

# The next level of cooking.

The Bosch kitchen appliance catalogue.

**NEW** Series | **8** and  
accent|**line** range

## Why Choose Bosch?

For Bosch Series | 8 accent|line  
Premium Built In Generation

### **Bosch Series | 8 accent|line Premium Built-in Generation.**

The Bosch Series | 8 kitchen range reveals the value of pursuing a consistent brand language combined with functional quality and simple yet striking form. Intriguing details tempt the user to explore further, turning cooking into a haptic as well as an olfactory experience.

For Bosch Series | 8 and accent|line  
Induction Cooktops

### **Good Design Award 2023.**

Bosch Series | 8 and accent|line cooktops combine exceptional design, thoughtful user interfaces and premium features like the PerfectFry Plus and CookingSensor Plus.\*

\*Available with selected models.

reddot winner 2023

For Bosch User Interface  
Generation Digital Ring

### **Red Dot Design Award 2023.**

Bosch has been awarded reddot winner 2023 for the user interface of the Bosch Digital Control Ring. The ring functions as a rotary knob for settings and programs, it is engraved in the glass and features a colour display. "The intuitive operation gives the user a sense of control and precision and makes even complicated settings surprisingly easy," the jury commented in its statement.

### **Australia's Most Trusted Brand for Ovens 2022.**

Bosch has been awarded Australia's Most Trusted Brand 2022 for Ovens as voted by Australians, revealed exclusively by Reader's Digest. Australian Reader's Digest engaged an independent market research agency to conduct a stand-alone survey of a representative sample of more than 3,000 Australians.

### **CO<sub>2</sub> neutral.**

Since 2020, the Bosch Group with its more than 400 locations worldwide has been climate neutral (scopes 1 and 2)\*. An independent auditing company has officially confirmed this.

\*For this, remaining emissions of 0.7 million metric tons of CO<sub>2</sub> were offset by carbon credits in 2022. Scopes 1, 2, and 3 are used in accordance with the Greenhouse Gas Protocol Corporate Accounting and Reporting Standard.

## **Bosch – a brand you can trust.**

Over 130 years of experience paired with the latest German engineering allows Bosch to manufacture quality products that make everyday life easier.

## Say Hello to the Future.

With the Home Connect App, you can control your Wi-Fi enabled Bosch home appliances via your smart device. Integrate your appliances with one of the growing network of partner services that turn your house into a connected home, and let connectivity redefine the everyday.

### Remote Controlling and Monitoring.

Ever left the house only to go back to check that you've turned off the oven? With Wi-Fi enabled Bosch cooking appliances and the Home Connect App, you can monitor and control the status of your appliance directly from your phone.

### Voice Assistants.

Enjoy the party and get out of the kitchen with Home Connect. Simply pair your smart speaker to your Wi-Fi enabled Bosch appliance and enjoy voice activated commands. Ask your coffee machine to prepare a cappuccino, or ask your oven "When will dinner be ready?"

### CoffeeWorld and CoffeePlaylist.

Control your built-in Bosch coffee machine with any smart device. Try CoffeeWorld, the tech that offers a variety of international coffee specialities for your coffee machine to create. Use CoffeePlaylist to add various beverages into a list and prepare them one after another.

### Recipe World.

With full access to an entire world of exciting recipes, Home Connect transfers your selected recipe's cooking setting requirements directly to your oven. To enjoy this feature, just connect your oven to your registered Home Connect account.

# Introducing the New Oven Range from Bosch.

## accent|line

A superior look that allows for an equally superior cooking experience. The thin carbon-black handle with an embossed Bosch logo highlights the elegant design. Your cooking experience is supported by a vibrant high-resolution TFT Touch Display.

Available with accent|line

Available for selected models

Available with Series | 8

Available for selected models

## Series | 8

Discreet elements of the Series | 8 range highlight the elegant nuances in the beautiful seamless design. The intuitive TFT Touch Display of the Series | 8 range with the Digital Control Ring engraved in the glass and the stainless steel-look handle with an embossed Bosch logo offer a contemporary kitchen design.

Available on all accent|line and Series | 8 ovens.

### Air Fry Function.

Air frying requires less oil than deep frying for a delicious and crispy dish. Making it a great option for healthy cooking at home, that can now be done in your oven!

### Bosch Assist.

With the Assist Function simply select the dish you're cooking on the food display, and your oven does the rest. The ideal heating function, temperature and preparation time are all set automatically.

# Steam, the Perfect Ingredient for Healthy Cooking Results.

## Steam Function Plus.

Vegetables cooked with full steam stay crunchy and retain natural aroma, vitamins and nutrients. The new Steam Function Plus steams at a temperature of up to 120°C so that your dishes are cooked faster and retain even more of their vitamins and nutrients. For example: potatoes are steamed up to 35% faster, whereas green beans and carrots are ready even up to 50% quicker!\*

\*Steam Function Plus compared to 100°C steam, BSH laboratory test.

## More vitamins and nutrients.

Steaming broccoli at a temperature over 100°C, retains up to 26% more nutrients and up to 8% more Vitamin C than conventional cooking methods.\* Whereas steaming red pepper at a temperature over 100°C retains up to 12% more Vitamin C!\* They also keep their full, natural flavour, so you can go easy on the extra seasoning and use much less salt when cooking. In short – healthy food has never tasted better.

\*Steam Function Plus compared to cooking in boiled water, University of Hohenheim test results 5/2022.

## Steam Boost Function.

Home-made bread tastes best. Take control of the steam process by baking with the Steam Boost Function. You can inject individual shots of steam as needed – for home-made bread that's crisp outside and nice and fluffy inside.

## Added Steam.

Enhance your cooking results to create succulent roasts and perfectly browned bread crusts with ease by adding various levels of steam: low, medium or high. The Perfect Steam sensor automatically measures the humidity inside the oven to ensure consistent results.

# New Ovens, New Functions.

## Air Fry Function.

You can make your very own potato or veggie chips – simply place thin slices on the Air Fry and Grill tray, add a little oil, select the Air Fry Function, and soon you'll have yummy snacks ready to go! The program combines fast air movement and heat from the grill to achieve a crispy finish.

Applies to accent|line and Series | 8 ovens.

## Crisp Finish Function.

Do you want to give your roast a final crispy finish? It doesn't get any easier than the Crisp Function, which removes moisture directly from the oven cavity during the roasting or baking process. This gives your finished dish the extra crispiness you want.

\*Available with selected models.

## Digital Control Ring.

With the Digital Control Ring, you can adjust your oven settings intuitively. Just move your finger across the ring engraved in the glass and confirm the desired setting.

Applies to accent|line and Series | 8 ovens.

For the Bosch User Interface Generation Digital Ring.

HNG978QB1A

CSG958DB1, BIC9101B1

## Individual Browning.

Everyone has their own baking preferences. Now you can tell your Bosch oven exactly what that is. Thanks to Artificial Intelligence in our top of the range model HNG978QB1A, the integrated Oven Camera will detect when compatible dishes are browned to your liking and stop the cooking process. Perfection has never been easier. To enjoy 'Individual Browning', just connect the oven to the registered Home Connect account.

**Oven Camera.** Thanks to your Oven Camera, you can now have a quick sneak peek into the oven from anywhere, through your smart device! The Home Connect app lets you know when your dish is ready and switches off the oven for you. So you can relax knowing that dinner is taken care of.

\*Available in oven model HNG978QB1A.

## Cooking the Intelligent Way.

The new Series | 8 ovens learn using Artificial Intelligence from the growing anonymised data of numerous baking and roasting processes. The more you use the oven the more precisely your oven makes the prediction about the exact end time of your cooking process. Home Connect and Artificial Intelligence support features like PerfectBake Plus or the PerfectRoast Plus. For perfect results today. And even better ones tomorrow.

### PerfectBake Plus.\*

Baking has never been so simple. Choose your desired dish from the Assist Menu, press 'Start' and your oven will automatically choose the right setting. The best part: thanks to Artificial Intelligence within the Home Connect app and the Baking Sensor that measures the humidity inside your oven, you can see how many minutes are left until your dish is ready to serve.

### PerfectRoast Plus.\*

Using the 3-point Meat Probe Assistant with PerfectRoast Plus, you can now achieve your preferred degree of doneness. If you want your beef tenderloin to be "medium rare", the recommended core temperature will be determined using the Meat Probe Assistant, and using Artificial Intelligence through the Home Connect app, the minutes it will take to achieve your desired roast will be shown.

\*Features available with selected models.

#### Microwave Boost Function.

Not sure what microwave level to select? Simply enter the number of watts – as it appears on most convenience food packaging. The highest watt level is identified by 'Boost'.

## Bosch Ovens with Microwave Gourmet Food in just a Short Time.

If you'd like to make a home cooked meal but don't have the time, the new Series | 8 ovens with microwave function can help. Speed up the roasting, baking and cooking process with the intelligent combination of conventional heating methods and the microwave function. If all you need to do is reheat your food the classic microwave function is also available.

## Coffee Made How You Like It.

Whether your preference is a flat white, latte or a double shot cappuccino, the new Series | 8 built-in coffee machines bring café-style drinks to your home. Plus, with the Favourite function you can save your coffee preferences to make the perfect cup of coffee time and time again.

#### Aroma Select.

Enjoy espresso just the way you like it. With Aroma Select, you can adjust the strength of the coffee to your personal preferences. Simply choose between three different aroma profiles: mild, balanced or distinctive.

#### Coffee World.

You can effortlessly create international coffee specialties – at the touch of a button. With up to 20 coffee variations from 8 countries, simply select the type of coffee you want in the Home Connect app, and let your Bosch espresso machine do the rest.

## Introducing the Bosch Oven Range.

## Sometimes our Best Ideas end up in a Drawer.

The new multi-functional warming drawers can do much more than just keep food and plates warm. They're perfect for slow-cooking meat, defrosting frozen foods, melting chocolate, drying fruit and proving dough.

### Warming Drawers.

The new Bosch Warming Drawers can be seamlessly combined with matching 60cm ovens, compact ovens or built-in coffee machines. The convenient Push & Pull technology on all models ensures that they are always easy to open and close.

With the Home Connect app, the warming drawers can be controlled on the go. Monitor the on/off status of heating programs, set a timer to turn off the drawer, and personalise your favourite settings.

### Vacuum-sealing Drawer.\*

Vacuum-seal fresh fruit, vegetables or leftovers and freeze them easily – nutrients, vitamins and flavours are retained longer than with conventional freezing.

\*Applies to BVE9101B1.

### Sous Vide.

Cooks vacuum-sealed food at low temperatures and 100% steam, retaining nutrients and flavours.

### Select the Right Appliances for your Kitchen.

Whether you're designing a new kitchen or simply updating one of your appliances, we have a wide variety of cooking appliances available with the latest innovations. For optimum design co-ordination, choose appliances belonging to the same series. Create seamless lines in your kitchen, as panels and sizes are matching across the range.

### 60cm Ovens

The accent|line oven range not only exceeds in performance but also in design. With an elegant dark-glass exterior, carbon-black handle and brilliant TFT Touch Display.

### 45cm Compact Ovens

Choose from a microwave or steam oven, packed with great features and programs. Combine with a 14cm warming drawer and place next to full size oven for a seamless kitchen design.

### Warming Drawers

Ensure food stays at just the right serving temperature. You can also defrost, prove dough or slow cook.

### Double Ovens

Bosch double ovens allow you to roast in the bottom oven cavity while grilling in the top oven for maximum cooking convenience.

### 90cm Ovens

A large interior cavity, boasting 112 usable litres (net), perfect for extra-wide trays and greater cooking demands.

### Microwaves

Built-in microwave used for thawing, heating and food preparation. Every dish is a perfect success thanks to 8 pre-set automatic programs.

# Cleaning made Easy.

Anyone who has ever cleaned an oven by hand knows how exhausting and time-consuming it can be. This chore is now a thing of the past, thanks to Pyrolytic Self-cleaning and EcoClean Direct.

**Pyrolytic Self-cleaning\*.**  
The oven heats up to 480°C, burning away grease or food residue\* – no chemicals required. Once the oven has cooled down, simply wipe out the ash.

**EcoClean Direct\*.**  
A special coating on the oven walls and roof gently breaks down grease spatters while you roast or bake. Minimum cleaning effort required, just wipe the base of the oven and the glass door. For optimum cleaning, simply activate the regeneration cycle from time to time\*.

**Cleaning Assistance.†**  
Pour approximately 400ml of water with a drop of liquid detergent to the bottom of the oven cavity and select the Cleaning Assistance program. It will soften baked-on residue, making it much easier to wipe away afterwards.

\*Features vary depending on model. Please check individual product specifications.

#Metal racks may show slight discolouration after prolonged use of the pyrolytic function. Please refer to manual if your racks are pyrolytic proof.

^Please remove all accessories when activating the specific EcoClean Direct program.

† Available with all Series | 8 and accent|line ovens.

**Full Extension Clip Rails.**  
Usually, telescopic rails are permanently installed on one specific level. That's not the case with the new Series 8 ovens. Thanks to the Full Extension Clip Rails, you can choose the level on which you want your rails to be placed. There are specific rails with coatings to suit either steam ovens or Pyrolytic cleaning ovens.

# Programs and Functions.

Perfect baking and roasting not only require the right temperature, but also the appropriate heating function for each dish. From 4D HotAir to Slow Cooking, Bosch ovens are there for all your cooking needs.

**4D HotAir**  
Heat is distributed swiftly and evenly throughout your oven's interior. Place your tray or rack on any level from one to four and enjoy consistently perfect results from top to bottom.\*

**3D HotAir**  
By maintaining the right temperature across three shelf levels, consistently even cooking results are achieved.

**HotAir Gentle**  
The fan distributes the heat evenly throughout the oven cavity, which can help save energy. When baking on a single level – such as small baked goods, cakes in tins or cakes on a baking tray – no preheating is necessary.

**Top and Bottom Heat**  
Uses both the upper and lower heating elements. Heat travels to the centre of the oven which is the best position to obtain the selected temperature. Suitable for traditional baking and roasting and offers best results for cakes with moist toppings.

**Top and Bottom Heat Gentle**  
With this heating mode, you can prepare small baked goods, bread and rolls to perfection every time. Depending on the particular food and method of preparation, you can also save energy.

**Bottom Heat**  
This targeted form of heat is especially suited for dishes cooked in a water bath or in need of additional baking or browning on the bottom.

**Intensive Heat**  
A combination of top heat and extreme bottom heat – for superior baking results with a crisp base and moist filling – for example, for a tarte flambé or cheesecake.

**HotAir Grill**  
Once the desired temperature has been reached, the fan switches on and optimally distributes the hot air, especially around large dishes. Ideal for perfectly crisp roasts, poultry and whole fish.

**Grill, Small Area or Large Area**  
Especially suited for grilling large/small quantities – for example, steaks, sausages, fish or vegetables.

**Pizza Setting**  
Create crispy pizzas or give any dish that extra heat that's needed from underneath by using a combination of heating elements.

**Keep Warm**  
This function keeps dishes warm – to help you serve multiple dishes.

**Slow Cooking**  
For slow and gentle cooking at low temperature, e.g. 85 °C, for super-tender vegetables or poultry.

**Preheat Ovenware**  
This function pre-heats your plates to the perfect temperature so that foods stay hot longer after serving.

**Drying**  
A function for drying fruits, vegetables and herbs with maximum flavour. This function can also be used for drying out the oven cavity after the added steam function has been used.

**Fast Pre-heating**  
With rapid heating you can shorten the heat-up time for selected heating functions, including 4D HotAir and top and bottom heating.

**Fan Forced HotAir**  
A fan disperses heat evenly for cakes and pastries baked on two levels.

**Fan Assisted Top and Bottom Heating**  
Uses both upper and lower heating elements while a fan disperses heat evenly.

**Defrost**  
Gently defrosts food evenly and more quickly than it would take on the kitchen counter.

**Reheating**  
For plated meals and baked items. Cooked food is gently reheated. The steam ensures the food does not dry out.

**Dough Proving**  
For yeast dough and sourdough, dough will rise considerably more quickly than at room temperature. The surface of the dough does not dry out.

**HotAir Steam**  
Use with steam bowl for delicious baking and roasting results.

**SoftMove door.**  
A special damping mechanism prevents the oven door from slamming. It prevents the door from fully closing and then gently and quietly closes itself. When opening the door, it gently comes to a stop.

**AutoPilot 30**  
Every dish is a perfect success thanks to 30 pre-set automatic programs.

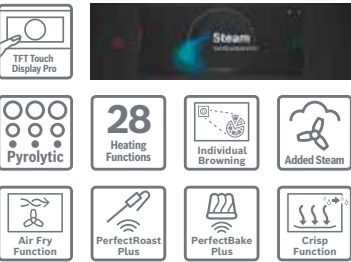

Features may vary depending on models. Please check individual product specifications.

\*To cook on all four levels simultaneously, four wire racks are required for best results. For up to three levels, all accessories are suitable, ie. universal tray or baking tray.

## Double Ovens.

Enjoy the convenience of cooking multiple dishes at the same time with our double ovens. Perfect for large families and entertaining. A double oven provides you with lots of flexibility; if you would like to cook a small meal, you can choose to just use the top oven.

## Induction Cooktops

# The Best Cooking needs just One Ingredient: Bosch.

Modern cooking offers so many wonderful new tastes and textures – you need a cooktop that's flexible enough to keep up.

## Induction Cooktop Range.

Bosch's induction cooktops boast a wide range of modern features designed to make it easier and quicker for you to create the dishes you love. Induction cooktops can bring water to the boil much faster than a conventional cooktop and are particularly easy to clean.

### FlexInduction.

Ideal for pots, pans and casserole dishes of all shapes and sizes. Thanks to the unique coil shapes, you get the ultimate flexibility and heat distribution. At the touch of a button, two induction zones become one large FlexInduction surface.

### CombiInduction.

With Bosch CombiInduction, you have the freedom to use your biggest pans and baking trays for more adventurous cooking. Switching from small to large pans is as simple as a single touch that merges two standard cooking zones into one large CombiZone.

### Induction.

Cooking with induction is safer than all other alternatives. Only the base of the pan is heated and not the entire cooktop, which remains almost completely cold.

## Speed up your cooking.

Time Required to Heat 2 Litres of Water at 15°C–90°C.

Source: BSH Hausgeräte GmbH, Germany (overseas test results).

PXX995KX5E

### NEW Bosch Assist Menu.

TFT colour display menu of dishes for automatic cooking.

\*Available in PXX995KX5E

# Always Tasty, Never Scorched.

With PerfectFry Plus, healthy cooking has never been easier. The intelligent sensor in your cooktop can be set to eleven different temperature levels depending on your meal. Once activated, it gently heats up the food on the selected cooking zone, avoiding overheated oil and potentially harmful substances. Throughout the cooking process, it constantly monitors the temperature and can prevent your food from scorching.

## Selection of the Many Dishes that you can Prepare with PerfectFry Plus:

70°C / 80°C	90°C / 100°C	110°C / 120°C	140°C	160°C	180°C / 200°C	220°C
Melt chocolate butter or cheese, e.g. for fondue	Reheat dishes	Prepare sauces or stew vegetables	Frying dishes with extra virgin olive oil, margarine or better, e.g. omelets	Frying fish, meatballs or sausages	Frying steaks (medium or well-done), fresh ragout or vegetables	Frying steaks (rare), frozen French fries or popcorn

The temperature shown on the displays is approximate and can differ from the real temperature on the pan.

**Desserts that melt your heart.**  
PerfectFry Plus helps you create the perfect highlight for your menu – even at low temperatures. It allows you to melt chocolate couverture at 70°C without the use of a water bath.

**Fry your Veggies, not their Nutrients.**  
Glazed vegetables are a classic made even better by modern technology.  
  
With PerfectFry Plus you can gently sauté your veggies at 120°C and preserve their vitamins.

**Steaks Done to Perfection.**  
Thanks to PerfectFry Plus, you can make well-done steaks instead of mistakes.  
  
The sensor will heat the pan to the optimum temperature of 180°C and makes sure your meat turns out tender.

**End your day with a pop.**  
With PerfectFry Plus you can prepare delicious golden brown popcorn for your movie night. Even at 220°C, the sensor avoids scorching and serves up a truly cinematic snack. That way you can watch your movie without having to watch your popcorn.

## Bosch Quality Cookware.

Our cookware range is the perfect fit for all induction cooktops with Flex and Combi Zones – not only in terms of functionality but also style. Thanks to their quality build and high level of practicality, you'll make the best use of your cooktop.

## Flex to the Max.

The new Series | 6 cooktops with **Easy Flex Zones** are equipped with several inductors that enable a separation in different-sized cooking zones – they detect your cookware and resize the cooking zones accordingly. Once you move your cookware, your cooking setting automatically moves with it.

Resizes your cooking zones.

Detects your cookware.

Transfers your setting when moving the cookware.

HEZ9FF040

### Pro Induction Flex Pans

The coated Pro Induction Flex Pans offer exciting new ways for meal-prepping. They are available as single items as well as three and four-piece sets.

Pro Induction Flex Pan set, 3 pcs. (medium, 2x small): HEZ9FF030

Pro Induction Flex Pan set, 4 pcs. (large, medium, 2x small): HEZ9FF040

Large Flex Pan HEZ9FF010

### Pro Induction Cookware

Whether you are a seasoned pro or an experimental home chef, we have just the right cookware set for your needs. They are available as four or six-piece sets.

Pro Induction Cookware set, 6 pcs.: HEZ9SE060

### Grill Plate

You are red-hot for the savoury taste of grilled foods? With the large Grill Plate stretching over two cooking zones you can easily prepare meat, fish and vegetables.

Grill Plate: HEZ390522

### Teppan Yaki

Our Teppan Yaki is perfect for everyone with a knack for Asian cuisine. With this 40 x 20cm large cookware you can prepare exotic sandwiches, desserts or minced meat dishes.

Pro Induction Teppan Yaki: HEZ9TY010

### Cast-iron Pan

Despite its cast-iron body, it's not too hot to handle. With its 28cm diameter and extra large handle, it is perfectly safe and easy to use.

Cast-iron Pan: HEZ9FE280

### Roaster and Steaming Rack

This cookware combination cooks your meat and vegetables evenly while trapping the juices underneath. Awesome sauce!

Roaster: HEZ390011

### Wok

Whether you want to cook stir-fry, noodles or soup – with our Wok you have an all-in-one pot. Literally.

Wok: HEZ390090

# Light Up Your Day.

Combine a modern kitchen look with the ultimate cooking experience.

PerfectCook Sensor.\*

Prevents foods from boiling over or overcooking thanks to precise temperature control.

Illuminated Cooking Zones.\*

Only when switched on, red LEDs enable the illumination of the cooking zones. Thus, you can easily recognise which part of the zone is active.

ZoneLight.\*

When switched off, cooktop is completely black.

\*Available in cooktop model PXY898DX6E.

# Key Features and Functions.

## Safety & Cleaning

**WipeProtection**  
Stay in complete cooking control even when you’ve had a spill or boil-over. Bosch WipeProtection locks the control panel for 20 seconds so you can clean the surface of the control panel easily, without losing your cooking settings.

**2-stage Residual Heat Indicators**  
Provides clear indication of when a zone is still hot after use. Two levels: ‘H’ means residual heat sufficient to finish off cooking or to keep items warm; ‘h’ – residual heat insufficient to cook, but zone is still hot enough to advocate caution.

**Child Lock**  
Maximum safety for tiny hands. Lock your cooktop’s control panel and prevent accidental little chefs from ‘helping out’ and hurting themselves. Enjoy the reassurance of maximum safety for both you and your loved ones.

**Automatic Safety Switch-off**  
Never worry again if you have forgotten to turn off the cooktop. If you’ve stopped using it, your Bosch Induction cooktop will automatically shut down.

**Pause Function**  
Pause the heating process (e.g. to answer the door).

**ReStart**  
Things happen quickly in the kitchen – spilling something on the control panel or accidentally switching off the cooktop, ReStart will store your last selected settings. Those settings can be instantly recalled by simply pressing the main power switch within 4 seconds.

## Convenience

**Bosch Assist**  
A menu of dishes for automatic cooking: easily find the right temperature setting for a certain dish in the touch display.

**Automatic Pot Detection**  
Bosch Induction cooktops feature Automatic Pot Detection which recognises the diameter of the cookware and determines the size of the cooking zone accordingly. If the pot is removed, the control panel indicator will flash and remain inactive until the pot is detected.

**Keep Warm**  
At the touch of a button, this is the ideal setting for keeping food warm before serving.

**Dual Function Timer Including Automatic Switch-off for Each Zone**  
Use the independent audible timer to set the length of cooking time or set the cooking zone at a specific temperature (e.g. level 5.5) for up to 99 minutes – ideal for busy households. Once the selected time has been reached, the cooking zone is switched off automatically.

**QuickStart**  
Start cooking more quickly. Bosch QuickStart functionality automatically detects the location of your pot and displays the cooking zone on the control panel. Just select the power level and you’re away.

**Dish Assistant**  
Easily find the right temperature setting for a certain dish via the Home Connect app.

**Energy Consumption Display**  
Each time you finish cooking, your Energy Consumption Display shows exactly how much power you’ve used. So if you wish, you can adapt your cooking style to save energy and money (for example, placing a lid on a pot can help reduce your energy consumption).

## Performance

**Cook to Hood**  
Control your rangehood via your cooktop with cooktop-based hood control. If preferred, the rangehood can be controlled manually.

**DirectSelect Premium**  
Taking easy-to-use, intuitive controls to the next level, DirectSelect Premium gives you complete cooking control with intermediate levels and unsurpassed accuracy.

**DirectSelect**  
Enjoy total convenience with DirectSelect 1.0. Simply select the required power level from the power settings laid out on the cooktop, without the need to press +/- repeatedly.

**TouchSelect**  
With this control panel, you can regulate the desired cooking zone easily. Select your cooking zone and use the +/- keys to choose the power level you need.

**17 Power Levels**  
Enjoy total control on every recipe with 17 power levels. This function allows cooking zones to be set in increments of 0.5 (e.g. 0.5, 1, 1.5, 2...9).

**PowerBoost**  
PowerBoost channels increased power to a selected zone to turbocharge the cooking process. With PowerBoost, you can boil 2 litres of water almost three times faster than on a conventional glass-ceramic cooktop.

**ShortBoost**  
Reduce the time to heat up pans – this boost function heats up the pan for 30 seconds at high power before automatically reducing the heat to the correct power setting.

**MoveMode**  
Pre-set 3 different power levels and move from boil to simmer in just seconds.

Descriptions are a guide only. Additional information, full dimensions & installation details are in the instruction & installation manuals supplied with the appliances. Reference guide see pages 86–87.

Features may vary depending on models. Please check individual product specifications.

## Cooktops | Gas

# Gas Without The Guesswork.

The gas cooktops with FlameSelect are equipped with nine precisely-defined power levels which let you adjust the required heat easily and reliably. For simply perfect cooking results.

## Series | 8

Our Series | 8 range of gas cooktops combines convenience and truly elegant black design with ultimate cooking control, for professional performance in the kitchen.

## Series | 6

Expect excellent operation and timeless designs with our Series | 6 range of gas stainless steel cooktops. You'll get premium engineering and materials so that you can always cook something special.

### Cast-iron Support.

Square design cast-iron pan supports don't just look good, but provide more stability for pots and pans. Cleverly designed to fit together, they are separate pieces, which make them easy to handle and clean.

## FlameSelect

### FlameSelect.

We're taking the guesswork out of using a gas cooktop. Our innovative Step Valve technology regulates the gas output precisely, so you're able to choose the size of flame. With an easy-to-use setting, all you need to do is decide which of the 9 power settings you want.

# Features and Functions for Everyday Use.

## Convenience

**One-hand Ignition**  
Push and turn the ergonomically designed control knobs and the gas ignites automatically. As well as offering the convenience of only using one hand, there is also no separate ignition button to clean.

## Simplicity

**FlameSelect**  
FlameSelect and its patented valve technology offer you incremental heat regulation within nine precisely-defined power levels, making your cooking with gas as easy, safe and enjoyable as possible.

**Flame Failure Device**  
For added safety, all Bosch gas cooktops feature a flame failure device. This feature stops the supply of gas to the burners if the flame is extinguished.

## Performance

**High-power Wok-style Burner**  
Selected gas cooktop models feature a powerful wok-style burner which provides up to 19.5 MJ/h. Suitable for use with flat-based pans or with a wok using the wok ring provided.

**Flexible Burners**  
All our gas cooktops feature different burner combinations for greater flexibility. With wok, high-speed, standard and economy burners, you can cook more efficiently with the burner most suited to the size of your pan.

# Ceramic Cooktops.

With electronic touch-controls and extendable cooking zones, Bosch ceramic cooktops combine great looks with smart function and design. The smooth ceramic glass cooktop surface is tough and durable as well as practical and easy-to-clean.

**Installation Dimensions (HxWxD)**  
46 x 560 x 490–500mm

## Convenience

### DirectSelect Premium

DirectSelect Premium gives you complete cooking control with intuitive controls and unsurpassed accuracy.

### QuickTherm Technology

For improved control and flexibility, heat is delivered to the cooking zone in approximately three seconds.

### PowerBoost

PowerBoost now on selected Bosch ceramic cooktops lets you heat up large volumes of water even faster than on the highest power level.

### Keep Warm

At the touch of a button, this is the ideal setting for keeping food warm before serving.

### ReStart

ReStart will store your last selected settings in case of a spill or accident. Those settings can be reset by simply pressing the main power switch within 4 seconds.

### WipeProtection

In case of a spill or boil over, Bosch WipeProtection locks the control panel for 20 seconds so you can clean the surface of the control panel easily, without losing your cooking settings.

### 2-stage Residual Heat Indicators

Provides clear indication of when a zone is still hot after use. Two levels: 'H' means residual heat sufficient to finish off cooking or to keep items warm; 'h'– residual heat insufficient to cook, but zone is still hot enough to advocate caution.

### Energy Consumption Display\*

Each time you finish cooking, your energy consumption display shows exactly how much power you've used.

Descriptions are a guide only. Additional information, full dimensions & installation details are in the instruction & installation manuals supplied with the appliances. Reference guide see pages 90–91.

Features may vary depending on models. Please check individual product specifications. \*Available on selected models only.

Rangehoods

# Integrated GlassVisor Rangehoods.

With our new integrated design hood you can finally gain more room beside and on the hood – and not just for spices. The hood with the T-shaped body itself serves as storage space and can hold up to 10kg on each side. Thanks to its optimised design, additional shelving can be installed in the upper cabinet to the left and right of the chimney, providing you with even more storage space – for example, for cookbooks and cooking utensils.

**Where Premium Design Meets Ultimate Performance and Space Efficiency.**  
The black rangehood has an elegant appearance thanks to the flush installation, making it almost invisible in an upper cabinet when folded away.

**Silence.**  
Noise is measured in numeric decibels or dB(A). It is important to note that a few decibels can make a huge difference.

**EcoSilence Drive Brushless Motor.**  
The EcoSilence Drive brushless motor operates without carbon brushes, eliminating the disadvantages of conventional motors. Instead of energy loss, wear and noise, you get efficiency, durability, and smooth operation. The result: low noise levels with high power.

# Key Features and Functions.

## Performance

### Variable Power Settings

All Bosch rangehoods feature variable power settings which can be set to effectively remove odours, smoke and moisture caused by cooking. Many models also feature an intensive extraction setting which gives an extra boost to the performance when required.

### PerfectAir Sensor

PerfectAir continuously monitors the air and automatically adapts the extraction rate to the amount of odour present. At the same time, it reduces the noise level because it only activates the lowest extraction rate necessary.

### LED Lighting

The LED lights offer a longer lifetime and use less energy than conventional halogen lighting. Additional convenience is offered with SoftLight which gently fades lighting in and out with the dimmer function.

### Automatic power revert

When the intensive setting is selected, it can be set to automatically revert to a pre-defined setting after a short period of time.

## Convenience

### Cook to Hood

Control your rangehood via your cooktop with cooktop-based hood control. If preferred, the rangehood can be controlled manually.

### Electronic Filter Saturation Indicator

For maximum extraction efficiency, an illuminated light indicates when the filter needs cleaning. For hassle-free cleaning, the one-piece filter can be loaded into your Bosch dishwasher.

### Electronic Control

3 power levels + 2 additional intensive settings, automatic run-on, filter saturation indicator, automatic power revert and SoftLight with dimmer function; control at your fingertips.

### Electronic Button Control

This control provides you with 3 power levels + 1 intensive setting. There's also a push-button for turning the lights on and off. And to make operation even easier, the buttons are back-lit.

### Rocker Switch Control

It doesn't get any easier: one switch with 3 power levels and one for turning the lights on and off.

### Favourite Button

Directly access favourite functions with a configurable button (available with connected Home Connect account).

## Cleaning

### Dishwasher-safe Metal Grease Filters

For easy cleaning, all Bosch metal grease filters can be safely loaded into any Bosch dishwasher for sparkling clean results. Metal grease filters are required for ducted and recirculating systems to filter grease and other solid particles out of the extracted air. To make sure these filters operate at maximum efficiency, they should be cleaned about twice a month.

### Extraction Rates

Air extraction is measured using room volume. This is calculated by multiplying Length x Width x Height. Bosch rangehoods offer powerful maximum extraction rates for when you are cooking up a storm in the kitchen, while the variable power settings allow you to navigate the extraction power you need for each meal.

### Stainless steel filter

The stainless steel filter provides an exceptionally high level of grease absorption. It is concealed behind an elegant stainless steel cover with a stainless steel handle.

### Rim ventilation filter

With its smooth uninterrupted surface and grease separation of 80–92%,\* the rim ventilation filter from Bosch has a multi-patented filter sealing system and flow-optimised filter system.

# Installation Methods.

### Ducted Extraction

Ducting out is the most effective method of extraction. Ideally, the rangehood should be sited on an outside wall, or an outside wall can be reached via ducting. All Bosch extractors are now standardised to facilitate a 150mm diameter outlet for maximum performance, although smaller ducting can be used if required. Please refer to the installation guide for further advice on best practice installation.

### Recirculation Kit

Odours are extracted and filtered, then purified air is returned to the room. The kit comprises a carbon filter and all components needed to ensure that odour free air is returned into the kitchen. To maintain performance, the carbon filter should be replaced on a regular basis. A recirculation kit will need to be purchased as a separate accessory.

### What Extraction Rate Do I Need?

It is recommended that the air be exchanged or extracted in the room 6–12 times per hour to maintain optimal air quality. (Minimum 6 times per hour for simmering/low to medium cooking and maximum of 12 times per hour for frying/boiling/stir frying).

Note: For open plan kitchens 50% of the area in the adjacent room is added to the extraction rate calculation.

At Bosch, we adopt a stringent extraction rates testing method in accordance with the European measurement standard EN 61591.

**No space for a rangehood?** See our 2-in-1 cooktops with integrated ventilation on pages 44–45.

<b>Mounting kit for 90cm cupboard</b> Fits Bosch DFS097A51A.	<b>DSZ4920</b>

## This much is for sure: you can trust our service.

Reliable, experienced, fast. The customer service of Bosch – before and after purchase.

### Quality service straight from the manufacturer. Original Bosch.

We are committed to quality even when it comes to after-sales service because no one knows Bosch appliances better than our highly-trained service engineers. Working with the latest equipment for measuring, diagnostics and repairs, Bosch service engineers only use original Bosch spare parts.

### Reliability guaranteed. No compromises.

All Bosch home appliances are produced with maximum care using high-quality materials.

We promise it in our two year manufacturer's warranty on all appliances.

### Original accessories.

### Effective care products.

Take a look at our extensive range of accessories for some inspiration: discover additional uses, replace old materials for optimum operation or simply give a trusty home appliance a good work-over. With the right care, you will be able to enjoy your high-quality appliance for many years to come. To help you do so, we offer a wide range of Bosch certified cleaning and care products.

### Extensive customer service network. Just a call away.

#### Customer Care

Our friendly Bosch Customer Care team is on-hand to provide competent, reliable assistance. Before or after purchase, the Bosch team will be happy to advise you on products, their use and special functions.

#### Service & Repairs

Our team is there to provide the right advice on faults, arrange a visit of a service engineer and order the right accessories or spare parts.
