Quick Start Guide

This product meets applicable national SAR limits of 1.6 W/kg. The specific maximum SAR values can be found on page 18 of this user guide.

When carrying the product or using it while worn on your body, either use an approved accessory such as a holster or otherwise maintain a distance of 1.0 cm from the body to ensure compliance with RF exposure requirements. Note that the product may be transmitting even if you are not making a phone call.

The mobile phone is in compliance with the requirement of EN 60950-1: 2006 amendment A12: 2011. There will appear a warning box when the volume level is over 4. If the user selects left soft key in the warning box, the volume can be increased and the phone will repeat the acknowledgement more than once every 20h of cumulative listening time

PROTECT YOUR HEARING

To prevent possible hearing damage, do not listen at high volume levels for long periods. Exercise caution when holding your device near your ear while the loudspeaker is in use.

Calls.....

English - CIBICB4ALAAA

3.1 Making a call

Dial the desired number, press the ___ key and choose SIM to place the call. If you make a mistake, you can delete the incorrect digits by pressing the key. To hang up the call, press the wey.

Making an emergency call

If your phone is covered by the network, dial emergency number and press the Le key to make an emergency call. This works even without a SIM card and without typing the PIN code or unlocking

3.2 Calling your Voice mail (1)

You can see SIM voice mail in this menu.

3.3 Receiving a call

When you receive an incoming call, press the L key to talk and then hang up using the ___ key.

3.4 Available functions during the call

During a call, you can use your directory, your calendar, text message etc. without hanging up or dropping the call.

(1) Contact your network operator to check service availability

Safety and use.....

We recommend that you read this chapter carefully before using your mobile phone. The manufacturer disclaims any liability for damage. which may result as a consequence of improper use or use contrary

• TRAFFIC SAFFTY:

Given that studies show that using a mobile phone while driving a vehicle constitutes a real risk, even when the hands-free kit is used (car kit, headset...), drivers are requested to refrain from using their mobile phone when the vehicle is not parked. Check the laws and regulations on the use of wireless mobile phones and their accessories in the areas where you drive. Always obey them. The use of these devices may be prohibited or restricted in certain areas. When driving, do not use your mobile phone and headphone to

listen to music or to the radio. Using a headphone can be dangerous and forbidden in some areas

When switched on, your mobile phone emits electromagnetic waves that can interfere with the vehicle's electronic systems such as ABS anti-lock brakes or airbags. To ensure that there is no problem:

- do not place your mobile phone on top of the dashboard or within an airbag deployment area.
- check with your car dealer or the car manufacturer to make sure that the car's electronic devices are shielded from mobile phone RF energy.

· CONDITIONS OF USE:

You are advised to switch off the mobile phone from time to time to ontimize its performance

Remember to abide by local authority rules of mobile phone use

Operational Warnings: Obey all posted signs when using mobile devices in public areas

Follow Instructions to Avoid Interference Problems: Turn off your mobile device in any location where posted notices instruct you to do so. In an aircraft, turn off your mobile device whenever instructed to do so by airline staff. If your mobile device offers an airplane mode or similar feature, consult airline staff about using it in flight. Switch the mobile phone off when you are in health care facilities

except in designated areas. As with many other types of equipment now in regular use, mobile phones can interfere with other electrical or electronic devices, or equipment using radio frequency.

Switch the mobile phone off when you are near gas or flammable liquids Strictly obey all signs and instructions posted in a fuel depot, gas station, or chemical plant, or in any potentially explosive atmosphere. When the mobile phone is switched on, it should be kept at least 15 cm from any medical device such as a pacemaker, a hearing aid or insulin nump. In particular when using the mobile phone you should hold it against the ear on the opposite side to the device if any

Read and follow the directions from the manufacturer of your implantable medical device. If you have any questions about using your mobile device with your implantable medical device, consult your To avoid hearing impairment, answer the call before holding your

mobile phone to your ear. Also move the handset away from your ear while using the "hands-free" option because the amplified volume might

It is recommended to have proper supervision while small children use your mobile phone

When replacing the cover please note that your mobile phone may contain substances that could create an allergic reaction

Always handle your mobile phone with care and keep it in a clean and

Do not allow your mobile phone to be exposed to adverse weather or environmental conditions (moisture, humidity, rain, infiltration of liquids dust sea air etc.) The manufacturer's recommended operating temperature range is -10°C (14°F) to +55°C (131°F) (the max value depends on device, materials and housing paint/texture).

Over 55°C (131°F) the legibility of the mobile phone's display may be impaired, though this is temporary and not serious. Do not open or attempt to repair your mobile phone yourself

Do not drop, throw or try to hend your mobile phone Do not use the mobile phone if the glass made screen, is damaged,

cracked or broken to avoid any injury.

Use only batteries, battery chargers, and accessories which are recommended by TCL Communication Ltd. and its affiliates and are compatible with your mobile phone model TCI Communication Ltd. and its affiliates disclaim any liability for damage caused by the use of other chargers or batteries.

Your mobile phone should not be disposed of in a municipal waste. Please check local regulations for disposal of electronic products.

Remember to make back-up copies or keep a written record of all important information stored in your mobile phone.

BATTERY AND ACCESSORIES:

Some people may suffer epileptic seizures or blackouts when exposed

to flashing lights, or when playing video games. These seizures or

blackouts may occur even if a person never had a previous seizure or

blackout. If you have experienced seizures or blackouts, or if you have

a family history of such occurrences, please consult your doctor before

playing video games on your mobile phone or enabling a flashing-lights

feature on your mobile phone Parents should monitor their children's

use of video games or other features that incorporate flashing lights

on the mobile phones. All persons should discontinue use and consult

a doctor if any of the following symptoms occur: convulsion, eye

or muscle twitching, loss of awareness, involuntary movements, or

disorientation. To limit the likelihood of such symptoms, please take

When you play games on your mobile phone, you may experience

occasional discomfort in your hands, arms, shoulders, neck, or other

parts of your body. Follow these instructions to avoid problems such as

tendinitis carnal tunnel syndrome or other musculoskeletal disorders:

If your hands, wrists, or arms become tired or sore while playing,

Take a minimum of a 15-minute break every hour of game playing.

If you continue to have sore hands, wrists, or arms during or after

Please note that you must respect the laws and regulations in force in

your jurisdiction or other jurisdiction(s) where you will use your mobile

one regarding taking photographs and recording sounds with your

nobile phone. Pursuant to such laws and regulations, it may be strictly

forbidden to take photographs and/or to record the voices of other

people or any of their personal attributes, and reproduce or distribute

It is the user's sole responsibility to ensure that prior authorization

be obtained, if necessary, in order to record private or confidential

conversations or take a photograph of another person; the

manufacturer, the seller or vendor of your mobile phone (including the

operator) disclaim any liability which may result from the improper use

There are no express warranties, whether written, oral or implied, other

than this printed limited warranty or the mandatory warranty provided

by your jurisdiction. In no event shall TCL Communication (US), Inc. or

any of its affiliates be liable for incidental or consequential damages of any

nature whatsoever, including but not limited to commercial loss, to the

full extent those damages can be disclaimed by law Some states do not

allow the exclusion or limitation of incidental or consequential damages,

or limitation of the duration of implied warranties, so the preceding

My phone cannot connect to a network or "No service" is Try connecting in another location.

Verify the network coverage with your operator. Check with your operator that your SIM card is valid.

Output: 5 V 200 mA

THIS MOBILE PHONE MEETS THE GOVERNMENT'S REQUIREMENTS

Your mobile phone is a radio transmitter and receiver It is designed

and manufactured not to exceed the emission limits for exposure to

radio-frequency (RF) energy. These limits are part of comprehensive

guidelines and establish permitted levels of RF energy for the general

population. The guidelines are based on standards that were developed

by independent scientific organizations through periodic and thorough

evaluation of scientific studies. These guidelines include a substantial

safety margin designed to ensure the safety of all persons regardless

The exposure standard for mobile phones employs a unit of

measurement known as the Specific Absorption Rate, or SAR. The

SAR limit set by public authorities such as the Federal Communications

Commission of the US Government (FCC), or by Industry Canada, is

1.6 W/kg averaged over 1 gram of body tissue. Tests for SAR are

conducted using standard operating positions with the mobile phone

transmitting at its highest certified power level in all tested frequency

Although the SAR is determined at the highest certified power level,

the actual SAR level of the mobile phone while operating can be

well below the maximum value. This is because the mobile phone is

designed to operate at multiple power levels so as to use only the

power required to reach the network. In general, the closer you are

to a wireless base station antenna, the lower the power output of

the mobile phone. Before a mobile phone model is available for sale

to the public, compliance with national regulations and standards

The highest SAR value for this model mobile phone when tested

While there may be differences between the SAR levels of various

mobile phones and at various positions, they all meet the government

requirement for RF exposure. For hody-worn operation, the mobile

phone meets FCC RF exposure guidelines provided that it is used with

a non-metallic accessory with the handset at least 10 mm from the

body. Use of other accessories may not ensure compliance with FCC

19

is 1.02 W/Kg for use at the ear and 1.51 W/Kg for use close to

the body.

- Try selecting the available network(s) manually. Try connecting at a later time if the network is overloaded.
- My phone cannot connect to the Internet

- Check that the IMEI number (press *#06#) is the same as the one printed on your warranty card or box.
- Check your phone's Internet connecting settings.
- Make sure you are in a place with network coverage.
- Try connecting at a later time or another location.

Invalid SIM card

- Make sure the SIM card has been correctly inserted (see "Inserting or oving the SIM card").
- Make sure the chip on your SIM card is not damaged or scratched. Make sure the service of your SIM card is available

Unable to make outgoing calls

- Make sure you have dialed a valid number and pressed the ___ key. For international calls, check the country and area codes.
- Make sure your phone is connected to a network, and the network is not overloaded or unavailable
- Check your subscription status with your operator (credit. SIM card valid, etc.).
- Make sure you have not barred outgoing calls. Make sure that your phone is not in flight mode.

Unable to receive incoming calls

- Make sure your phone is switched on and connected to a network (check for overloaded or unavailable network).
- Check your subscription status with your operator (credit. SIM card

The caller's name/number does not appear when a call is

- Make sure you have not forwarded incoming calls. Make sure that you have not barred certain calls.
- Make sure that your phone is not in flight mode.

Check that you have subscribed to this service with your operator.

Your caller has concealed his/her name or number

Additional information on SAR can be found on the Cellular Telecommunications & Internet Association (CTIA) Web site: http://www.ctia.org/

The World Health Organization (WHO) considers that present scientific information does not indicate the need for any special precautions for use of mobile phones. If individuals are concerned, they might choose to limit their own or their children's RF exposure by limiting the length of calls, or using "hands-free" devices to keep mobile phones away from the head and body, (fact sheet n°193), Additional WHO information about electromagnetic fields and public health are

available on the following website: http://www.who.int/peh-emf.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions may cause harmful interference to radio communications. However, there is no guarantee that interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Recrient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver Connect the equipment into an outlet on a circuit different from that
- to which the receiver is connected.
- Consult the dealer or an experienced radio/ TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment For the receiver devices associated with the operation of a licensed

radio service (e.g. FM broadcast), they bear the following statement: This device complies with Part 15 of the FCC Rules. Operation is subject to the condition that this device does not cause harmful interference.
