

# Quick Installation Guide

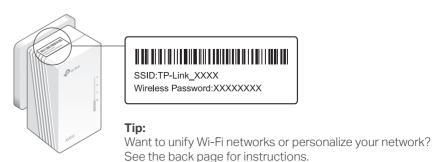

Plug the extenders into power outlets on the same electrical circuit. Wait until the extender's Powerline LED û turns on.

Note: If the LED is off, please refer to FAQ > Q2.

# 3 Enjoy!

Connect your devices to the internet using the default SSID (network name) and password on the label at the top of the extender.

### Attention

Plug powerline devices into wall outlets instead of power strips.

Using power strip will affect network performance or even cause connection drops.

## Unify Your Wi-Fi Networks via WPS

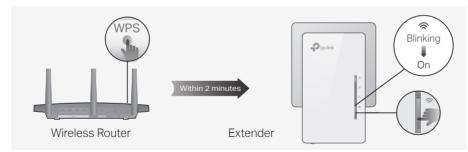

Copy SSID and password from your router via WPS to create one unified Wi-Fi network throughout your home.

Note: If your router doesn't have a WPS button, manually change the extender's Wi-Fi settings via the toPLC app, toPLC Utility, or web interface.

- 1 Plug in the extender in the same room as your router. Wait until the extender's Wi-Fi LED @ turns on.
- 2 Press your router's WPS button. Within 2 minutes, press the extender's Wi-Fi button for 1 second. The extender's Wi-Fi LED starts blinking. When it stays on, Wi-Fi settings are

Note: If Wi-Fi settings are not copied within 2 minutes, manually change the extender's Wi-Fi settings.

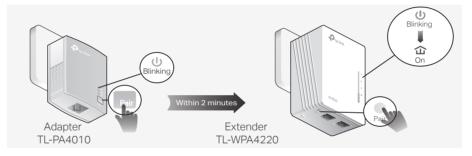

**3** Relocate the extender and enjoy the internet using your router's SSID and password.

# Create a Secure Powerline Network by Pairing

Note: You can only pair two devices at a time. We recommend that you plug in the powerline devices near each other when pairing.

- 1 Press the Pair button on the adapter for 1 second. Its Power LED **U** should start blinking. Note: If the Power LED does not blink, press the Pair button again.
- 2 (Within 2 minutes) press the extender's Pair button for 1 second. Its Power LED **U** should start blinking.
- **3** When the extender's Powerline LED **a** turns on, a powerline network has been successfully created.

# Sync Wi-Fi Settings to More Extenders

If you have more extenders, simply plug in and pair each one with the existing adapter to join the network. Then the Wi-Fi settings will automatically sync from the existing extender to the new ones.

## Personalize Your Network

#### tpPLC App

For easy management via your smartphone or tablet, download the app from the App Store or Google Play, or simply scan the QR code.

Scan to download tpPLC App

#### tpPLC Utility

For easy management via your computer, download the utility on the product's Support page at https://www.tp-link.com/support/download.

Note: For detailed instructions, refer to the utility manual on the product's Support page.

#### Web Interface

To access all settings, connect to an extender wirelessly and visit http://tplinkplc.net.

Note: For detailed instructions, refer to the product manual on the product's Support page.

# Frequently Asked Questions

#### Q1. How do I reset my adapter and extender to factory default settings?

- A1. For TL-PA4010, press and hold the Pair button until all LEDs turn off and then come back on.
- A2. For TL-WPA4220, press and hold the Reset button for at least 2 seconds. Release the button and all LEDs turn off. When the LEDs turn back on, the reset process is complete.

#### Q2. What should I do if the Powerline LED û is off?

- A1. Try another wall socket and make sure all powerline devices are on the same electrical circuit.
- A2. Try to set up a powerline network by pairing. Refer to the section above for instructions.
- A3. If the problem persists, contact our Technical Support.

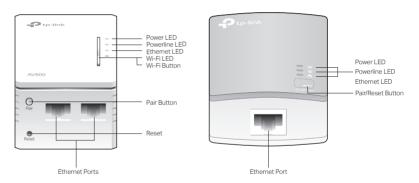

#### Q3. What should I do if there is no internet connection in my powerline network?

- A1. Make sure all powerline adapters and extenders are on the same electrical circuit.
- A2. Make sure the Powerline LEDs 🏠 are lit on all of your powerline devices. If they are not, pair all devices
- A3. Make sure all devices are correctly and securely connected.
- A4. Check if you have an internet connection by connecting the computer directly to the modem or router.

#### Q4. What should I do if a successfully-paired extender does not reconnect after it is relocated?

- A1. Make sure all powerline adapters and extenders are on the same electrical circuit.
- A2. Try to pair the extender again, and make sure the Powerline LED  $\hat{\mathbf{w}}$  is on.
- A3. Check for possible interference due to a washing machine, air conditioner or other household appliances that may be too close to one of the powerline devices. Plug the appliance into the integrated electrical socket to remove the electrical noise if your powerline device has an integrated electrical socket.

# Physical Appearance

LED	STATUS	DESCRIPTION
	On	The powerline adapter/extender is on.
U Power	Blinking	Quickly: Pairing is in process. Slowly: Power-Saving Mode is on.* (TL-PA4010 Only)
	Off	The powerline adapter/extender is off.
	On	The powerline adapter/extender is connected to a powerline network.
	Off	The powerline adapter/extender is not connected to any powerline network.
Ethernet	On/Off	The Ethernet port is connected or not connected.
<b>⊗</b> Wi-Fi	On	The wireless function is enabled.
	Blinking	Slowly: The powerline extender is cloning 2.4G Hz wireless network settings from the main router.
		Quickly: The powerline extender is syncing 2.4G Hz wireless network settings.
	Off	The wireless function is disabled.

\* If the device connected to TL-PA4010 is turned off or inactive for more than 5 minutes. TL-PA4010 will automatically switch to Power-Saving Mode.
