosphere. Deep blacks and bright whites make for more dynamic images, with great colour and crisp picture quality.

4K Pure Direct / Pure Direct: During signal transmission to the TV via HDMI, colour information is slightly compromised, resulting in less-than-ideal colour shading and gradation. With Pure Direct, all colour information and full resolution is transmitted to the TV so that the picture retains its crisp, rich colours as intended.

SMART NETWORKING

Media Player 2.0: The renowned Media Player is now available with Panasonic TVs. It lets you easily enjoy your personal multimedia entertainment stored on any USB memory device. The Easy List View and Mix Folder functions make the new 2.0 version even more user friendly. In addition, HDR content is recognized automatically so you don't need to make any changes in the menu.

Web Browser: The Web Browser lets you easily browse the Internet on the TV and enjoy user-friendly features. On Panasonic 4K TVs, you can also enjoy online content in Ultra HD 4K resolution, perfect for viewing maps on screen.

Easy Mirroring: Transfer photos, videos and more from your smartphone, tablet or computer display straight to the large Panasonic TV screen. Built-in Wi-Fi capability lets you easily and quickly connect your Android-based⁴ mobile devices to the TV.

USB HDD Recording: Thanks to this function, available with many new cutting-edge Panasonic TVs, you can hook up an external USB hard disk to record TV shows or films in excellent quality. It also supports Timer Recording, Direct TV Recording and Pause Live TV.

Quattro Tuner: Four Different Types of TV Reception - All in One. Enjoy satellite, cable and TV->IP content in addition to digital terrestrial broadcasting thanks to innovative built-in tuners.

In-house TV Streaming Server & Client^{*3}: You now have the freedom to position your TV anywhere in your home. Simply wirelessly stream broadcasts from a main TV, which acts as a server, to any other TVs, tablets or smartphones in any room (via your home network).

Internet Apps: Cloud-based, the new Internet Apps functionality gives you instant and easy access to the Internet, as well as a wide range of apps, Video on Demand services, games and more.

Wireless LAN built-in: Many Panasonic TVs can be wirelessly connected to your home network. So you can take advantage of Internet Apps and DLNA networking throughout your home.

IP Home Networking: Panasonic TVs with this feature can be controlled by the Home Automation System via your IP home network, allowing you to control the TV via the Home Automation System for easy operation.

Panasonic Bluetooth[®] Audio Link: Play music wirelessly from connected Bluetooth[®] devices. Thanks to the Audio Link feature you can connect BT compatible headphones or playback your favourite music on your TV^{*5} from your mobile device via Bluetooth[®].

EASY OPERATION

Swipe & Share: Unleash the full potential of your smartphone with the Panasonic TV Remote 2 app and Swipe & Share functions. Share and stream personal content like pictures, movies and music to your Panasonic TV simply from Android[™] or Apple-based smartphones.

Quad-Core PRO: This ultra-powerful processor lets you enjoy smart features at high-speed with smooth interaction. Quad-Core PRO is extra efficient, as the picture is processed separately from the features. So you can easily switch between multiple apps and Web pages seamlessly without any lag time.

Vreal Smart PRO: A dedicated multimedia engine, advanced Vreal Smart PRO ensures fast processing of all your digital networking as well as high picture quality. It is the powerhouse for a full entertainment experience, providing added smart features for more versatile viewing.

TV Anywhere^{*3}: Enjoy your favourite multimedia content wherever you are. The Panasonic TV streams live broadcasts or recorded content stored on a USB HDD to your mobile device. (Panasonic Media Center App – free download available for iOS and Android[™] devices.)

Panasonic TV Remote 2 app: With this app, it is easy and fun to share – simply swap multimedia or websites from your smartphone's display to the TV screen and vice versa. This newly enhanced Panasonic app goes a step further, letting you swipe and store your media from your smartphone to the TV.

my Home Screen 3.0: The new streamlined My Home Screen smart TV system helps you find your favourite content in just seconds – be it on live TV, a streaming app, or another device on your home network. You can create your own customised, graphically rich landing page, and even map your most used app to a dedicated remote control button.

Touch Pad Remote: Several new Panasonic TVs come with a smart Touch Pad Remote. Intuitively shaped with a spacious touch pad, it lets you pin your favourite apps and channels to your my Home Screen 2.0 with a touch of the 'my' button.

Voice Assistant: With Voice Assistant, voice operation is virtually just like talking. It enables you to easily speak out keyword searches and even control the TV too.

Voice Guidance: Panasonic TVs with Voice Guidance will verbally inform you of programme information, recording and other settings, and more with clear pronunciation and tone. It provides easy-to-understand operating procedures for people with impaired vision or for elderly people.

^{*3} Not in the UK / ^{*4} Ver. 4.2 and above and Miracast[™] certified / ^{*5} FX700 series and above

LOGO & ICON GLOSSARY: VIDEO / AUDIO

TECHNOLOGY

ULTRAHD™ PREMIUM **Ultra HD Premium:** Is a certification program based on the stringent technical specifications standardized by the Ultra HD Alliance.

4K Networking **4K Networking:** Photographs or videos recorded in 4K resolution can be played through to your 4K television by devices with this logo.

Blu-ray 3D™ **Blu-ray 3D™:** Enjoy your favourite blockbusters in stunning 3D at home. Full HD 3D Blu-ray Disc™ Playback brilliantly reproduces images that leap off the screen, with enhanced depth, lustre and texture.

HCX PROCESSOR **HCX Processor:** Advanced picture processing that includes support for the premium HDR10+ format, and an HDR Optimizer to always provide the best HDR pictures.

HDR OPTIMIZER **HDR Optimizer:** Unique Panasonic feature which adjusts the output picture to optimise it to your TV's capabilities. It improves the details in bright areas of the picture.

4K High Precision Chroma Processor **High Precision Chroma Processor:** The 4K High Precision Chroma Processor expands the usual colour reproduction capabilities of Ultra HD Blu-ray™ to deliver much more nuanced and natural pictures.

4K Direct Chroma Upscaling **Direct Chroma Upscaling:** By upconverting Full HD chrominance and luminance signals directly into 4K signals, this technology achieves higher-precision image processing.

4K Ultra HD Upscaling **4K Ultra HD Upscaling:** This digital video format boosts conventional Full HD media to the next generation of TV resolution, which is four times higher than Full HD – delivering breathtaking image and sound quality.

ULTRA HD Blu-ray™ **ULTRA HD Blu-ray™:** New standard that raises the maximum values for the three picture quality components resolution, luminance and colour reproduction.

HDR10+ **HDR10+:** New HDR format with dynamic metadata adds extra scene by scene information to help TVs deliver the best true to life pictures.

SMART NETWORKING

DAB+ **DAB+:** DAB Plus is latest standard for digital radio broadcasting available in several countries in Europe. Products with this feature offer an outstanding quality for listening to your favourite radio station among a wide choice of channels.

Wi-Fi Built-in **Wi-Fi Built-in:** Many Panasonic video products can be wirelessly connected to your home network. So you can take advantage of Internet Apps and DLNA networking throughout your home.

Web Browser **Web Browser:** As the name implies, the Web Browser lets you easily browse the Internet on the TV and enjoy user-friendly features. And with Web Browser 4K, you can enjoy online content in high 4K resolution, perfect for viewing maps on screen.

Panasonic Music Streaming App **Panasonic Music Streaming App:** Available for all models that feature Bluetooth®, AirPlay or DLNA, this app controls wireless music streaming from any device, be it smartphone, tablet or PC, and recognises compatible wireless speakers.

AirPlay **AirPlay®:** Developed by Apple especially for Apple devices, AirPlay technology lets you stream your favourite music wirelessly from your iPhone, iPad and iPod Touch directly to AirPlay-enabled devices in the same Wi-Fi network.

Digital Audio In **Digital Audio In:** The Digital Audio In offers the possibility to connect other sources with digital connection, such as Blu-ray players, TVs, game consoles, etc.

Chromecast built-in **Chromecast built-in :** Stream audio through mobile and web apps to your Panasonic device.

Google Assistant built-in **Google Assistant built-in:** Access your product's features and content just by talking to it. No external devices required.

Works with the Google Assistant **Works with the Google Assistant:** Can connect with external Google Assistant devices, enabling voice control of your Panasonic product.

NFC™ (Near Field Communication) **NFC™ (Near Field Communication):** Enables easy pairing of the NFC-capable speaker and smartphone via Bluetooth® – at a single touch of the smart device – making troublesome settings a thing of the past.

HDMI x2 **Twin HDMI:** With Twin HDMI™, one signal output is exclusively dedicated to audio so that your home cinema media sounds incredible.

Wi-Fi CERTIFIED **Wi-Fi Certified:** Panasonic products that are Wi-Fi Certified have been specially certified by the Wi-Fi Alliance for their ability to wirelessly connect to your home network.

Internet Apps **Internet Apps:** Cloud-based, the new Internet Apps functionality gives you instant and easy access to the Internet as well as a wide range of apps, Video on Demand services, games and more.

Bluetooth **Bluetooth®:** Bluetooth® is a wireless technology standard for exchanging data over short distances from fixed and mobile devices. This means you can connect any Panasonic Bluetooth®-enabled product with other Bluetooth®-enabled devices without the cable clutter – and in high-quality.

DLNA CERTIFIED **DLNA:** Access videos, pictures and music stored in other rooms and enjoy content throughout the home by connecting compatible devices via DLNA™. The Panasonic TV Remote 2 app lets you transfer content from your iPhone / Android™ tablet or smartphone to your TV, or access your DLNA server from mobile devices.

2x CI+ **2x CI+:** Common Interface Plus (CI+) is a technical specification that adds additional security and features to the proven DVB Common Interface (CI) Standard, which gives CI+-compatible consumer electronic devices access to Pay TV Services via plug-in CI+ modules. Products with this feature offer two slots.

TV>IP SERVER **TV>IP:** This new technology using SAT>IP can flexibly distribute High and Standard Definition TV programmes throughout your home. SAT>IP allows satellite TV distribution by using your existing data network and enables the displaying and viewing of the signals on any multimedia IP device equipped with suitable software.

HIGH-QUALITY SOUND

FLAC **FLAC:** FLAC stands for Free Lossless Audio Codec and is a High Definition audio compression technology without any loss in quality. Panasonic products with FLAC compatibility enable you to listen to compressed music files without compromising on high audio quality.

3.1ch System **3.1ch System:** In addition to the usual right and left front channels and the sub-woofer channel, the systems with 3.1 additionally incorporate a center speaker for even better clarity for voices in the movies.

High Res SOUND™ **High Res Sound™:** A clear listening experience is yours with High Res Sound, available for Panasonic audio products which support a playback frequency range of at least 48kHz.

XBS Master **XBS Master:** Short for Extra Bass System, XBS Master is a unique Panasonic, high-quality sound technology for even more powerful bass sound without distortion.

LincsD-Amp™ **LincsD-Amp (3rd generation):** Based on MASH noise-shaping technology, LincsD-Amp™ markedly reduces jitter and sound distortion that can affect audio clarity – producing pure, brilliant sound.

EASY OPERATION

VIERA Link **VIERA Link:** This feature allows the control of other Panasonic home AV devices via the television remote control. By pressing the VIERA Link button on the television remote, it is possible to turn on and navigate the menus of other VIERA Link equipment. IT requires an HDMI connection between the television and the external source.

Remote Recording **Remote Recording:** Functionality to set up recordings using your smartphone, tablet or PC. Just browse channel listings and select shows to record on your second screen without interrupting your main TV viewing.

TV Anywhere **TV Anywhere:** This functionality sends recordings and live TV broadcasts over the Internet to smartphones or tablets outside the home.

SPECIAL FEATURES: URBAN AUDIO / HIGH POWER AUDIO SYSTEMS

DJ JukeBox **DJ JukeBox:** Interactive feature to record your music to the internal memory via Bluetooth® for personal use and also to select songs from the the internal memory or USB.

AIRQUAKE BASS **AIRQUAKE BASS:** Unique port and bass amplification technology that pushes sounds forward without losing the resonance of sounds generated from behind the woofer unit. This further amplifies the bass to produce extremely powerful sound.

DJ Sampler **DJ Sampler:** Feature that lets you add up different types of sample sounds to match the mood and music of each song.

D.BASS BEAT **D.Bass Beat:** Amplification of the beat for more powerful enjoyment, giving you rhythmical music at its best.

SPECIAL FEATURES: HEADPHONES

IPX4 **IPX4:** Protects from splashing water regardless the direction. Keeps rain and sweat out to keep the music loud and clear.

IPX5 **IPX5:** Protects from water jets no matter the direction. Easy to clean, just hold it under running water to remove dirt and sweat.

*1 scale: A++ to G
*2 THX and the THX logo are trademarks of THX Ltd. which are registered in some jurisdictions. The THX 3D logo is a trademark of THX Ltd. All rights reserved.
*3 Due to network conditions or certain broadcaster restrictions, this function may not be available.
*4 The Web Browser cannot display some web pages correctly. And viewable contents by the Web Browser are subject to the following conditions: viewable contents may vary depend on models, viewable contents may differ from those for PC, viewable contents may be limited.
*5 DLNA, the DLNA Logo and DLNA CERTIFIED are trademarks, service marks, or certification marks of the Digital Living Network Alliance.
*6 HSD (Human Interface Device Profile) compliant keyboards are available. A2DP (Advanced Audio Distribution Profile) compliant audio devices are available. The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Panasonic Corporation is under license.
*7 This feature requires a USB hard drive or flash drive with a capacity of at least 160 GB.
*8 Based on IEC 62087 Ed.2 measurement method.
*9 Energy consumption XYZ kWh per year, based on the power consumption of the television operating 4 hours per day for 365 days. The actual energy consumption will depend on how the television is used.
*10 The terms HDMI and HDMI High-Definition Multimedia Interface, and the HDMI Logo are trademarks or registered trademarks of HDMI Licensing, LLC in the United States and other countries.
*11 Not all the accessories are listed here.
*12 Dimension with recommended pedestal style.
*13 27 Languages (English / German / Italian / Spanish / French / Danish / Finnish / Swedish / Dutch / Hungarian / Czech / Romanian / Bulgarian / Polish / Norwegian / Estonian / Latvian / Lithuanian / Portuguese / Turkish / Greek / Croatian / Slovak / Slovenian / Serbian / Russian / Macedonian)
*14 All models: Supporting HDR does not increase the peak brightness capabilities of the TV panel. Full HD and HD models: The ability to send a non 4K HDR signal via HDMI depends fully on the playback device. The majority of 4K Blu-ray discs require HDCP2.2 on TV to play back HDR, whereas the HDMI input on this TV support only HDCP1.4, accordingly not all HDR contents are guaranteed to be enjoyed on the TV.
*15 Internet apps are provided by their respective service providers, and may be changed, interrupted, or discontinued at any time. Panasonic assumes no responsibility and makes no warranty for the availability or the continuity of the services.
*16 When a Bluetooth device is connected to the TV, it is possible that the Bluetooth audio output may not be synchronized (i.e. be delayed) with relation to the images on the screen. This is not a defect of the TV or the device. The delay time will differ depending on the device.

* Discs recorded and finalized on recording devices. / ** HDMI connection required. / ** For 4K Upscaling playback a TV with same resolution is required. / ** For 4K/60p video, a high speed HDMI cable supporting 18 Gbps bandwidth is required. / ** MP4 (4K/25p, 30p) bit rate up to 100Mbps/resolution up to 3840 x 2160. / ** This function is effective only when reproducing AVCHD data recorded with x.v.Color technology. The function cannot be used with BD-ROM or DVD-ROM discs. HDMI connection is required. / ** CD sampling is done at 176.4/88.2 kHz. / ** Compatible with Android** devices, Ver. 4.2 and above and Miracast certified. For information on whether the smartphone, etc. supports Miracast, contact the manufacturer of the device. / ** Requires broadband Internet service. / ** The external HDD with capacities of 2TB or less in processing NTFS (H.264) data is supported. ** Playback is possible with some external hard disk drives. / ** To enjoy content, you will need to insert a SD (1GB or more of free space/ sold separately). Requires broadband Internet service. / ** Excluding the projecting parts. / ** MKV / JPEG only / ** Enabled by software update. / ** Amazon Video is available in UK, Germany / and Austria only. / ** (FLAC / WAV / ALAC / DSD / WMA / AAC / MP3 / AIFF) / ** Amazon Alexa

Specifications are subject to change without notice. All numbers given here are approximate. / Playability may vary depending on the contents, discs and quality of the recording. For content recorded for your personal use.
