

ARUBA CX 10000 SWITCHING ESSENTIALS

WEBINAR SERIES: APRIL 12 & 13 AT 9AM PST | 5PM GMT

The Aruba CX 10000 Switching Essentials webinar series presented by Aruba Education Services will focus on managing the **CX 10000 Switch with AMD Pensando**. This includes utilizing Aruba Fabric Composer and Pensando Policy Service Manager for stateful firewalling and secure segmentation. It will also cover flow-based session-level telemetry, which provides access to all network state information for exceptional visibility and analytics. Learn how to leverage this evolutionary data center switch to provide software-defined stateful services where data is processed to optimize network bandwidth and improve security posture.

After attending this 2-part webinar series, you will be able to:

- Understand the Aruba CX 10000 switch key features
- Manage network services with Aruba Fabric Composer
- Implement policy and network segmentation
- Utilize analytics to monitor traffic flow and detect trends and security incidents

We encourage attending both parts of this webinar series, as the content will build on the previous session. Earn a certificate of completion for attendance & completion of the webinar evaluation. Replays will be available on the **Airheads Learning Community**.

PART 1: April 12, 2023 | 9-11AM PST

PART 2: April 13, 2023 | 9-11AM PST
