## Why Choose a Ductless Air Source Heat Pump?

Ductless heat pumps have earned the **ENERGY STAR Most Efficient designation!**<sup>2</sup>

Using advanced, variable speed inverter compressor technology, a ductless heat pump can cut heating and cooling costs by up to 30%!<sup>3</sup>

2. <https://www.nrcan.gc.ca/energy-efficiency/products/product-information/heating-equipment-for-residential-use/13740>

3. Results may vary depending on climate.

## How to Apply

**Step 1: Register for the Canada Greener Homes Grant**

**Step 2: Book Your Pre-Retrofit EnerGuide Evaluation**

An NRCAN-registered energy advisor will give you an EnerGuide home rating and a renovation upgrade report. Homeowners can receive up to \$600 to cover the Energy Evaluation cost.

**Step 3: Find the Panasonic Heat Pump That is Right for You!**

Have a licensed HVAC professional install one of Panasonic's incentive-eligible products that is the right size for your home.

**Step 4: Schedule Your Post-Retrofit EnerGuide Evaluation**

Submit your post-retrofit EnerGuide results to receive up to \$5,000 in incentives!
