Troubleshooting

If you are having trouble pairing the Crux® Monaco to the iPad®, try the following solutions:

1) Ensure that the battery on both the iPad and the Crux Monaco are fully charged.

2) Ensure that the Bluetooth® on the iPad is set up correctly.

3) Disconnect all other Bluetooth devices from the iPad and then attempt to reconnect to the Crux Monaco.

4) Reset the iPad by holding down the "Home" and "Lock" buttons for 3 seconds.

5) Make sure your iPad is running the latest version of Apple's IOS.

6) If none of these solutions corrects the problem then email BodyGuardz® support at: support@bodyguardz.com

Charging Battery

To charge the Crux Monaco plug the Micro-USB cord into its port and then plug the other end into either your laptop or the iPad's charger. A RED-colored indicator light will glow while the Crux Monaco's battery is being charged. When the battery is fully charged the RED-indicator light will turn off. Use care when connecting and disconnecting the cord to the micro-USB connector. When the Crux Monaco's battery is low, a BLUE-indicator light will start to blink.

Requirements

Operate in temperatures between 32° F and 95° F (0° C to 35° C). Do not operate in non-condensing humidity levels above 95%. Maximum non-pressurized operating altitude is 10,000 ft (3000 m).

Power Save / Deactivate Keyboard

If the Crux Monaco keyboard is idle for more than 2 minutes, it will go into "Power Save" mode. This feature helps to extend the life of the battery between charges. Power save mode will automatically turn off as you once again begin typing on the keyboard. To deactivate the keyboard, simply turn the power off. To reactivate the keyboard, simply turn the power back on.
