Symbols

Bosch SDS-System

Fast tool insertion and removal, without the need for additional tools.

SDS-plus

Optimum power transfer and good guidance with auto-locking system. For rotary hammers in the 2–4 kg class.

SDS-max

Optimum power transfer and good guidance with auto-locking system. For rotary hammers and demolition hammers from the 5 kg class onwards.

Electronic

Accelerator function for smooth start-up when drilling, screwdriving and sawing.

Constant Electronic

Power booster for heavy loads. Constant speed, even under load.

Spindle Lock

Faster, simpler disc / tool change.

Anti-Rotation

Interruption of power transmission. See also safety clutch.

Hook & loop Fastening

The hook & loop system is used for quick and easy sanding sheet changes.

Precision Control

To reduce jigsaw blade wander.

Saw Blade Pendulum Action

Adjustable three or four stage blade pendulum action for optimum curve cutting ability, high cutting capacity and blade-saving operation.

Dust Extraction

Dust extraction directly into the integral dust bag on the machine or using an all-purpose dust extractor.

Auto-Lock

For fastest possible tool changes with one hand.

Brushless EC motor

Up to 100% longer lifetime and 30% more runtime.

L-BOXX

Storage and mobility solution.

L-BOXX Ready

L-BOXX inlay included.

Safety Clutch

Rotation eliminator should the drill bit jam.

CoolPack

Battery includes cooling technology for more lifetime.

BAG+ kits

Professional tool kits with BAG+.

NEW! Power Control

2-Speed adjustable power mode to fit to different applications and materials.

Wireless Charging System

World's First inductively charged professional power tools

Electronic Rotation Control

Internal sensor shuts down motor on kick-back for more safety.

Electronic Cell Protection

Internal sensor shuts down motor if excess current threatens battery damage.

Electronic Motor Protection

Internal sensor shuts down tool if excess current threatens motor damage.

Electronic Precision Control

Reduced maximum performance to 70% for better control in delicate work - even with impact.

Vibration Control

Patented vibration damping system that reduces vibrations.

WORLD'S FIRST: Wireless Charging System

- ▶ Just put the cordless tool down and the battery will charge.
- ▶ Your tool is always ready to use with only one battery.
- ▶ You save time and the extra costs for a second battery to alternate with.
- ▶ The worldwide unique Bosch Wireless Charging System consists of the charging station and a special battery.

Inductive charging of cordless tools

Complete flexibility:

Wireless Charging battery (GBA 18 V 4.0 Ah MW-B) is compatible with all Bosch 18 V cordless tools

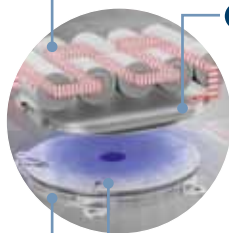

1 Induction generates charging current in battery

2 Inductive coil in battery

3 Magnetic field

4 Inductive coil in charger

Very robust charging station:

No contact points and durable against water, dust and dirt

NEW! Bosch Professional & Tough Mudder

Teaming up in 2015! Watch out for announcements at:

www.toughmudder.co.uk &
www.bosch-professional.co.uk

BOSCH

Invented for life

Tough Mudder

Bosch Professional Power Tools has launched its sponsorship of Tough Mudder at the London West event in Henley on Thames

Over 20,000 Mudders took part in the inaugural UK event in 2015, testing their physical strength and mental grit over a 12 mile obstacle course.

As part of our sponsorship Bosch has supplied its 18 V cordless power tool range to the construction team at Tough Mudder who spend weeks prior to each event building the obstacles.

At each event crowds gather to witness the final obstacle, Electroshock Therapy, which is sponsored by Bosch. It's the most infamous and feared of all obstacles where Mudders rely on teamwork, stamina and endurance to get through the web of shock wires blasting participants with 10,000 volts!

Once participants have completed the obstacle course, they arrive in the Mudder Village. At the Bosch base camp teams have the opportunity to become Bosch Mudders by striking their best 'Always Power Ready' team pose on our giant wireless charger with the chance to win a host of prizes, including a GSB 18 V-Li Professional Wireless Combi, toolbags and much more, if they tag themselves in their photo on our Facebook page.

If you are a Tough Mudder at any of the forthcoming events don't forget to visit us in the basecamp for your team photo and to enter our competition.

Bosch offers a comprehensive range of Accessories for all applications and all power tools ensuring you get the optimal result every time. To find out more; **search 'put bosch in your tool' on facebook.**

BOSCH

Invented for life

Wireless Charging System range extension

NEW! GBA 4.0 Ah 18 V Professional battery with Wireless Charging System

The world's first 4.0 Ah battery with wireless charging

The new battery is designed for demanding high current draw applications when using large system tools. It provides additional run-time and is suited to the professional who is often mobile and seldom in the same place as their charger.

Up to 100% longer lifetime Bosch **CoolPack** for active temperature* management

100% Compatible to all Bosch Blue Li-ion tools and chargers within 18 V class**

Can be used inconjunction with wireless charger, wireless holster, and wireless charging bay system

Our service promise for Professional Power Tools users extends to batteries and chargers: **2-year Premium Service** on all professional blue Bosch lithium-ion batteries including chargers. If a defect occurs on a registered battery or charger during the term of the Battery Premium Service due to a material or manufacturing fault or due to wear, Bosch will replace it! **Please go on line for further information.**

Specification	GBA 18 V 4.0 Ah W Battery with Wireless charging technology
Voltage	18 V
No. of batteries and capacity	1 x [4.0] Ah CoolPack
Charging time (100%) with GAL 1830 W	85 min
Supplied with:	1 x 18 V 4.0 Ah battery, carton

PART NUMBER	ORDER CODE	RRP (EX. VAT)	RRP (INC. VAT)
1600A00C42	18BLUE40W	£99.00	£118.80

Promotions and pricing available from 01/07/2015 to 30/09/2015 or while stocks last
RRP is for illustrative purposes only and dealers shall determine their own resale price

NEW! 4.0 Ah 18 V Professional battery with Wireless Charging

The new 4.0 Ah battery is compatible with past and future tools in the 18 V Li-Ion class, and it also will charge perfectly with the full range of professional chargers from Bosch that use traditional charging technology.**

* Comparison of batteries with / without CoolPack cooling technology.

** Except GML 20 / 50 and GKS 18 V-LI. Please note the 4.0 Ah WLC battery does not fit existing standard inlays used in CLICK & GO.

Wireless Charging System range extension

NEW! Wireless Charging Holster

The new “Wireless Charging Holster” once integrated into the vehicle (via an inverter*) wirelessly charges the battery during each journey. When you arrive at the jobsite you do not have to unpack the cordless drill, it is always exactly in its place and can be conveniently taken out of the holster and is immediately “Power Ready” to use. The holster is built from a shock-absorbing material providing a secure hold on the cordless drill and charger and is designed to hold 18 V cordless tools including drill / drivers, combis and impact drivers. The holster can be mounted both vertically or horizontally on any surface and is compatible with the in-vehicle equipment system from Sortimo.

Robust shock absorbent blow moulded material

Compatible for existing 18 V Drills

- GSR 18 V-EC
- GSB 18 V-EC
- GDX 18 V-EC
- GSR 18 V-LI
- GSB 18 V-LI
- GDX 18 V-LI
- GDR 18 V-LI
- GDS 18 V-LI

Adjustable for 2.0 Ah and 4.0 Ah batteries:

The holster has a drawer for the charger that can be moved up or down to accommodate different height batteries

Specification		Wireless Charging Holster	
Supplied with:		Holster, carton (no charger or inverter supplied)

Perfect power to weight ratio

NEW! GKS 165 Professional circular saw

Top performance from a compact machine

The GKS 165 Professional circular saw uses the latest dual gear technology permitting an impressive 66 mm depth of cut from just a 165 mm blade. The powerful 1100 watt motor, as well as compact and light weight design makes the GKS 165 Professional the ideal circular saw for working in areas of restricted space. The GKS 165 Professional is the perfect choice for rip cuts in solid wood as well as cross cuts in wood and composite materials such as OSB and MDF.

Lightweight and compact

Dust extraction interface:

cleaner and safer working

Comfortable guidance:
auxiliary handle with soft grip and hex key storage for blade change

Powerful air blowing function:
for a clean cutting line

Dual gear technology inside:

for higher cutting depth with only a 165 mm blade

Stamped steel base plate:
for robustness and durability

Specification	GKS 165 Professional
Power input	1100 W
No load speed	4900 rpm
Cutting capacity 90°	66 mm
Cutting capacity 45°	47 mm
Saw blade diameter	165 mm
Bore diameter	20 mm
Weight	3.6 kg

Power and precision

NEW! GKS 55+ GCE Professional circular saw

Power with guide rail precision

The GKS 55+ GCE Professional circular saw uses the latest dual gear technology permitting an impressive 63 mm depth of cut from just a 165 mm blade. The powerful 1350 watt motor, as well as compact and light weight design along with Bosch FSN guide rail compatibility makes the GKS 55+ GCE Professional the ideal circular saw for those looking extra cutting precision. The GKS 55+ GCE Professional with its variable speed control is ideally suited for rip cuts in solid wood as well as cross cuts in wood and composite materials such as OSB and MDF.

Dust extraction interface:
cleaner and safer working

Variable speed:
for effective cutting of
multiple materials

Comfortable guidance:
auxiliary handle with soft
grip and hex key storage for
blade change

Brake function:
for fast stopping
of the blade

Dual gear technology inside:
for higher cutting depth with
only a 165 mm blade

Guide rail compatibility:
compatible with the full FSN
guide rail system

Safety first

NEW! Large angle grinder dust guards

Health & safety first

The new range of Bosch Professional large angle grinder dust guards enable cleaner and safer working when using large angle grinders for cutting and slotting. The direct "Click and Clean" connection allows the Bosch range of GAS dust attractors to be quickly and easily connected to the guards. Each guard is wheel mounted for ease of use and also has a depth adjustment for the setting of the cutting depth.

Easy connection to the vac:

connection via rubber adapter direct
connection via "Click & Clean"

Flexible dust collar

Highly efficient dust extraction:

collection of most of the dust for a healthier and cleaner working environment*

Maximum convenience:

easy to mount
well balanced design

Adjustable cutting depth:

permits the setting of the required cutting depth for greater precision

Integrated wheels

Depth adjustment scale

Trimming off excess material

Progressor
for Wood and Metal

Special
for Sheet Metal

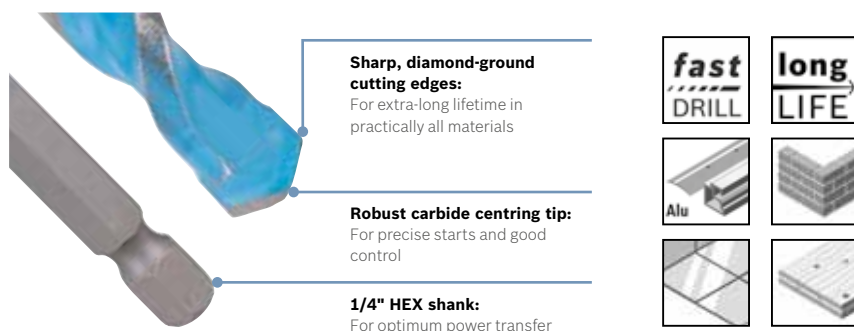

Accessories for masonry drilling

HEX-9 MultiConstruction Drill Bit Range

Another innovation from Bosch - the HEX-9 MultiConstruction drill bit is perfectly tailored to the working environment of powerful cordless impact drivers.

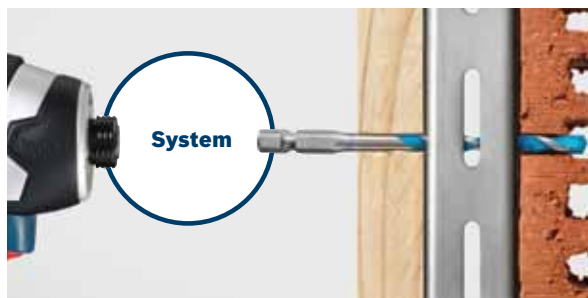

Thanks to the drill bits' ¼" HEX shank, Bosch impact drivers can turn into a convenient, lightweight system for drilling in wood, plastic, tiles, masonry and sheet metal. With an impact drill, it is even possible to use the HEX-9 MultiConstruction drill bit to work in concrete.

The convenient system from Bosch

Cordless impact drivers help you with interior fitting and renovation work. Our new system of impact driver, like the new Bosch GDR 10.8 V-EC, and new HEX-9 MuCo bit enables you to use the driver as a drill as well. There is no need to carry an additional cordless drill anymore.

Bosch - focusing on convenience.

Intelligent measuring solutions

GLM 100 C Professional Laser Measure

The high-tech solution for convenient measurement

The Bosch GLM 100 C offers the accuracy of laser measurement with the added advantages of Bluetooth technology in a feature-packed package. A long-life lithium-ion battery drives the powerful Laser Measure to measure distances up to 100 m with 1.5 mm / m accuracy. Other features include best-in-class memory storage and angle measurement in two axis; this innovative product allows users to make accurate measurements that are instantly transferred to smart devices via the free Bosch Measure & Doc and FloorPlan mobile app.

Auto-audit:

Internal software ensures every measurement is accurate to ± 1.5 mm

Integrated Inclinometer:

Which doubles up as a digital spirit level and allows intelligent indirect measurements

Automatically illuminated display:

For easy use in all environments

IP54 protection

Unrivalled versatility:

Utilising 10 measuring modes including:

- Length
- Area
- Volume
- Angle
- Minimum / maximum length
- Continuous measurement
- Single indirect height
- Single indirect length
- Combined indirect height
- Multi-surface

Automatic storage:

Of up to 50 measurements on the device. This becomes unlimited when using the Measure & Doc app

Timer function:

Can be switched on / off – for precise measurement from difficult positions

Two **FREE** GLM 100 C App's from Bosch

- **“Measure & Doc” App** – Transfer measurements directly into photos or create easy to manage digital lists.
- **“Floor Plan” App** – Create and modify professional quality Floor Plans effortlessly.

C-Tec Precision plunge-cutting saw blades

Unique technology with rounded (convex) cutting edge

The unique Bosch technology with rounded (convex) cutting edge in combination with a reinforced tool mount and a tapered base body – offers the best precision plunge-cutting saw blades for “wood”, “hardwood” and “wood and metal”. These new C-Tec precision plunge-cutting saw blades enable precise, clean and smooth plunge cuts. No more guess work. You'll always get it right with the new C-Tec precision plunge-cutting saw blades.

Precise plunge cuts in wood,
e.g. for cuts in construction wood

Precise plunge cuts in hard wood,
e.g. sunken installation of a display screen

Precise plunge cuts in wood and metal,
e.g. cutouts in aluminium reinforced parquet or laminate

Manufacturer's Guarantee

(Applicable from 1st September 2004)

All Bosch Power Tools, pneumatic tools and measuring tools are carefully checked, tested and are subject to the stringent controls of Bosch Quality Assurance. Bosch therefore offers a guarantee for Bosch Power Tools, Pneumatic Tools and Measuring Tools. Your warranty claim based on your sales contract with the retailer, including your statutory rights, shall not be affected by this guarantee. We offer a guarantee for these tools in accordance with the following conditions:

1. Our guarantee in accordance with the following provisions (nos. 2 – 7) provides for the correction of deficiencies to the tool, at no charge, if it can be verified to the satisfaction of the Bosch Service Centre that the deficiencies were caused by a material or manufacturing fault within the guarantee period.
2. The guarantee period varies depending on the use of the tool:
 - for Green tools and Blue tools used for DIY / domestic purposes it is 24 months;
 - for Blue tools used for commercial / professional purposes it is 12 months; this may be extended to 36 months if registered on the appropriate Bosch web-site (see below); please note that commercial / professional use of Green tools invalidates the warranty.
 - The guarantee period begins from the time the tool is purchased from new. The starting date is the date on the original sales receipt. For all professional blue power tools and measuring tools bought on or after 01.09.2005 (with the exception of high-frequency tools, production cordless screwdrivers and pneumatic tools), the guarantee period shall be extended to 36 months if you register these tools within 4 weeks after the date of purchase. All battery packs and battery chargers (including the GML Powerboxes) as well as supplied accessories are excluded from this guarantee extension (Note: an exception to this exclusion relates to Lithium-Ion batteries and chargers as detailed on page 6 of this publication). Registration can only be made via the Internet under www.bosch-professional.co.uk. The registration form, which must be stored and/or printed out immediately, and the original receipt of purchase that displays the date of purchase, are necessary to validate any claim. Registration shall only be possible if you agree to the storage of the data entered (conditions will be explained on the site).
3. The guarantee does not cover:
 - Components that are subject to natural wear and tear caused by use in accordance with operating instructions
 - Defects in the tool caused by non-compliance with the operating instructions, improper use, abnormal environmental conditions, inappropriate operating conditions, overload or insufficient servicing or maintenance.
 - Defects caused by using accessories, components or spare parts other than original Bosch parts.
 - Tools to which changes or additions have been made.
 - Slight deviations from the specified quality that do not affect the value and functionality of the tool.

4. Defects recognised by us as being covered by the guarantee shall be corrected either by means of repair of the faulty tool free of charge or by replacement with a tool in perfect working order (this may possibly be a later model). Retained tools for which a replacement has been provided shall become our property.

5. The guarantee claim must be lodged within the guarantee period. This requires the submission or sending of the complete tool in question with the original sales receipt, which must indicate the purchase date and the product designation, to the retailer or to one of the Authorised Service Centres named in the Operating Instructions. If a claim is made within the 36-month guarantee period based on the above mentioned registration, the down-loaded and printed registration form must also be submitted. Partially or completely disassembled tools cannot be submitted or forwarded in the case of a guarantee claim. The Bosch Service Centre provides a free-of-charge pick-up service for warranty claims (call 0844 7360109); if you elect to send the tool to a retailer or to an Authorised Service Centre, you shall bear the costs of transport and shall carry the transport risk. Transport charges for invalid claims may be levied at the discretion of the Bosch Service Centre; invalid warranty claims may be repairable, in which case you may be offered an estimate of the cost involved.
6. Claims other than the right to correction of faults in the tool named in these guarantee conditions are not covered by our guarantee.
7. Services provided under guarantee do not lengthen or renew the guarantee period for the tool.

The above guarantees apply to tools that are bought and used in Europe. German law shall apply to this guarantee to the exclusion of the UN Convention on the International Sale of Goods (CISG) in so far as this is permitted by national legislation. ROBERT BOSCH GMBH Geschäftsbereich Elektrowerkzeuge 70745 Leinfelden-Echterdingen Bundesrepublik Deutschland.

ISO certification

All electric and pneumatic power tools listed in this catalogue are manufactured in our own factories, which have been certified to ISO9001, i.e. 9002. All tools comply with S.A.B.S. regulations (IEC 745)

Conformity

All electric and pneumatic power tools listed in this catalogue conform to the following standards or regulatory documentation: EN 50 144, HD 400, EN 60 335 or EN 792 (depending on the model), EN 55 014, EN 55 104, EN 61 00-3 according to the provisions of EU Directives 72/33/EEC, 89/392/EEC, 89/336/EEC.

Insulation

The Bosch Power Tools listed are double-insulated. Additional safety, even when a live wire is accidentally drilled through, is assured by full insulation which is featured in many Bosch Drills, impact Drills and Rotary Hammers.

General

We reserve the right to amend technical specifications. Drawing and recommended prices are non-binding. No liability can be accepted for printing errors. Status 01/07/2015.

Real Bosch!

Always power ready

Blue Performance
Simply more.

NEW! Professional holster with

Wireless Charging System: see page 14

The new holster securely holds the drill, battery and charger and once integrated into the vehicles 12 V electrical system via an inverter wirelessly charges the battery during each journey, so the tradesperson is always power ready!
