**FCC ID: 2AC7Z-ESP32WROVERB**

This device complies with Part 15 of the FCC Rules and with RSS of Industry Canada. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

**IC: 21098- ESPWROVERB**

This digital apparatus does not exceed the class B limits for radio-noise emissions from digital apparatus as set out in the Radio Interference

Regulations of the Canadian Department of Communications.

**NOTICE:** Changes or modifications made to this device not expressly approved by Signify North America Corporation (USA) and Signify Canada Ltd./Signify Canada Ltée. (collectively “Signify”) may void the U.S. FCC and Canadian authorization to operate this device.

The advanced interface module complies with FCC radiation exposure limits set forth for an uncontrolled environment.

CAN ICES-3 (B)/NMB-3(B)

Caution: To maintain compliance with the FCC’s RF exposure guidelines, place the product at least 20cm from nearby persons.

The manufacturer is not responsible for any radio or TV interference caused by unauthorized

modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

This device has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This device generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this device does cause harmful interference to radio or television reception, which can be determined by turning the device off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna

- Increase the separation between the device and receiver
- Connect the device into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/television technician for help
