FEATURES AND BENEFITS

REVERSE CYCLE DEFROST

The variable speed compressor and advanced defrost capability allow for the best heat pump operation down to 0° F.

ANTI-CORROSION DESIGN/PREMIUM GUARD SEACOAST PROTECTION

Exclusive rust-proof basepan and bulkhead provide another level of corrosion protection to ensure lasting performance in challenging environments.

INVERTER TECHNOLOGY

Variable speed operation provides an advantage with shorter recovery time, improved efficiency, sound quality and dehumidification. Consistent room temperature allows for total room comfort.

ADJUSTABLE SPEED MAKEUP AIR

Makeup air and customizable variable speed fan technology provide the precise airflow for specific applications. For energy savings, Makeup air delivery can be cycled based on occupancy, using a compatible occupancy detecting thermostat. Optional MERV 13 filtration available.

UltimateV12 FACT:

SAVE 60% ON INSTALLATION TIME*

Complete installation from the interior makes installation 60% faster!

*Compared to Friedrich Vert-I-Pak models or GEA AZ91 series models, including installing and building a platform.

INVERTER TECHNOLOGY THE REASONS WHY

Inverter Technology is the latest innovation in Zoneline Vertical Terminal Air Conditioning. By enabling variable speed operation, it improves:

- **Temperature Recovery Time**—ensuring occupant comfort by quickly reaching the desired setpoint temperature
- **Efficiency**—aligns compressor output to room needs thereby reducing energy consumption
- **Low Ambient Heat Pump**—the variable speed compressor and advanced defrost capability allows for the best in heat pump operation down to 0° F
- **Two-Way Thermostat Capability**—advanced thermostat communication allows for true compressor speed control and adjusts cooling & dehumidification outputs to precisely match room needs
- **Sound Quality**—operates at slower speeds longer and smoothly changes speed to avoid abrupt start-ups
- **Dehumidification**—with 3 selectable levels of enhanced dehumidification, it maintains comfortable room conditions using variable speed to reduce humidity, even in challenging environments

UltimateV12 HEAT PUMP SAVINGS

- COP of 3.6 at rated conditions
- Heat Pump operates down to 0° F
- Minimizes use of costly back-up heat

ADJUSTABLE SPEED MAKEUP AIR

MAKEUP DUCT INLET FAN

Open

Closed

A dedicated variable speed fan allows for the delivery of room specific volumes of conditioned Makeup air of up to 70 SCFM.

The RAK190V thermostat provides the ability to achieve energy savings by cycling Makeup air based on occupancy status.

The RAA13V is an optional MERV 13 filter that reduces dust, pollen, mold, bacteria, viruses and other airborne pathogens from entering the room. It provides cleaner Makeup air to improve overall indoor air quality, with easy access from the front side of unit.
