PHOTOSENSITIVE SEIZURES

People may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of epilepsy may have an undiagnosed condition that can cause photosensitive seizures while watching video games. A variety of symptoms including:

- Lightheadedness
- Altered vision
- Eye or face twitching
- Jerking or shaking of arms or legs
- Disorientation
- Confusion
- Children and teenagers are more likely than adults to experience these seizures.

Photosensitive epileptic seizures may be reduced by:

- Sitting farther from the television screen,
- Using a smaller television screen,
- Playing in a well-lit room,
- Not playing when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

ILLUSIONS

Some televisions, especially front- or rear-projection types, can be damaged if any video images, including static images presented during the play of a video game, are "burned" on the screen, causing a static image to appear at all times, even when the game is not being played. Similar damage may occur when placing a video game on hold and then playing it again.

SINGLE PLAYER
MISSION BRIEFING/OBJECTIVES
Each level has primary and secondary objectives, explained on the Mission Briefing screen. Completing the primary objective is mandatory to finishing the level and unlocking additional game features. Nailing secondary objectives is not essential to success but may unlock cool items.

• Pause the game (greater than) to view your objective completion status.

• Law Enforcement objectives may involve apprehending a suspect instead of using deadly force. Use a stun gun to subdue a suspect when required, then cuff 'em with the Action button (default B).

• When you complete an element of any objective, a prompt appears at the top of the screen.

ATTACKING
• Pull the Shoot trigger (default R) to fire or swing a weapon.
• Pull the Throw Grenade trigger (default L) to throw a grenade, tear gas or pipe bomb.

FIRST-AID KITS
Pick up first-aid kits to heal your wounds. Some only provide partial first aid and others give you 100% health.

SPECIAL MOVES
Perform special moves by pressing the Action button (default B) when an Action Icon appears at the bottom of the screen.

OPEN/CLOSE — Kick open doors.
CLIMB — Climb up ladders. Grab the ladder and move L.
VAULT — Jump over obstacles.
ON/OFF — Throw switches to turn power On/Off to some system in the area.
PICK UP WEAPON — Pick up a weapon lying in front of you. In exchange, you will lay down a weapon you're holding of the same weapon type.

APPREHEND — Arrest Criminals after taking them out with non-lethal means (Law Enforcement only).

NEXT SONG — Find a boom box and press the Action button to tune in a new song.

USING WEAPONS
Weapons fall into four categories and vary depending on your Criminal or Law Enforcement status. When you pick up a weapon, you discard a weapon of the same type. You can return to that spot later and trade a weapon for the one you discarded. Your weapons include:

• Handguns, including dual pistols.
• Shotguns, automatic rifles and sniper rifles.
• Hand-to-hand weapons such as baseball bats or stun guns.
• Thrown explosives such as grenades and molotovs.

FIREARMS
Use R (default) to aim your weapon. The targeting crosshairs turn red when over the enemy. Pull the Shoot trigger (default R) to fire.
• Click R to keep your weapon up and ready to fire. Click R again to lower your weapon. Clicking R gives you better aim and a zoomed-in view.
• Press the Reload button (default X) to reload.
• Press the Action button (default B) to pick up weapons dropped by slain enemies.
• Press R (right) to peer around corners and take a protected shot.

GRENADES/BOMBS
Use R to aim your grenade or bomb, aiming with the cursor in the same way as aiming your guns. Pull the Throw Grenade trigger (default L) to toss the explosive. The longer you hold the trigger, the farther you throw.

HAND-TO-HAND WEAPONS
These include clubs, nightsticks, knives and stun guns. Stun guns and zappers knock someone out; that person is down for the count. Law Enforcement can apprehend a downed suspect for additional points and objective credit.
TAKE 25 TO LIFE BEYOND THE BOX

Xbox Live® is a high-speed or broadband Internet gaming community where you can create a permanent gamer identity, set up a Friends List with other players, see when they’re online, invite them to play, and talk to them in real time as you play.

In 25 TO LIFE, it’s Law Enforcement versus Criminals in bloody showdowns where even the winners wear serious powder burns. Up to 16 players compete. Join online games or create and host your own game.

.44 AUTO: Huge firepower in a small semi-automatic package.

RIFLES/SHOTGUNS/AUTOMATIC WEAPONS

MP SILENCED SUB-MACHINE GUN: Some people think this is the best sub-machine gun ever made. At 800 rounds per minute, there’s enough slugs for everyone.

AK ASSAULT RIFLE: Now you’re playing Army. Rapid-fire and monster hitting power make this the weapon to fear on any battlefield.

SNIPER RIFLE: Get a huge range advantage and take someone out before they even see you. Click R to zoom the scope for a perfect shot.

BOMBS

FLASH GRENADE: Explodes with a blinding flash.

TEAR GAS CANISTER: One snort of this causes the victim’s eyes to start burning as they gasp for air.

Pipe Bomb: This is plumbing stuffed with black powder. Total devastation for the do-it-yourselfer.

Molotov: It’s a bottle full of gasoline. Press R to adjust the trajectory of your throw. And make it a good throw! Back and turn you into thug flambe.

You can customize your characters, weapon loadout and the tag you spray on buildings. These options appear in both Multiplayer Online and Multiplayer System Link games.

CUSTOMIZING YOUR CHARACTER

Criminal or Law Enforcement, if you are going to end up bleeding in the streets, at least have cool clothes when you hit the pavement. 25 TO LIFE lets you customize everything about your character. From skin color, clothes and jewelry to beards and ski masks, you can create a totally unique character.

- Dress like the rest of your posse for quick identification during intense online battles. Criminals can wear Clan colors and Law Enforcement can wear agency uniforms.
- To customize your character in Multiplayer mode, select Customization once you have logged in.
- You can save up to four custom Criminals and Law Enforcement characters to use during Multiplayer games. Each character can have different weapon loadouts.

To customize a character:

1. Select Customize Characters from the Customize Menu. Next, select the character you want to customize and press A.
2. Select Edit Name to give each character preset a name.
3. Select Edit Clothing to customize the look of your Law Enforcement or Criminal character. Start from scratch and choose to modify your character's head, body, arms, hands, legs and feet. Or choose Select Prebuilt and scroll through a list of prebuilt characters. Select Clear/Reset to start over.

USING YOUR CUSTOM CHARACTER IN MULTIPLAYER GAMES

On the Customize Menu, the dot next to the character's name indicates which character will be used in Multiplayer games. The red dot indicates the Criminal character; the blue dot indicates the Law Enforcement character.

To switch the dot to another character, select the character on the Customize Menu. The dot will move to that character when you back out, regardless of whether or not you edited the character.
EDITING YOUR WEAPON LOADOUT
You can customize weapon loadouts during both Multiplayer Online and Multiplayer System Link gameplay.

1. Select Customization, select Customize Characters, press A to select your character and then select Edit Loadout. You can edit and save a different loadout for each custom character.

2. There are four categories (or weapons "slots") to set: Melee, Secondary, Primary, and Grenade. In each category, use ? to toggle between weapon choices.
   - Melee weapons are hand-held weapons such as a baseball bat and hammer, and non-lethal weapons for Law Enforcement such as the stun gun and zapper.
   - Secondary weapons are handguns, including automatic handguns such as the Mak, M.A.G. and 9mm auto.
   - Primary weapons are your big guns — everything that's rifle-sized. These include the AK, shotguns, 2x M.A.G. and sniper rifles.
   - Grenades are lobbed weapons, including pipe bombs, flashbangs and tear gas.

3. Once you finish editing your weapon loadout, press B to return to the previous menu. You will be prompted to save/overwrite your settings before returning to the Multiplayer Menu. Remember to select Yes to save any changes you made to your character.

CREATING A CUSTOM TAG
The tag editor lets you create a custom tag for spray painting on buildings during online games.

- Select Customization, then Custom Tags. You can create up to five letters, choosing the color for the inside, outline and accent.

ONLINE GAME MODES
- RAID — It's time for the Criminals to pay! Law Enforcement attempts to raid a Criminal hangout where they are protecting their stash. The Criminals must defend their turf and prevent the Law Enforcement team from making a bust. The Law Enforcement team's goal is to infiltrate, grab the stash and return it to the SWAT van (or other location) at the start point.
- ROBBERY — Criminals go from their spawn point to a target location and pick up the loot object. Criminals carrying loot run more slowly, requiring team assistance. Criminals must take the loot to available drop-off points. Cops spawn on the opposite side of the map and attempt to prevent successful theft of loot.
- TAG — Represent your set! Two rival gangs of Criminals clash to claim their turf. Each team "owns" turf by controlling tag locations across the level. When you come across an empty tag location, press and hold the Action button (default B) until your character is done tagging. You can also tag over a rival team's tag; doing so gives your team control of that section of turf. A Criminal team wins the round if they control the most tag locations for the longest time or if they control all of the tag locations on the level at one time.
• WAR— This mode is an all-out, team-based deathmatch. The round ends when the time limit or score is reached or when one team is completely eliminated. Be sure to check out the different options that you can configure for this mode when hosting this type of game.

Modifying the Spawn Rules:
You can modify the Spawn rules in the online game modes.
• With **Respawn On**, a player who is killed will re-spawn quickly. A Criminal who is "arrested" will receive a time-based respawn penalty.

- **TIME LIMIT**— Set the game to last from 1 to 20 minutes.
- **SCORE LIMIT**— Set the limit for the winning score, or set no score limit.
- **MAX PLAYERS**— Choose to play with from 2 to 16 players.
- **ROUNDS**— Set the max number of rounds for your game.
- **RESERVED SLOTS**— When set to **Public**, anyone can join your hosted game. If you set this option to **Private**, only your Friends, clan-mates and people you invite by name can join your game.
- **CYCLE TEAMS**— When set to **On**, players switch sides between rounds.
- **FRIENDLY FIRE**— When set to **On**, you can injure or kill teammates.
- **RANKED MATCH**— When set to **On**, your statistics are recorded for rankings. Turn this **Off** for practice with your Clan or Friends, or if you don't want statistics to be reported for the match.
- **TEAM SPAWNS**— Set the number of Spawn tickets for each team. Each ticket allows one player to respawn. Run out of tickets for your team and it's down to elimination rules — you die and it's over!
