

The designer difference at Lowe's.

Lowe's offers a one-on-one design experience through their Project Specialist Interiors (PSI) program. Schedule an in-store meeting to share your inspiration, explore design ideas, and discuss color and finish options. Lowe's designers can help bring your next residential renovation project to life.

1. Get a referral

Discuss your kitchen or bath project with a Lowe's associate who can refer you to a PSI. The PSI will contact you to schedule a free in-store consultation.

2. Meet at Lowe's

For the free in-store visit (2-4 hours), bring photos, measurements, and design inspiration. You and the PSI will discuss design ideas, shop for product options and set a budget.

3. Follow up at home

If you move forward, the PSI will set up an in-home visit with a contractor to verify measurements and the scope of the project. A \$75 fee is required at this stage, and is good toward your installation cost.

4. Finalize at Lowe's

You'll meet the PSI in store to review the final design, product choices, costs, and timelines – all assembled in a binder you can take home. After you confirm financing and sign a contract, you'll be assigned a project coordinator who will schedule product delivery and installation.
