Welcome to Issue 199

Highlights

08 Farewell to the 24-pin ATX plug
Richard Swinburne explores the new ATX12VO specification.

10 An Apple games rig?
Rumours about a $5,000 Apple games machine may not be as far-fetched as you think, reasons Tracy King.

16 Intel Cascade Lake-X
We take a look at Intel's latest 10-core, 12-core and 14-core HEDT CPUs.

40 Graphics cards
We charge into the overcrowded streets of the £150-£350 graphics market, from the GeForce GTX 1650 Super to the GeForce RTX 2060 Super, to find which of AMD and Nvidia's new GPUs hit the sweet spots.

56 RGB memory
We put nine of the latest RGB memory kits to the test, not only gauging their performance and overclocking headroom, but also their lighting features.

74 Cyberpunk 2020
With Cyberpunk 2077's launch approaching this year, Rick Lane explores the definition of Cyberpunk in current times.

82 The ultimate air-cooling guide
Where should you put your fans, and where do you want your airflow going? We investigate what really matters when it comes to fans, airflow and cooling, so you can make your PC cool and quiet.

90 VR deep dive
From displays and lenses to controllers and head tracking, we examine the technology under the hood of VR headsets.

96 Hobby tech
Gareth Halfacree interviews Raspberry Pi co-founder Eben Upton about Code the Classics, tests the Pimoroni Heatsink Case for Raspberry Pi 4 and gives his verdict on The Art of Point and Click Adventure Games.

101 Retro tech: Intel 386
Ben Hardwidge examines the impact of Intel's first 32-bit x86 CPU, while taking a look at what made it tick.

106 Using coolant to control fans and pumps
Antony Leather shows you how to use coolant probes to set your water-cooling parts to respond to the temperature of your coolant, rather than the CPU temperature.
