

# **TIBCO Flogo® Connector for Salesforce.com User's Guide**

*Software Release 1.1.0  
December 2018*

## Important Information

SOME TIBCO SOFTWARE EMBEDS OR BUNDLES OTHER TIBCO SOFTWARE. USE OF SUCH EMBEDDED OR BUNDLED TIBCO SOFTWARE IS SOLELY TO ENABLE THE FUNCTIONALITY (OR PROVIDE LIMITED ADD-ON FUNCTIONALITY) OF THE LICENSED TIBCO SOFTWARE. THE EMBEDDED OR BUNDLED SOFTWARE IS NOT LICENSED TO BE USED OR ACCESSED BY ANY OTHER TIBCO SOFTWARE OR FOR ANY OTHER PURPOSE.

USE OF TIBCO SOFTWARE AND THIS DOCUMENT IS SUBJECT TO THE TERMS AND CONDITIONS OF A LICENSE AGREEMENT FOUND IN EITHER A SEPARATELY EXECUTED SOFTWARE LICENSE AGREEMENT, OR, IF THERE IS NO SUCH SEPARATE AGREEMENT, THE CLICKWRAP END USER LICENSE AGREEMENT WHICH IS DISPLAYED DURING DOWNLOAD OR INSTALLATION OF THE SOFTWARE (AND WHICH IS DUPLICATED IN THE LICENSE FILE) OR IF THERE IS NO SUCH SOFTWARE LICENSE AGREEMENT OR CLICKWRAP END USER LICENSE AGREEMENT, THE LICENSE(S) LOCATED IN THE "LICENSE" FILE(S) OF THE SOFTWARE. USE OF THIS DOCUMENT IS SUBJECT TO THOSE TERMS AND CONDITIONS, AND YOUR USE HEREOF SHALL CONSTITUTE ACCEPTANCE OF AND AN AGREEMENT TO BE BOUND BY THE SAME.

ANY SOFTWARE ITEM IDENTIFIED AS THIRD PARTY LIBRARY IS AVAILABLE UNDER SEPARATE SOFTWARE LICENSE TERMS AND IS NOT PART OF A TIBCO PRODUCT. AS SUCH, THESE SOFTWARE ITEMS ARE NOT COVERED BY THE TERMS OF YOUR AGREEMENT WITH TIBCO, INCLUDING ANY TERMS CONCERNING SUPPORT, MAINTENANCE, WARRANTIES, AND INDEMNITIES. DOWNLOAD AND USE OF THESE ITEMS IS SOLELY AT YOUR OWN DISCRETION AND SUBJECT TO THE LICENSE TERMS APPLICABLE TO THEM. BY PROCEEDING TO DOWNLOAD, INSTALL OR USE ANY OF THESE ITEMS, YOU ACKNOWLEDGE THE FOREGOING DISTINCTIONS BETWEEN THESE ITEMS AND TIBCO PRODUCTS.

This document contains confidential information that is subject to U.S. and international copyright laws and treaties. No part of this document may be reproduced in any form without the written authorization of TIBCO Software Inc.

TIBCO, the TIBCO logo, Two-Second Advantage, TIBCO Cloud Integration, TIBCO Flogo Enterprise, TIBCO Flogo, and TIBCO Flogo® Connector for Salesforce.com are either registered trademarks or trademarks of TIBCO Software Inc. in the United States and/or other countries.

Enterprise Java Beans (EJB), Java Platform Enterprise Edition (Java EE), Java 2 Platform Enterprise Edition (J2EE), and all Java-based trademarks and logos are trademarks or registered trademarks of Oracle Corporation in the U.S. and other countries.

All other product and company names and marks mentioned in this document are the property of their respective owners and are mentioned for identification purposes only.

THIS SOFTWARE MAY BE AVAILABLE ON MULTIPLE OPERATING SYSTEMS. HOWEVER, NOT ALL OPERATING SYSTEM PLATFORMS FOR A SPECIFIC SOFTWARE VERSION ARE RELEASED AT THE SAME TIME. SEE THE README FILE FOR THE AVAILABILITY OF THIS SOFTWARE VERSION ON A SPECIFIC OPERATING SYSTEM PLATFORM.

THIS DOCUMENT IS PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NON-INFRINGEMENT.

THIS DOCUMENT COULD INCLUDE TECHNICAL INACCURACIES OR TYPOGRAPHICAL ERRORS. CHANGES ARE PERIODICALLY ADDED TO THE INFORMATION HEREIN; THESE CHANGES WILL BE INCORPORATED IN NEW EDITIONS OF THIS DOCUMENT. TIBCO SOFTWARE INC. MAY MAKE IMPROVEMENTS AND/OR CHANGES IN THE PRODUCT(S) AND/OR THE PROGRAM(S) DESCRIBED IN THIS DOCUMENT AT ANY TIME.

THE CONTENTS OF THIS DOCUMENT MAY BE MODIFIED AND/OR QUALIFIED, DIRECTLY OR INDIRECTLY, BY OTHER DOCUMENTATION WHICH ACCOMPANIES THIS SOFTWARE, INCLUDING BUT NOT LIMITED TO ANY RELEASE NOTES AND "READ ME" FILES.

# TIBCO Documentation and Support Services

---

## How to Access TIBCO Documentation

Documentation for TIBCO products is available on the TIBCO Product Documentation website, mainly in HTML and PDF formats.

The TIBCO Product Documentation website is updated frequently and is more current than any other documentation included with the product. To access the latest documentation, visit <https://docs.tibco.com>.

Documentation for TIBCO Flogo<sup>®</sup> Connector for Salesforce.com is available on the TIBCO Flogo<sup>®</sup> Connector for Salesforce.com Product Documentation page.

## Product-Specific Documentation

The following documents for this product can be found on the TIBCO Documentation site:

- *TIBCO Flogo<sup>®</sup> Connector for Salesforce.com Installation*
- *TIBCO Flogo<sup>®</sup> Connector for Salesforce.com User's Guide*
- *TIBCO Flogo<sup>®</sup> Connector for Salesforce.com Release Notes*

## How to Contact TIBCO Support

You can contact TIBCO Support in the following ways:

- For an overview of TIBCO Support, visit <http://www.tibco.com/services/support>.
- For accessing the Support Knowledge Base and getting personalized content about products you are interested in, visit the TIBCO Support portal at <https://support.tibco.com>.
- For creating a Support case, you must have a valid maintenance or support contract with TIBCO. You also need a user name and password to log in to <https://support.tibco.com>. If you do not have a user name, you can request one by clicking Register on the website.

## How to Join TIBCO Community

TIBCO Community is the official channel for TIBCO customers, partners, and employee subject matter experts to share and access their collective experience. TIBCO Community offers access to Q&A forums, product wikis, and best practices. It also offers access to extensions, adapters, solution accelerators, and tools that extend and enable customers to gain full value from TIBCO products. In addition, users can submit and vote on feature requests from within the [TIBCO Ideas Portal](#). For a free registration, go to <https://community.tibco.com>.

# Overview

---

Salesforce.com is a cloud-based service for customer relationship management (CRM) that helps companies automate and manage the sales cycle, marketing activities, and customer service. Use the TIBCO Flogo® Connector for Salesforce.com connector to add Salesforce.com data to your Flogo Enterprise flows. This section discusses the tiles related to the TIBCO Flogo® Connector for Salesforce.com connector.

You must have valid connections created on the **Connections** page before using a Salesforce.com connection for either a Salesforce.com trigger or Salesforce.com activity.

# Creating a Salesforce.com Connection

You must create a Salesforce.com connection before you can use the TIBCO Flogo® Connector for Salesforce.com connector. The Salesforce.com connection contains all the parameters required to connect to the Salesforce.com REST API. The Salesforce.com connection is used by all the activities in the Salesforce.com category. Before you create a Salesforce.com connection, be sure that you have an active Salesforce.com account.

Make sure that you have set up the OAuth Permissions in Salesforce.com before installing the connector. Refer to the "Configuring the OAuth Permissions in Salesforce.com" topic in the *TIBCO Flogo® Connector for Salesforce.com Installation* guide for details.

Before you create a Salesforce.com connection, familiarize yourself with Salesforce.com. For details on how to use the Salesforce.com product, see the Salesforce.com product documentation.

You can have a maximum of four active Salesforce.com connections for one user at any time. If you create more than four connections for the same user, the first connection that you created gets deactivated. This limit is enforced by Salesforce.com.

You now have the option to create a Salesforce.com connection to a **Sandbox** environment when creating new connections. All your existing Salesforce.com connections default to the **Production** environment. You can switch environments for existing connections using Edit connection.

Make sure that the pop-up blocker in your browser is configured to always allow pop-ups from for the Salesforce.com site. On Macintosh, clicking the link to the site will result in the connection details page hanging, so make sure to select the radio button for "**Always allow pop-ups from <site>.**"

To create a flow using the Salesforce.com trigger see the "Creating a Connection Flow" topic in the Flogo Enterprise User's Guide.

To create a Salesforce.com connection, click the **Connections** tab on the Flogo Enterprise page.

If this is the first connection you are adding, do the following:

1. Click the **Salesforce connector** tile.
2. Follow these steps:
  - a. In the **Salesforce Connector** dialog, enter a name for the connector in the **Name** text box and optionally a description in the **Description** text box.
  - b. Select the **Environment** you want to use from the drop down list.
  - c. Enter the **Client Id** and **Client Secret**. The Consumer Key field in Salesforce.com corresponds to Client ID in Salesforce.com Connection dialog, and the Consumer Secret in Salesforce.com corresponds to Client Secret in Salesforce.com Connection dialog.
  - d. Enter your username and password for Salesforce.com in the **Username** and **Password** text boxes respectively, and click **Log In**. If your Salesforce account(s) credentials are saved, the username(s) will be listed and you can click on the username for the account you want to use to create this connection.
  - e. You might be asked to verify your identity. Enter the code you received in the **Verification Code** text box and click **Verify**.
  - f. In the Allow Access dialog, click **Allow**.

The **Connections** page opens displaying the new connection you just created.

If you already have an existing connection for any connector in Flogo Enterprise, the connections will be displayed on the **Connections** page.

1. Click **Add Connection**.

2. Click the **Salesforce connector** tile.
3. Follow these steps:
  - a. In the **Salesforce Connector** dialog, enter a name for the connector in the **Name** text box and optionally a description in the **Description** text box.
  - b. Select the **Environment** you want to use from the drop down list.
  - c. Enter the **Client Id** and **Client Secret**. The Consumer Key field in Salesforce.com corresponds to Client ID in Salesforce.com Connection dialog, and the Consumer Secret in Salesforce.com corresponds to Client Secret in Salesforce.com Connection dialog.
  - d. Enter your username and password for Salesforce.com in the **Username** and **Password** text boxes respectively, and click **Log In**. If your Salesforce account(s) credentials are saved, the username(s) will be listed and you can click on the username for the account you want to use to create this connection.
  - e. You might be asked to verify your identity. Enter the code you received in the **Verification Code** text box and click **Verify**.
  - f. In the Allow Access dialog, click **Allow**.The **Connections** page opens displaying the new connection you just created.

# ReceiveSalesforceMessage Trigger

**ReceiveSalesforceMessage** is a Salesforce.com trigger that gets created by default when you create a flow for the TIBCO Flogo<sup>®</sup> Connector for Salesforce.com connector. It receives messages whenever a change occurs in Salesforce.com and activates the flow.

To create a flow using this trigger, see the "Creating a Connection Flow" topic in the Flogo Enterprise User's Guide.

## Configuration

The **Configuration** tab has the following fields that identify which Salesforce.com connection to use and the type of object to use for the selected connection.

Field	Description
Connection Name	Salesforce.com connection name. By default, this field displays the name of the Salesforce.com connection that you had selected at the time of this flow creation. If you have multiple Salesforce.com connections, and would like to use a different connection than the one you specified when creating the flow, you can change the connection by selecting it from the drop down menu for this field.
Object Name	Salesforce.com business object name. By default, this field displays the name of the Salesforce.com object that you had selected at the time of this flow creation. If you would like to configure this trigger with a different object than the one you specified when creating the flow, you can change the object by selecting it from the drop down menu for this field.
Query	The query used to receive information from Salesforce.com, for example Select Id, Name From Account. The query must be in the SOQL (Salesforce Object Query Language) syntax. Selecting the Id field is mandatory in the query for this trigger. The query object must be the same as the one that you selected in the <b>Object Name</b> field. See the Salesforce documentation for more details.

## Output

The schema for the output of this trigger is displayed in a tree format in this tab. The schema will vary according to the object that you selected in the **Configuration** tab. The elements that you see in the schema can be mapped as input to the activities which follow this trigger in the flow.

# SalesforceCreate

---

This activity adds an object to the database of your organization.

## Configuration

The **Configuration** tab has the following fields that identify which Salesforce.com connection to use and the type of object to create.

Field	Description
Connection Name	Salesforce.com connection name. If you have created multiple Salesforce.com connections, select the one you want to use from the drop down menu for this field.
Object Name	Salesforce.com business object name. Select the object you want to use for this activity from the drop down menu for this field.

## Input

You have the option to either enter the input manually or map the input to the output from a preceding activity provided that the preceding activity has an output. The input tree displayed for this activity will depend on the object that you selected in the **Configuration** tab. Refer to the "Using the Mapper" section in the Flogo® Enterprise documentation for details on how to use the mapper.

## Output

The schema for the output of this activity is displayed in a tree format in this tab. The schema will vary according to the object that you selected in the **Configuration** tab. The elements that you see in the schema can be mapped as input to the activities which follow this activity in the flow.

# SalesforceQuery

This activity executes the specified SOQL SELECT statement. It executes a query against the specified object for the specified connection and returns the data that matches the specified criteria in the query.

## Configuration

The **Configuration** tab has the following fields that identify which Salesforce.com connection to use and the type of object to query.

Field	Description
Connection Name	Salesforce.com connection name. If you have created multiple Salesforce.com connections, select the one you want to use for this flow.
Object Name	Salesforce.com business object name. Select the object you want this activity to use for this activity from the drop down menu for this field.

## Input

Entering or mapping a value for the id field in this tab is mandatory. See the Salesforce documentation for more details.

Enter the Salesforce.com query, you want to send to Salesforce using SOQL (Salesforce Object Query Language). You have the option to either enter the input manually or map the input to the output from a preceding activity provided that the preceding activity has an output. The input tree displayed for this activity will depend on the object that you selected in the **Configuration** tab. Refer to the "Using the Mapper" section in the Flogo® Enterprise documentation for details on how to use the mapper.

## Output

The schema for the output of this activity is displayed in a tree format in this tab. The schema will vary according to the object that you selected in the **Configuration** tab. The elements that you see in the schema can be mapped as input to the activities which follow this activity in the flow.

# SalesforceUpdate

This activity updates an existing object within the database of your organization.

## Configuration

The **Configuration** tab has the following fields that identify which Salesforce.com connection to use and the type of object to use for the selected connection.

Field	Description
Connection Name	Salesforce.com connection name. If you have created multiple Salesforce.com connections, select the one you want to use for this flow.
Object Name	Salesforce.com business object name. Select the object you want this activity to use for this activity from the drop down menu for this field.

## Input

Entering or mapping a value for the id field in this tab is mandatory. See the Salesforce documentation for more details.

Input the details of the object that you want to update. You have the option to either enter the input manually or map the input to the output from a preceding activity provided that the preceding activity has an output. The input tree displayed for this activity will depend on the object that you selected in the **Configuration** tab. Refer to the "Using the Mapper" section in the Flogo<sup>®</sup> Enterprise documentation for details on how to use the mapper.

## Output

The schema for the output of this activity is displayed in a tree format in this tab. The schema will vary according to the object that you selected in the **Configuration** tab. The elements that you see in the schema can be mapped as input to the activities which follow this activity in the flow.

# SalesforceDelete

This activity is used to delete a record in the Salesforce.com database. It deletes an instance of the specified object from the database of your organization.

## Configuration

The **Configuration** tab has the following fields that identify which Salesforce.com connection to use and the type of object to be deleted.

Field	Description
Connection Name	Salesforce.com connection name. If you have created multiple Salesforce.com connections, select the one you want to use for this flow.
Object Name	Salesforce.com business object name whose record you want to delete from the Salesforce.com database.

## Input

Entering or mapping a value for the id field in this tab is mandatory. See the Salesforce documentation for more details.

Input the details of the object that you want to delete. You have the option to either enter the input manually or map the input to the output from a preceding activity provided that the preceding activity has an output. The input tree displayed for this activity will depend on the object that you selected in the **Configuration** tab. Refer to the "Using the Mapper" section in the Flogo® Enterprise documentation for details on how to use the mapper.

## Output

The schema for the output of this activity is displayed in a tree format in this tab. The schema will vary according to the object that you selected in the **Configuration** tab. The elements that you see in the schema can be mapped as input to the activities which follow this activity in the flow.
