55" Sony BRAVIA OLED 4K  
HDR Display with Google TV,  
including 3 years  
PrimeSupport

### Features

#### **World wide colours**

Our brightest and widest shades and hues, all beautifully displayed on a QD-OLED screen powered by Cognitive Processor XR™

#### **Contrast. Unsurpassed.**

Pure blacks bring out extraordinary detail and depth. With Cognitive Processor XR™, the expressive power of QD-OLED is maximised.

#### **Pure blacks. Absolute brightness. Supreme contrast.**

Our brightest ever OLED. With a temperature sensor, high luminance panel and heat diffusion sheet for dissipating heat, this TV detects screen temperature and precisely controls light to deliver 200% as much brightness as its predecessor.

#### **Beautiful colours. Any angle.**

Watching TV from the sides is truly satisfying. Our QD-OLED panel on the A95L keeps luminance constant for consistent colours across all viewing angles.

#### **Everything upscaled close to 4K quality.**

Whatever the content or source, images are upscaled close to 4K. XR 4K Upscaling accesses a vast database to intelligently recreate lost texture and detail.<sup>1</sup>

**Less noise. Less blur. More clarity in every picture.**

XR Clear Image reduces noise utilising zone division and dynamic frame analysis, and minimises blur.

**Intelligent motion processing for smooth, fast-moving action.**

XR OLED Motion combats blur by detecting and cross analysing key visual elements on successive frames. It creates and inserts extra frames between the originals for smoother, clearer action.

**Sound from the screen, truly immersive.**

With Acoustic Surface Audio +™, sound comes directly from the right place in the scene. The screen vibrates, turning every part of it into a speaker for powerful acoustics that perfectly match the picture. Far more immersive than conventional TVs where sound comes from beneath the screen.

**All your entertainment upscaled to 3D surround sound.**

XR Surround virtually creates surround sound using just the TV speakers for 3D audio without in-ceiling or up-firing speakers. Our BRAVIA XR™ TVs are also compatible with Dolby Atmos®.

**What you want to watch all in one place.**

Browse 700,000+ movies and TV episodes from across your streaming services, all in one place and organised into topics and genres based on what interests you.<sup>2</sup>

**Just say what you want to see - Hands-free Voice Search.**

Find favourites faster with voice search. Jump right to a show or movie just by saying it or try browsing with a voice search like “find action movies”. Just say “Ok Google” to get started.

**Auto HDR Tone Mapping texture and detail.<sup>1</sup>**

Auto HDR Tone Mapping instantly optimises HDR settings

during your PS5™ initial setup. Even in dark shadow and bright highlights, you'll see fine details and true colours.

**Auto Genre Picture Mode.**

BRAVIA™ automatically switches into Game Mode with PS5™ to minimise lag and maximise responsiveness. It switches back to Standard Mode when watching movies for more expressive scenes.<sup>3</sup>

**Game Menu - One place for all your game settings.**

Never has it been easier to fine-tune your game status, settings and assist functions. All the essentials are at your fingertips for ease and comfort.<sup>4</sup>

**Seamless Edge. Almost no bezel.**

Designed virtually frameless, this TV focuses your eyes on what's important - the picture.

**All your eco in one place.**

The Eco Dashboard keeps all eco-related settings in one place, making it easy to change them individually or in one go.

**Greater peace of Mind.**

There's the added reassurance of our 3 Years PrimeSupport Professional service package as standard, with access to an elite EU-wide helpdesk for technical support & advanced product exchange handled by local partner, on premise where possible. You can also choose to extend your support for an additional 2 years.
