Highlights

Voice-activation function

Voice-activated recording is a convenience feature for hands-free recording. When enabled, recording will start automatically when you start speaking. Recording stop automatically after you stop speaking and restart automatically when you start speaking again.

Plug and play

Just plug your recorder into your PC and play in Windows and Mac OS.

One-touch recording

Press and hold the record button for a moment to switch the recorder on and start recording instantly.

8 GB memory built-in

With the 8 GB of built-in memory, your recorder is able to capture multiple days of continuous recording.

Time-stamped recording

Thanks to time-stamped recording, the date and time of your recordings are added to the sound file, allowing you to easily find and navigate through your file library.

Extra long battery runtime

The batteries of the new recorder last for up to 44 hours for extra long recording sessions.
