Crestron® Flex Tabletop UC Video Conference System for Zoom Rooms™ Software

- *A complete solution that contains the Crestron Mercury® tabletop console, Huddly IQ™ high-definition USB camera, UC Engine, and power supplies — just add a display and mount*
- *Easy to provision and manage through Crestron XiO Cloud™ service*
- *HDMI® input for laptop and other AV content sources; HDMI output for room display device(s)*
- *Exceptional full-duplex audio performance and 2-way wideband voice quality*
- *Limes Audio TrueVoice® AEC (Acoustic Echo Cancellation) technology*
- *Integrated 360° quad microphone array*
- *7 in. (178 mm) HD color touch screen*
- *Onscreen calendaring and meeting management*
- *Connects and communicates securely over any enterprise or SMB network*
- *Supports single or dual display configuration*
- *PIR (Passive Infrared) occupancy detector wakes the device when it senses motion or voice*
- *Enterprise-grade security*

The Crestron Flex UC-M150-Z system provides a complete video conference room solution for use with Zoom Rooms™ software. It supports single or dual video displays, and features the Crestron Mercury Tabletop UC Audio Conference Console, which comprises a high-performance, full-duplex conferencing speakerphone and touch screen controller in one stunning tabletop device.

Native Zoom Rooms™ Software Experience

The UC-M150-Z system features Zoom Rooms conferencing software that enables audio and video connectivity for easy collaboration and content sharing.

Crestron Mercury® UC Conference Console

Through one tabletop device, the CCS-UC-1 facilitates effortless conferencing and control. Its advanced speakerphone delivers highly intelligible, echo-free voice clarity, and its functional design is perfectly at home on any conference table.

The UC-M150-Z system facilitates conversations with exceptional audio fidelity and pickup. The console's integrated 360° quad microphone array faithfully captures voices at every seat at the table. Its high-powered, full-range speaker produces full, rich and real sounding audio for both voice and program material. Limes Audio TrueVoice® AEC technology achieves transparent full-duplex performance free of distracting echo or noise. Wideband audio codec support allows for full-spectrum, bidirectional voice communication.

Its extra-large, high-definition touch screen makes the UC-M150-Z system easy to use, whether starting or joining an online meeting or presenting and sharing content. The full-color user interface provides quick access and intuitive operation through a feature-rich UI.

Occupancy detection using a patent-pending combination of motion and voice activity provides several benefits, such as monitoring and reporting room usage to the [Crestron Fusion®](#) monitoring and scheduling software, or automating the system to power down to save energy when all parties leave the room.

Additionally, the UC-M150-Z system can integrate with a Crestron control system to enable touch screen control of room lighting, motorized window shades, climate control, AV, and other amenities.¹ Large or long tables are easily accommodated by adding up to two mic pods ([CCS-UCA-MIC KIT](#) sold separately), which may be daisy-chained or individually home run to the main console.² For ultimate versatility, the console can be powered using either PoE+ or the included 100-240 V universal power pack.² The console can sit freely on any tabletop surface, or be permanently attached to the table using the optional 180° swivel mount kit ([CCS-UCA-SMK](#) sold separately).

Crestron® Flex Tabletop UC Video Conference System for Zoom Rooms™ Software

Huddly IQ™ camera

The included Huddly IQ™ camera features an ultra wide-angle 150° diagonal field of view to capture an entire conference room in Full HD 1080p video resolution. High precision aspherical optics, 12 MP CMOS sensor, and advanced video processing ensure an immersive, crystal clear video image free from light or noise artifacts or optical aberrations. Genius Framing digital autozoom (coming soon) intelligently detects the people in the room and frames them perfectly for an optimal view. With Genius Framing, there's no need to control the camera manually or rely on stored presets.

UC Engine

The UC Engine Assembly (UC-BRKT-100-Z-ASSY) streamlines the installation of a Crestron UC system by assembling the UC-ENGINE-Z, HD-CONV-USB-200, and UC-CONN-HD together on one convenient and ready-to-mount bracket.

The complete assembly can be mounted on the wall, or it can be attached to the rear of the display device. Attachment to the display is accomplished using two of the four bolts that also affix the display to a VESA® compliant display mount. The assembly bracket includes mounting holes on its left and right side edges, spaced at 100, 200, and 300 mm vertically, to allow for attachment to either side of the display mounting plate on the rear of the display device.

Additional features are included to manage wiring and conceal connections for a clean, secure installation. A 1-gang sized cutout at the lower right-hand corner allows for mounting over a flush wall-mounted electrical box, which may be used for an AC outlet or a wall plate containing AV and data jacks.

Network Management and Security

Crestron Flex is an enterprise-grade solution, engineered to integrate seamlessly into any Zoom Rooms deployment. Crestron Flex is ideally equipped for mass deployment throughout any-sized corporate, university, medical, military, or government facility.

IoT cloud based provisioning enables complete network configuration in advance of hardware delivery, with touchless updates following installation. Crestron Fusion or Crestron XiO Cloud management enables monitoring and logging of room and equipment usage, as well as centralized help desk support. Advanced security features ensure privacy, reliability, and compliance with your organization's IT policies.

Crestron XiO Cloud™ Provisioning and Management Service

The UC-M150-Z system is compatible with the Crestron XiO Cloud™ service, which is an IoT (Internet of Things) based platform for remotely provisioning, monitoring, and managing Crestron devices across an enterprise or an entire client base. The service enables installers and IT managers to deploy and manage thousands of devices in the amount of time it would ordinarily take to manage just one. Notes:

1. Room control capability (lighting, shades, thermostats, etc.) requires additional equipment and commissioning to be provided by a Crestron authorized integrator and/or programmer. Additional costs may apply.
2. When used without any microphone pods connected, the Crestron Mercury console may be powered using either PoE+ or the included power pack (model PW-2420RU). If one or two mic pods are connected, the console MUST be powered using the power pack. PoE+ cannot be used to power the console if any mic pods are connected. When using PoE+, make sure the network switch supports PoE+ (802.3at Type 2). Regular PoE (802.3af or 802.3at Type 1) cannot be used to power the console. Be advised, the UC Engine component can only be powered using its included AC power adapter. The UC Engine cannot be powered via PoE or PoE+.
3. This feature is not utilized as part of a Crestron Flex system.
