reddot winner 2023

Design and display overview.

Series 8		accent line	
TFT Touch Display (size: 45mm x 45mm)	TFT Touch Display Plus (size: 70mm x 70mm)		TFT Touch Display Pro (size: 160mm x 70mm)
Stainless steel handle		Carbon-black design	
Air Fry Function			
Home Connect Oven Assistant with Voice Control			

Put your food on display.

New and improved interface for intuitive control. Use the Digital Control Ring, engraved in the glass, paired with clear, vivid images and text to navigate through program options. For a more detailed interface, we have designed the enlarged TFT Touch Display Plus or Touch Display Pro touch screen on selected models.

Digital Control Ring.
Adjust your oven settings intuitively. A simple swipe with your finger and touch to select your desired setting.

Sometimes our best ideas end up in a drawer.

The new multi-functional warming drawers can do much more than just keep food and plates warm. They're perfect for slow-cooking meat, defrosting frozen foods, melting chocolate, drying fruit and proving dough.

Multi-functional Warming Drawers.
Installed either separately or in combination with matching ovens, compact ovens or built-in coffee machines. Keep your hands free with the Push & Pull technology on our models which ensures they are always easy to open. Our warming drawers are available in heights of 14cm and 29cm.

With the Home Connect app, your warming drawers can be controlled on the go. Monitor the on/off status of heating programs, set a timer to turn off the drawer, and personalise your favourite settings.

Vacuum-sealing Drawer.*
Vacuum-seal fresh fruit, vegetables or leftovers and freeze them easily – nutrients, vitamins and flavours are retained longer than with conventional freezing.

*Applies to BVE9101B1.

Sous Vide
Cooks vacuum-sealed food at low temperatures and 100% steam, retaining nutrients and flavours.

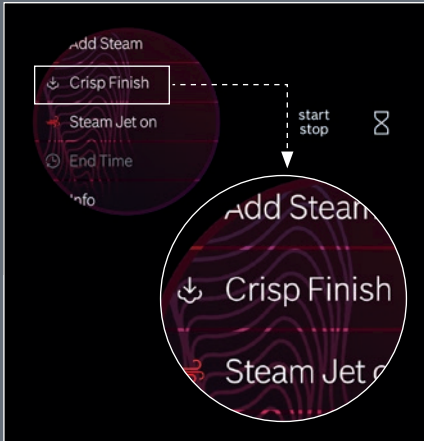

New range, new functions.

Air Fry Function.

Air frying requires less fat than deep frying for a delicious and crispy dish. Making it a great option for healthy cooking at home. Furthermore, no extra device taking up bench space!

Make your own veggie chips by placing thinly sliced veggies on the Air Fry & Grill tray, add a little oil, select the Air Fry Function, and soon you'll have yummy snacks ready to go. The program combines fast air movement and heat from the grill to achieve a crispy finish.

Crisp Finish Function.

Do you want to give your roast a final crispy finish? Now it's easier than ever thanks to the Crisp Function, which removes moisture directly from the oven cavity during the roasting or baking process. Leaving your dish with the extra crispiness you want.

*Available with selected models.

Individual Browning.

Tell your oven what your preferred degree of browning is for meals like lasagna or pizza. Thanks to Artificial Intelligence, in our top of the range model HNG978QB1A, the Oven Camera will detect when compatible dishes are browned to your liking and stop the cooking process. Perfection has never been easier. To enjoy 'Individual Browning', just connect your oven to your registered Home Connect account.

Oven Camera.

Have a quick sneak peek into your oven from anywhere, through your mobile device! The Home Connect app lets you know when your dish is ready and switches off the oven for you. So you can relax and take your meal out when you are ready to eat.

*Available in oven model HNG978QB1A

Steam, the perfect ingredient for healthy cooking results.

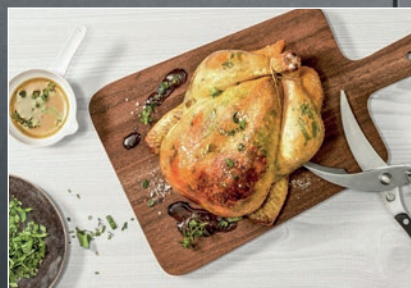

Steam Function Plus.

Vegetables cooked with full steam stay crunchy and retain natural aroma, vitamins and nutrients. The new Steam Function Plus steams at a temperature of up to 120°C so that your dishes are cooked faster and retain even more of their vitamins and nutrients.

Steam Boost Function.

Home-baked bread tastes best. Take control of the steam process by baking with the Steam Boost Function. You can inject individual shots of steam as needed – for bread that's crisp outside and nice and fluffy inside.

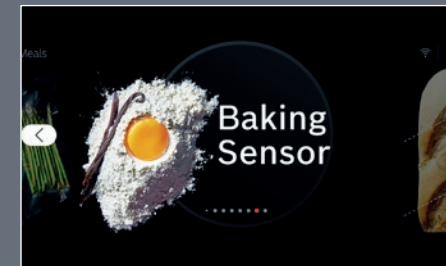

Added Steam.

Enhance your cooking results to create succulent roasts and perfectly browned bread crusts with ease by adding various levels of steam: low, medium or high. The Perfect Steam sensor automatically measures the humidity inside the oven to ensure consistent results.

*Steam Function Plus compared to 100°C steam, BSH laboratory test.

Cooking in the best company.

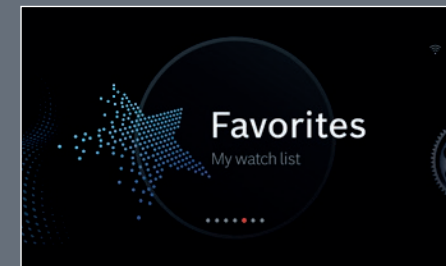

PerfectBake Plus and PerfectRoast Plus.

The new ovens with Artificial Intelligence (AI) learn using Artificial Intelligence from the growing anonymised data of numerous cooking processes. The more you use the oven the more precisely your oven predicts the exact end time of your cooking process. Home Connect and AI support features like PerfectBake Plus or the PerfectRoast Plus on selected models.

Assist Programs.

Not sure which oven setting to choose? The Assist Function is here to help. Simply select the dish you're cooking in the control panel, and your oven does the rest. The ideal heating mode, as well as temperature and time are all set automatically. Perfection at the push of a button.

Favourites.

To avoid having to enter the same settings for your favourite dish over and over again, just save them under 'Favourites' so that you can access them instantly and at any time, both on the appliance and in the Home Connect app. To enjoy 'Favourites', just connect your oven to your registered Home Connect account.

Say hello to the future.

With the Home Connect App, you can control your Wi-Fi enabled Bosch home appliances via your smartphone. Experience remote control and monitoring of your cooking appliance, use voice assistants to help prepare and access a world of new recipes!

Complete your kitchen with a Bosch dishwasher and induction cooktop.

FlexInduction cooktops.
Ideal for pots and pans of all shapes and sizes. With unique coil shapes you get ultimate flexibility and heat distribution. At the touch of a button, combine two induction zones into one large FlexInduction surface.

PerfectFry sensor – for a steak that is just right.

With up to 5 automatic settings, the pan is heated to just the right temperature. Sensors inside the cooktop continuously measure the temperature and maintain it for perfect results. Works with Bosch PerfectFry sensor pan.

DoorOpen Assist with push to open.
Series |8 dishwashers automatically open the door towards the end of the drying phase for a better dry with the added bonus of saving energy.

Zeolith® Drying Technology.
Absorbs water molecules in order to dry dishes quicker with ultimate energy efficiency.
*Selected models.

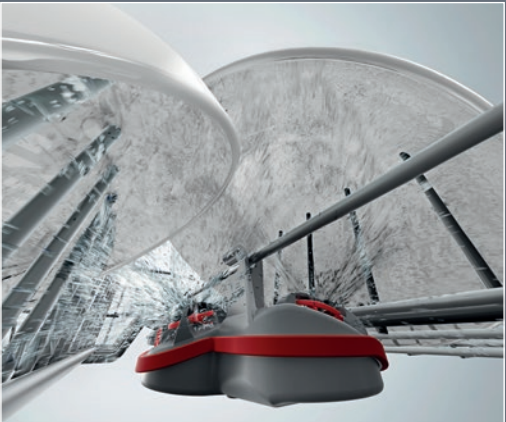

Vario Hinge installation.

The door hinge allows the cabinetry door panel to slide upwards while opening, allowing for reduced plinth height (minimum 5cm).

ExtraClean Zone.

Designed for dishes needing an extra soak in the upper basket. A constant spray from three rotating nozzles allows three times more water on tougher to clean items.
