## Crestron Flex Tabletop UC Video Conference System for Zoom Rooms™ Software

- *Front-of-room video conferencing solution for Zoom Rooms™ software*
- *Present, call, conference, and collaborate with the Crestron Mercury® UC Conference Console*
- *Easy to specify and install — no custom design, programming, or software installation required*
- *Network management and provisioning, system alerts, and the pairing of a Crestron Mercury device to the UC-M150-Z system's UC Engine through the Crestron XiO Cloud service*
- *Network management and provisioning and system alerts through the Crestron XiO Cloud service*
- *Connects and communicates securely over any enterprise or SMB network*
- *Enterprise-grade security*
- *Complete kit contains the Crestron Mercury tabletop console, Huddly IQ™ high-definition USB camera, UC Engine, and power supplies — just add a display and mount*

The Crestron Flex UC-M150-Z system provides a complete video conference room solution for use with the Zoom Rooms intelligent communications platform. It supports single or dual video displays, and features the Crestron Mercury® Tabletop UC Audio Conference Console, UC Engine Assembly with UC-ENGINE-Z, and Huddly IQ™ camera.

### Native Zoom Rooms™ Software Experience

The UC-M150-Z system features Zoom Rooms conferencing software that enables audio and video connectivity for easy collaboration and content sharing.

### Crestron Mercury® UC Conference Console

The Crestron Mercury UC Conference Console (CCS-UC-1) is an advanced speakerphone that facilitates conversations with exceptional audio fidelity and pickup using the console's integrated 360° quad microphone array. Its high-powered, full-range speaker produces high quality audio for both voice and program material. Limes Audio TrueVoice® AEC technology achieves transparent full-duplex performance free of distracting echo or noise, and wideband audio codec support allows for full-spectrum, bidirectional voice communication.

Its extra-large, high-definition touch screen makes the Crestron Mercury system easy to use, whether starting or joining an online meeting or presenting and sharing content. Occupancy detection using a patent-pending combination of motion and voice activity provides several benefits, such as monitoring and reporting room usage to the Crestron Fusion® monitoring and scheduling software, or automating the system to power down to save energy when all parties leave the room.

Additionally, the Crestron Mercury speakerphone can integrate with a Crestron control system to enable touch screen control of room lighting, motorized window shades, climate control, AV, and other amenities.<sup>1</sup>

For more information, refer to the [CCS-UC-1](#) product page.

### UC Engine Assembly

All the capabilities of a complete Zoom Rooms video conferencing and content sharing solution are empowered by the UC Engine. For ultimate performance, Crestron employs a powerful Intel® NUC Mini PC running Zoom Rooms software. The UC Engine Assembly (UC-BRKT-100-Z-ASSY) streamlines the installation of a Crestron UC system by assembling the UC-ENGINE-Z, HD-CONV-USB-200, and UC-CONN-HD together on one convenient and ready-to-mount bracket.

The complete assembly can be mounted on the wall, or it can be attached to the rear of the display device. Attachment to the display is accomplished using two of the four bolts that also affix the display to a VESA® compliant display mount. The assembly bracket includes mounting holes on its left and right side edges, spaced at 100, 200, and 300 mm (3.94, 7.87, and 11.81 in.) vertically, to allow for attachment to either side of the display mounting plate on the rear of the display device.

For more information, refer to the [UC-BRKT-100-Z-ASSY](#) product page.

### Huddly IQ™ Camera

The included Huddly IQ camera features an ultra wide-angle 150° diagonal field of view to capture an entire conference room in Full HD 1080p video resolution. High precision aspherical optics, 12 MP CMOS sensor, and advanced video processing ensure a clear video image free from light or noise artifacts. Genius Framing digital autozoom intelligently detects the people in the room and frames them for an optimal view. With Genius Framing, there's no need to control the camera manually or rely on stored presets.

### Network Management and Security

Crestron Flex is an enterprise grade solution, engineered to integrate seamlessly into any Zoom Rooms software deployment. Crestron Flex is ideally equipped for mass deployment throughout any sized corporate, university, medical, military, or government facility.

IoT cloud based provisioning enables complete network configuration in advance of hardware delivery, with touchless updates following installation via Windows® Update. Crestron Fusion® or Crestron XiO Cloud management enables monitoring and logging of room and equipment usage, as well as centralized help desk support. Advanced security features ensure privacy, reliability, and compliance with your organization's IT policies.

### Crestron XiO Cloud™ Provisioning and Management Service

The UC-M150-Z is compatible with the Crestron XiO Cloud™ service, which is an IoT (Internet of Things) based platform for remotely provisioning, monitoring, and managing Crestron devices across an enterprise or an entire client base. The service enables installers and IT managers to deploy and manage thousands of devices in the amount of time it previously took to manage just one. As part of the UC-M150-Z system, the Crestron XiO Cloud service allows for network management and provisioning and system alerts. System updates are controlled by Windows Update. ## Notes:

1. Room control capability (lighting, shades, thermostats, etc.) requires additional equipment and commissioning to be provided by a Crestron authorized integrator and/or programmer. Additional costs may apply.
2. When used without any microphone pods connected, the Crestron Mercury console may be powered using either PoE+ or the included power pack (model [PW-2420RU](#)). If one or two mic pods are connected, the console **MUST** be powered using the power pack. PoE+ cannot be used to power the console if any mic pods are connected. When using PoE+, make sure the network switch supports PoE+ (802.3at Type 2). Regular PoE (802.3af or 802.3at Type 1) cannot be used to power the console. Be advised, the UC Engine component can only be powered using its included AC power adapter. The UC Engine cannot be powered via PoE or PoE+.
3. This feature is not utilized as part of a Crestron Flex system.
