

Milk Coolers

COLD WALL & FORCED AIR

Continental[®]
Refrigerator

INNOVATIVE DESIGNS FOR YOUR FOODSERVICE NEEDS

Milk Coolers

Refrigerator & Freezer

Cold wall or forced air performance-rated refrigerated milk coolers, either single or dual access, are designed to keep milk products cold prior to serving. Cabinet construction consists of stainless steel top, lid, and door, white finish or stainless steel body and galvanized steel interior (stainless steel interior on -SS models). Reinforced stainless steel floor provides added durability.

Design & Safety

Custom laminates are available to allow your unit to reflect your company branding or an artistic atmosphere. Corner or wrap-around bumpers provide safety in youth-oriented environments.

Performance & Reliability

Performance-run tested for a minimum of 12 hours providing a highly sophisticated temperature analysis recording, exclusive to each cabinet.

FLEXIBILITY

Modifications Made Easy.

At Continental Refrigerator, we know the foodservice industry is an ever-changing environment. We are reminded of this every day through feedback from our customers, both directly and through our network of representatives. In fact, customer feedback has often lead to our custom engineering modifications becoming standard product features.

For this reason, we pride ourselves in delivering feature-rich refrigeration equipment solutions designed specifically for the commercial foodservice market. Whether it's kitchen ambient, food safety, limited space or storage challenges, our products are packed with flexible options that provide **real** operator benefits out of the box. This flexibility, a key differentiator of our products, enables our customers to modify base product features strategic to the way they operate their kitchen or bar environment.

Standard Features & Specifications

Standard Features

Performance-rated refrigeration system

Designed to keep milk cold during serving

Unique forced air flow curtain (Forced Air models)

Environmentally friendly R-290 refrigerant (Forced Air models)

Environmentally-safe R-404A refrigerant (Cold Wall models)

2" non-CFC polyurethane foamed-in-place insulation

Heavy-duty stainless steel lid, door hinges and latches

Built-in, electric condensate evaporator (Forced Air models)

Easily serviceable, bottom-mounted condensing unit

Electronic controller w/ digital display & hi-low alarm

Snap-in lid and door gaskets

Heavy-duty, epoxy-coated steel wire floor racks

Cylinder-keyed security lock

5" swivel casters w/ front locking brakes (factory installed)

Reinforced stainless steel floor for added durability

Floor drain

Engineering, Manufacturing & Quality Control

Continental Refrigerator engineers and builds our Milk Coolers to meet the most stringent specifications demanded by consultants and service operators. All cabinets are constructed of top quality materials and components, attributing to their genuine ruggedness and durability. Our Milk Coolers are designed with enhancements to endure everyday use in typical commercial kitchen environments.

Prior to factory shipping, all models are performance-run tested for a minimum of 12 hours, providing a highly sophisticated temperature analysis recording, exclusive to each individual cabinet. This recording is then supplied, along with the unit's operation manual, for the customer. A final leak test, vibration check, noise level and visual examination is made by our quality control team, to assure a superior product is shipped from our factory.

Cold Wall & Forced Air

Cold Wall and forced air technology allows optimal cooling, keeping milk products cold prior to serving.

Airflow on MC4NS model

Product design and specifications are subject to change without prior notice.
