

MEDIUM VOLTAGE PRODUCT

KOKS 24(25) kV

Indoor current transformers

Technical parameters	Value
Highest voltage for equipment	24(25) kV
Power frequency test voltage, 1 min.	50 kV
Lighting impulse test voltage	125 kV
Rated short-time thermal current	100 × I _{pn} kA
Rated dynamic current	practically unlimited
Rated continuous thermal current	
KOKS 24 D11 and _D21	6 000 A
KOKS 24 F11 and _F21	8 000 A

Description

Cast resin body. Primary winding formed of a straight busbar to be mounted on the site of installation. At rated primary currents (I_{pn}>4 000 A) the cores are protected from the magnetic fields of the adjacent current busbars. Light-metal mounting frame with the secondary terminal box underneath (sealable terminal box). Two sizes. Core number 1...4. The protection cores can be linearized if needed. Without the mounting frame the transformer width is 400 mm. Conductors of 2.5...10 sq. mm or 2x2.5...2x6 sq. mm can be connected to the secondary terminals.

Selection of transformer

The core selection table shows how the core size is determined by the primary voltage, accuracy class, and burden when the secondary current is 5 A and the frequency is 50 Hz. The core size total must not exceed the maximum core size. The core selection table is valid for the types KOKS 24 D11 and KOKS 24 D21 only.

Max. core sizes

KOKS 24 D 11	235
KOKS 24 D 21	345

Standards

IEC 185

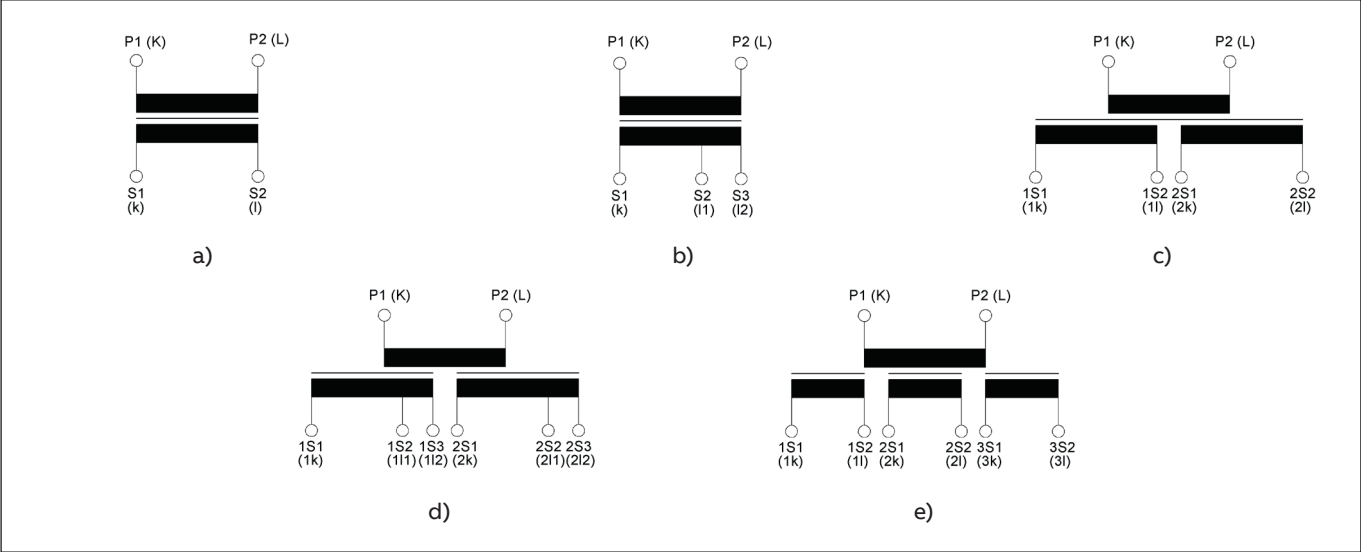

Other standards as requested

Dimensional Drawing

	KOKS 24 D 11	KOKS 24 D 21	KOKS 24 F 11	KOKS 24 F 21
A [mm]	390	500	400	510
B [mm]	190	245	195	250
C [mm]	35	75	35	75
D [mm]	150	150	205	205

Marking of current transformer outlets - example

a) Single-core design | b) Double-core design | c) Three-core design | d) Single-core design, reconnectable on the secondary side | e) Double-core design, reconnectable on the secondary side

Core selection table for types KOKS 24 D11 and _D21Rated continuous thermal current: $1.2 \times I_{pn}$ except for 6 000 Awhere rated continuous thermal current is $1.0 \times I_{pn}$
