# INTEL® XEON® E PROCESSOR LANDSCAPE

**MOBILE & ENTRY WORKSTATIONS**

Performance and visuals for workstation professionals

**ENTRY SERVERS**

Support small business demands for on-premise, cloud-ready solutions

**SECURE CLOUD SERVICES**

Protect the most sensitive portions of a workload or service, with hardware-enhanced security

# ESSENTIAL PERFORMANCE FOR ENTRY SERVER SOLUTIONS

UP TO **1.48X** PERFORMANCE  
IMPROVEMENT  
4-YEAR REFRESH<sup>1</sup>

UP TO **1.39X** PERFORMANCE  
IMPROVEMENT  
GEN-ON-GEN<sup>2</sup>

UP TO **4.7** GHz WITH INTEL®  
**TURBO**  
BOOST TECHNOLOGY 2.0

UP TO **64GB** → **128GB\*** DDR4  
**2666** MHz

UP TO **6 CORES**

ENHANCED  
INTEL® SOFTWARE GUARD EXTENSIONS  
DELIVERS ADVANCED SECURITY CAPABILITIES

**ESSENTIAL** PERFORMANCE AND VISUALS WITH  
EXPANDABILITY, RELIABILITY, SECURITY

AVAILABLE IN SINGLE-SOCKET CONFIGURATION ONLY

\*Support for up to 128GB system memory capacity will be available in 2019 through a published BIOS update. Please contact your hardware provider for availability and support. Software and workloads used in performance tests may have been optimized for performance only on Intel microprocessors. Performance tests, such as SYSmark and MobileMark, are measured using specific computer systems, components, software, operations and functions. Any change to any of those factors may cause the results to vary. You should consult other information and performance tests to assist you in fully evaluating your contemplated purchases, including the performance of that product when combined with other products. For more complete information visit [www.intel.com/benchmarks](http://www.intel.com/benchmarks). Performance results are based on testing as of 10/12/2018 and may not reflect all publicly available security updates. See configuration disclosure for details. No product can be absolutely secure. Results have been estimated or simulated using internal Intel analysis or architecture simulation or modeling, and provided to you for informational purposes. Any differences in your system hardware, software or configuration may affect your actual performance. Please see Slide 15 for complete details on the performance claims and configurations.

# DATA IS ESSENTIAL TO SMALL BUSINESS

OF SMALL BUSINESSES PLAN  
TO INCREASE TECHNOLOGY  
INVESTMENT<sup>+</sup>

SMALL BUSINESS SMART APPS  
CAN DELIVER INSIGHTS  
DIRECTLY FROM CUSTOMERS<sup>+</sup>

CRITICAL APPLICATIONS RUN  
IN-HOUSE CAN HELP MAINTAIN A  
COMPETITIVE ADVANTAGE<sup>+</sup>

INTEL OFFERS A PORTFOLIO OF PRODUCTS,  
THOUGHTFULLY DESIGNED FOR SMALL BUSINESS  
CUSTOMERS

AN ON-PREMISE, CLOUD-CONNECTED ENTRY SERVER,  
PROVIDES A POWERFUL AND FLEXIBLE RESOURCE TO  
A GROWING SMALL BUSINESS

UP  
TO **48%**

INTEL® XEON® E-2100 PROCESSOR  
PERFORMANCE IMPROVEMENT  
COMPARED TO A 2014 ENTRY SERVER<sup>1</sup>

## ACCELERATE SMALL BUSINESS DATA INSIGHTS WITH INTEL® XEON® E PROCESSORS

# INTEL® XEON® E PROCESSOR FOR ENTRY SERVER SOLUTIONS

Enhanced performance, advanced security, reliability and affordability for professional-grade entry server solutions and secure cloud services.

## ESSENTIAL PERFORMANCE

Up to 6 cores and 12 threads with up to 4.7 GHz Intel® Turbo Boost Technology frequency combined with up to 128GB\* DDR4 ECC 2666 MHz memory support delivering rapid workload loading and processing

## EXPANDED I/O

Up to 40 lanes of PCI Express 3.0 for graphics, storage and network expandability. Enjoy a faster, smoother, and amazingly responsive computing experience with Intel® Optane™ memory, a smart, adaptable system accelerator.

## ADVANCED SECURITY

Enhanced Intel® Software Guard Extensions supports increased security for application code and data protection.

## SERVER MANAGEMENT

Entry reliability, serviceability and availability (RAS) with Intel® Server Platform Services deliver hardware-enhanced security and remote manageability.

New Intel® Xeon® E Processor

\*Support for up to 128GB system memory capacity will be available in 2019 through a published BIOS update. Please contact your hardware provider for availability and support.

# INTEL® XEON® E PROCESSOR

Boost in processor speed, enhanced memory capabilities, advanced hardware-enhanced security, reliability features and affordability for professional-grade entry server solutions and secure cloud services.

- Up to 6 cores, 12 threads
- Up to 128GB\* DDR4 ECC 2666 MHz memory
- Intel® Hyper-Threading Technology (Intel® HT Technology)
- Intel® Turbo Boost Technology 2.0
- Intel® Advanced Vector Extensions 2.0
- Support for LGA 1151 socket
- Up to 40 PCI Express 3.0 lanes
- Support for USB 3.1 Gen 2 (Up to 10 Gbps)
- Support for Thunderbolt™ 3.0 technology
- Intel® Server Platform Services
- Enhanced Intel® Software Guard Extensions (Intel® SGX)
- Support for Intel® Optane™ memory for 1-node HDD storage performance
- Support for 1 Gigabit Intel® Ethernet and Intel® Wireless-AC

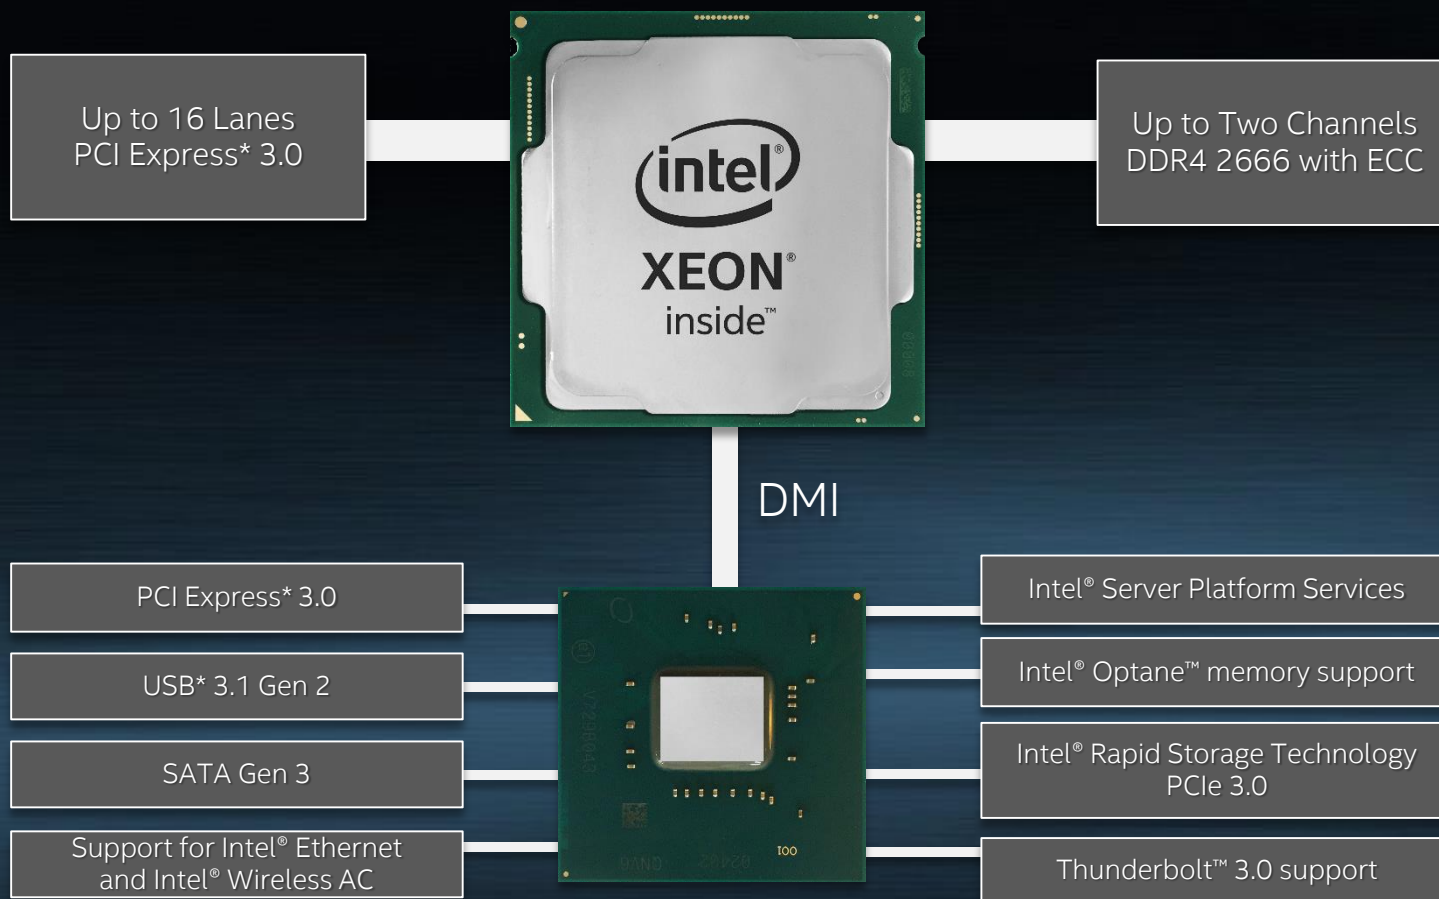

Not a comprehensive of all features and capabilities.

\*Support for up to 128GB system memory capacity will be available in 2019 through a published BIOS update. Please contact your hardware provider for availability and support.

# INTEL® XEON® E PROCESSORS

Essential performance for entry server solutions with advanced security technologies for secure cloud services

AVAILABLE IN SINGLE-SOCKET CONFIGURATION ONLY

Processor, chipset and diagram provided for illustration purposes only.  
Diagram and table are not a comprehensive of all features and capabilities.

Maximum Core Count Supported	6
Maximum Base Frequency Supported	3.8 GHz
Maximum Intel® Turbo Boost Technology 2.0 Frequency Supported	4.7 GHz
Processor Cache Memory Support	Up to 12MB Intel® Smart Cache
Processor Performance Support	Intel® Turbo Boost 2.0 Technology, Intel® Hyper-Threading Technology (Intel® HT)
Maximum Number of Processor Sockets Supported	One Socket
Thermal Design Point (TDP)	Up to 95 Watts
Socket Type	LGA-1151 Socket
System Memory Support	2 channels of DDR4 ECC 2666 MHz 2 DPC
Maximum System Memory Supported	Up to 128GB*
Supported Chipset	Intel® C246 Series Chipset
I/O	PCI Express 3.0 – Up to 40 lanes (CPU + Chipset) USB 3.1 – Up to 6 ports USB 3.0 – Up to 10 ports SATA 3.0 – Up to 8 ports DMI – Up to 4 lanes, Gen 3
Intel® Manageability Engine (Intel® ME)	Intel® ME v12 with Intel® Active Management Technology (Intel® AMT); Intel® vPro™ Technology; and Intel® Server Platform Services
Intel® Rapid Storage Technology	Intel® Rapid Storage Technology PCIe 3.0
Processor Manufacturing Process	Intel's latest 14nm process technology

\*Support for up to 128GB system memory capacity will be available in 2019 through a published BIOS update. Please contact your hardware provider for availability and support.

# NOTICES AND DISCLAIMERS

Statements in this presentation that refer to business outlook, future plans and expectations are forward-looking statements that involve a number of risks and uncertainties. Words such as "anticipates," "expects," "intends," "goals," "plans," "believes," "seeks," "estimates," "continues," "may," "will," "would," "should," "could," and variations of such words and similar expressions are intended to identify such forward-looking statements. Statements that refer to or are based on projections, uncertain events or assumptions also identify forward-looking statements. Such statements are based on management's expectations as of April 26, 2018 and involve many risks and uncertainties that could cause actual results to differ materially from those expressed or implied in these forward-looking statements. Important factors that could cause actual results to differ materially from the company's expectations are set forth in Intel's earnings release dated April 26, 2018, which is included as an exhibit to Intel's Form 8-K furnished to the SEC on such date. Additional information regarding these and other factors that could affect Intel's results is included in Intel's SEC filings, including the company's most recent reports on Forms 10-K and 10-Q. Copies of Intel's Form 10-K, 10-Q and 8-K reports may be obtained by visiting our Investor Relations website at [www.intc.com](http://www.intc.com) or the SEC's website at [www.sec.gov](http://www.sec.gov).

All information in this presentation reflects management's views as of July 9, 2018. Intel does not undertake, and expressly disclaims any duty, to update any statement made in this presentation, whether as a result of new information, new developments or otherwise, except to the extent that disclosure may be required by law.

Intel technologies' features and benefits depend on system configuration and may require enabled hardware, software or service activation. Performance varies depending on system configuration.

No computer system can be absolutely secure.

Tests document performance of components on a particular test, in specific systems. Differences in hardware, software, or configuration will affect actual performance. For more complete information about performance and benchmark results, visit <http://www.intel.com/benchmarks>

Cost reduction scenarios described are intended as examples of how a given Intel-based product, in the specified circumstances and configurations, may affect future costs and provide cost savings. Circumstances will vary. Intel does not guarantee any costs or cost reduction.

Intel does not control or audit third-party benchmark data or the web sites referenced in this document. You should visit the referenced web site and confirm whether referenced data are accurate.

Performance varies depending on hardware, software, and system configuration. For more information, visit <http://www.intel.com/go/turbo>

All information provided here is subject to change without notice. Contact your Intel representative to obtain the latest Intel product specifications and roadmaps.

# PERFORMANCE BENCHMARK DISCLOSURES [1/2]

Intel technologies' features and benefits depend on system configuration and may require enabled hardware, software or service activation. Learn more at [intel.com](https://www.intel.com), or from the OEM or retailer.

Some results have been estimated or simulated using internal Intel analysis or architecture simulation or modeling, and provided to you for informational purposes. Any differences in your system hardware, software or configuration may affect your actual performance..

Intel processors of the same SKU may vary in frequency or power as a result of natural variability in the production process.

Intel does not control or audit third-party benchmark data or the web sites referenced in this document. You should visit the referenced web site and confirm whether referenced data are accurate. Optimization Notice: Intel's compilers may or may not optimize to the same degree for non-Intel microprocessors for optimizations that are not unique to Intel microprocessors. These optimizations include SSE2, SSE3, and SSSE3 instruction sets and other optimizations. Intel does not guarantee the availability, functionality, or effectiveness of any optimization on microprocessors not manufactured by Intel. Microprocessor-dependent optimizations in this product are intended for use with Intel microprocessors. Certain optimizations not specific to Intel microarchitecture are reserved for Intel microprocessors.

Please refer to the applicable product User and Reference Guides for more information regarding the specific instruction sets covered by this notice. Notice Revision #20110804.

The benchmark results may need to be revised as additional testing is conducted. The results depend on the specific platform configurations and workloads utilized in the testing, and may not be applicable to any particular user's components, computer system or workloads. The results are not necessarily representative of other benchmarks and other benchmark results may show greater or lesser impact from mitigations.

Software and workloads used in performance tests may have been optimized for performance only on Intel microprocessors. Performance tests, such as SYSmark and MobileMark, are measured using specific computer systems, components, software, operations and functions. Any change to any of those factors may cause the results to vary. You should consult other information and performance tests to assist you in fully evaluating your contemplated purchases, including the performance of that product when combined with other products. For more complete information visit [www.intel.com/benchmarks](https://www.intel.com/benchmarks).

Results have been estimated or simulated using internal Intel analysis or architecture simulation or modeling, and provided to you for informational purposes. Any differences in your system hardware, software or configuration may affect your actual performance.

Intel technologies' features and benefits depend on system configuration and may require enabled hardware, software or service activation. Performance varies depending on system configuration. No computer system can be absolutely secure. Check with your system manufacturer or retailer or learn more at [www.intel.com](https://www.intel.com).

The cost reduction scenarios described are intended to enable you to get a better understanding of how the purchase of a given Intel based product, combined with a number of situation-specific variables, might affect future costs and savings. Circumstances will vary and there may be unaccounted-for costs related to the use and deployment of a given product. Nothing in this document should be interpreted as either a promise of or contract for a given level of costs or cost reduction.

No computer system can be absolutely secure.

# PERFORMANCE BENCHMARK DISCLOSURES [1/2]

Software and workloads used in performance tests may have been optimized for performance only on Intel microprocessors. Performance tests, such as SYSmark and MobileMark, are measured using specific computer systems, components, software, operations and functions. Any change to any of those factors may cause the results to vary. You should consult other information and performance tests to assist you in fully evaluating your contemplated purchases, including the performance of that product when combined with other products. For more complete information visit [www.intel.com/benchmarks](http://www.intel.com/benchmarks). Performance results are based on testing as of 10/12/2018 and may not reflect all publicly available security updates. See configuration disclosure for details. No product can be absolutely secure. Results have been estimated or simulated using internal Intel analysis or architecture simulation or modeling, and provided to you for informational purposes. Any differences in your system hardware, software or configuration may affect your actual performance.

1: Up to a 48% performance improvement with an Intel® Xeon® E-2100 processor-based entry server. Config: Tested at Intel Corp as of 10/12/2018. 1x Intel® Xeon® E-2124G Processor, Platform: Moss Beach, 4 x 8GB DDR4 2666 ECC(32GB 2666MHz) ,OS: Ubuntu 18.04.1 LTS (Kernel 4.15.0-29-generic) ,Benchmark: SPECrate\*2017\_fp\_base (Estimated), Compiler: ICC 18.0.2 20180210,BIOS: CNLSE2R1.R00.X138.B81.1809120626, uCode:0x96, Storage: SSD S3710 Series 800GB, Score: 30.6 (Estimated) compared to 1x Intel® Xeon® E3-1226v3 Processor Platform: S1200RP, 4 x 8GB DDR3 1600MHz (32GB 1600MHz) ,OS: Ubuntu 18.04.1 LTS (Kernel 4.15.0-29-generic), Benchmark: SPECrate\*2017\_fp\_base (Estimated), Compiler: 18.0.2 20180210,BIOS: S1200RP.86B.03.04.0007.082920181422, uCode:0x25, Storage: Intel® SSD S3710 Series 800GB, Score: 20.6 (Estimated)

2: Up to a 39% performance improvement with an Intel® Xeon® E-2100 processor-based entry server. Config: Tested at Intel Corp as of 10/12/2018. 1x Intel® Xeon® E-2186G Processor, Platform: Moss Beach, 4 x 8GB DDR4 2666 ECC(32GB 2666MHz) ,OS: Ubuntu 18.04.1 LTS (Kernel 4.15.0-29-generic) ,Benchmark: SPECrate\*2017\_int\_base (Estimated), Compiler: ICC 18.0.2 20180210,BIOS: CNLSE2R1.R00.X138.B81.1809120626, uCode:0x96, Storage: SSD S3710 Series 800GB, Score: 41.4 (Estimated) compared to 1x Intel® Xeon® E3-1285v6 Processor Platform: S1200RP, 4 x 8GB DDR4 2400 (32GB 2400MHz) ,OS: Ubuntu 18.04.1 LTS (Kernel 4.15.0-29-generic), Benchmark: SPECrate\*2017\_int\_base (Estimated), Compiler: 18.0.2 20180210,BIOS: S1200SP.86B.03.01.0038.062620180344, uCode:0x8e, Storage: SSD S3710 Series 800GB, Score: 29.7 (Estimated)

# OPTIMIZATION NOTICE

Optimization Notice: Intel's compilers may or may not optimize to the same degree for non-Intel microprocessors for optimizations that are not unique to Intel microprocessors. These optimizations include SSE2, SSE3, and SSSE3 instruction sets and other optimizations. Intel does not guarantee the availability, functionality, or effectiveness of any optimization on microprocessors not manufactured by Intel.

Microprocessor-dependent optimizations in this product are intended for use with Intel microprocessors. Certain optimizations not specific to Intel microarchitecture are reserved for Intel microprocessors. Please refer to the applicable product User and Reference Guides for more information regarding the specific instruction sets covered by this notice.
