# DOMETIC INFLATABLE AWNINGS

**Quick and secure – our innovative air frame has revolutionised touring**

The patented AIR Frame technology in Dometic inflatable awnings will transform your touring experience. Conventional steel and fibreglass awning poles are replaced with interlinked inflatable AIR Poles, enabling you to inflate the entire awning from a single external point. Conveniently, the AIR Frame is always attached to the awning for a quick and easy setup. Not only is the AIR Frame extremely strong, it can flex in the wind too, so you'll never break or bend a pole.

Additionally, with no metal or fibreglass poles there's nothing to damage your caravan, as the AIR Poles simply rest against your vehicle with no other attachment needed. For optimal awning performance inflate the awning to 9 psi. Each awning comes with a Downdraught hand pump and for maximum convenience, simply plug in the optional Gale 12 V pump.

**Air frame pressure in response to differing air temperatures**

# SINGLE POINT INFLATION

Individual AIR Poles are linked together allowing the entire awning to be inflated from a single external inflation point. The entire AIR Frame is easily deflated through quick release deflation valves at the base of each leg; as each AIR Pole is connected there is no need to deflate each AIR Pole individually. So, as well as being the easiest awnings to set-up, the user-friendly Dometic awnings are also the easiest to take down.

Deflation valve

For optimal performance inflate to 9 psi

**Air Frame Construction**

The AIR Frame is incredibly durable, each AIR Pole is made of a strong TPU inflation tube zipped into a reinforced laminated oxford polyester/PE cover, which is then zipped into a heavy-duty polyester sleeve in the awning. Tested up to 22 psi, the AIR Frame system best functions when inflated to 9 psi.

**Reliable Technology**

Dometic AIR Poles are well protected and require no maintenance. Inflatable awnings are considerably lighter, and with no poles to snap, the AIR Frame is also far more durable than conventional poles. Suitable for both hot and cold climates, the AIR Frame can even handle extreme changes in temperature.

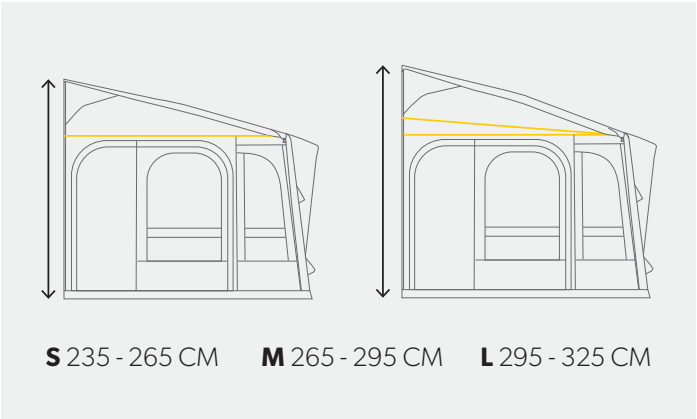

# MULTI HEIGHT SYSTEM

Patent Pending

Dometic height adjustable static awnings ensure exceptional vehicle fitment

Our new Multi-Height System delivers the most versatile inflatable static awnings ever. Rather than strictly being suited to either a caravan or motorhome, this ground-breaking feature enables the same awning to fit to a variety of leisure vehicles, with the keder connection now achieved at a multitude of heights within an expanded range.

We know that real-world experience is everything, and thanks to our latest awning innovation these are our best performing awnings ever. The Multi-Height System means your Dometic awning will be easier to pitch on uneven ground and perform better in adverse conditions, effectively shedding rainwater and fitting closer to the vehicle side.

## How does it work?

The operation couldn't be easier; simply unzip the gusseted awning side panels, peg the awning down to fine tune fitment, then close the internal zips to hide any excess material. Once you've set the Multi-Height System for the first time, you are free to set the awning down and pitch again and again without needing to re-adjust. For convenience, the adjustable zipped gussets are positioned just above the zip-out side panels, meaning fitting and adjusting the awning to your motorhome can be achieved without the need for a step or ladder.

## Designed for touring confidence

As all experienced tourers know, selecting the correct size awning for your vehicle is essential to maximise the living space of your pitch and enhance your holiday. The Multi-Height System makes finding your perfect awning easier than ever before, size S awnings connect to vehicles with a connection height range of 235 – 265 cm, size M from 265 – 295 cm and size L from 295 – 325 cm.

# DUAL KEDER

Fitted to all new Dometic inflatable motorhome awnings, premium dual awning keder. 5 mm and 7 mm keder are now installed as standard, allowing a seamless connection to both conventional caravan awning rail and motorhome cassette awnings. This innovative design feature means Dometic inflatable static awnings are equally suited for use with caravans, motorhomes and panel vans. Dual keder reduces model complexity and affords you the freedom to change vehicles without necessarily changing awning.

# APEX VENTILATION

Experience greater comfort with our new weather protected apex ventilation. Fitted to all new Dometic inflatable motorhome awnings, triangular apex ventilation panels increase air circulation and improve comfort inside the awning. These auxiliary ventilation points, found in the top corners of each inflatable awning, conveniently allow air to escape the awning as it rises and warms. Importantly, this feature helps to regulate the interior temperature in hotter climates and effectively combats condensation for early and late-season tourers.

**AIR Frame™**

Single Point Inflation AIR Frame awnings inflate entirely from just one external inflation point, creating an exceptionally strong structure.

**Multi-Height System**

Your Dometic awning will be easier to pitch on uneven ground and perform better in adverse conditions, effectively shedding rainwater and fitting closer to the vehicle side.

**Quickpitch™ Guying System**

Heavy-duty straps can be pegged out in seconds. Peg the bottom strap taut and adjust the top buckle to apply tension.

**Dual-Pitch™ Roof System**

Effectively deflect wind and shed rain water efficiently to prevent puddling on the roof and enhance performance.

**SabreLink™ ready**

Attach up to three lights on the front and centre AIR Poles. Switch the lights on/off and adjust the brightness remotely. Also suits poled awnings.

**Limpet® ready**

Pre-punched holes ready to attach the rear wall of the awning to the vehicle using Limpet Fix technology.

**Weathershield™ All-Season**

Ultra-rugged and UV resistant All-Season material, perfect for touring in warmer climes and for use on a seasonal pitch. The fully breathable fabric is constructed to handle extremes of weather and has been tested in the wettest regions of Europe and the sunniest parts of Australia to ensure it never lets you down.

**Weathershield™ Pro**

The iconic fabric used extensively throughout the awning range has proven quality in diverse environments. With the look and feel of a traditional fabric, but weighing far less, Weathershield™ Pro continues to be the definitive choice for tourers the world over.

**Weathershield™ 150D**

Extremely light and easy to handle, Weathershield™ 150D promises super-fast set-up and take-down every time. Highly durable and weather-resistant too, this lightweight material offers great value with no compromises.

**Weathershield™ PVC**

Constructed with 400g/m<sup>2</sup> PVC, this super tough awning material is waterproof, long-lasting and easy to clean. Developed for winter touring, Weathershield™ PVC is rated to -20 °C, more than a match for even the most extreme snowy conditions.

**Weathershield™ Redux**

Waterproof, lightweight, and environmentally responsible. This material is woven from recycled plastic bottle yarn, providing reliable protection from the elements without compromise.

**UV Protection**

An Ultraviolet Protection Factor (UPF) denotes how much solar ultraviolet radiation is reduced when passing through fabric. Dometic awning material allows only 1/50th of ultraviolet rays to pass through, ensuring you're protected and kept cool.

**Waterproof**

Tested to 200L/m<sup>2</sup> per hour to ensure that you are kept dry.

We love the outdoors. As pioneers in the mobile living arena, we are committed to driving sustainability in our industry. Because we want nature to be a resource for everyone to enjoy and explore. Forever.

The new Weathershield Redux material used on our Redux tents and shelters is an important step towards our collective goals. Plastic waste is a major environmental issue but we can play our part by turning a problem into a solution. The material name, Redux, meaning ‘brought back’, hints at the responsible construction of

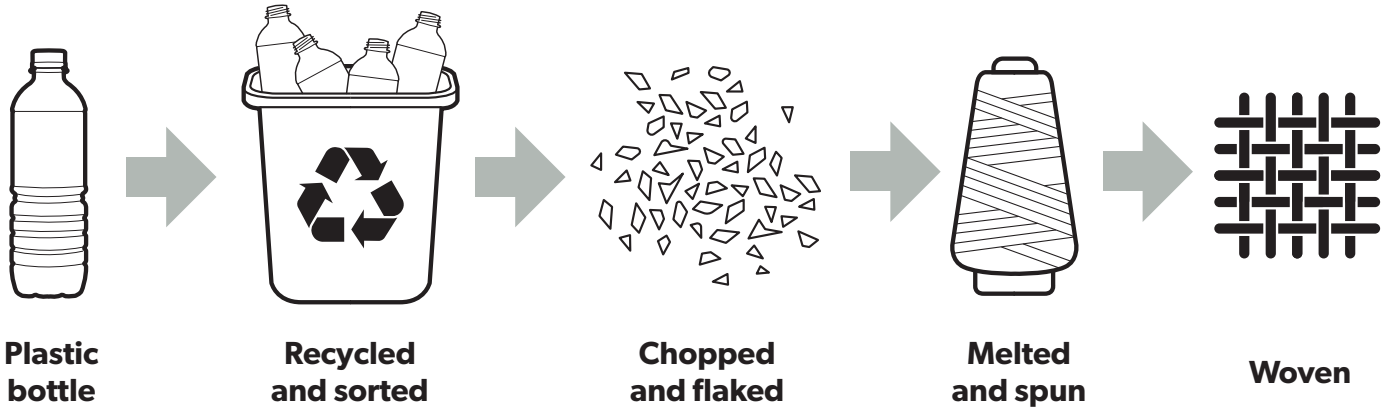

our new awnings, tents and furniture. Weathershield Redux is made from 100% recycled plastic bottles and is Global Recycled Standard certified. This new material is only one of the many ways Dometic is ensuring future sustainability across the whole company, to balance our environmental, economic and social impact.

We’re now on the move to a better tomorrow, but we’re not there yet.

THE PROCESS

The Dometic Leggera AIR  
Redux 260 uses approximately  
28 metres of material

**= 280**

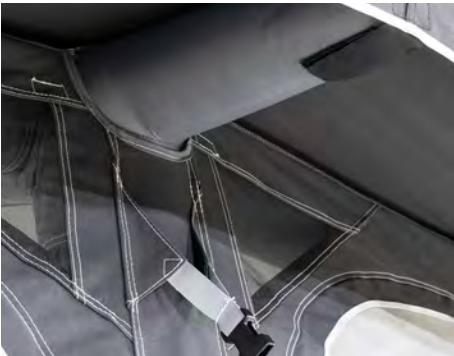

That means **280** bottles  
have been recycled to  
make this awning.

Combining traditional full awning internal space with innovative Air Frame technology, the Dometic Residence AIR All-Season is the ultimate inflatable caravan awning. Available in A measurement sizes 13 to 18 (equivalent to 950 cm - 1100 cm), the Dometic Residence awning boasts an integrated inflatable canopy, zipped external window blinds and removable front and side panels. Built to last, the breathable, polycotton material construction makes this awning extremely resistant to inclement weather - great for long site stays at any time of year.

Our camping furniture allows you to make the most of your time away with friends and family. Sturdy chairs and tables with adjustable legs for use on uneven ground allow you to comfortably sit and enjoy meals outside your tent or under the awning. Designed for quick and easy setup, create a space where you can eat and relax together – because it's for moments like these that you decided to go camping.

**Camping Tables**

Quick to set up, lightweight and durable, our tables are built for use in harsh outdoor environments. Adjustable legs ensure a level dining surface on uneven ground, while foldable designs make storage and transport easy.

**Camping Chairs**

Recline and relax, sit up and eat or position your chair to lean back out in the sun. We have a variety of ergonomically designed chairs with SoftMesh™ fabric and sturdy aluminium or steel frames.
