Dear customer,

Thank you for choosing one of our products. Our products stand for high-quality, successfully tested products which are designed to provide years of service and are made to be easy to use. Please take a moment to make sure that you understand all the instructions for use before using your device to make sure that they will work to the best advantage of your needs.

1. Included in delivery

In the delivery
• PO 60 pulse oximeter
• 2 x AAA batteries
• Instruction manual

2. Intended use

Only use this device for the purpose as described in the instruction manual. This device is intended for home use and is not intended to be used in conjunction with other medical devices. This device is not intended to be used for any purpose other than as described in the instruction manual.

3. Getting to know your device

The Beurer PO 60 pulse oximeter provides a non-invasive measurement of the arterial oxygen saturation (SpO₂) and heart rate. Correct measurement is subject to the conditions specified in the instruction manual. Therefore it is an important parameter for assessing the respiratory func-
tion. This device is intended only for home use and by non-medical personnel. This device is not intended for use by people who have limited physical, sensory or mental capabilities or limited experience and knowledge unless they are supervised or trained by a person responsible for their safety. The device is intended only for home use by people who have not been diagnosed with a heart disease or other medical condition. The manufacturer disclaims any liability for any incorrect use of the device. The user is solely responsible for ensuring that the device is used in accordance with the instructions and the regulations of the relevant country.

4. Signs and symbols

The following symbols are used in these instructions for use, on the packaging and on the type plate for the device.

5. Warnings and safety notes

In the case of non-compliance with the following information, the following risks may result:

• Incorrect measurements are likely for patients who have been administered medical dye in the past or for patients at risk such as people with heart disease or asthma, but also for athletes and healthy people who undertake physical exertion.

6. System requirements for the app "Beurer HealthManager"

The "Beurer HealthManager" app must be activated in the app store first. According to the app settings, the following system requirements are required for the app to work:

7. Function button

The function button on the pulse oximeter has four functions in total:

Initial use

7.1 Turning the batteries

1. Slide the battery compartment cover.
2. Insert the two supplied AAA batteries into the battery compartment. The plus symbol (+) must face outwards.
3. Close the battery compartment cover again.

8. Operation

To transport the pulse oximeter more easily you can attach a lanyard to the device.

9. Transfer of measured values via Bluetooth® low energy technology

Note: Bluetooth® must be switched ON if you wish to transfer data.

Note: The "Beurer HealthManager" app must be activated in the app store first.

Each time data is transferred, the time and date are synchronized with the smartphone. To save all of your measurements using the app, a Bluetooth® connection must be made, the "Beurer HealthManager" app must be installed and the app must be activated. To transfer data to the app, you must have the latest version of the app installed on your smartphone.

10. System requirements for transferring data using Bluetooth®

The "Beurer HealthManager" app must be activated in the app store first.

11. Evaluation and measurement results

12. Maintenance/cleaning

Cleaning:

To clean the pulse oximeter, first detach the lanyard using the button. To clean the pulse oximeter, use a soft cloth dampened with water and soap.

Storage:

The pulse oximeter should be stored under the following conditions:

13. Disposal

The Beurer PO 60 pulse oximeter must not be disposed of in the municipal waste stream. The device is marked with the symbol for WEEE (Waste Electrical and Electronic Equipment). The device should be sent to an appropriate facility for disposal or recycling, in accordance with the relevant country’s disposal regulations.

For environmental reasons, do not dispose of the device in the household waste at the end of its useful life, but return it to a collection point for waste electrical and electronic equipment.

If you have questions or comments, please contact the local authorities responsible to dispose of the device.

14. What if there are problems?

15. Technical data

Model No.
PO 60

16. Notes on electromagnetic compatibility

The device is suitable for use in environments where it is exposed to interference. For devices with connection to the electrical network, connected to the public grid or connected to a fixed electrical installation, the following applies:

17. Warran
ty/Service

If the device is not used within a relative long period, take the batteries out of the battery compartment.

18. Additional information

To transport the pulse oximeter more easily you can attach a lanyard to the device.
