

DECORATIVE WINDMILL GARDEN HOSE STAND

HMI-764

Read this manual carefully before use and save it for future reference.
Assemble components on a soft, clean surface to avoid scratching or damaging the finish.

ASSEMBLY & INSTALLATION

In-Ground

1. Twist stand top (A) onto stand base (B), ensuring parts are secure.
2. Connect the decorative top (C) to the stand using hardware (D).
3. Choose a location with soil that is firm enough to support the stand while it is in use. Loose soil may cause the stand to lean or tip over.
4. Step on the spikes while pushing the base down until the spikes are fully inserted into the ground.

Wall-Mount

1. Carefully measure and mark the wall where decorative top (C) will be mounted onto the screws.
2. Pre-drill a hole (where the decorative top will slide down onto the screw) and insert the wall plugs (E).
3. Insert screws (F) into the wall plugs, leaving them far enough out to so the decorative top can slide over the screw head.
4. Slide decorative top (C) onto the screws.

⚠ SAFETY STATEMENTS & WARNINGS ⚠

- Do not install the stand in loose soil as this could cause the stand to lean or tip over.
- Do not bend the metal.
- Store indoors during the winter and severe weather conditions.

Any modification or failure to follow the recommended care will void the product warranty.
