The Crestron Flex UC-C160-Z system provides a customizable video conference room solution for use with the Zoom Rooms intelligent communications platform. It supports single or dual video displays, and features the UC Engine Assembly with UC-ENGINE-Z and 10.1 in. touch screen. The UC-C160-Z enables integration with your choice of displays, cameras, speakers, microphones, mixers, switchers, and audio conferencing interface (or speakerphone).

### Native Zoom Rooms™ Software Experience

The UC-C160-Z system features Zoom Rooms conferencing software that enables audio and video connectivity for easy collaboration and content sharing.

### Custom Room Integration

The UC-C160-Z system provides the essential components needed to design a fully custom video conferencing space using your choice of display devices, cameras, speakers, microphones, and other AV equipment. Any Zoom Rooms software compliant USB camera and USB audio conferencing interface (or speakerphone) may be used. A non-USB camera or camera switcher may also be integrated by adding a video converter, model [HD-CONV-USB-100](#) (sold separately). The UC-C160-Z system allows rooms of any size and scale to be designed using Crestron Avia™ digital signal processors and amplifiers, Saros® or Vector™ speakers, and other equipment.

### 10.1 in. Touch Screen

With a large 10.1 in. (257 mm) capacitive touch screen display, the Crestron® tabletop touch screen ([TS-1070-B-S](#)) provides superior conferencing control in meeting rooms, huddle spaces, and executive offices. The touch screen also offers optional control of room lighting, shades, thermostats, and other equipment.<sup>1</sup>

### UC Engine Assembly

All the capabilities of a complete Zoom Rooms video conferencing and content sharing solution are empowered by the UC Engine. For ultimate performance, Crestron employs a powerful Intel® NUC Mini PC running Zoom Rooms software. The UC Engine Assembly (UC-BRKT-100-Z-ASSY) streamlines the installation of a Crestron UC system by assembling the UC-ENGINE-Z, HD-CONV-USB-200, and UC-CONN-HD together on one convenient and ready-to-mount bracket.

The complete assembly can be mounted on the wall, or it can be attached to the rear of the display device. Attachment to the display is accomplished using two of the four bolts that also affix the display to a VESA® compliant display mount. The assembly bracket includes mounting holes on its left and right side edges, spaced at 100 mm (3.94 in.), 200 mm (7.87 in.), and 300 mm (11.81 in.) vertically, to allow for attachment to either side of the display mounting plate on the rear of the display device.

For more information, refer to the [UC-BRKT-100-Z-ASSY](#) product page.

### Network Management and Security

Crestron Flex is an enterprise grade solution, engineered to integrate seamlessly into any Zoom Rooms software deployment. Crestron Flex is ideally equipped for mass deployment throughout any sized corporate, university, medical, military, or government facility.

IoT cloud based provisioning enables complete network configuration in advance of hardware delivery, with touchless updates following installation via Windows® Update. Crestron Fusion® or XiO Cloud® management enables monitoring and logging of room and equipment usage, as well as centralized help desk support. Advanced security features ensure privacy, reliability, and compliance with your organization's IT policies.

### XiO Cloud® Provisioning and Management Service

The UC-C160-Z is compatible with the XiO Cloud service, which is an IoT (Internet of Things) based platform for remotely provisioning, monitoring, and managing Crestron devices across an enterprise or an entire client base.<sup>2</sup> The service enables installers and IT managers to deploy and manage thousands of devices in the amount of time it previously took to manage just one. As part of the UC-C160-Z system, the XiO Cloud service allows for network management and provisioning and system alerts. System updates are controlled by Windows Update.
