## **MBR 179 MK2 FCC certification – Cover letter**

This is to request Nemko Canada Inc to provide the required service enabling us to achieve FCC certification for the MBR 179 MK2 equipment manufactured by Kongsberg Seatex AS.

The Maritime Broadband Radio is a smart antenna designed for use in maritime applications where digital high-speed reliable communication and data transfer is crucial for efficient and safe operation. The MBR 179 MK2 version has a phased array consisting of 60 antennas and can in real-time adjust the signal phase in order to increase gain in the direction of the receiver.

Yours faithfully

---
