# Set up your Latitude 5300 2-in-1 Chrome

## About this task

**i** **NOTE:** The images in this document may differ from your computer depending on the configuration you ordered.

## Steps

1. Connect the power adapter and press the power button.

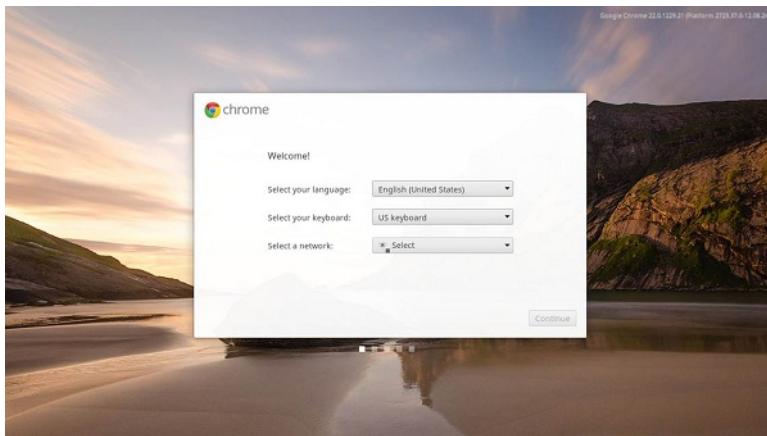

**i** **NOTE:** The images used are for illustration purposes only. The actual computer may vary depending on the region and configuration ordered.

**i** **NOTE:** To conserve battery power, the battery might enter power saving mode. Connect the power adapter and press the power button to turn on the computer.

2. Finish Chrome OS setup.

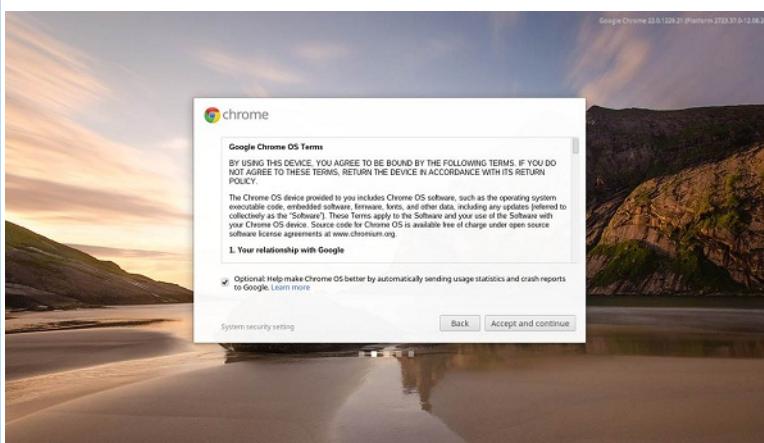

Follow the on-screen instructions to complete the setup. When setting up, Dell recommends that you:

- Connect to a network for Chrome updates.
- i** **NOTE:** If connecting to a secured wireless network, enter the password for the wireless network access when prompted.
- If connected to the internet, sign-in with or create a Google account following the link <https://accounts.google.com/signup/v2/webcreateaccount?flowName=GlifWebSignIn&flowEntry=SignUp>. If not connected to the internet, use **Guest** account.
- a) Select the language settings. On the "Connect" screen that appears, select the language to be used by default. If there is more than one way to type in the language, users may be prompted to select a keyboard input method as well.
  - b) Connect to a network. Select a wireless network from the network menu.

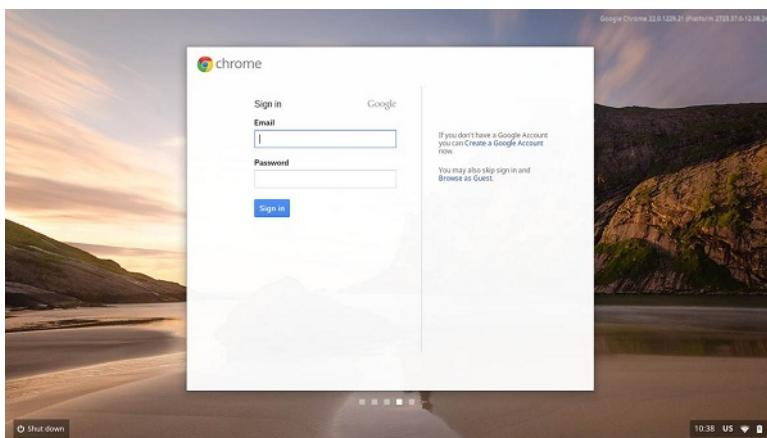

- c) Accept the terms of service with one click. Once connected to a network, Chrome device will then download any available system updates so users automatically get the latest features.

**i | NOTE:** The option to automatically send usage statistics to Google is intended for troubleshooting purposes. No personal information is collected.

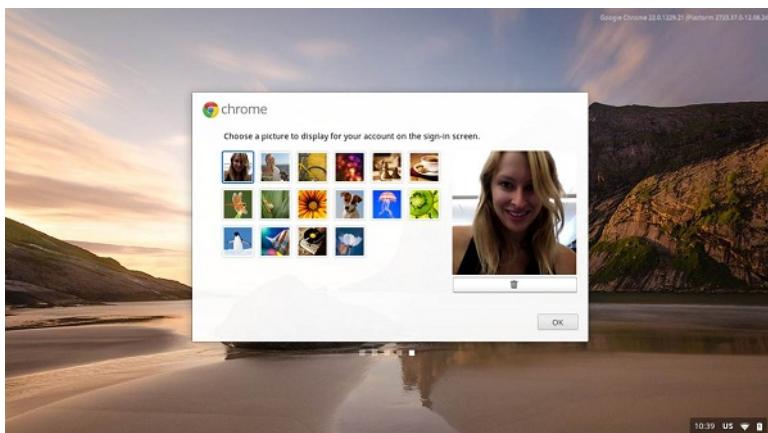

- d) Enroll the Chrome device (optional). If the Chrome device was provided by work or school, users might need to enroll it with the domain before signing in below. Ask the network administrator for instructions before continuing with these steps.  
e) The system will automatically install any available update. This may take a few minutes. The system checks for updates every time it is powered on.  
f) Sign in with Google Account. In the sign-in box that appears, enter the Google Account username and password and click Sign in. Make sure to sign in with your primary Google Account, because this account will be set as the owner account.

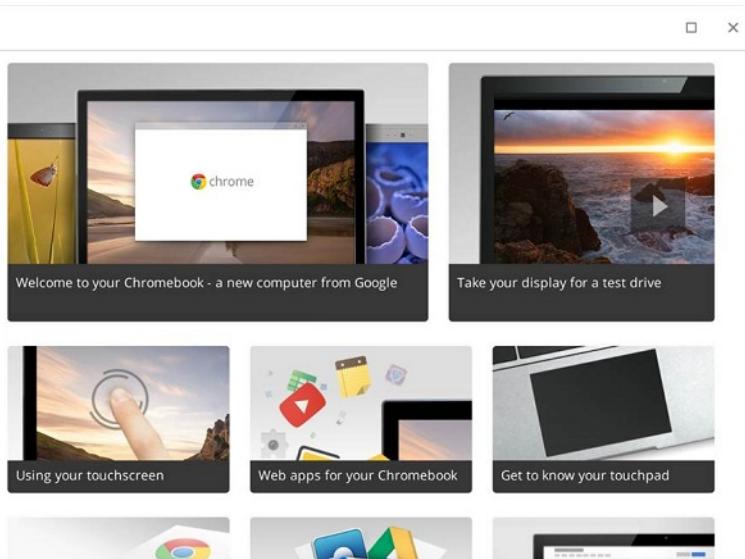

**i | NOTE:** Users can also use the computer without an account by clicking Browse as a Guest on the right.

- g) Set an account picture. This picture will represent the user's account on the main sign-in screen and status area. If users have a camera, there is an option to take a photo with the built-in webcam. If users don't want to take a photo at this time, choose a fun icon instead. Users can always update their picture after signing in.

3. **Get to know your Latitude 5300 2-in-1 Chrome** After setting up the profile, users will be shown the Get Started app. Users can learn about the desktop, discover new web apps, find instructions on how to print, and much more. This app is customized based on the computer model so users will only see information relevant to them

## Archiviazione

 **ATTENZIONE:** Applicazioni Web su Chrome OS, archivia tutti i dati importanti nel cloud. Alcuni tipi di file, come download, cookie e file cache del browser, potrebbero essere ancora presenti sul computer. Chrome OS crittografa questi dati utilizzando un hardware resistente alle manomissioni, impedendo a chiunque di accedere a tali file. Si consiglia di eseguire regolarmente il backup dei dati sul computer, poiché nel caso in cui il computer necessiti di assistenza, tutti i dati andranno persi e saranno irrecuperabili.

# Software

Il presente capitolo descrive i sistemi operativi supportati e fornisce le relative istruzioni su come installare i driver.

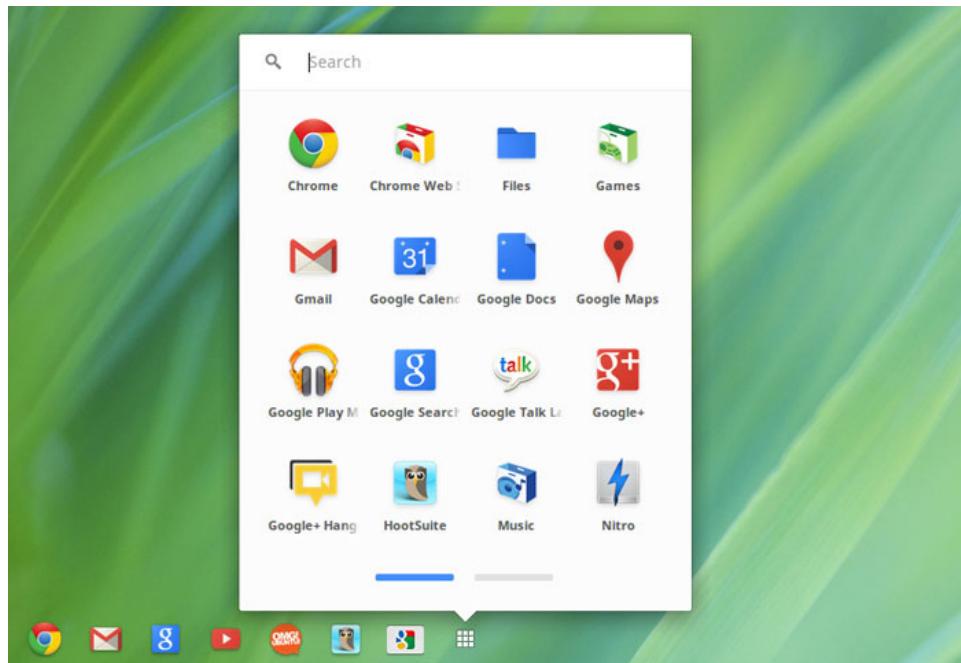

## Argomenti:

- [Operating system](#)
- [Visualizzare le informazioni di sistema](#)

## Operating system

This page contains information about the operating system used by the Dell Latitude 5300 2-in-1 Chrome.

## Chrome OS

Chrome devices are powered by the Google Chrome operating system, based on Google's popular Chrome browser. It has been developed to provide a fast, simple, and more secure computing experience for users who spend most of their time online.

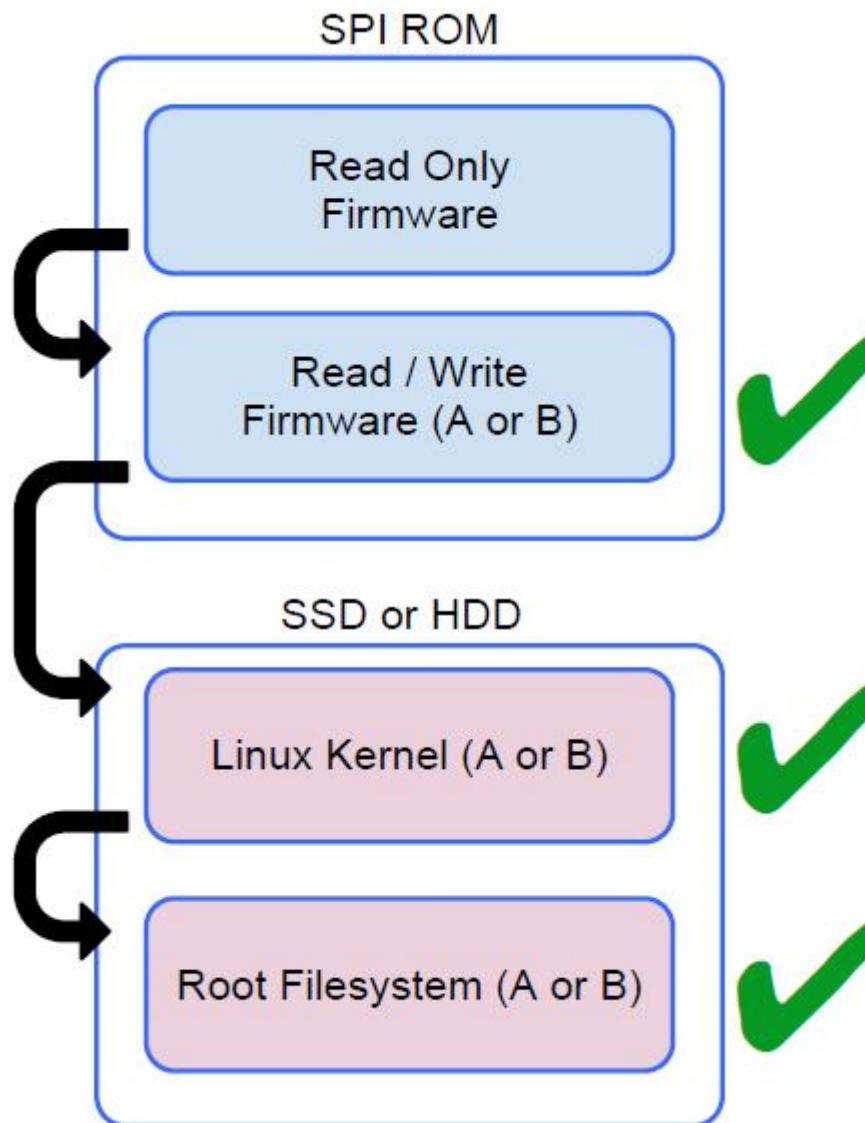

## Key Benefits

- Speed
- Simplicity
- Security
- Updated
- Synchronization
- High power at low cost
- Easy to learn and use
- Documents, calendar, e-mail, contacts, and tasks available online and offline, and all securely backed-up and synchronized in the cloud.
- Access to the Chrome web app store
- Killer web apps
- The latest Intel Core processors
- Fun games

- Built-in support for popular file types and external devices

For more information about the Chrome OS, please visit the [Chrome OS training page](https://www.google.com/chromebook/) <https://www.google.com/chromebook/>.

## Verified Boot

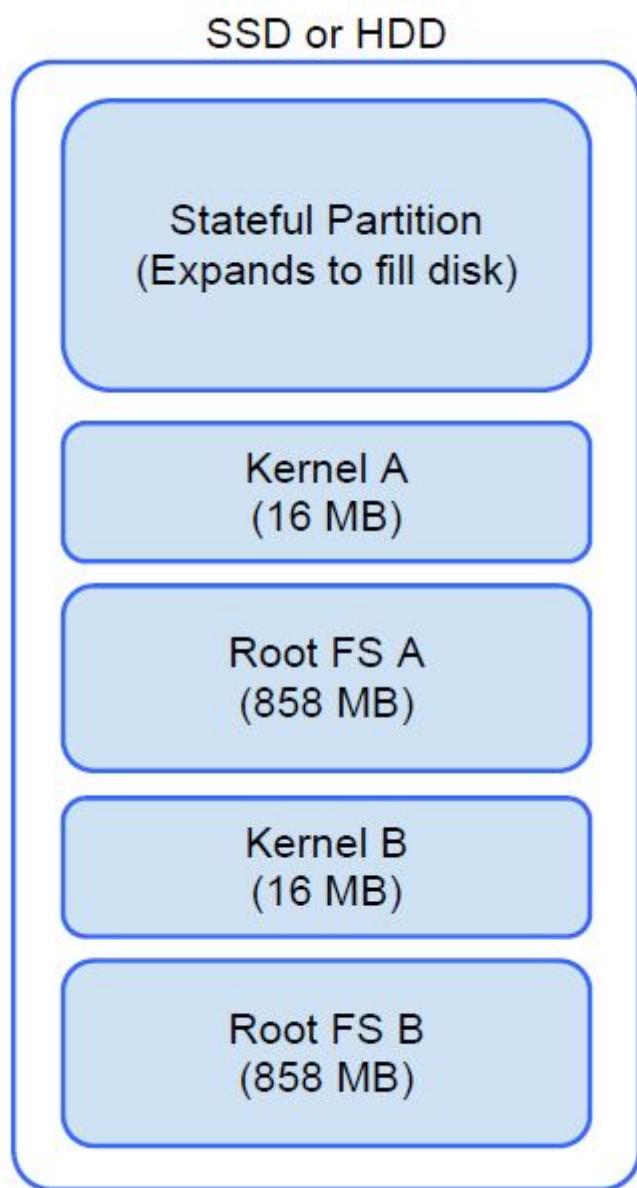

Read Only firmware verifies the integrity of Read/Write (R/W) firmware. R/W firmware verifies the active Linux kernel. During run time, the kernel verifies each block read from disk.

If a verification step fails and there is no backup option, the machine enters recovery mode.

The Developer Mode switch turns off verified boot (at the Kernel stage) to enable users to run Chromium OS (or other OS). The BIOS is always verified.

## Disk Partition Map

There are two copies of Chrome OS on disk: an active copy and a backup copy. Each copy consists of a kernel partition and a root file system. The backup copy is updated automatically in the background. Users only need to reboot. The partition contains encrypted user data and is also used in the factory for storing test software.

# Developer and Recovery mode

Table 21. Developer and Recovery mode

Developer Mode	Recovery Mode
<p>Developer Mode BIOS screen</p>	<p>Recovery Mode BIOS screen</p>

**Developer Mode:**

- Used to boot without verification.
- Can be turned on via key combination during boot.
- Stateful partition is wiped during transitions.
- Used in the factory to boot test image.

**Recovery Mode:**

- Allows a user to reinstall the Chrome OS from a USB key or SD card.
- Recovery mode is entered if verified boot fails.
- A user can force recovery mode via a key combination during boot.

# Coreboot and U-boot Custom Firmware

## Coreboot (x86 only)

- Memory and chipset initialization
- Open-source, except for MRC binary from Intel.

## U-Boot

- Performs verified boot
- Handles recovery and Developer Mode
- Open source code

Normal boot is very fast, as it takes less than 1 second to start loading kernel. Chrome devices does not boot other operating systems such as Windows or OS X.

# Visualizzare le informazioni di sistema

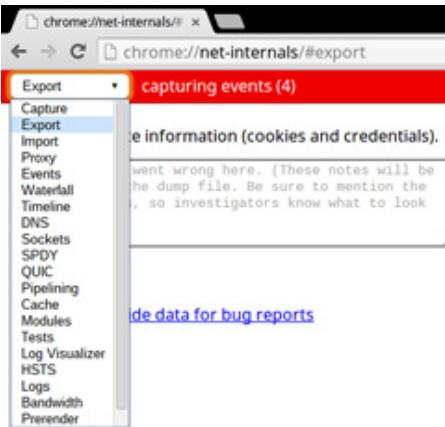

Questa pagina contiene tutte le informazioni sulla visualizzazione delle informazioni di sistema per Dell Latitude 5300 2-in-1 Chrome.

Dell Latitude 5300 2-in-1 Chrome non supporta Dell BIOS. Pertanto vi sono diversi modi per controllare le specifiche del sistema in base alle informazioni che si desidera ricercare. La tabella di seguito elenca alcuni dei metodi più comunemente utilizzati per visualizzare informazioni e specifiche del sistema.

## Touchpad

Questa pagina contiene informazioni sui movimenti del touchpad di Dell Latitude 5300 2-in-1 Chrome.

La seguente tabella elenca alcuni gesti e azioni supportati dal touchpad Chromebook:

**Tabella 26. Comandi gestuali del touchpad**

Movimenti sul touchpad	
movimenti	Spiegazione
	È sufficiente spostare il dito sul touchpad.
	Premere verso il basso sulla metà inferiore del touchpad. Poiché la funzione tap-to-click è abilitata per impostazione predefinita, è possibile toccare rapidamente sul touchpad per far registrare un clic.
	Toccare il touchpad con due dita.

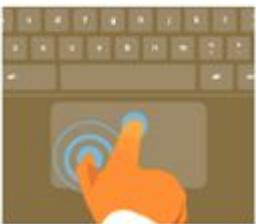

## Movimenti sul touchpad

Posizionare due dita sul touchpad e spostarli in alto e in basso per scorrere in verticale, a destra e a sinistra per scorrere in orizzontale. Se lo scorrimento "Australian" è abilitato, muovere due dita verso l'alto per scorrere verso il basso. La funzione è simile allo scorrimento su smartphone o tablet. Se sono aperte più schede nel browser, è anche possibile scorrere a sinistra o destra con tre dita per spostarsi tra di esse.

### Striscia

Spostare rapidamente due dita verso sinistra o destra per andare indietro o avanti nelle pagine Web o mentre si utilizzano app.

Fare clic sull'elemento che si desidera spostare con un dito. Con un secondo dito, spostare l'elemento. Alzare entrambe le dita per lasciare l'elemento nella nuova posizione.

## Bluetooth

Questa sezione descrive le istruzioni per associare un dispositivo Bluetooth con i dispositivi Chrome.

La tecnologia Bluetooth consente di collegare dispositivi senza fili su brevi distanze. Per utilizzare gli accessori Bluetooth sul Chromebook, per prima cosa verificare se il modello del Chromebook supporta Bluetooth. Sarà quindi necessario abbinalo con l'accessorio.

Per verificare se sia possibile utilizzare gli accessori Bluetooth con il Chromebook, fare clic sull'area di stato nell'angolo in basso a destra, in

cui viene visualizzata l'immagine dell'account. Se viene visualizzata l'icona Bluetooth o nel menu, il Chromebook supporta Bluetooth. Se non viene visualizzata una di queste icone, il Chromebook non supporta Bluetooth. Se il Chromebook supporta Bluetooth, è in grado di connettersi a una vasta gamma di accessori Bluetooth, inclusi i seguenti:

- Tastiere
- Mouse
- Altoparlanti
- Cuffie
- Cuffie con microfono (solo audio)

Per collegare un dispositivo Bluetooth al Chromebook, è necessario associarli. Ecco come:

1. Accedere al Chromebook.
2. Fare clic sull'area di stato nell'angolo in basso a destra, in cui viene visualizzata l'immagine dell'account.
3. Selezionare lo stato Bluetooth nel menu visualizzato.

4. Se Bluetooth è disconnesso, fare clic sull'icona di disconnessione. o fare clic su Abilita Bluetooth nel menu. Il Chromebook inizierà automaticamente a rilevare eventuali dispositivi Bluetooth disponibili.
5. Scegliere il dispositivo da aggiungere dall'elenco di dispositivi Bluetooth disponibili e fare clic su Connetti.
6. Seguire le istruzioni visualizzate per collegare il dispositivo Bluetooth.
  - Se si sta collegando un mouse, solitamente non viene richiesto un PIN. Se viene richiesto un PIN, immettere il PIN del mouse tramite la tastiera del dispositivo Chrome.
  - Se si sta collegando una tastiera, immettere il PIN generato casualmente sulla tastiera che si desidera associare e premere INVIO.

Per confermare che il dispositivo Bluetooth è connesso, verificare lo stato Bluetooth. Il dispositivo, se connesso, verrà visualizzato lì.

**i | N.B.: È il primo utilizzo del Chromebook o Chromebox? Se si sta accendendo il dispositivo Chrome per la prima volta e si dispone di un dispositivo Bluetooth anch'esso acceso, il dispositivo Chrome potrebbe rilevarlo automaticamente e visualizzare passaggi per associarlo. Le istruzioni vengono visualizzate solo se il dispositivo Chrome non ha già un simile dispositivo connesso o se la funzionalità relativa non è integrata, come per una tastiera o un trackpad.**
