Reliably Smart
www.tp-link.com

2 0 2 3

CORPORATE PROFILE

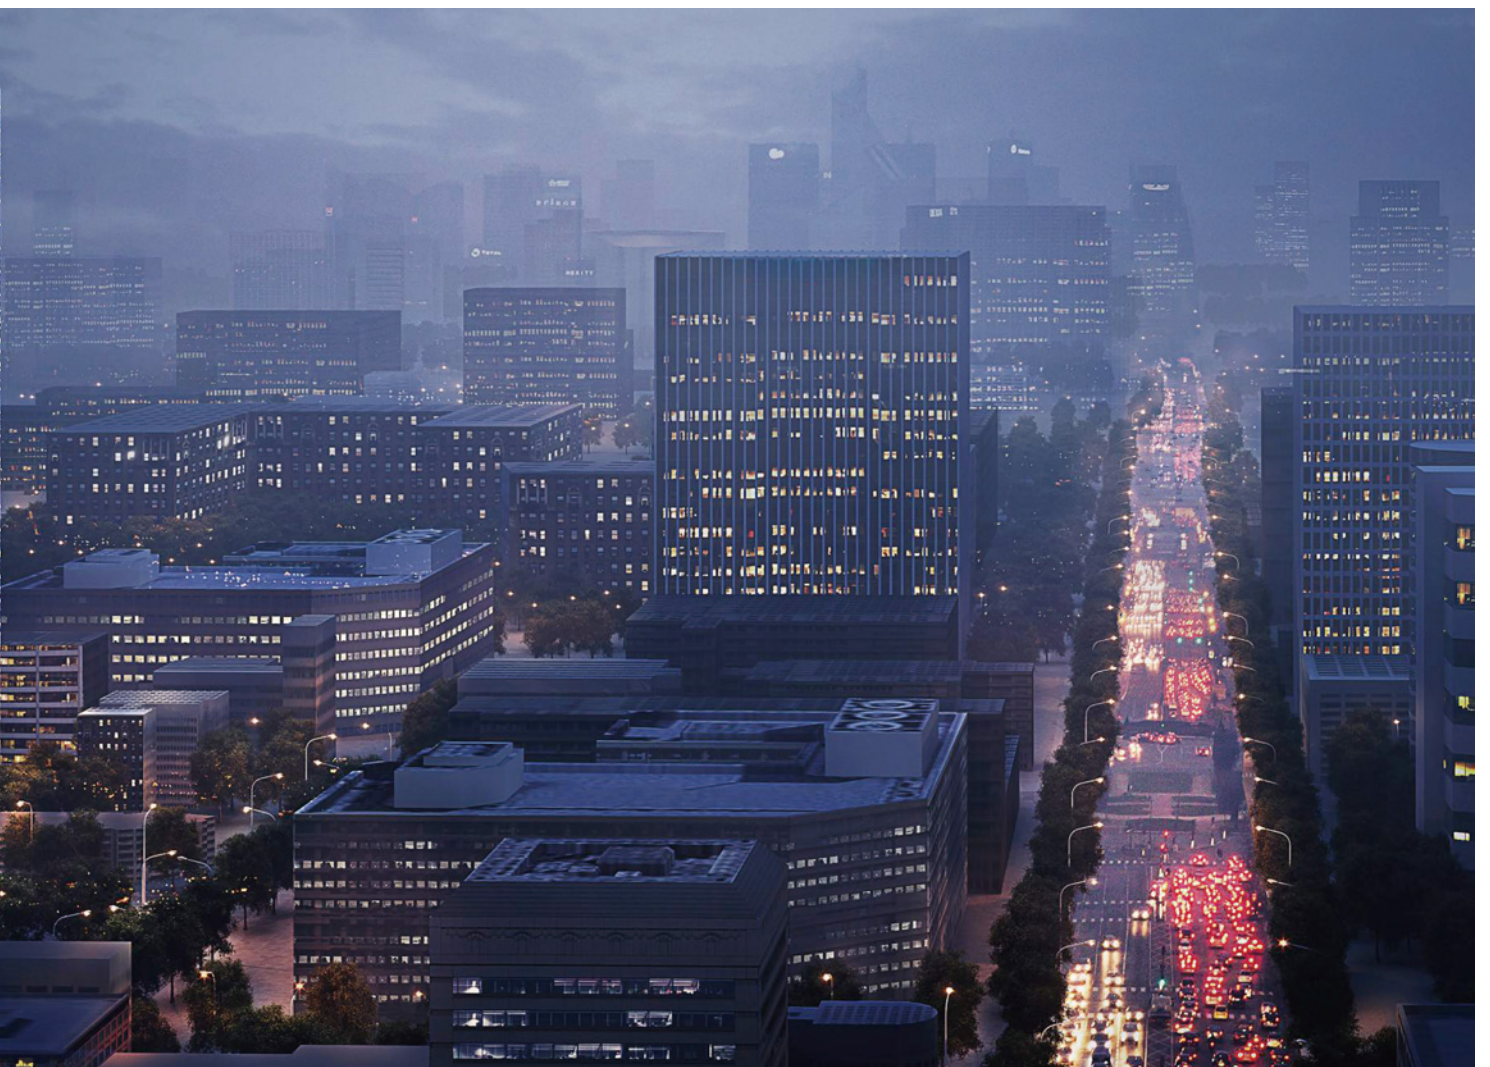

TP-Link serves as the network backbone for homes and businesses worldwide. With humble beginnings in 1996, the company has grown to what it is today: a global leader.

You can find our Reliably Smart devices connecting 1.7 billion people in over 170 countries and regions. These numbers have led analyst firm IDC to rank us as the No. 1 provider of Wi-Fi devices for over a decade.*

We understand the importance of the always-connected lifestyle. Our products feature the latest technologies and are engineered to last. The TP-Link portfolio includes home-business-ISP networking, surveillance, and consumer electronics. Rest assured that you're receiving our proven stability, performance, and value with every device.

As our lives grow ever more connected, TP-Link will continue to pursue excellence and explore the possibilities of tomorrow.

*According to the latest published IDC Worldwide Quarterly WLAN Tracker Report, Q4 2021 Final Release.

What is Wi-Fi 7?

Wi-Fi 7 is the upcoming Wi-Fi standard, also known as IEEE 802.11be Extremely High Throughput (EHT). It works across all three bands (2.4 GHz, 5 GHz, and 6 GHz) to fully utilize spectrum resources. While Wi-Fi 6 was built in response to the growing number of devices in the world, Wi-Fi 7's goal is to deliver astounding speeds for every device with greater efficiency. If you're struggling with constant buffering, lag, or congestion, a Wi-Fi 7 router may be your best solution.

Wi-Fi 7 introduces 320 MHz ultra-wide bandwidth, 4096-QAM, Multi-RU, and Multi-Link Operation to provide speeds 4.8× faster than Wi-Fi 6 and 13× faster than Wi-Fi 5. Unlock more scenarios than ever before.

46 Gbps

Wi-Fi Like Never Before

What Does Wi-Fi 7 Bring?

With the upcoming 7th generation of Wi-Fi, the ultimate online experience will be unleashed.

4.8× Faster

Wi-Fi 7 accelerates throughput up to 46 Gbps.

100× Lower Latency*

Worst Case Latency is 100× better compared to Wi-Fi 6 with 15× better AR/VR performance.

5× Network Capacity*

With 320 MHz and MLO (Multi-Link Operation), Wi-Fi 7 provides up to 5× greater capacity than Wi-Fi 6.

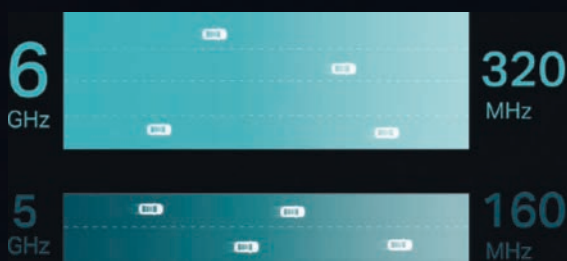

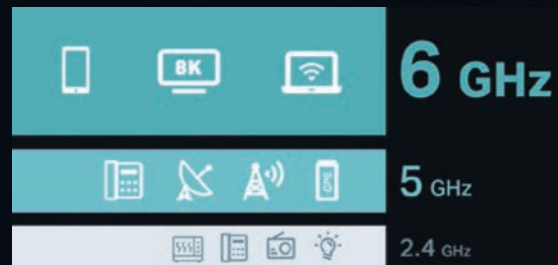

*Data is from Broadcom. Maximum wireless signal rates are the physical rates derived from IEEE Standard 802.11 specifications. Actual wireless data throughput and wireless coverage are not guaranteed and will vary as a result of network conditions, client limitations, and environmental factors, including building materials, obstacles, volume and density of traffic, and client location.

▶ 6 GHz: Express Data on the Latest Band

Access to the 6 GHz frequency brings more bandwidth, faster speeds, and lower latency, opening up resources for future innovations in AR/VR, 8K streaming and more.

• The Wide and Clear 6 GHz Band

Unlike the 2.4 GHz and 5 GHz that are filled with signals from microwave ovens, radio, phones, radar, satellite equipment, and Bluetooth, the 6 GHz band brings cleaner and wider band resources to Wi-Fi.

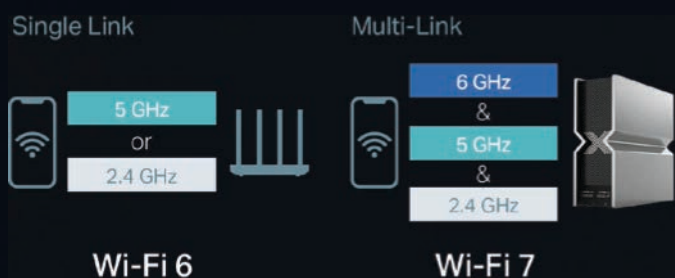

• Up to 320 MHz Bandwidth Brings the Ultimate Speed

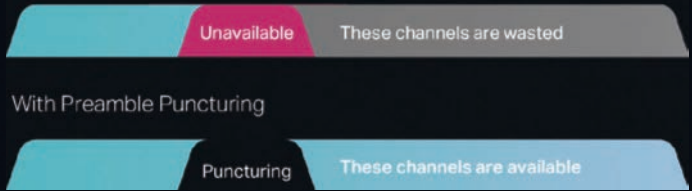

The Wi-Fi 7 protocol standard adds a 320 MHz bandwidth mode for 6 GHz, directly doubling Wi-Fi 6 throughput. Now you can stream 8K in the express lane with double the width, ensuring other devices don't interfere with your streaming.

▶ Multi-Link Operation (MLO) Increases Throughput, Reduce Latency and Improve Reliability

Traditional Wi-Fi devices use a single link to transmit data. With Multi-Link Operation (MLO), Wi-Fi 7 enables devices to simultaneously send and receive data across different frequency bands and channels to increase throughput, reduce latency, and improve reliability for emerging applications like VR/AR, online gaming, remote offices, and cloud computing.

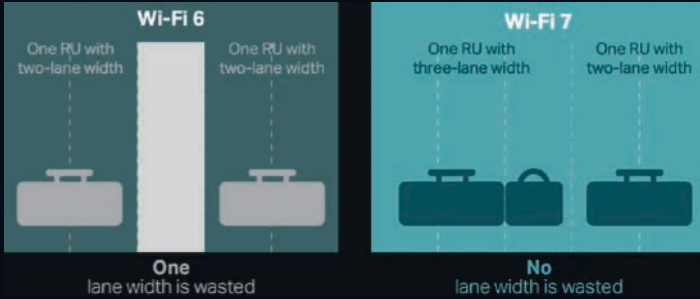

Without Preamble Puncturing

► **Preamble Puncturing — No Waste, No Congestion**

Before, busy channels meant bands could not be fully used. Data would only be sent through the primary channel. Now, with Preamble Puncturing, the interference can be blocked, opening up more channels to use.

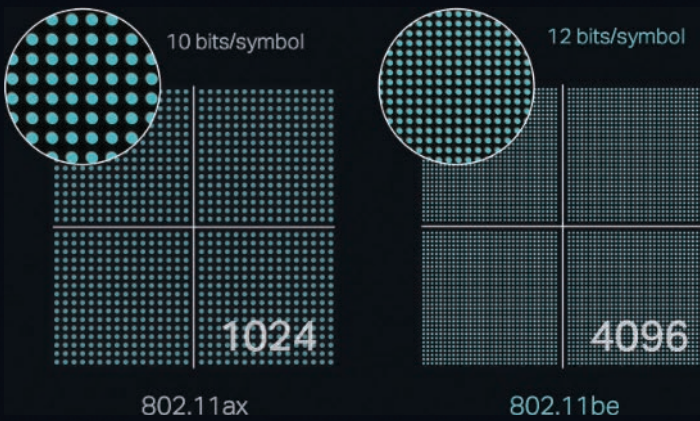

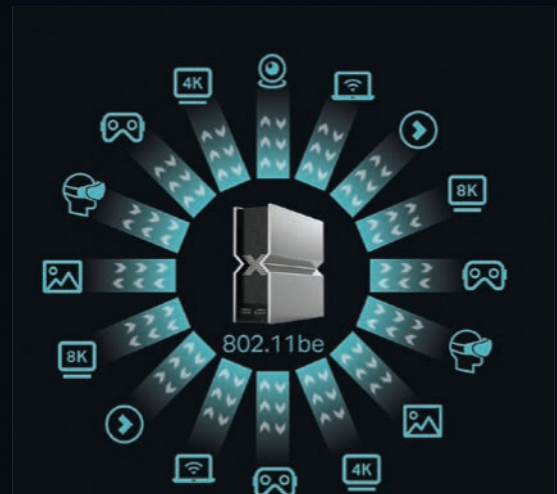

► **Makes Full Use of Every Resource with Multi-RU**

With Wi-Fi 6, each user could only send or receive frames on an assigned resource unit (RU), which significantly limited the flexibility of the spectrum resource scheduling. To solve this problem and further enhance spectral efficiency, Wi-Fi 7 allows multiple RUs to be assigned to a single user and can combine RUs for increased transmission efficiency.

► **Connect to More Devices with 16x16 MU-MIMO**

16 streams are available, double the theoretical physical transmission rate compared to Wi-Fi 6. This allows more simultaneous device connections and increases overall throughput and peak performance.

► **Pack More Data for Higher Speeds with 4K-QAM**

4096-QAM improves raw speeds by 20% compared to Wi-Fi 6's 1024-QAM. This allows you to watch flawless 4K/8K videos and play massive online games without lag.

Wi-Fi 7 Applications

A Real Upgrade for Businesses

An Unstoppable Stream of Entertainment

A Revolution in the Intelligent Lifestyle

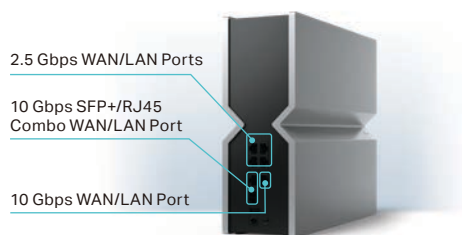

10GbE

10G and 2.5G Multi-Gigabit Ports — Multi-Gigabit Wired Connections and Unlock the Full Potential of Wi-Fi 7

TP-Link Wi-Fi 7 routers, range extenders, and Deco Whole Home Mesh Wi-Fi with 10GbE and 2.5GbE ports

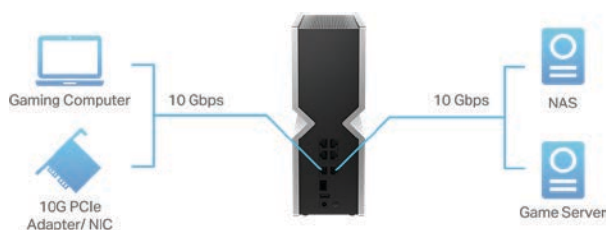

▶ 10G and 2.5G WAN Ports Maximize Internet Access

10 Gbps or 2.5 Gbps WAN ports make full use of gigabit speeds from your local ISP. Break through the 1G bottleneck and drive your devices to peak performance. WAN/LAN support gives you remarkable flexibility to tailor both ports to fit your network's needs.

▶ 10G and 2.5G LAN Ports for Super-Fast Transfer Rates

Transmit stable multi-gigabit connections to the 10G and 2.5G LAN ports. By connecting your wired devices, such as a gaming PC and Network-Attached Storage (NAS) server, experience immersive gaming without lag, transfer files at gigabit speeds, and edit large images and videos from your NAS.

▶ Same Cables, New Speed

Designed to integrate flawlessly into existing gigabit Ethernet network infrastructures, guaranteeing speeds 5x faster* using standard Cat 5e Ethernet cables—no Cat 6 wiring needed. With Cat 6a or higher rated cables, 10G connections can reach up to 100 meters (328 feet).

Cable Type	1G	2.5G	5G	10G
CAT 5e	✓	✓	✓	✗
CAT 6	✓	✓	✓	55m
CAT 6A	✓	✓	✓	✓

▶ 10 / 2.5 Gbps Ports Are Available Beyond Wi-Fi 7 Devices**

5G

The Perfect Fusion of Cutting-Edge Tech for Multi-Gigabit Wi-Fi

The 5th Generation of Cellular Networks + The 7th Generation of Wi-Fi Networks

What is 5G?

5G is the 5th generation of mobile networking, which enables connections for virtually everything.

What Does TP-Link 5G + Wi-Fi 7 Bring?

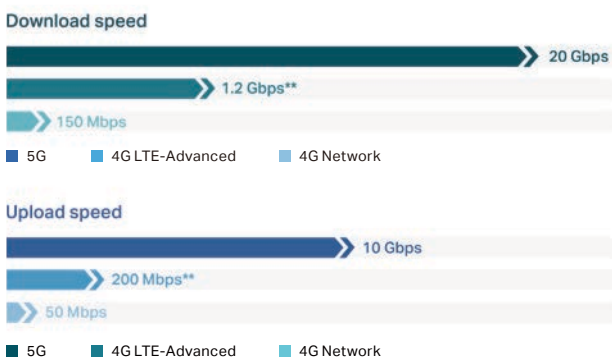

5G brings ultra-fast connections into your home and unlocks true Wi-Fi 7 speeds. Take advantage of the incredible fast upload speeds—upload videos and live stream your life! Just plug in the 5G SIM card and play with the latest generation of Wi-Fi.

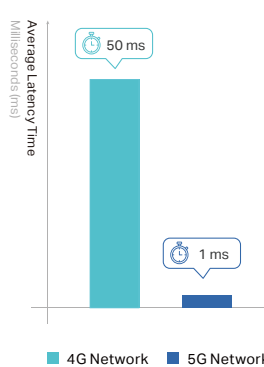

How does 5G work ?

The new **5G NR** air interface will further enhance OFDM to deliver a much higher degree of flexibility and scalability. 5G can operate in both lower bands (e.g., **sub-6 GHz**) as well as **mmWave** (e.g., 24 GHz and up), which will bring extreme capacity, multi-Gbps throughput, and low latency.

17x Faster than 4G, up to 20 Gbps*

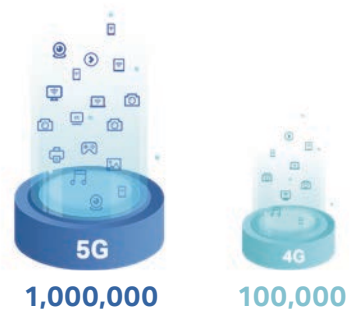

Lower latency, down to 1ms

Denser Connections

The Number of Devices per 1 km² Supports

5G applications

Enhanced mobile broadband

5G mobile technology ushers in new immersive experiences such as VR and AR with faster, more uniform data rates, lower latency, and lower cost-per-bit.

VR

Cloud Gaming

Self-Driving Cars

Remote Operation

Logistics

Smart Cities

Mission-critical communications

5G enables new services that can transform industries with ultra-reliable, available, low-latency links like self-driving cars and remote operation.

Massive IoT

5G can seamlessly connect a massive number of embedded sensors in virtually everything to provide extremely lean and low-cost connectivity solutions.

*20Gbps download speed and 10Gbps upload speed both refer to the theoretical rate of mmWave at 400MHz bandwidth.
 **1.2Gbps download speed and 200Mbps upload speed both refer to the theoretical rate under 4G Cat18.

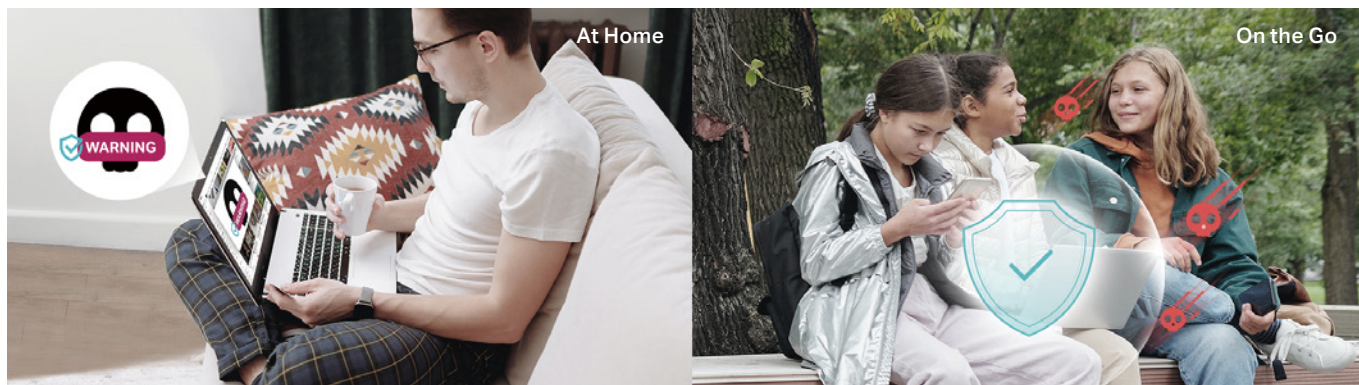

Smart Security Enhances Wi-Fi 7 for Smart Living

Network security is always important to us. With HomeShield, managing your family's internet has never been easier. Many potential risks can be controlled effectively (e.g., private info leakage and internet addiction). HomeShield is a built-in home networking protection kit that covers all security scenarios with its network security, parental controls, QoS, and comprehensive reports. With HomeShield security, safe Wi-Fi 7 experiences will enhance your smart living.

Anywhere Protection – At Home or On the Go

Security: Network Protection, 100% Safeguard

HomeShield provides comprehensive security protection. Simply configure the gateway and achieve whole home network security. With its advanced DPI, it improves its identification capability. HomeShield examines your network by scanning and identifying potential risks, thus improving your network security.

Real-Time IoT Protection

Advanced algorithms protect your IoT and other connected devices from any cyber threats and attacks.

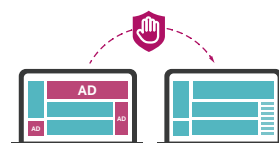

Intrusion Prevention

Identifies and blocks potential threats and fixes vulnerabilities in the network.

Web Protection

Safeguards your family by intelligently preventing access to malicious URLs.

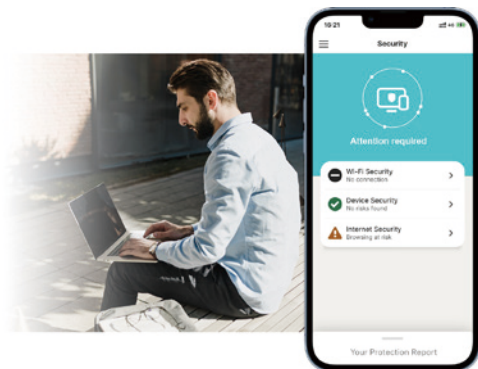

Ad Blocker

Blocks annoying ads and pop-ups, and prevents data tracking to enjoy safer and ad-free online experience.

Exclusive Network Security App, Your On-The-Go Security Helper

Through the exclusive device security app, your devices and personal information are well protected anytime and anywhere.

Device Security

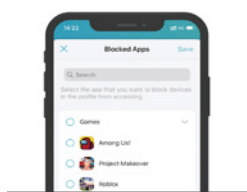

- Antivirus
- Online Threat Protection
- Smart Firewall

Online Security

- Secure VPN Client
- Privacy Monitor

Parental Controls: Protect Your Kids and Maintain Healthy Digital Habits

Age-level filters and online time limits provide your family with personalized and appropriate internet access. With a detailed report of your home network, you can check the sites your children visit and how much time they spend on each. It's a great way to know your children are safe while they're having fun online.

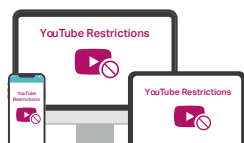

App Blocker

Blocks inappropriate apps by category or by the app itself to ensure children's online experience.

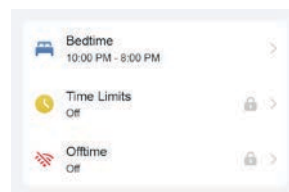

Content Filter and Safe Search

Filter and block content that may not be appropriate for your kids to search for or read by setting keywords like sex, violence, or drugs.

YouTube Restrictions

Block potentially unsafe videos and channels that might contain inappropriate content.

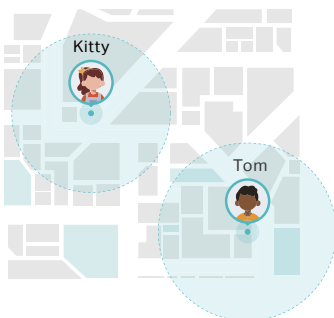

Time Schedule

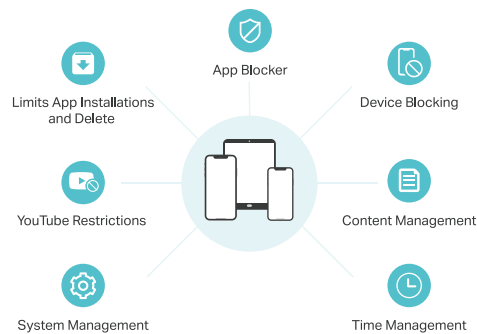

Ensures your family maintains healthy digital habits by setting time schedules and granting extra online time when necessary.

Exclusive App, Comprehensive Network Safety for Kids

The exclusive parental controls app for kids adds the "on the go" scene, allowing parents to track kids' locations, block inappropriate apps/websites, and more, even if they aren't connected to your home Wi-Fi. This helps solve the problem of management permissions when kids are off the internet.

deco™

A True Whole Home Mesh Wi-Fi Solution

Deco Mesh provides your home with an integrated, comprehensive mesh Wi-Fi solution, no matter the size of your home or your internet access type. Flexibly create your whole home mesh Wi-Fi system and enjoy a seamless network experience.

Why is Deco Always the Best?

The Latest and Comprehensive Mesh System

- Improved Coverage
- Smart Antennas
- Optional Backhaul
- Seamless AI-Driven Mesh

Best Mesh with the Latest Advanced Technology

- Wi-Fi 7
- 5G
- 10G Multi-Gigabit Network
- Seamless AI-Driven Mesh
- HomeShield

Diversified Product Line Meets Every Scenario

- Multiple Installation Options
- Full-Scenario for All Your Internet Demands

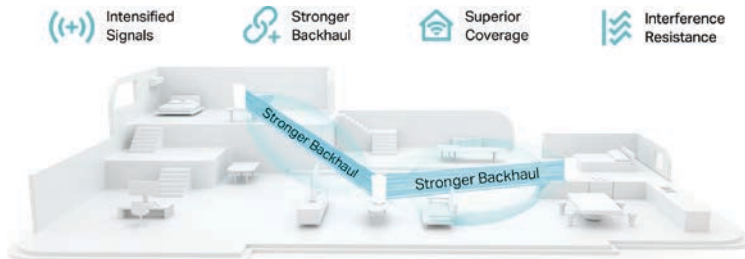

The Latest and Comprehensive Mesh System

Improved Whole Home Coverage

The Deco system eliminates weak signal areas with a single Wi-Fi network that covers every corner of your home with seamless roaming, adaptive path selection, and self-healing. No more searching around for a stable connection, whether you're in the basement, garage, or yard.

Smart Antennas Boost Your Coverage

By using intelligent algorithms, smart antennas auto-detect Deco units and adjust to the most optimal antenna pattern arrays. This way, with smart antennas, Deco creates the ideal network throughout your home with up to 256 signal patterns.*

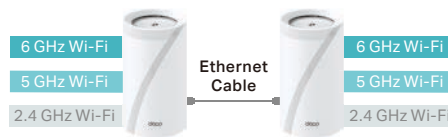

Flexible Backhaul Connection Between Deco Units

Flexible backhaul allows Deco to use wireless, wired, and powerline as a hybrid backhaul at the same time,* ensuring the best connection between Deco units.

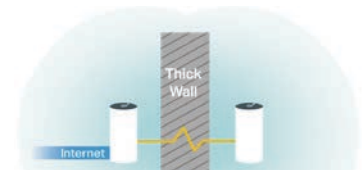

Multi-Band Backhaul

Deco communicates with each unit simultaneously across different frequency bands to increase throughput and coverage.

Ethernet Wired Backhaul

Use Ethernet cables to connect each Deco unit together to create a wired backhaul connection. This way, you'll have a more stable and faster network.

Powerline Hybrid Backhaul

Powerline technology uses your home's electrical wiring to create stronger connections, reducing the impact of walls and other obstacles on signals.

Seamless AI-Driven Mesh

Deco Mesh forms a unified network with a single network name. With built-in AI-Roaming technology, it creates the ideal Wi-Fi solution with its advanced algorithms and self-learning. Walk through your home and enjoy seamless streaming at the fastest possible speeds.

With TP-Link Mesh Technology, every Deco model works together to immerse your whole home in powerful Wi-Fi no matter its size or shape. Want more coverage? Simply add more Deco units.

Whole Home Mesh Wi-Fi 7 Systems

BE33000 Whole Home Mesh Wi-Fi 7 System

Deco BE95

33 Gbps Deco Mesh and Whole Home Multi-Gig Coverage

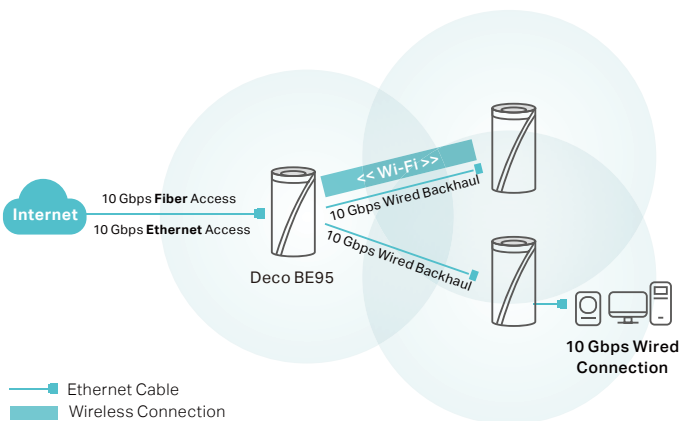

As the flagship high-end Wi-Fi 7 Mesh system, Deco BE95 features the latest 6 GHz band, 320 MHz bandwidth, and 4K-QAM for a combined speed of up to 33 Gbps across 16 streams, bringing whole home multi-gigabit coverage.

Ultra-Fast Quad-Band Experience with 16 Streams

Deco BE95, a Wi-Fi 7 powered quad-band network boosts overall speeds up to a stunning 33 Gbps, ideal for demanding applications like 8K video and cloud gaming.

Whole Home 10 Gbps Connectivity

10 Gbps Wired Connectivity

2× 10 Gbps + 2× 2.5 Gbps ports offer multi-Gig wired connections, so all your internet demands are met.

SPF+ Slot: High-Speed Fiber Connections

1× 10 Gbps SFP+ slot for high-bandwidth connectivity, converting fiber data to Ethernet cable data with an SFP module. This builds long-range point-to-point connections easily.

Wi-Fi 7: The Most Powerful Wi-Fi Ever. Faster Speeds, Lower Latency.

TP-Link HomeShield

- **AI-Driven Mesh** - Provides the ideal mesh Wi-Fi unique to your home and network environment by intelligently learning and improving itself from experience.
- **Improved Capacity** - OFDMA and MU-MIMO technologies enable simultaneous transmissions to over 150 devices.
- **Ultra-Low Latency** - Greater reduction in latency enables more responsive gaming and video chatting.
- **Minimized Wi-Fi Interference** - BSS Color avoids unnecessary slowdowns and minimizes Wi-Fi interference from the neighborhood.
- **Seamless Roaming** - Deco units work together to form a unified network. Walk through your home and stay connected with the fastest possible speeds.
- **Total Security** - WPA3, the next-gen encryption method, creates extra protection for your network.

Full-Scenario Mesh Wi-Fi, Everywhere

AX3000 Whole Home Mesh Wi-Fi 6 System with PoE

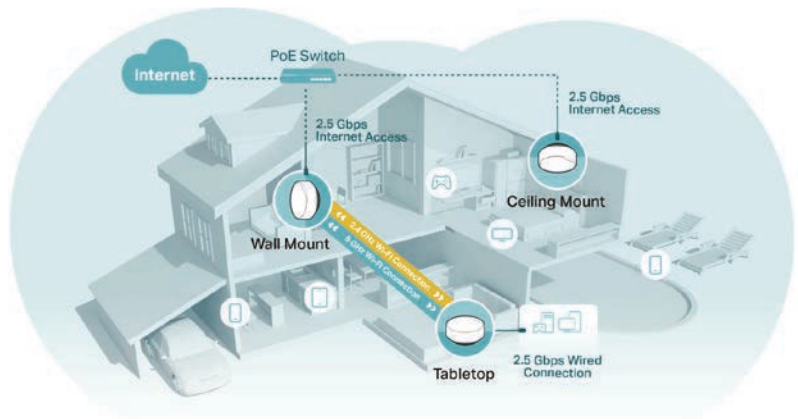

Deco X50-PoE

Flexible in Every Way

Deco X50-PoE lets you install, power, and access the internet exactly as you need. Place it on a tabletop or install it on a ceiling or wall with our adaptive accessories.

- Multiple Installation Options
- PoE/DC Power Supply
- Wired and Wireless Backhaul
- Supports Router/AP Mode

Multi-Scenario PoE Mesh Wi-Fi

Faster, Broader, More Devices

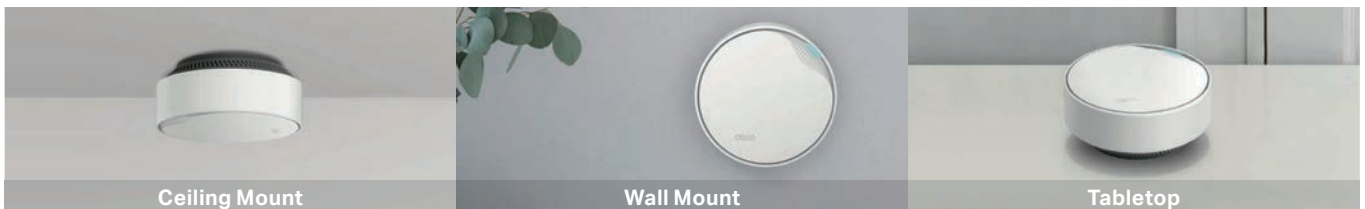

- Wi-Fi 6 Speed up to 3.0 Gbps
- Up to 2.5 Gbps Internet Access
- Connects over 150 Devices
- Covers up to 6,500 ft² / 600 m² (3-pack)

Compact Design, Easy for Installation

Put your Deco anywhere you want

Deco has flexible installation to meet various demand scenarios. Place it on a tabletop or install it on a ceiling or wall with our adaptive accessories.

Take Your Network Outdoors

AX3000 Outdoor/Indoor Mesh Wi-Fi 6 Unit

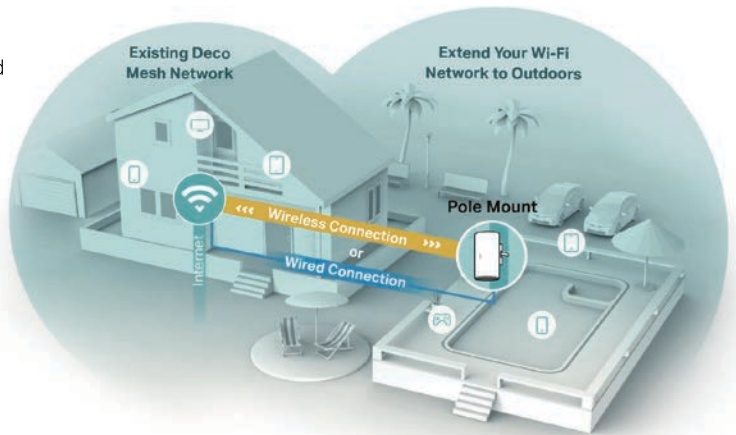

Deco X50-Outdoor

➤ Ideal for Fast Outdoor Wi-Fi

Deco X50-Outdoor features a weatherproof enclosure and solid operating temperature, enabling strong Wi-Fi signals outside. Flexible installation and power supply make it even easier for outdoor use.

- IP65 Waterproof & Dustproof
- Great Operating Temperature Range
- Multiple Installation Options
- Supports PoE/AC for Easy Power Supply

➤ Faster, Broader, More Devices

- Wi-Fi 6 Speed up to 3.0 Gbps
- Works with All Deco Models
- Connects over 150 Devices
- Covers up to 2,500 ft² / 230 m² (1 unit)

➤ IP65 Waterproof & Dustproof, Ideal for Outdoors

➤ Put your Deco Anywhere You Want

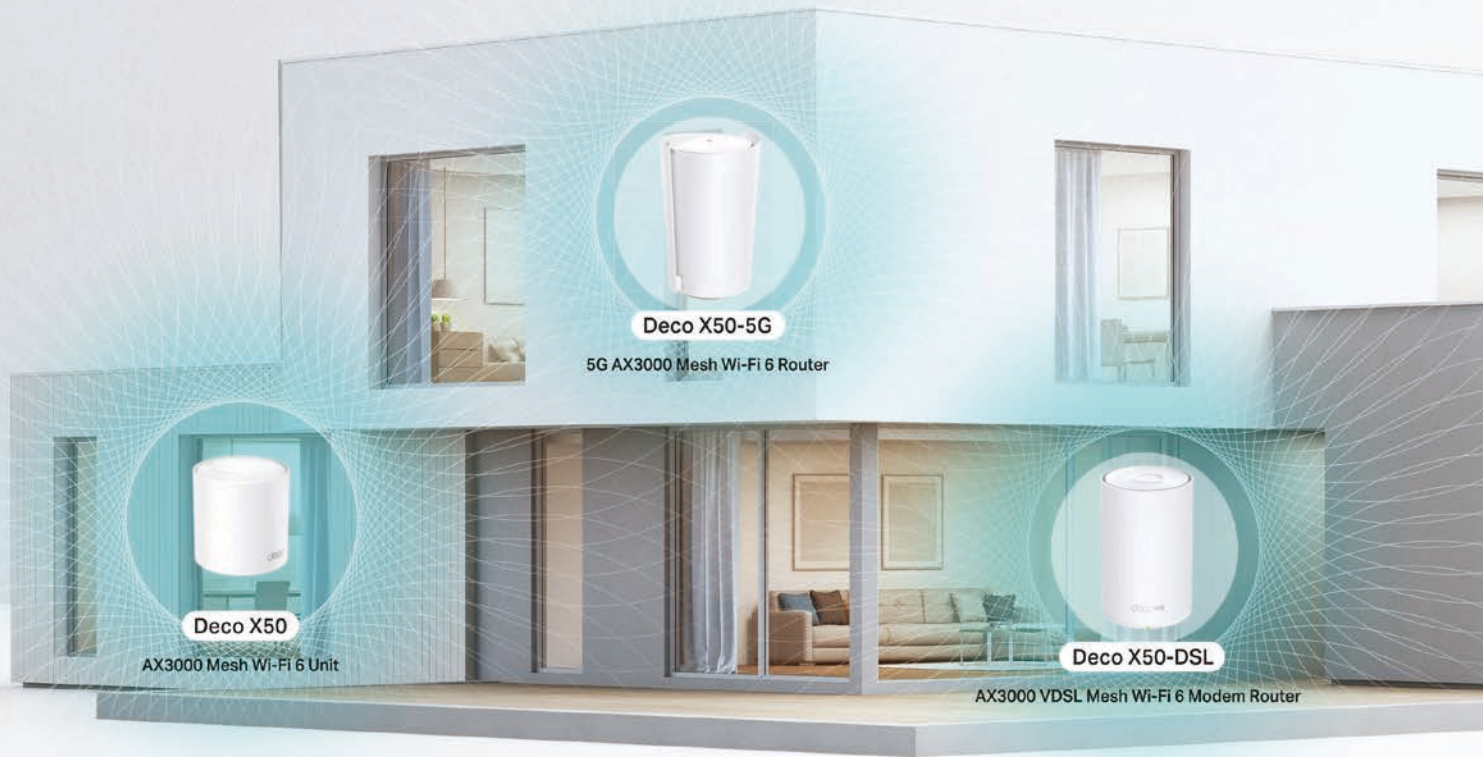

Deco has flexible installation to meet various demand scenarios. Place it on a tabletop or install it on a pole or wall with our adaptive accessories.

Deco Mesh Hybrid Gateway System

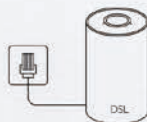

More Ways. Less Hassle.

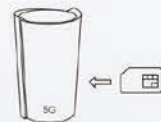

1 Ethernet Cable

2 DSL Phone Cable

3 SIM Card

Versatile Connectivity:

Connect anyway you want with 5G LTE, DSL, or Ethernet broadband access.

5G Failover Backup:

Automatically switch to backup 5G when your access fails, ensuring a reliable connection at all times.

Note: 5G failover backup feature will be supported in subsequent software updates.

Compatible with All Deco Models:

Works with any Deco unit to form a unified whole home network. Extend your Wi-Fi coverage simply by adding more Decos.

5G/4G Whole Home Mesh Wi-Fi 7 Systems

Latest Technology Ultimate Experience

BE11000 Whole Home Mesh Wi-Fi 7 System

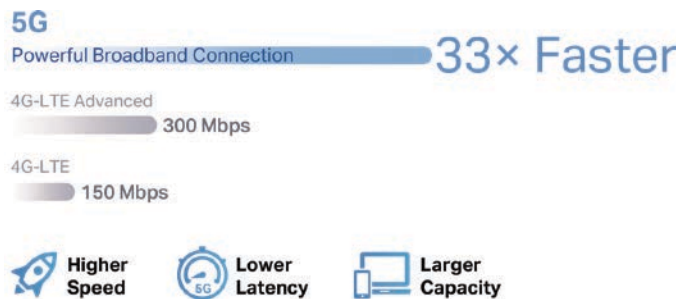

Deco BE65-5G

Wi-Fi 7 **5G**   

Revolutionary Speed

5G greatly boosts download speeds up to 5.0 Gbps (based on R15 Sub-6GHz) – 16.7× faster than 4G LTE-Advanced and 33× faster than 4G LTE. It brings fast, responsive network connections to tomorrow's mobile devices, with only 1 ms latency.

Wi-Fi 7 Mesh: Faster, Broader, For More Devices

BE11000 Tri-Band Wi-Fi

Speeds up to 11 Gbps

Covers Every Corner of Your Home

Broader Whole Home Coverage

Up to 320 MHz Bandwidth on 6 GHz

Wider Bandwidth Brings the Ultimate Speed

Connects Numerous Devices

Connects over 200 Devices

Got a SIM Card? Then Plug and Play

With an integrated 5G modem and built-in SIM card slot, all you have to do is to insert a nano SIM card and turn on the router.

Full 2.5 Gbps Wired Performance

4× 2.5 Gbps WAN/LAN ports offer up to 2.5 Gbps wired connection to meet all of your internet demands.

Save Clients' Power

Target Wake Time helps mobile devices, especially IoT devices, consume less power during data transmission cycles to prolong battery life.

Wi-Fi Routers

Based on self-developed Archer system 3.0, TP-Link offers a comprehensive range of Wi-Fi routers, engineered to meet all your networking needs. App-based setup and helpful features for the whole family give you complete control.

- The industry's most stringent stability testing standards, constantly improve stability.
- All products undergo rigorous performance testing.
- Explore the performance limits of contemporary Wi-Fi routers.
- The brand-new and more secure Homeshield 3.0.

For faster, stronger, and more reliable Wi-Fi, look no further than TP-Link.

EasyMesh

The Simplest Way to Create Whole Home Multi-Gigabit Mesh Wi-Fi 7

Experience strong, stable, and seamless wireless connections throughout your home with EasyMesh.* A whole home mesh standard works across different access points for ultimate flexibility.

More than Wi-Fi 7 routers and ranges extenders, the majority of TP-Link Wi-Fi 6 and Wi-Fi 5 routers and ranges extenders also support EasyMesh to easily set up Whole Home Mesh Wi-Fi.

Unique Home Mesh Solution

Seamless Wi-Fi Connections with One Network Name

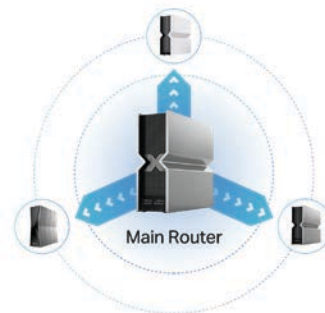

Connects mobile devices to your routers or extenders that provide the best coverage. Devices compatible with EasyMesh also share a single Wi-Fi name so you stay connected in every room.

Stability Meets Flexibility

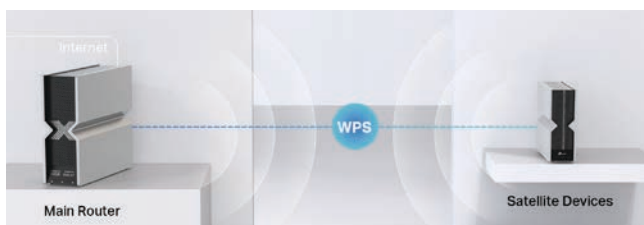

Choose from a wide range of models to build your solid whole-home mesh network with EasyMesh-compatible TP-Link routers.

- ✓ Main Router + All EasyMesh-Compatible Routers / Range Extenders
- ✓ Main Router + All OneMesh™ Range Extenders

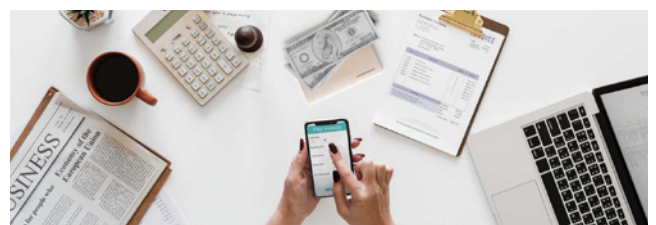

One-Click Settings

Simply choose your main router and satellite devices, then press their WPS buttons.² Seamless Mesh Wi-Fi is as simple as that.

Every Dollar Goes Farther

No need to scrap your entire system when upgrading your coverage. Just add EasyMesh-compatible access points as needed to your existing Wi-Fi network.

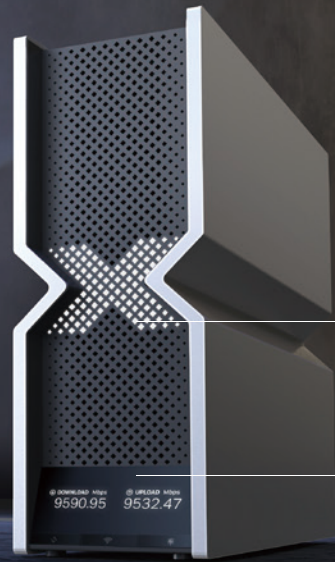

1. Routers and range extenders must support EasyMesh or OneMesh™. Firmware upgrades may be required.
2. Satellite routers should change to satellite mode.

The Face of the 10G+ Era

2.2 GHz Quad-Core CPU

Up to 24 Gbps Quad-Band Wi-Fi and 10 Gbps Wired Connectivity

Top-Notch Design to Match Your Quality of Life

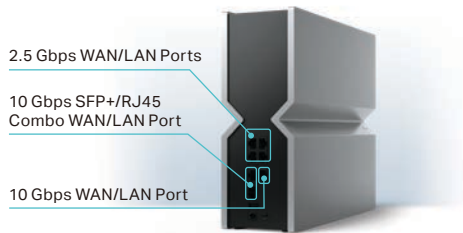

Quad-Band BE24000 Speeds for Multiple 8K

Stream multiple 8K videos with BE24000 Quad-band Wi-Fi speeds. Boosted by 4096-QAM and HE320, BE900 delivers astonishing wireless speeds with ultra-wide bandwidth enabling multiple online media playing instantly.

10G Multi-Gig Internet Connection

Don't waste your gigabit internet access. BE900 is equipped with a 10 Gbps WAN/LAN Port, a 10 Gbps SFP+/RJ45 Combo WAN/LAN Port, and four 2.5 Gbps LAN ports, ensuring maximum flexibility and boosted throughput. With SFP+, NAS can be provided with high-speed fiber data transmission.

Cutting-Edge Processing

Combining Quad-band Wi-Fi with a powerful Quad-Core CPU, Archer BE900 provides sixteen simultaneous data streams to open up more bandwidth and help your devices operate at full speed.

Wi-Fi 7: Faster Speeds, Lower Latency.

Wi-Fi 7 is the upcoming Wi-Fi standard. It utilizes the 2.4 GHz, 5 GHz, and 6 GHz frequency bands to deliver higher Wi-Fi speeds, lower latency, higher efficiency and stronger anti jamming.

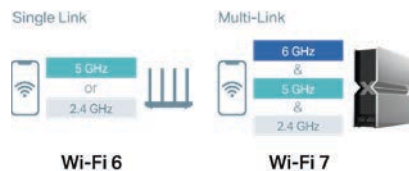

More Throughput

Up to 24 Gbps Wi-Fi 7 speeds and new 320 MHz bandwidth mode for 6 GHz double throughput. 4K-QAM and MLO further increase throughput.

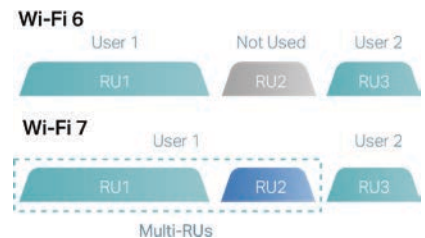

Less Latency

Multi-Link Operation (MLO) enables your network to simultaneously send and receive data over multiple radio bands to create a single aggregated connection, reducing latency and increasing anti jamming.

Higher Efficiency

Multi-RU increases data transfer efficiency by introducing a more flexible way for Resource Unit (RU) allocation. Preamble Puncturing, MLO, and flexible bandwidth combination further increase efficiency.

*The EasyMesh function is still being developed on some models and will be supported in subsequent software updates.

- **Wi-Fi 7** - Delivers higher Wi-Fi speeds, lower latency, higher efficiency, and stronger anti jamming.
- **6 GHz** - Works on the 6 GHz band with more bandwidth and higher efficiency.
- **320 MHz Bandwidth Channel** - Extending channel width to 320 MHz enables many more simultaneous transmissions, doubling Wi-Fi throughput.
- **4K-QAM** - Improves raw speeds by 20% compared to Wi-Fi 6's 1024-QAM.
- **Multi-Link Operation (MLO)** - Increases throughput, reduces latency, and improves reliability.
- **OFDMA** - Greatly increases the number of connected devices by assigning channels to more devices simultaneously.
- **MU-MIMO** - Simultaneously transfers data to multiple devices for faster performance.
- **Smart Connect** - Automatically assigns each device to the best available band to optimize network performance.
- **Beamforming** - Concentrates signals to connected devices and delivers highly efficient wireless connections.
- **HomeShield** - TP-Link's premium security services keep your home network safe with cutting-edge features for network and IoT protection.
- **Works with Alexa** - Control your router using voice commands with Amazon Alexa.
- **EasyMesh-Compatible** - Flexible create a whole home Mesh network.*
- **USB 3.0 Ports** - Lightning-fast media sharing, up to 10x faster transfer speeds than USB 2.0.

*The EasyMesh function is still being developed on some models and will be supported in subsequent software updates.

Unrivaled Speed for Multiple 8K

Stream multiple 8K videos with AXE16000 quad-band Wi-Fi speed. Boosted by 1024-QAM and HE160, AXE300 delivers astonishing wireless speeds with ultra-wide bandwidth enabling multiple online media playing instantly.

Cutting-Edge Processing

Combining quad-band Wi-Fi with a powerful Quad-Core CPU, Archer AXE300 provides sixteen simultaneous data streams to open up more bandwidth and help your devices operate at full speed.

Multi-Gig Wired Performance

Equipped with two 10G ports—one RJ45 port and a RJ45/SFP+ combo port—Archer AXE300 provides flexible support for both fiber and copper connections. AXE300's additional 2.5G port, 4 Gigabit ports, and USB 3.0 port make it an ideal solution for future-proofing your home network.

Wi-Fi 6E: Higher Efficiency, Greater Capacity

Wi-Fi 6E means Wi-Fi 6 extended to the 6 GHz band, a newly-opened frequency that brings more bandwidth, faster speeds, and lower latency. Wi-Fi 6E utilizes the capabilities of 6 GHz to enable high-bandwidth applications that require faster data throughput such as high-definition video streaming and virtual reality, as well as lower latency connectivity for online gaming applications.

Great Coverage
6× High-Performance Antennas with
Beamforming

- **Parental Controls** - Manage when and how connected devices can access the internet.
- **3×3 MU-MIMO** - Simultaneously transfers data to multiple devices for faster performance.
- **Guest Network** - Keep your main network secure by creating a separate network for visitors.
- **Access Point Mode** - Transforms a wired network into a wireless one.
- **IPTV** - Supports IGMP Proxy/Snooping, Bridge, and Tag VLAN to optimize IPTV streaming.
- **WPA3** - Refined security for your network with the latest WiFi security protocol.
- **EasyMesh-Compatible** - Flexible create a whole home Mesh network.*
- **Gigabit Ports** - All Gigabit Ethernet ports deliver lightning-fast wired performance.
- **TP-Link Tether App** - Provides simplified control and management from your iOS or Android smartphone.

* The EasyMesh function is still being developed on some models and will be supported in subsequent software updates.

Portable Routers

TL-WR902AC

AC750 Wi-Fi Travel Router

- AC750 Wi-Fi**
Strong, Fast Connections for HD Streaming on All Your Devices
- USB Port**
Multifunctional USB Port for File Sharing and Charging
- One Switch for Multiple Modes**
Perfect for Wi-Fi at Home, Your Hotel Room, or on the Road

TL-WR802N

300 Mbps Wireless N Nano Router

- N300 Wi-Fi**
Ideal for Video Streaming and Online Calling
- Power It with a Power Bank**
Flexibly Turn It into a Mobile Router with a Power Bank
- Nano Design**
Slim and Small, Easy to Carry Anywhere

- **Multi-Mode** - Supports Wireless Router, Client, Range Extender, Access Point, and Hotspot modes.

Access Points

TP-Link Access Points help your existing wired network turn into a wireless network, allowing you to connect all of your favorite wireless devices.

Ideal for Small Businesses

AX3000 Gigabit Wi-Fi 6 Access Point

Wi-Fi 6 | Dual-Band | Gigabit Port

TL-WA3001

TL-WA3001

AX3000 Gigabit Wi-Fi 6 Access Point

AX3000 Dual-Band Wi-Fi
2402 Mbps (5 GHz) and 574 Mbps (2.4 GHz)

160 MHz Channel Bandwidth
Expands Bandwidth to Double the Network Speed of Traditional 80 MHz

Refined Security
WPA3 Encryption

High-Speed Internet Access
Gigabit Ethernet Port

Upgraded Marketing
Captive Portal Supported

TL-WA1201

AC1200 Wireless Access Point

AC1200 Dual-Band Wi-Fi
867 Mbps (5 GHz) and 300 Mbps (2.4 GHz)

Great Coverage
4x High-Performance Antennas with Beamforming

Refined Security
WPA3 Encryption

High-Speed Internet Access
Gigabit Ethernet Port

Upgraded Marketing
Captive Portal Supported

TL-WA801N

300 Mbps Wireless N Access Point

N300 Wi-Fi Speed
300 Mbps Wi-Fi for Daily Needs

Great Coverage
2x High-Performance Antennas

Fast Internet Access
Fast Ethernet Port

Simplified Security
One-Step Wireless WPS Encryption

- **Passive PoE** - Use an Ethernet cable to simultaneously send data and electricity to wherever your AP may be located, even up to 100 feet away.
- **Multi-Mode** - Supports Range Extender, Access Point, Multi-SSID, and Client modes.

TP-Link Gaming Series

DOMINATE THE COMPETITION

Based on self-developed Archer gaming system 3.0, TP-Link offers a series Wi-Fi gaming routers designed for gaming enthusiasts.

- Quad acceleration for games.
- Easy-to-use game panel to see the game statistics.
- Dedicated Wi-Fi game band.
- The industry's most stringent stability testing standards, constantly improve stability.

Wi-Fi 7

Archer GE800

BE19000 Tri-Band Wi-Fi 7 Gaming Router

19 Gbps Tri-Band Wi-Fi 7

The latest 19 Gbps Tri-Band Wi-Fi 7 helps you game at your fastest

Cutting-Edge Power for Domination

2.2 GHz Quad-Core CPU + 1 GB RAM

10G Multi-Gig Ports

1× 10 Gbps WAN/LAN +
1× 10 Gbps SFP+/RJ45
Combo WAN/LAN +
2× 2.5 Gbps LAN +
4× 1 Gbps LAN

Easy Sharing

1× USB-A 3.0 Port +
1× USB-A 2.0 Port

Wi-Fi 7

Archer GE650

BE11000 Tri-Band Wi-Fi 7 Gaming Router

11 Gbps Tri-Band Wi-Fi 7

The latest 11 Gbps Tri-Band Wi-Fi 7 helps you game at your fastest

Cutting-Edge Processing

Fast Transmission Speeds and Smooth Operation

2.5G Multi-Gig Ports

1× 2.5 Gbps WAN Port +
4× 2.5 Gbps LAN Ports

Easy Sharing

1× USB 3.0 Port

Archer AX11000

AX11000 Tri-Band Wi-Fi 6 Gaming Router

10 Gbps Tri-Band Wi-Fi

AX11000 Tri-Band speeds deliver unstinted bandwidth for all your gaming rigs

Cutting-Edge Power for Domination

1.8 GHz Quad-Core CPU + 1 GB RAM

2.5G Multi-Gig Ports

1× 2.5 Gbps WAN port +
8× Gigabit LAN ports

USB-C Extensive Sharing

1× USB-C 3.0 Port +
1× USB-A 3.0 Port

Archer GX90

AX6600 Tri-Band Wi-Fi 6 Gaming Router

Unrivaled Gaming Wi-Fi

AX6600 Tri-Band speeds create dedicated next-gen gaming experiences for every gaming rig in need

Powerful Processing Ability

1.5 GHz Quad-Core CPU + 512 MB RAM

2.5G Multi-Gig Ports

1× 2.5 Gbps WAN/LAN port +
1× Gigabit WAN/LAN port +
3× Gigabit LAN ports

Easy Sharing

1× USB-A 3.0 Port +
1× USB-A 2.0 Port

tp-link

Game Center – Crafted for Winning

Game Center on Archer GE800 focuses on what pro gamers care about — accelerating gaming experience, extremely low latency, and wired-level reliability — and provides a wide range of tools to help you win more.

» Quad Acceleration for Games

Accelerate game streams to ensure your gaming stays immersive and your network runs faster than your reaction speed.

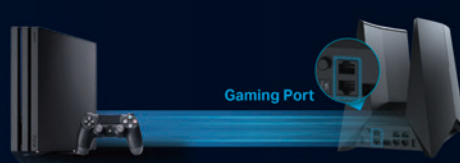

Game Accelerator with QoS

Prioritize and accelerate your game applications to run at full speed even on a crowded network.

Accelerate Wired Games with Gaming Port

Automatically prioritize traffic from the gaming device you connect. Its local network and internet traffic will take precedence over the rest.

Exclusive Mobile Game Acceleration

One click to accelerate mobile games with the Tether app.

Game Server Acceleration with WTFast GPN

Minimize game ping and lag with WTFast GPN (Gamers Private Network). WTFast provides a global latency-sensitive proxy overlay network and secures the shortest possible path, driven by real-time measurements and AI. It optimizes the middle mile, providing faster and smoother connections. All kinds of a popular games are supported.

» Practical Game Features to Win More

Flexibly Set the Prior Port

Make your gaming console or PC more accessible to other gaming consoles and PCs on the internet. Port forwarding improves connection speed, lobby wait times, and overall gameplay.

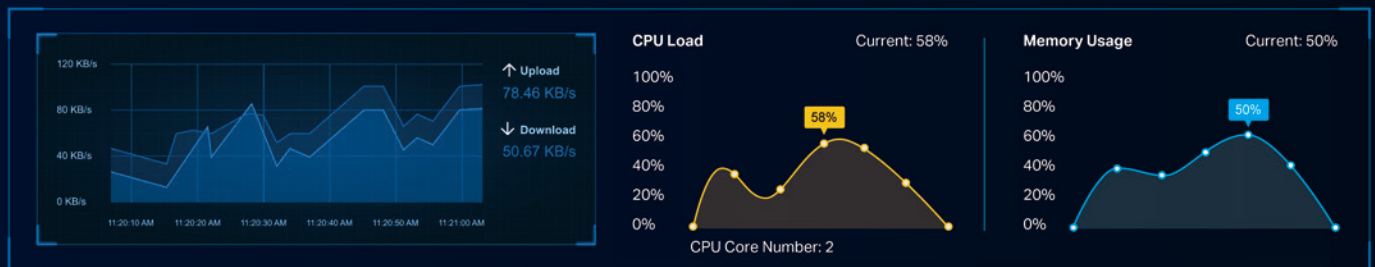

Game Detector

Monitor the ping of a game server in real time.

» Easy-to-Use Game Panel and Traffic Monitoring

Real-Time Game Statistics

See the real-time latency, system utilization, and game duration of your network with just a glance on an exclusive game dashboard. This ensures every detail is tweaked the way you like.

Comprehensive Gaming Traffic Monitoring and Reports

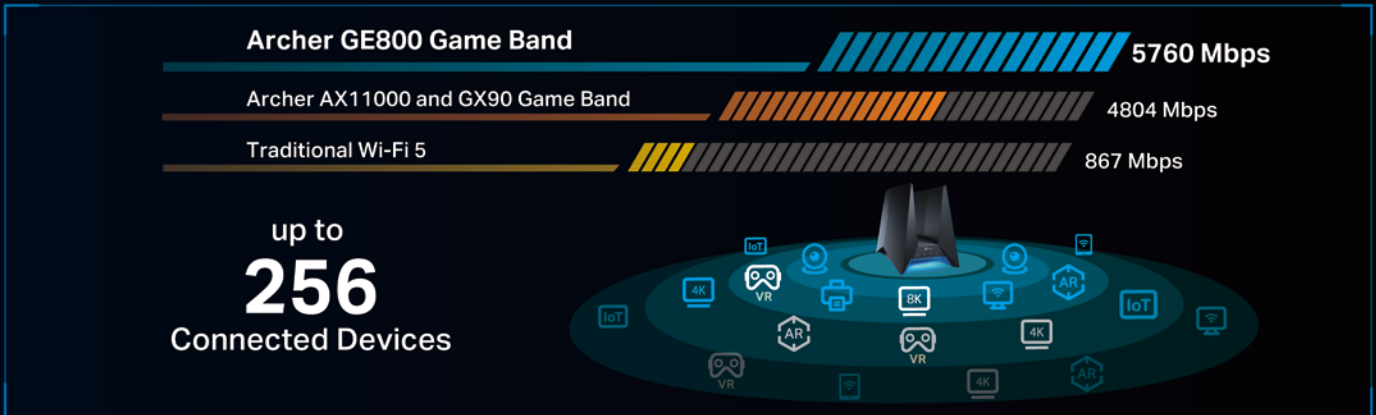

Gain insight and better control of your gaming network with comprehensive gaming traffic reports. The traffic of various periods can be demonstrated, including devices, applications, and WAN/LAN.

Hardware Forged for Gaming

» Unrivaled Wi-Fi and Connectivity

TP-Link Gaming Series routers, equipped with 12-stream tri-band, fuel your need for high-speed downloading and streaming. Wi-Fi 7 routers effortlessly connect up to 256 devices running games — all with minimal latency.

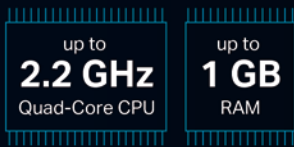

» The Unparalleled BE19000 Wi-Fi 7 for Unbelievable Speeds

» Battle-Tested Processing

A powerful CPU and high RAM work together to handle huge throughput and demolish lag. Specially designed heatsinks rapidly reduce temperature, enabling full-clock speeds on each core even under heavy loads.

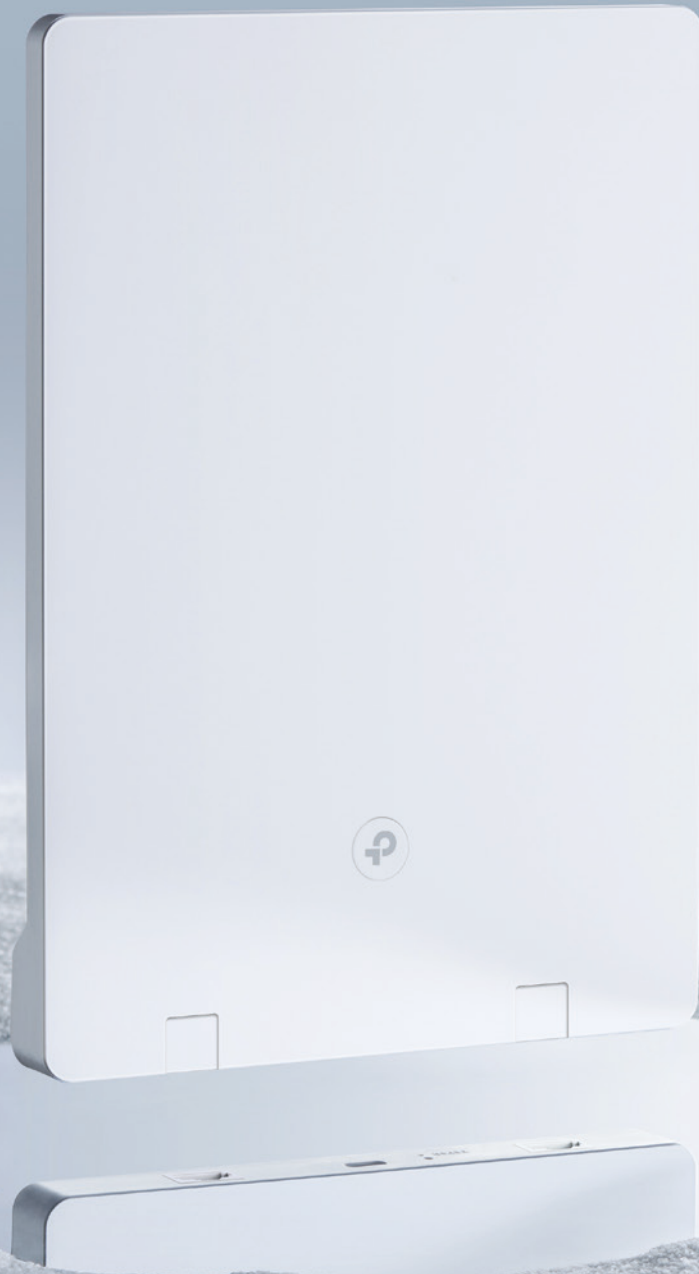

» 10 Gbps Wired Connections

Unleash the full potential of your next-level network. The Multi-Gigabit solution — two 10 Gbps WAN/LAN ports and two 2.5 Gbps LAN ports for extremely fast wired connections — is available on Archer GE800.

Archer Air Series

Thin Beyond Imagination

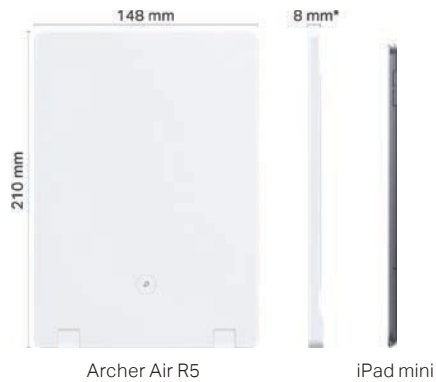

AX3000 Wi-Fi 6 Air Router / Archer Air R5

AX3000 Wi-Fi 6 Air Range Extender / Archer Air E5

▶ Unprecedented 8-mm Thin Design

The Archer Air series has an ultra-thin (8-mm thickness) and minimalist appearance (A5-paper size).* The compact and light design makes the size and weight close to the iPad Mini.

▶ Ultra Convenience with Wall Adhesives

Archer Air series can be pasted to the wall with its provided 3M adhesive. It also supports being hung on the wall with a hanger. Archer Air's thin design and wall-mounting frees up socket and desktop space.

▶ Redefining the Beauty of Wi-Fi Routers

The unprecedented thin design, pure white shell, minimalist lines, rounded corners, and internal antennas make the Archer Air series complement any home décor. The 2-in-1 (LED and WPS button) design on the front further simplifies its beauty. A large metal design on the back enhances both heat dissipation and aesthetics.

▶ EasyMesh-Compatible for a Powerful Mesh Network

Air R5 and Air E5 can be used separately. Simultaneously, being EasyMesh-compatible, they can also combine together to form a powerful Mesh Wi-Fi 6 for full-home coverage and seamless roaming, eliminating Wi-Fi dead zones.

▶ Extraordinary Performance Despite the Thin Shell

Equipped with AX3000 dual-band Wi-Fi 6, the Air R5 router and E5 range extender deliver Wi-Fi speeds up to 3 Gbps (2402 Mbps on the 5 GHz band, 574 Mbps on 2.4 GHz). It has high-gain antennas and an RF unit, which provides strong coverage in horizontal and vertical directions, effectively improving the existing Wi-Fi network.

AX3000 Wi-Fi 6 Speed

2402 Mbps on 5 GHz +
574 Mbps on 2.4 GHz

160 MHz Channel

Double the data at peak transmission times on a single stream**

WPA3 Encryption

The latest Wi-Fi encryption provides redefined security

Two Gigabit Ethernet Ports***

Gigabit speeds unlock the Wi-Fi 6 potential

HomeShield***

Premium security services keep your home network safe

VPN Server***

PPTP/ L2TP/ OpenVPN

*The 8 mm thickness of Archer Air R5 refers to the shell without calculating the Ethernet ports.

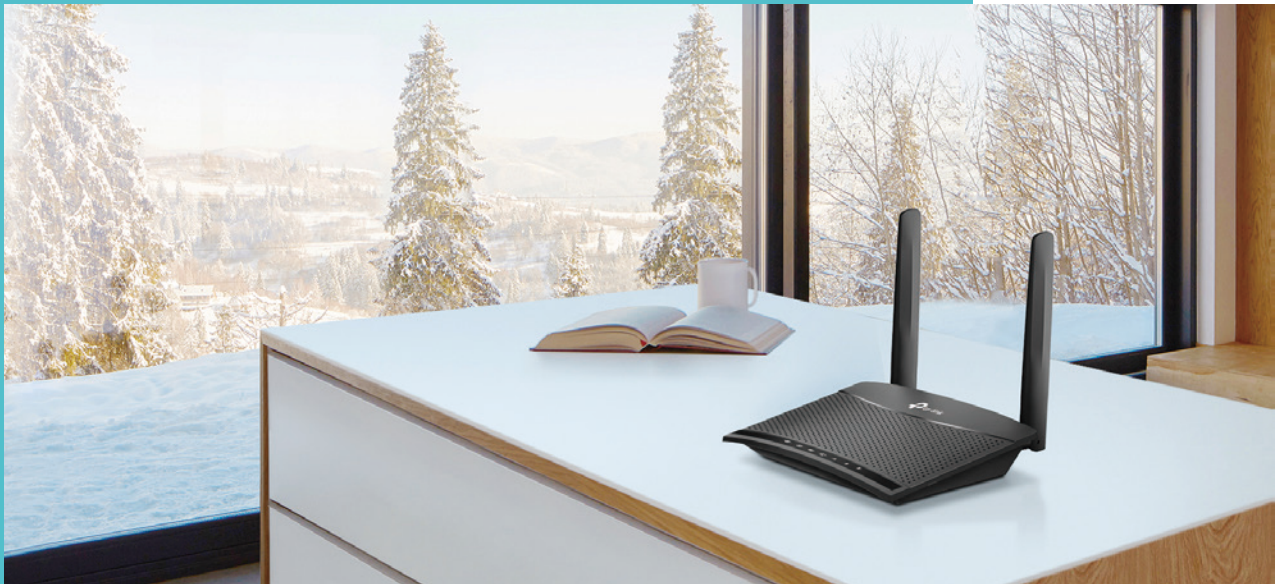

**The double channel width refers to 160 MHz compared to 80 MHz for general Wi-Fi 6 routers.

***Two gigabit ports, HomeShield, and VPN Server are supported by Archer Air R5.

3G/4G Routers

Share the freedom of 3G/4G data at home! No need to rely on a Wi-Fi hotspot, just enjoy the flexibility of a wireless connection. Improve the value of your dongle or SIM card with a 3G/4G router. Compatibility with SIM cards in 100+ countries is assured by years of field tests. Simply plug in your SIM card and start using your devices without any configuration. These routers also enable you to share a single 3G/4G connection with multiple friends, family members, or colleagues at the same time.

- **OneMesh™** - Flexibly create a whole home Wi-Fi with truly seamless online experience.
- **Plug and Play** - No configuration needed, compatibility with SIM cards in 100+ countries is assured by years of field tests.
- **Detachable LTE Antennas** - Detachable LTE antennas provide high performance and stable cellular network connections.
- **Multiple Modes** - With a fully functional WAN/LAN port, works as a router compatible with cable, fiber, and DSL modems.
- **Wi-Fi Router Mode** - Plugs an Ethernet cable into the LAN/WAN port for flexible access if you can't get a 4G connection.
- **3G/4G Network Support** - FDD-LTE/TDD-LTE/DC-HSPA+/SPA+/HSPA/UMTS.
- **TP-Link Tether App** - Provides simplified control and management from your iOS or Android smartphone.
- **Advanced Software** - Equipped with various software functions including parental controls and traffic management.

DSL Modem Routers

The world moves quicker every day. More homes now have multiple devices requiring strong, steady wireless signals. Luckily, faster internet is just a broadband modem away.

TP-Link's family of DSL modem routers are compatible with the leading DSL service providers to meet all your networking needs. TP-Link offers a wide range of innovative DSL modem routers that allow you to easily access and manage your network through our own app. Moreover, TP-Link's family of DSL modem routers can be used for your advanced landline calls and empower your home entertainment. Featuring a variety of features and rich functionality, they act as the perfect space-saving hub for your home or business network.

Get in the Fast Lane

AC2100 Wireless MU-MIMO VDSL/ADSL Modem Router

Archer VR2100

Super VDSL

Ultra-Fast Speed

Versatile Connectivity

Higher Efficiency

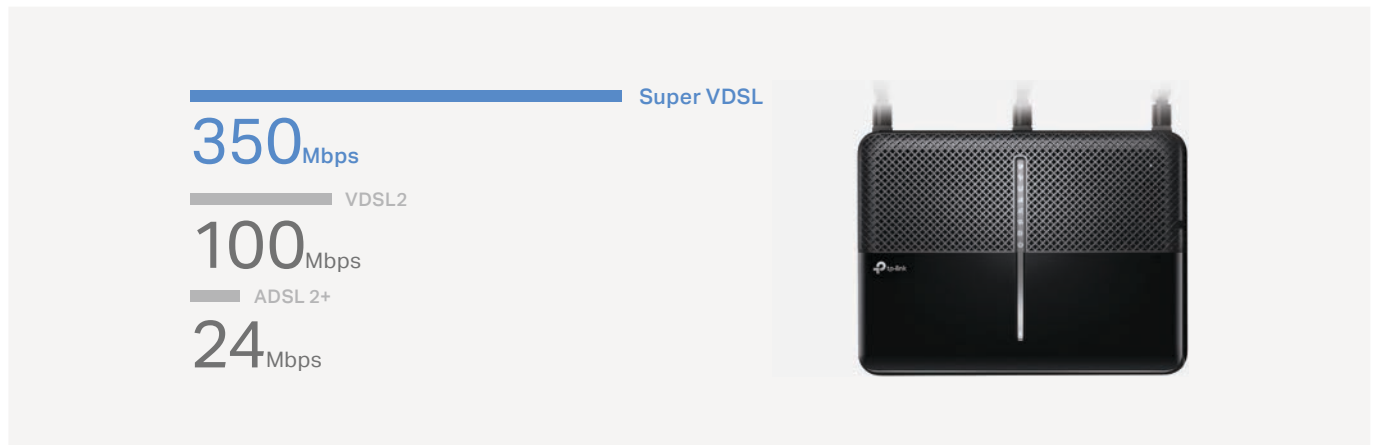

Lightning-Fast Wired Connections

Easy Setup and Management

› Super VDSL - the Future of Internet Access

Archer VR2100 features Super VDSL (VDSL2 Profile 35b), the latest generation of DSL technology. Downstream is increased by up to 350 Mbps, 3.5× faster than its VDSL2 predecessor. The integrated DSL port also supports all standard DSL connections.

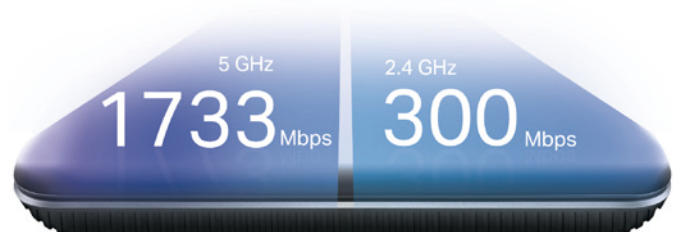

› Supports TP-Link OneMesh™ for Whole Home Coverage

TP-Link OneMesh products work together to provide a more flexible and cost-effective mesh network with a single Wi-Fi name for seamless whole home coverage.

› Enjoy Your Network at Full Speed

The Archer VR2100 makes full use of its dual-band Wi-Fi, reaching speeds of up to 1733 Mbps on 5 GHz band and 300 Mbps on 2.4 GHz band. Enjoy a total speed of up to 2.1 Gbps to eliminate latency and buffering from your HD streams and lag from online games.

Range Extenders

With walls, floors, and extra space, weak signals and dead zones are common in today's homes. The ever-increasing number of devices under one roof also requires families to have Wi-Fi networks able to deliver high-speed and stable connections in every room.

TP-Link Wi-Fi Range Extenders help eliminate dead zones by boosting your wireless networks in your home and office. This ensures that your mobile, media, and computer devices are always connected and ready for wireless action.

Wi-Fi 7: Faster Speeds, Lower Latency.

Wi-Fi 7 is the upcoming Wi-Fi standard. It utilizes the 2.4 GHz, 5 GHz, and 6 GHz frequency bands to deliver higher Wi-Fi speeds, lower latency, higher efficiency, and stronger anti-jamming.

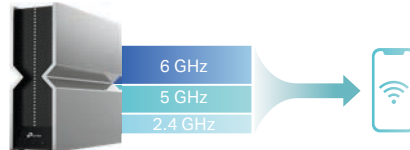

More Throughput

Up to 22,000 Mbps Wi-Fi 7 allows for new 320 MHz bandwidth mode for 6 GHz, doubling throughput. 4K-QAM, and MLO further increase the throughput.

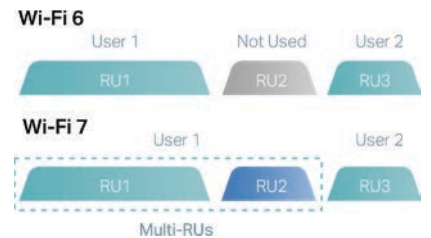

Less Latency

Multi-Link Operation (MLO) enables your network simultaneously send and receive data over multiple radio bands to create a single aggregated connection, reducing the latency and increasing anti-jamming.

Higher Efficiency

Multi-RU increases data transfer efficiency by introducing a more flexible way for Resource Unit (RU) allocation. Preamble Puncturing, MLO, and flexible bandwidth further increase the efficiency.

Seamless Roaming with EasyMesh-Compatible*

Create a mesh network by connecting to a EasyMesh Compatible router for seamless whole home coverage.

10G Multi-Gig Internet Connection

A 10 Gbps port makes full use of gigabit speeds from your local ISP. Break through the 1G bottleneck and drive your devices to peak performance.

*The EasyMesh function is still being developed on some models and will be supported in subsequent software updates.

Make full use of gigabit speeds from your local ISP

- **Wi-Fi 7** - Delivers higher Wi-Fi speeds, lower latency, higher efficiency, and stronger anti jamming.
- **6 GHz** - Works on the 6 GHz band with more bandwidth and less congestion.
- **4K-QAM** - Improves raw speeds by 20% compared to Wi-Fi 6's 1024-QAM.
- **Multi-Link Operation (MLO)** - Increases throughput, reduces latency, and improves reliability.
- **Wi-Fi Dead Zone Killer** - Keeps your entire home connected with powerful Wi-Fi extensions at top speeds.
- **Ultra-Low Latency** - Greater reduction in latency enables more responsive and smoother online experience.
- **AP Mode** - Supports AP mode to create a new Wi-Fi access point.

*The EasyMesh Compatible function is still being developed on some models and will be supported in subsequent software updates.

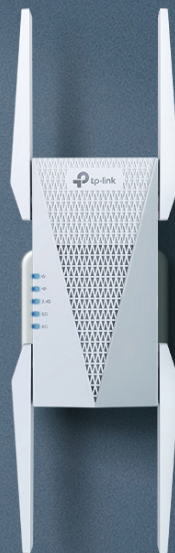

§ RE260BE doesn't support 6 GHz band.

Expands Bandwidth to Double the Network Speed of Traditional 80 MHz

EasyMesh-Compatible*
Flexibly Create a Mesh Network

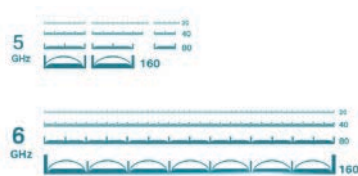

Wi-Fi 6E: Higher Efficiency, Greater Capacity

Wi-Fi 6E means Wi-Fi 6 extended to the 6 GHz band, a newly-opened frequency that brings more bandwidth, faster speeds, and lower latency. RE815XE is the first TP-Link 6E range extender, bringing your Wi-Fi to the next level.

Minimized Congestion

The wide-open 6 GHz band is available only for Wi-Fi 6E traffic, avoiding the overcrowding on many Wi-Fi networks.

More Throughput

Allows for 7 additional 160 MHz channels that double bandwidth and throughput, enabling more simultaneous connections with no buffering.

Improved Capacity

Provides up to 1200 MHz additional spectrum, more than doubling the number of pathways and dramatically increasing network capacity.

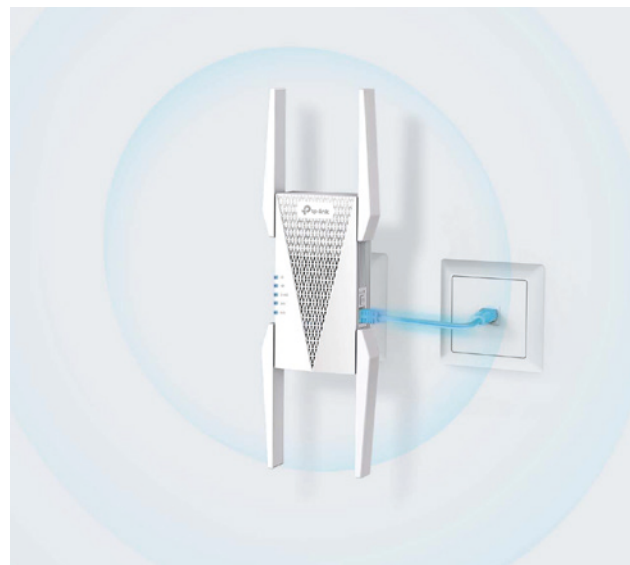

Uninterrupted Streaming

Create a Mesh network by connecting to a EasyMesh-Compatible* router for seamless whole home coverage.

Built-In Access Point Mode

RE815XE is more than just a range extender. Simply plug an Ethernet cable into its port to easily turn wired connections into high-speed tri-band wireless signals.

*The EasyMesh Compatible function is still being developed on some models and will be supported in subsequent software updates.

Blazing-Fast Desktop Range Extender

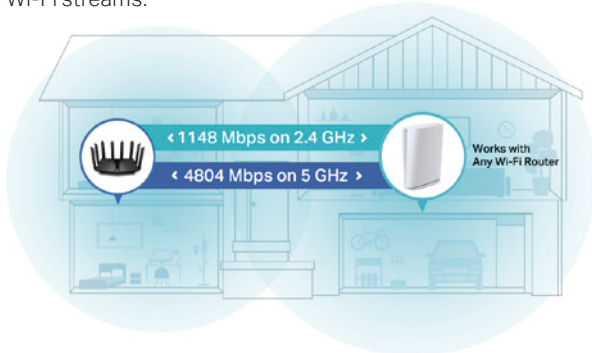

AX6000 Mesh Wi-Fi 6 Range Extender

RE900XD

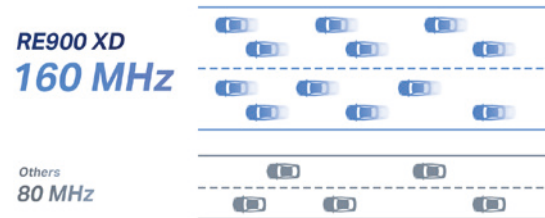

AX6000 Dual-Band Wi-Fi

Boosts overall speeds up to an incredible 6000 Mbps with 8× Wi-Fi streams.

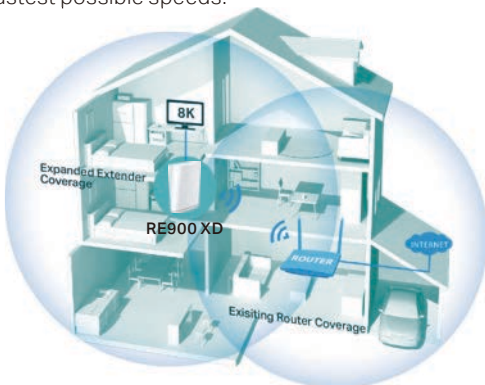

160 MHz Channel Bandwidth

Expands bandwidth to double the network speed of traditional 80 MHz.

Enjoy a Stable, Seamless Wi-Fi

Create a true seamless mesh network with EasyMesh-Compatible*. Walk from room to room and stay connected with the fastest possible speeds.

Cutting-Edge Wi-Fi 6

The latest Wi-Fi technology makes annoying lag, endless loading, and dead spots a thing of the past. Enjoy the future of faster network loads and more connections.

Multi-Gigabit Wired Performance

With one 2.5 Gigabit port and two Gigabit ports built-in, RE900XD is more than just a range extender. Simply plug an Ethernet cable into a port to easily turn wired connections into high-speed dual-band wireless signals.

Multiple Installation Methods

RE900XD supports desktop and wall-mounted installation.

Desktop

Wall-mounted

Powerline

With TP-Link's Powerline adapters, there's no need for drilling or wire installation. You can turn your home's electrical wiring into a high-speed network with ease.

Every single adapter acts as a portable LAN port, transmitting the wired and wireless network to any place in your home where there's a power socket, regardless of thick walls and floors.

Simply Plug and Play and enjoy simple network management with our user-friendly tpPLC app, tpPLC Utility, and Web Interface.

1. G.hn powerline adapters are not compatible with HomePlug AV/AV2 powerline adapters.
 2. The theoretical maximum channel data transfer rate is derived from Powerline specifications. Actual data transfer rate will vary from network environment including: distance, network traffic, noise on electrical wires, building material and construction, quality of electrical installation, and other adverse conditions.
 3. The OneMesh™ function is still being developed and will be supported in subsequent software updates.

Adapters

Turn wired into wireless with our impressive range of Wi-Fi Adapters. Designed to easily upgrade your computer or laptop, our adapters put the fun in functional and are a cool addition to our wireless innovation. Install, connect, enjoy.

Stay Fast with Wi-Fi 6, Even in a Crowded Network

AX3000 High Gain Wireless USB Adapter

Archer TX50UH

Lower Latency, Higher Efficiency, and Less Congestion

With cutting-edge Wi-Fi 6 technology, enjoy extreme speeds, lower latency, and improved connections. OFDMA creates separate channel segments for devices to communicate while MU-MIMO allows multiple clients to simultaneously receive data. A combination of OFDMA and MU-MIMO technologies ensures the most efficient Wi-Fi connection for your PC.

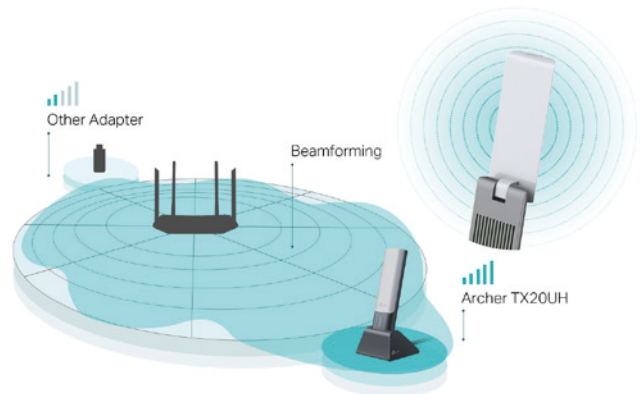

AX3000 Dual-Band Wi-Fi 6

1024-QAM and a 160 MHz bandwidth deliver powerful, continuous Wi-Fi to fully unlock the potential of your Wi-Fi 6 router. Achieving speeds 3× faster than standard AC Wi-Fi drives your PC to peak performance so your setup keeps pace with your jaw-dropping skills.

High-Gain Antennas with Beamforming

Two advanced high-gain antennas combine with Beamforming technology to create a stable Wi-Fi network across your home for an ideal surfing experience, even when your clients are far away.

PCI Express Wireless Adapters

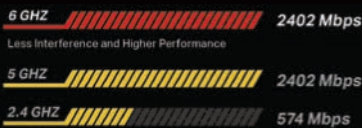

Brand-New Full Desktop Wi-Fi 6E Upgrade

AXE5400 Wi-Fi 6E Bluetooth
5.2 PCIe Adapter

Archer TXE75E

▶ Immersive Gaming

Archer TXE75E arms your PC with the newest Wi-Fi 6E technology supporting the 6 GHz band, unleashing the full potential of your Wi-Fi 6E router.

▶ Unparalleled Tri-Band Speed

The brand-new 6 GHz band is wide enough for 7 extra 160 MHz channels. Exclusive to Wi-Fi 6E devices, 6 GHz prevents drops in speed and interference from legacy devices.

▶ Refined Security

The latest Wi-Fi security protocol, WPA3, brings new capabilities to improve cybersecurity. More secure encryption in Wi-Fi password safety and enhanced protection against brute-force attacks combine to safeguard your home Wi-Fi.

▶ Superior Wi-Fi Reception

Equipped with 1024-QAM and MU-MIMO technology, Archer TXE75E delivers faster and clearer Wi-Fi to take your PC's Wi-Fi reception to the next level.

▶ Bluetooth 5.2

TXE75E equips your PC with the more advanced Bluetooth 5.2 that achieves faster speed and broader coverage than older versions to perfectly coordinate with your game controllers, headphones, keyboards, and other Bluetooth devices.

▶ Maximized Coverage

Two multi-directional and high-performance antennas with a magnetized base extends your existing Wi-Fi reception capabilities, allowing you to stream anywhere and anytime. Place the magnetized antenna base anywhere on your desktop to find the optimal location for signal reception.

- **Supporting Systems** - TXE75E, TXE72E, TX3000E, TX55E, TX50E, TX20E: Windows 11/10.
- T6E, T5E, T4E, T2E, TL-WN881ND, TL-WN781ND: Windows 11/10/8.1/8/7
- **Low-Profile and Full-Height Brackets** - In addition to the full-height bracket, a low-profile bracket is also provided for mini tower computer cases.

Arm Your PC with the Latest 10G Speeds

PCIe 3.0 Slot to 10 Gigabit Ethernet Network Adapter

TX401

Upgrade to 10G Networking

10 Gigabit Ethernet reaches blazing-fast data rates up to 10 billion bits per second—10× faster than standard Gigabit Ethernet. It's a brand-new era for all your bandwidth-intensive tasks from local data transfers to internet access.

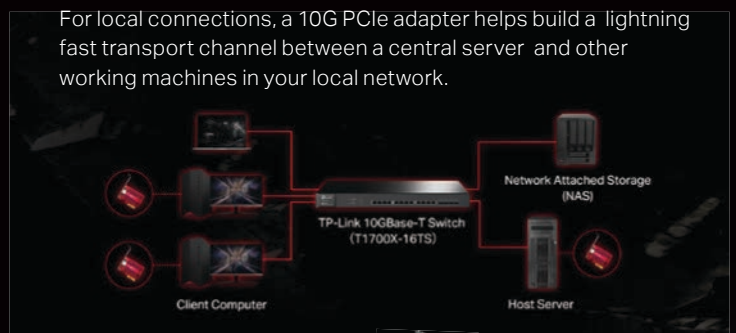

Play Never Ends with 10G

With 10 Gbps internet access, your gaming will be fully optimized with a large boost in speed, latency, and responsiveness.

Local Data Transmissions in Seconds

For local connections, a 10G PCIe adapter helps build a lightning fast transport channel between a central server and other working machines in your local network.

TX401

PCIe 3.0 Slot to 10 Gigabit Ethernet Network Adapter

TX201

2.5 Gigabit PCIe Network Adapter

TG-3468

Gigabit PCI Express Network Adapter

10 Gbps Networking

Supports 10/5/2.5/1 Gbps and 100 Mbps Network

2.5 Gbps Networking

Supports 2.5/1 Gbps and 100/10 Mbps Network

Gigabit Wired Connection

Supports 10/100/1000 Mbps Network

- **Easy Installation** - Upgrade your desktop system easily by plugging the adapter into an available PCI-E slot.
- **Supporting Systems** - Windows and Linux (TX401, TX201), Windows (TG-3468).
- **Low-Profile and Full-Height Brackets** - In addition to the full-height bracket, a low-profile bracket is also provided for mini tower computer cases.

Ethernet Network Adapters

USB 3.0 Type-C to Gigabit Ethernet Network Adapter

UE300C

UE330

USB 3.0 3-Port Hub & Gigabit Ethernet Adapter

- USB 3.0 port**
- Gigabit Ethernet Port**
- Great Compatibility**
Supports Windows 11/10/8.1/8/7, macOS, Linux OS and Chrome OS
- Plug and Play**
Supports Windows 11/10/8.1/8, macOS, Linux OS, and Chrome OS.

UE306

USB 3.0 to Gigabit Ethernet Adapter

- USB 3.0 port**
- Gigabit Ethernet Port**
- Great Compatibility**
Supports Nintendo Switch, Windows 11/10/8.1/8/7, Linux and macOS
- Plug and Play**
Supports Nintendo Switch, Windows 11/10/8.1, and Linux OS.

UE300

USB 3.0 to Gigabit Ethernet Adapter

- USB 3.0 port**
- Gigabit Ethernet Port**
- Great Compatibility**
Supports Windows 11/10/8.1/8/7, macOS, Linux OS and Chrome OS
- Plug and Play**
Supports Windows 11/10/8.1/8, macOS, Linux OS, and Chrome OS.

UE200

USB 2.0 to 10/100 Mbps Fast Ethernet Adapter

- USB 3.0 port**
- 100 Mbps Ethernet Port**
- Great Compatibility**
Supports Windows 11/10/8.1/8/7, macOS, Linux OS and Chrome OS
- Plug and Play**
Supports Windows 11/10/8.1/8/7, macOS, Linux OS, and Chrome OS.

- **Stronger Gigabit Wired Connection** - Equipped with a gigabit Ethernet port to provide network speeds up to 1000 Mbps.
- **Supports Hot Plugging** - Has no influence on your system working when you plug it in or not.

Bluetooth Adapters

Mobile Wi-Fi

Share the freedom of 3G/4G on the go! With this convenient companion, you can share your Wi-Fi with your friends everywhere, especially when you are traveling. Multiple wireless devices like tablets, laptops, and mobile phones can access this Wi-Fi connection at the same time. No need to worry about draining your phone's battery to open a hotspot.

Enjoy the Freedom of Faster Speed

LTE-Advanced Mobile Wi-Fi

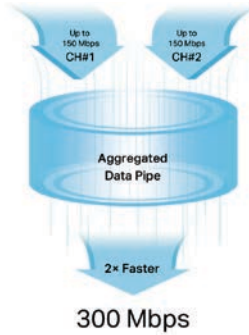

M7450

- 4G+**
LTE-Advanced Cat6
- AC1200** Selectable Dual-Band Wi-Fi
- 15h**
Power to Keep Working
- Easy Setup** with tpMFI
- Access for **32** Devices
- 32GB** microSD Card Slot

Do More with a Faster Mobile Connection of up to 300 Mbps

The M7450 supports the 4G LTE network LTE-A Cat 6, which uses Carrier Aggregation. This advanced technology merges the fragmented LTE band into a "virtual" wider band to increase the data rate to provide fast 4G speeds of up to 300 Mbps.

Power to Keep Working All Day Long for ~15 Hours

M7450 is equipped with a powerful 3000 mAh battery. On its own, it can work effortlessly up to 15 hours at full capacity and stand by for over 900 hours.

Advanced Screen & Menu for Easy Usage

The screen displays information of battery life, signal strength, Wi-Fi status, connected users, and more.

Supports Multi-Bands

Increased compatibility with the added B5 and B28 bands. *Version 1 is not supported.

The Fastest Mobile Wi-Fi to Match Your Wanderlust

LTE-Advanced Mobile Wi-Fi

M7650

600 Mbps LTE-Advanced Mobile Wi-Fi

M7650

- **LTE-Advanced Cat 11** - Up to 600 Mbps for downloads and 50 Mbps for uploads with Qualcomm chipset 256-QAM technology.
- **AC1200 Selectable Dual-Band Wi-Fi** - Two separate Wi-Fi bands combine for speeds of up to 1167 Mbps: 300 Mbps (2.4 GHz) and 867 Mbps (5 GHz).
- **Battery** - 3000 mAh battery provides up to 15 hours of service.
- **Easy Wi-Fi Sharing** - Share Wi-Fi with up to 32 devices simultaneously.
- **Storage** - microSD card slot for up to 32GB of storage space.
- **The TP-Link tpMiFi App** - Provides simplified control and management from your iOS or Android smartphone.
- **Network Support** - Supports 4G (FDD-LTE/TDD-LTE), 3G (DC-HSPA+/HSPA/UMTS), and 2G (EDGE/GPRS/GSM) networks.

High Power

These High-Power wireless products provide stronger and more powerful signals than mainstream Wi-Fi devices. Greater transmission distances and increased stability provide the perfect home or office solution for those who take their Wi-Fi seriously.

Five 2.5G Ports

Super-Fast Connections

Hassle-Free Cabling

Upgrade to 2.5G without changing cables*

Silent Operation

Industry-leading fanless design

- **Plug and Play** - Easy to use with no configuration needed.
- **Metal Casing** - Durable metal casing and desktop/wall-mounting design are well-suited for different environments.**
- **Auto-Negotiation and Auto MDI/MDIX** - Adjust for optimal speed with no need for a crossover cable.
- **Flow Control and Back Pressure** - Reliable data transfer by alleviating traffic congestion.
- **Traffic Prioritization** - 802.1p and DSCP QoS ensure smooth traffic.
- **Lower Latency** - Fast and reliable online gaming and streaming experience.

* Only Cat 5e or better cables do not need to be replaced.

**TL-SX1008 doesn't support wall-mounting.
