

Connect the secondary nodes to the internet

1. Place each node:
 - At a high and open area.
 - Ensure that the wall between the nodes is less than two.
 - Keep your nodes away from electronics with strong interference, such as microwave, Induction cooker and refrigerator.
2. Use the other power adapters to connect the remaining secondary nodes to power sources, their LED indicators light solid green. Wait about for 40 seconds. The secondary node is connecting to another node when its LED indicator blinks green.
3. Observe the LED indicators of the secondary nodes until their LED indicators light one of the following colors:
 - Solid green: Good connection
 - Solid yellow: Fair connection
 - Solid red: Disconnected
4. If a node's LED does not light solid green, relocate it according to placement tips to get it better connected.
- To access the Internet:
 - Wired devices: Connect wired devices to the LAN ports of your nodes.
 - Wireless devices: Connect wireless devices to your WiFi network using the SSID and WiFi password you set.
- If you want to manage the network anytime anywhere, tap  and use your account to login.
