

## **Preset Countdown & Hourly Timer FV-WCDO1-W On/Off Wall Control, White Wall Plate Included**

The Preset Countdown and Hourly Timer allows you to preset the fan to run for a specific period of time. It will then shut the fan Off automatically for you, making it an ideal product for tenant and family use. The Preset Countdown and Hourly Timer also includes an advanced, easy-to-use Adjustable Minutes Per Hour (MPH) Fan Timer for ASHRAE 62.2 compliance. It also carries a Commercial Grade quality designation, which means it's engineered to hand current LED lighting and DC motor loads. Additional features include a blue LED light to indicate when the fan is on and a matching wall plate for a decora style design. Can be used to comply with ASHRAE 62.2, LEED and ENERGY STAR®3.0

### **Pre-Set Countdown Timer**

Pre-set the fan timer anywhere from 5 to 60 minutes. When the fan is manually turned ON, the timer will run the fan for the selected period of time then shut the fan OFF automatically for you.

### **Adjustable Minutes Per Hour (MPH) Fan Timer**

Set the MPH fan timer to have the fan come ON for a set amount of time every hour (0-60 mins) for compliance with ASHRAE 62.2. The MPH fan timer provides constant and controlled ventilation every hour. It also sees when you've used the Preset Countdown Timer and will temporarily suspend fan operation to avoid excessive run times. If you want to manually shut the fan off when the MPH timer is running, simply press the fan On/Off button.

### **Manual On/Off Fan Control**

Simply push the switch button for manual on/off operation when immediate ventilation is needed.

### **Commercial Grade 8 Amp Max Load**

Tough and rugged, with a max load capacity of 8 amps, the Preset Countdown and Hourly Timer was engineered to handle current LED lighting and DC motor loads. It also comes with a 2 year limited warranty.
