

PRESS RELEASE – For Immediate Release, January 2009

Allegro MX Field PC™

Ultra-Rugged Allegro MX Field PC with Microsoft® Windows Mobile®

LOGAN, Utah, USA -- Juniper Systems, Inc., a provider of innovative field computer solutions for rugged applications, announces the new Allegro MX Field PC. The ultra-rugged Allegro features Windows Mobile® 6.1, IP67 rating, robust full keyboard, integrated Bluetooth® Wireless Technology and Wi-Fi 802.11b/g option, long-term battery life, and highly outdoor-visible display. The Allegro MX runs Microsoft® Windows Mobile® version 6.1 and is powered by an XScale core 624MHz processor. The Allegro MX is an ideal solution for mobile GIS when running ESRI ArcPad or ArcGIS Mobile. Durable in extreme environments, the Allegro is the premier choice for those in need of a rugged field computer with a full keyboard. Use the Allegro to collect, document, navigate, communicate, search, and share information. The Allegro MX is your long-term field companion.

The Allegro MX carries on the tradition of the proven Allegro field computers from Juniper Systems. The quality of the Allegro products is unsurpassed in the industry. The full alphanumeric keyboard is especially designed for high production data entry in the field. The keyboard features large keys that are color-coordinated by function. There are 12 function keys available as hot keys for application programs with a unique ability to also serve as Windows Mobile hot keys, enhancing user satisfaction in the field. Backed by our excellent customer service, the Allegro is waiting for you.

The ultra-rugged Allegro MX Field PC meets IP67 and Mil-Std-810F standards for drop, vibration, immersion, humidity, and operating temperatures. The Allegro expansion pods provide customers or OEMs the ability to customize the product for specific market needs. An Allegro expansion pods allow PCMCIA or other sensor modules to be integrated with the product while still maintaining the IP67 rating. Standard expansion pods include a bar code scanner and a GPS receiver. Call us to discuss OEM expansion pods including spread spectrum radio, RFID, 2D bar code.

Microsoft® Windows Mobile® powers more than 18,000 applications. The Allegro includes Microsoft® Excel Mobile, PowerPoint Mobile, Word Mobile, Outlook Mobile, Internet Explorer Mobile, and ActiveSync® for the desktop PC. These programs deliver improved productivity by allowing seamless synchronization of files, tasks, and appointments with an office PC. The Allegro is available in multiple languages allowing the powerful Windows Mobile® more accessibility to people around the world.
