

# Speaker Instructions

You'll notice a few features on the speaker panel:

- 1.) The OFF/ON button
- 2.) The USB port for power output (charge your phone or device)
- 3.) The 3.5mm auxiliary port (sound output)
- 4.) The mini USB port for power input (charge the speaker)
- 5.) The charging indicator and Bluetooth connection. The left light indicates Bluetooth connection and charging. The three lights on the right indicate battery level.

## Charge Battery:

To charge the battery, insert the USB charger into the device into port #4, and plug it into the wall. You'll want to use at least a 5 Volt/1.5 Amp charger in order to get a fast and full charge. When the left most light is red it indicates the speaker is charging.

## Light indications:

The three light indicators on the right show how much JUICE you have left. All 3 lights full? You are JUICED (power is full), my friend!

## Bluetooth Connection:

Flip the switch "ON" #1, turn on Bluetooth via any device. You'll see "Super Real Bluetooth" as an option. Connect, and you're good! You can connect via 3.5mm jack into the speaker via the aux port (#3) too.

Thanks so much - if you LOVE the product, we would love a review on Amazon!

## **FCC Statement**

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
