Federal Communications Commission
Authorization and Evaluation Division
7435 Oakland Mills Rd.
Columbia, MD. 21046

Date: Feb. 22, 2001

Attention: Authorization and Evaluation Division

Subject: **Class II Permissive Change/19" Color Monitor, FCC ID: ARSCM9B0S**
Original granted on Sept. 5, 2001.

Dear Sirs:

This letter serves as our explanation that the subject certified product change is to change its CRT. Below listed some modifications on the sample submitted for testing. We declare that the same will be implemented into all production units to enhance compliance of the units to FCC limits. The FCC ID label and User Manual remain unchanged.

The modifications include the following:

1. Added a ferrite core on the ribbon wire connecting main board and CRT board. (see photo 9)
2. Added a ferrite core on the degaussing wires connected to main board with 2 turns. (see photo 10)
3. Added a ground wire connecting CRT board to FBT's heatsink. (see photo 8)
4. Added 3 jump wires, 2 capacitors, one bead core, one diode and 3 resistors on the solder side of main board for electrical improvement. Added 3 capacitors for EMI. They will be built in to the component side after circuit re-layout. (see photo 13)
5. Added 3 capacitors and 3 resistors on the solder side of CRT board for electrical improvement. Added 1 capacitor for EMI. They will be built in to the component side after circuit re-layout. (see photo 15)
6. Added two ferrite cores on the harness of focus wires and G2 wire with 1 turn. (see photo 9)

If you have any further questions or comments regarding the above, please don't hesitate to contact Mr. Mike Su of ADT Lab. at fax No.: 886-2-2602-2943 or
E-mail: mike@mail.adt.com.tw

Sincerely yours,

Frank Yang / R&D Project Manager
