Inquiry Details on 04/07/2022:

First category: RF Exposure *
 Second category: MPE (RF Exposure)
 Third category:
 Subject: Mobile power wireless charging RF Exposure
 Inquiry: Dear Sir
 Good day
 I have a project is super charger, portable and mobile are applicable. Please see user manual attach.
 According to TCBC Workshop measurement guidance, tested and prepared test report has attached, Please help to check whether RF Exposure Evaluation Report can accept.
 Waiting for your information.
 Thanks for your attention!
 Best Regards!

---Reply from Customer on 04/14/2022---

Dear sir,

- can you reply to me? Thank you

FCC Response on 04/14/2022:

How strong is the MagSafe connection? Is it strong enough to stay in place when the phone is picked up?

---Reply from Customer on 04/18/2022---

Dear sir

The super charger is portable and removable, and has no appeal with mobile phones. The phone can be charged just by sitting on it or by holding it in place with your hand.

FCC Response on 04/18/2022:

Please clarify. If the end user picks up only the phone while it is charging, will it become detached from the charger? Or, does the user have to force apart the phone and charger because the magnetic suction is strong enough to keep the phone secured to the charger?

---Reply from Customer on 04/18/2022---

Dear sir?

if the end user picks up only the phone while it is charging?the phone can detached from the charger easy?
there is no magnetic?when charging.

FCC Response on 04/18/2022:

Thank you for the clarification. The procedures provided appear to follow current guidance. You may proceed.
