**Motherboard Layout and Features**

**Note for VGA Cards:** For a single VGA card, install the VGA card into the SLOT6 (x16) slot. For CrossFireX™ mode (two VGA cards linked), install one card each into SLOT6 (x16) and SLOT4 (x16) slots.  
**Note for Intel CPUs:** PCIe Slot#1 (x4) and Slot#4 (x16) are disabled when an Intel Core i7-5820K is installed. This is due to the CPU having a limitation of 28 PCIe lanes, compared to 40 with other CPU models.

LED4	Status Display (C7X99-OCE only)	Digital Readout	Download the status codes below**

\* For the C7X99-OCE-F, reboot time may be longer after clearing CMOS. This is due to the additional IPMI functions.  
 \*\* Download the AMI status codes at http://www.ami.com/support/doc/ami\_aptio\_4\_x\_status\_codes\_pub.pdf  
**Note:** Refer to Chapter 2 of the User Manual for detailed information on jumpers, connectors, and LED indicators.

**Memory Support**

The C7X99-OCE(-F) supports up to 64GB of Unbuffered (UDIMM) DDR4 non-ECC 2133~3000(OC) MHz in 8 memory slots. Populating these DIMM modules with a pair of memory modules of the same type and same size will result in interleaved memory, which will improve memory performance.  
**Note:** For memory optimization, use only DIMM modules that have been validated by Supermicro. For the latest memory updates, please refer to our website at http://www.supermicro.com/products/motherboard.

**DIMM Memory Installation**

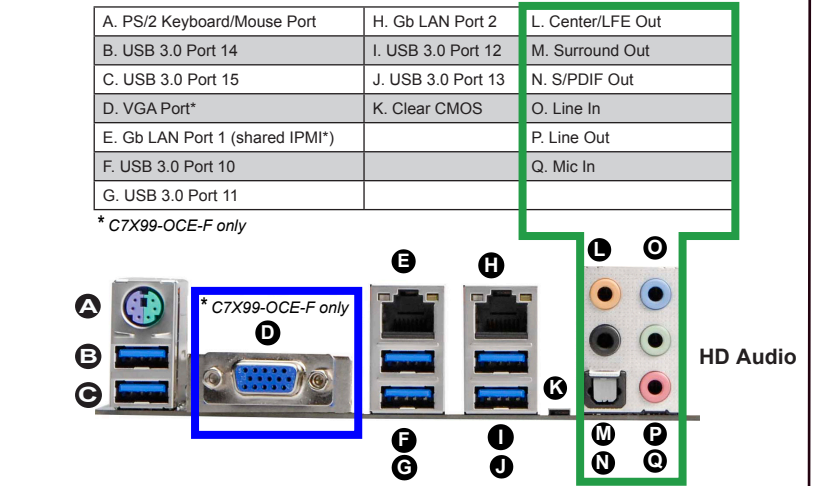

**Memory Population Guidelines**  
 When installing memory modules, the DIMM slots should be populated in the following order: DIMMA1, DIMMB1, DIMMC1, DIMMD1 then DIMMA2, DIMMB2, DIMMC2, DIMMD2.

- Always use DDR4 DIMM modules of the same size, type and speed.

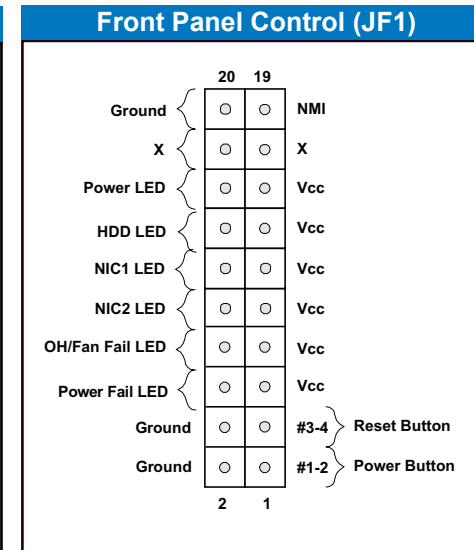

Recommended Population (Balanced)								
DIMMA1	DIMMB1	DIMMC1	DIMMD1	DIMMA2	DIMMB2	DIMMC2	DIMMD2	Total System Memory
4GB	4GB							8GB
4GB	4GB	4GB	4GB					16GB
4GB	4GB	4GB	4GB	4GB	4GB			24GB
4GB	4GB	4GB	4GB	4GB	4GB	4GB	4GB	32GB

**Note:** Up to 64GB of memory are supported. See chapter 2 of the User Manual for complete memory population information.
